## AR 90 ULTRA-PRECISION HIGH RANGE RESISTORS

The AR90 ultra precision metal film resistor is designed to satisfy those critical design requirements where resistance values between 1 meg Ω and 10 meg Ω are required. Temperature coefficients to 5 PPM/°C and tolerances to .05% are standard. Applications include ultra precision voltage dividers and input attenuators.

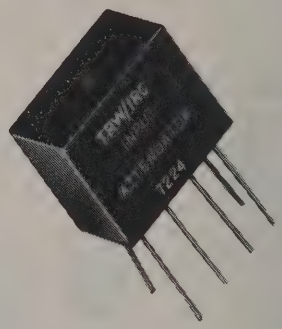
## AR ULTRA-PRECISION RESISTOR NETWORKS

AR Resistor Networks provide the best performance and packaging density for a circuit requiring multiple, interdependent precision resistors. The rugged epoxy encapsulation provides maximum environmental protection. AR networks are designed to specific circuit requirements using one of the standard sizes available or special sizes where required.

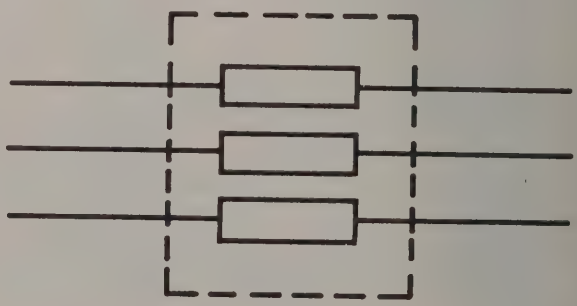


Features include:
- Lower Effective Cost
- High Density Packaging
- Ratio Matching to 0.005%
- Resistors thermally tied together
- Deliveries comparable to discretes
- All-welded construction
- TC Matching to ±1 PPM/°C

## AR MATCHED RESISTOR SETS

AR Matched Resistor Sets provide ultra-precision resistor performance at the lowest possible cost. Tolerance matching to 0.005% and TC matching to 1 PPM/°C can be specified.

Any TRW/IRC metal film resistors may be obtained as matched sets. The AR series, MAR and AR40 styles are recommended for the most precise tolerance and TC matching requirements.

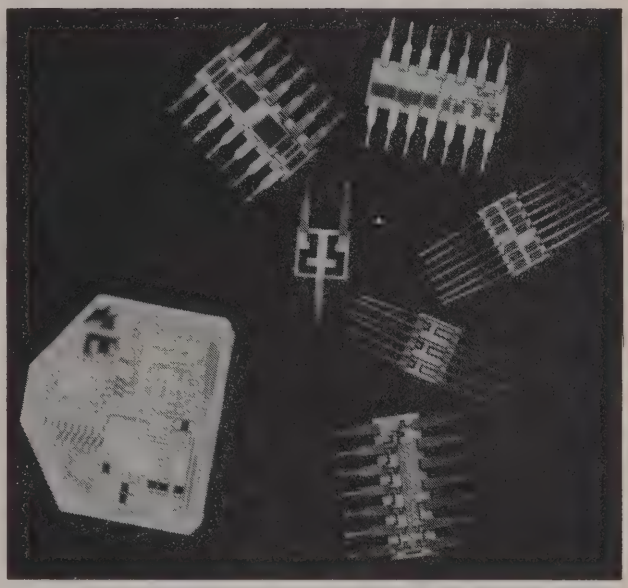


# TRW IRC RESISTORS

## TaNFilm™ PRECISION FILM RESISTOR NETWORKS

TRW/IRC TaNFilm precision subminiature resistor networks are made of sputtered tantalum nitride, using proprietary equipment and processes.

TaNFilm is inherently resistant to electrolytic attack, since each resistor is passivated with an anodized surface layer. The processes used in manufacture allow routine tolerances of 0.1% and make tolerances of 0.05% economically feasible. The continuous sputtering process makes TaNFilm very uniform, so resistors track over the full temperature range to a few parts per million. Many hours of test data allow accurate performance prediction. A variety of networks are available, and others can be fabricated to your packaging requirements. Standard configurations are the DIP sandwich pack shown on page 16, and TO-88 type flat packs.



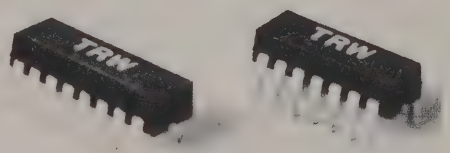
**TYPICAL TaNFilm Design CRITERIA[1]**

| | | | |
|---|---|---|---|
| Resistance Value | 50Ω to 100,000Ω | Drift | ≤0.25% per year |
| Tolerance | ±0.05% to ±1.0% | Noise | ≤−25dB |
| TCR | −100±25 ppm/°C | Voltage Coefficient | ≤5 ppm/V |
| TCR Tracking | to 5 ppm/°C | Series Inductance | ≤5 nH |
| Settling Time | to 20nSec. | Shunt Capacitance | ≤0.1 pF |

[1]These are not absolute units. Contact factory for your specific requirements.

## RESISTOR NETWORKS DUAL IN-LINE PACKAGE

TRW/IRC TaNFilm* resistor networks utilize a Tantalum Nitride resistor film deposited on a high alumina ceramic substrate. Units are molded in standard TO-116 DIP form-factor with 14 and 16 pin terminations.



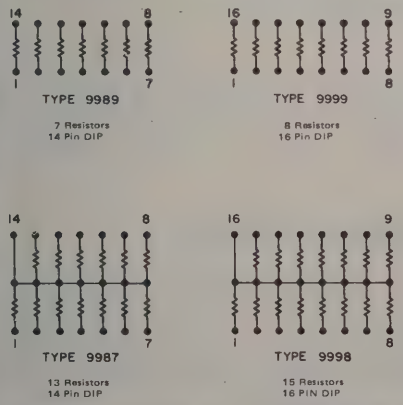
**Styles**

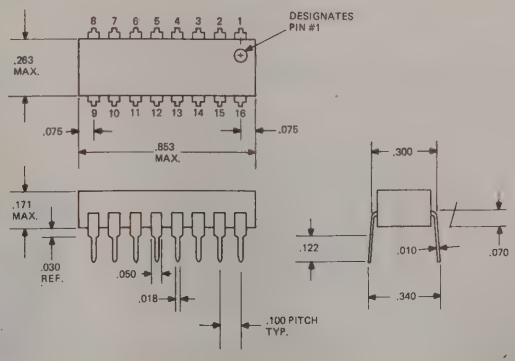
9989 = 7 resistors of equal value, 14 pin DIP
9999 = 8 resistors of equal value, 16 pin DIP
9987 = 13 resistors of equal value, 14 pin DIP
9998 = 15 resistors of equal value, 16 pin DIP

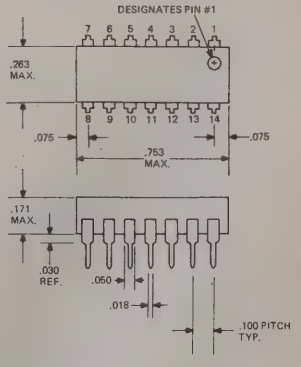
**Resistance Values**

Types 9987 and 9998
50Ω to 50KΩ

Types 9989 and 9999
50Ω to 100KΩ







*Trademark of TRW INC. for its Tantalum Nitride Film.

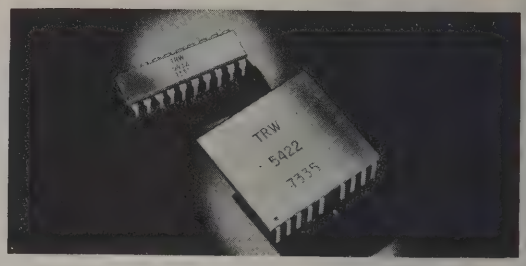
# TaNFilm© R-2R LADDERS

- 12 BIT RESOLUTION
- FULL MIL PERFORMANCE
- TWO PACKAGE STYLES
- FOUR RESISTANCE VALUES
- 12 BIT OR 10 BIT ACCURACY



## DESIGN

These 12 Bit R-2R Ladders feature the inherent passivation, low noise and premium performance of TaNFilm. They provide ±½ LSB accuracy over the full mil temperature range (−55 to +125°C) and retain this accuracy after long operating life in extreme environments. Unlike competitive devices this military grade performance demands no price premium. TaNFilm networks provide hermetic performance without the cost and disadvantages of hermetic sealing, because the tantalum nitride film is anodically passivated.

Resistors are sputtered tantalum nitride on 99.5% Alumina ceramic and are anodically passivated. Interconnections are 99.9% pure gold and the gold plated leads are welded to the interconnection film. Complete absence of silver and solder provides absolute insurance against silver and tin migration. The 5430 series features standard dual in-line packaging with rugged, gold plated, copper alloy, shouldered leads for ease of insertion. The 5420 series has two rows of leads .900" apart and is pin compatible with Beckman 811 series networks. The 5200 series are identical with the 5400 except for accuracy.

## CIRCUIT AND APPLICATION

The circuit and pinout diagram is shown on the right. The characteristic "R" value may be 5K, 10K, 20K or 25K. Other values may be provided on special order. Standard switch compensation of 5 ohms is built into the four most significant bits. This also may be changed on special order. Three extra application resistors are provided for bipolar operation, Op Amp feedback or output attenuation. Switch or offset compensation may be provided in these resistors if required.

## SPECIFICATIONS:

| | |
|---|---|
| Ladder Resistance Values (R) | 5K, 10K, 20K, 25K |
| Ladder Resistance Tolerance | ±1% |
| Maximum Input Voltage | 20V |
| Settling Time (to 0.1% of final value) | 100n sec. |
| External Switch Compensation (Note 1) | 5Ω |
| Temperature Range | −55° to 125°C |
| Ladder Voltage Accuracy | P/N 5200 is ±488 ppm; 5400 is ±122 ppm |
| Application Resistor Voltage Ratio | P/N 5200 is ±488 ppm; 5400 is ±122 ppm |
| Lead Material | Gold Plated Copper Alloy |

## STABILITY

TaNFilm 12 Bit Ladders Exhibit specified Maximum Voltage Ratio Error after the following tests:

| | |
|---|---|
| Operating Life | 1000 Hrs. Full Load 100°C |
| Short Time Overload | 10 Seconds 2.5 x Rated Voltage |
| Thermal Shock | 10 Cycles −65°C to +150°C |
| Temperature Cycling | 10 Cycles −65°C to +150°C |
| Moisture Cycle - Load/Polar | 10 Days 90/98% R.H. Full Load (202-106) |
| Soldering Heat | 10 Seconds @ 260°C |
| Shock | 3000 g's for 0.2 Milliseconds |
| Vibration | 20 g's |
| Terminal Strength | Per Mil 202-211B |

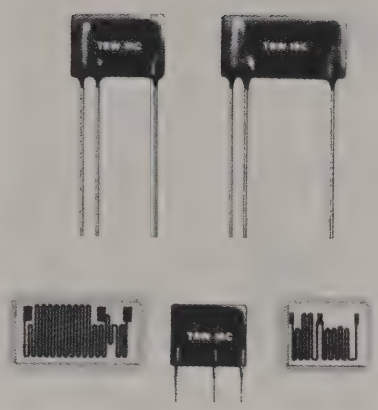
# THICK FILM-HIGH VOLTAGE DIVIDERS

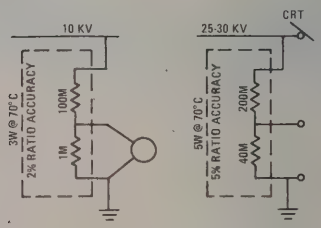


TRW-IRC "RD" series high voltage resistors feature voltage ratios, ratio tolerance and stability characteristics previously unavailable in high voltage resistors.

Resistance ratios to 10,000:1 and voltage ratings to 30 KV are now standard.

Typical Color tv application.

EXAMPLES:



For CRT, high voltage power supply, electrostatic copiers and other high voltage applications, type "RD" resistors are available in ceramic substrate and encapsulated versions; the latter is P.C. board compatible.

# TRW IRC RESISTORS

## MV GENERAL PURPOSE HIGH VOLTAGE RESISTORS

MV resistors are designed for high voltage requirements where high resistance and power are needed. TRW/IRC's exclusive composition film type resistance coating is applied in helical form on a ceramic tube to provide a conducting tube of long effective length.

MV resistors are particularly suited for voltmeter multipliers, bleeders, electrostatic filters, X-ray equipment, probes, voltage dividers, TV high voltage circuits, and similar applications.

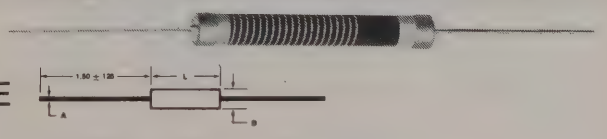
## CR SEMI-PRECISION CARBON ALLOY RESISTORS HIGH TEMPERATURE/HIGH VOLTAGE



CR resistors are economically priced, high-voltage/high-temperature resistors developed for ballast and bleeder applications. This resistor series was originally designed to operate in inert, vacuum, or oil environments. Construction is completely inorganic with no outgassing, and these uncoated carbon alloy resistors will withstand an open flame of 1600°F.

CR resistors are currently being manufactured in three sizes. Other sizes and protective coatings are available upon request.

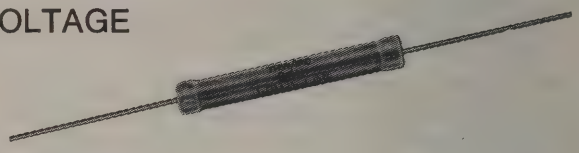
## CGH PRECISION HIGH RANGE, HIGH VOLTAGE METAL GLAZE RESISTORS



The CGH resistor uses the superior qualities of precision thick film, fired at high temperatures on an extremely stable ceramic substrate. This results in a resistor capable of operating in high ambient temperatures and with excellent high voltage load stability.

CGH resistors are particularly suited for precision high voltage and high impedance applications, such as voltage multipliers, X-ray equipment, and high voltage power supplies where precision tolerances and TCs are required.

**DIMENSIONS**:

## BR HIGH POWER DENSITY PRECISION THIN FILM RESISTORS

The BR series precision metal film power resistors offer an excellent power-to-size ratio, high frequency response, and exceptionally stable performance. They have power ratings 50% to 100% greater for a given size than formerly was available in metal films. This increased capability is obtained with no performance degradation.

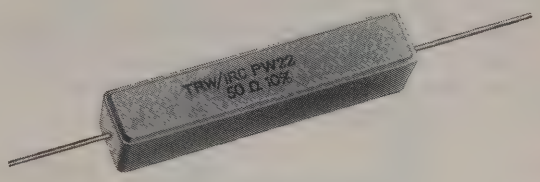
# TRW IRC RESISTORS

## PW GENERAL PURPOSE FIREPROOF POWER RESISTORS

**Type PW** resistors are available in eight ratings: 2, 3, 5, 7, 10, 15, 22 to 50 watts. All resistors are inorganically constructed and will not support combustion. Available in standard, fusible, and positive T.C. variations.



**SPECIFICATIONS**

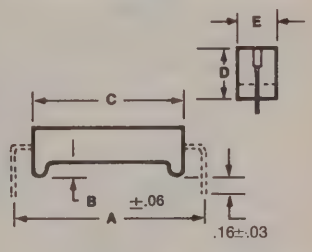
| PW-15A | 2.25 | .12 | 1.88 | .63 | .50 |

Standard parts are supplied with straight axial leads. Consult factory for available configurations for printed circuit mounting.



(PW-2A .18±.03)

## AS MINIATURE PRECISION POWER WIREWOUND RESISTORS

Type AS resistors expand circuit design limits significantly by carrying full power even at 125°C ambient. These resistors meet MIL Characteristic V (MIL-R-26) with an allowable 350°C hot spot.

Available in standard and non-inductive windings. Additional options include special stabilization, matching, varnish top-coat, hot tinned leads. Special AS resistors furnished as Hi-Rel functional fuses.

NOTE: Stack-mounted resistors must be derated to limit the hotspot of the hottest unit to 350°C. For more efficient ventilation, resistors should be mounted with their flat sides (short axis) on a vertical axis.

# TRW IRC RESISTORS

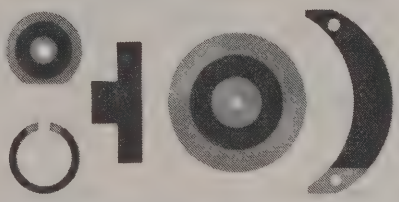
## AW COMMERCIAL WIREWOUND RESISTORS

**Type AW** resistors are available in a wide range of configurations to meet low-cost, high volume applications in the automotive and appliance fields. A range of terminal styles is available, and others can be made to user specifications at a nominal cost. Power ratings are 4.5 watts per inch between mounting centers on the standard AW, and 6 watts per inch between mounting centers on the Hi-Wattage AW resistor.

## CONCENTRIC DISCS and STRIPS

Concentric discs and strips are available in power ratings of up to 1 watt per square inch. These resistors are carbon composition film screen on various flat substrates. Available 20Ω-100KΩ/sq. Standard tolerances are ± 20%.

Disc resistors are die stamped from resistance strips. Inner and outer rings of colloidal silver are applied to provide contact with coaxial line fixtures. Special configurations and tolerances to ± 10% are available.



Applications are variable speed controls in automotive and appliance products, antenna rotor controls wherever a low cost special configuration pot element is required in quantity.

TRW/IRC RESISTORS, AN ELECTRONIC COMPONENTS DIVISION OF TRW INC., P.O. BOX 393, BOONE, N.C. 28607 (704) 264-8861

## TRW/IRC APPLICATION/DESIGN CAPABILITY

It is impossible to describe in this catalog all the product variations available from TRW/IRC Resistors. Selected TC's, special tolerances, fixed rise times . . . the unique configurations variations are limited only by our mutual ability to work together.

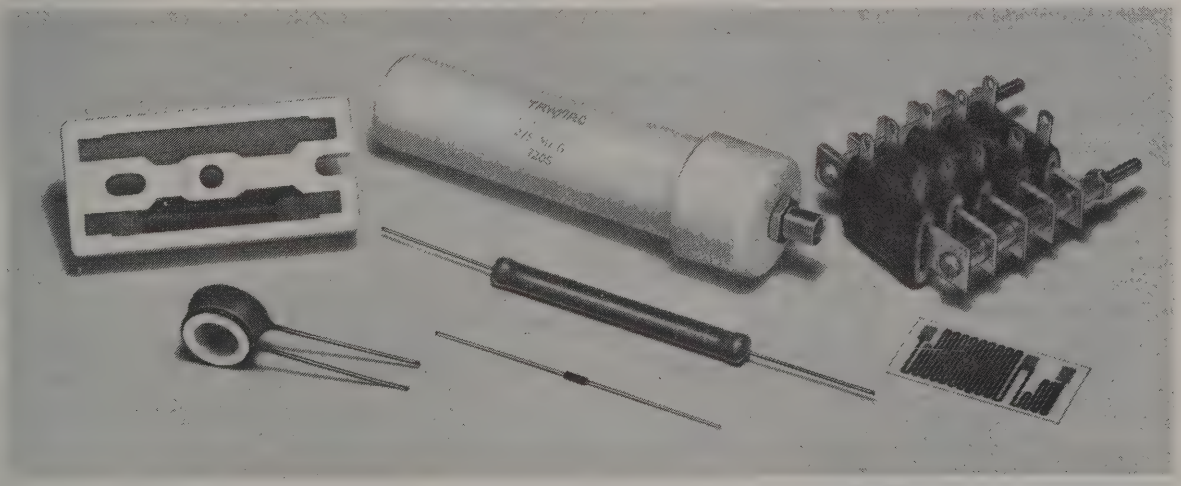
Beyond this, TRW also offers an application/design capability second to none in the industry—and ready to meet virtually any resistive need you might have.

This technology embraces both thin and thick metal film, networks, wirewounds, high-voltage and ultra-precision resistors. In thin-film, for example, it includes tolerance and TC matching down to .01% and 5 PPM/°C respectively. In thick-film, it includes design capabilities in subminiature, tubular substrates — for relays, LED's, and connector applications. In wirewound resistors and assemblies, it includes specialized TC's, fusible units, and custom configurations.

Too, TRW technology also takes in high-precision tantalum-nitride networks. Because of the high circuit density possible with tantalum units, this technology offers opportunities for extreme miniaturization.

* * *

The foregoing scarcely touches the highlights of TRW/IRC's application/design capability. But most important, whatever your performance, configuration or environmental problem, we urge that you let us work with you at the **design** stage. It's at this point, we believe, that we can offer the greatest help in application and cost effectiveness.



TRW/IRC RESISTORS, AN ELECTRONIC COMPONENTS DIVISION OF TRW INC., 401 N. BROAD ST., PHILADELPHIA, PA. 19108 (215) 922-8900

## MIL SPEC DEFINITIONS, TERMINOLOGY

**MIL—R—11 (RC) RC07GF153K**

| RC07 | GF | 153 | K |
|---|---|---|---|
| Style/Power (See Tables 1 and 2) | "G" = 70°C Max. ambient temperature for full load operation. "F" = Temperature Coefficient which varies (with resistance) from ±625 ppm/°C to ±3100 ppm/°C. | Resistance First 2 digits significant, 3rd digit "number of zeros." 153 = 15,000Ω | Tolerance (See Table 4) K = ± 10% |

**MIL—R—22684 (RL) RL07S153J**

| RL07 | S | 153 | J |
|---|---|---|---|
| Style/Power (See Tables 1 and 2) | Terminal (Lead) "S" = Solderable | Resistance First 2 digits significant, 3rd digit, "number of zeros." 153 = 15,000Ω | Tolerance (See Table 4) J = ±5% |

**MIL—R—10509 (RN) RN60D1003F**

| RN60 | D | 1003 | F |
|---|---|---|---|
| Style/Power (See Tables 1 and 2) | Characteristic (See Table 3) D = ±100 ppm/°C | Resistance First 3 digits significant, 4th digit "number of zeros." 1003 = 100,000Ω | Tolerance (See Table 4) F = ±1% |

**MIL—R—26 (RW)—Numbering System Complex (See MIL spec) RW55U49R9F**

| RW55 | U | 49R9 | F |
|---|---|---|---|
| Style/Power Size/ Construction | Max. "Hot Spot," derating temperature, insulation resistance and moisture resistance. "U" or "V" characteristic. | Resistance 3 or 4 digits depending on the TC, tolerance, etc. "U" char. has 4 "V" char. has 3 | Tolerance (See Table 4) Only applicable to "U" char. |

**MIL—R—39008 (RCR) RCR07G153JS**

| RCR07 | G | 153 | J | S |
|---|---|---|---|---|
| Style/Power (See Tables 1 and 2) | Characteristic "G" indicates a max. ambient temperature of 70°C for full load operation, and a TC which varies (with resistance) from ±625 ppm/°C to ±1900 ppm/°C. | Resistance First 2 digits significant, 3rd digit, "number of zeros." 153 = 15,000Ω | Tolerance (See Table 4) J = ±5% | Failure Rate (See Table 5) S = .001%/ 1000 hours |

**MIL—R—39017 (RLR) RLR07C153GR**

| RLR07 | C | 153 | G | R |
|---|---|---|---|---|
| Style/Power (See Tables 1 and 2) | Terminal (Lead) "C" = Solderable/Weldable | Resistance First 2 digits significant, 3rd digit, "number of zeros." 153 = 15,000Ω | Tolerance (See Table 4) G = ±2% | Failure Rate (See Table 5) R = ±0.1%/ 1000 hours |

**MIL—R—55182 (RNR) RNR60H1003FS**

| RNR60 | H | 1003 | F | S |
|---|---|---|---|---|
| Style, Terminal and Power (See Tables 1 and 2) RNR = Solderable Leads RNC = Solderable/Weldable Leads RNN = Nickel Leads | Characteristic (See Table 3) H = ±50 ppm/°C | Resistance First 3 digits significant, 4th digit "no. of zeros." 1003 = 100,000Ω | Tolerance (See Table 4) F = ±1% | Failure Rate (See Table 5) S = .001%/ 1000 hours |

**NOTE:** The Established Reliability specifications (i.e., MIL-R-39008, MIL-R-39017, and MIL-R-55182) supersede MIL-R-11, MIL-R-22684, and MIL-R-10509 respectively, for all *new* design. Resistors qualified to the three Established Reliability specifications may be substituted, without limitation, wherever the older MIL devices are specified.

**TABLE 1—Resistor Style**

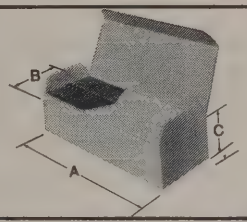
## PACKAGING STYLES

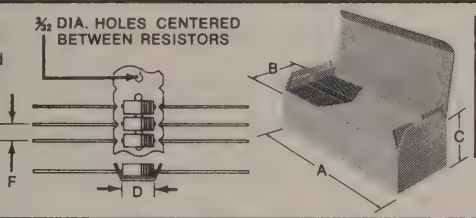
Consult factory for standard package available for the resistor of your choice.

**Oriented Bulk:** Preferred by manufacturers with their own feeding or taping arrangements. Resistors are axially oriented.



| Type | Wattage | Standard Quantity Per Box | A | B | C |
|---|---|---|---|---|---|
| GBT-¼ | ¼ | 2500 | 10¾" | 3 1/16" | 1¾" |
| GBT-½ | ½ | 2000 | 10¾" | 4 1/16" | 2 5/16" |
| GBT-½V | ½ | 2000 | 10¾" | 4 1/16" | 2 5/16" |
| GBT-1 | 1 | 1000 | 10¾" | 4 1/16" | 2 11/16" |
| BW-20 | 1 | 2000 | 10¾" | 4 1/16" | 2 5/16" |
| BWH | 2 | 1000 | 10 5/16" | 4¼" | 2 1/16" |

**Grip Strip®** A TRW exclusive. Resistors are held without adhesive in strips for ease of handling and counting.



| Type | Wattage | Standard Per Box | Quantity Per Strip | A | B | | D | F |
|---|---|---|---|---|---|---|---|---|
| GBT-½ | ½ | 1000 | 50 | 10 7/16" | 4 1/16" | 2 5/16" | .182" | 7/16" |
| GBT-½V | ½ | 1000 | 50 | 10 7/16" | 4 1/16" | 2 5/16" | .182" | 7/16" |

*Other spacing available.

**Cut and formed leads**

TRW/IRC offers the widest selection of pre-cut and formed units in the industry.

Purchasing of pre-cut units offers the user very significant savings in labor and assembly, as well as savings in valuable plant space, since units take only half the space of other packaging styles.

Drawings shown are for carbon composition types. These packaging styles are available for many wirewound and film resistors with some dimensional variations. Consult your sales representative or the factory for specifications, availability and costs.

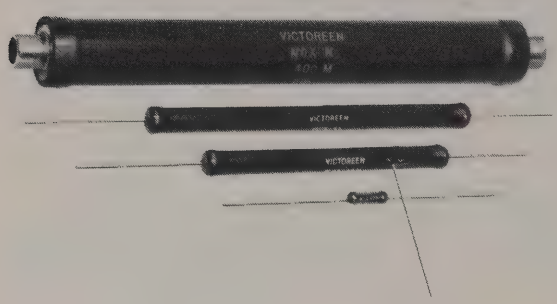
VICTOREEN

# TECHNICAL DATA COMPONENTS



- Wide Resistance Range — 10K-10,000 Megohms
- Full Load Stability — Typically Better than ±1% for 1000 Hours at 70°C
- Power Rating — To 45 Watts
- Voltage Rating — To 45 KV
- Excellent High Voltage, High Temperature

# MOX RESISTORS

Victoreen's MOX series of cylindrical, high voltage, high resistance resistors has provided the marketplace with a dependable, high performance product for nearly ten years. The improvements presented here represent our response to the current needs of the high voltage design engineer. These changes reflect improvements in Temperature Coefficient, Voltage Coefficient, Power Rating, and available Tolerance, yet are only intended as guidelines to our capabilities.

For applications requiring specifications more stringent than those presented here, please contact the Applications Engineering Department at Victoreen.

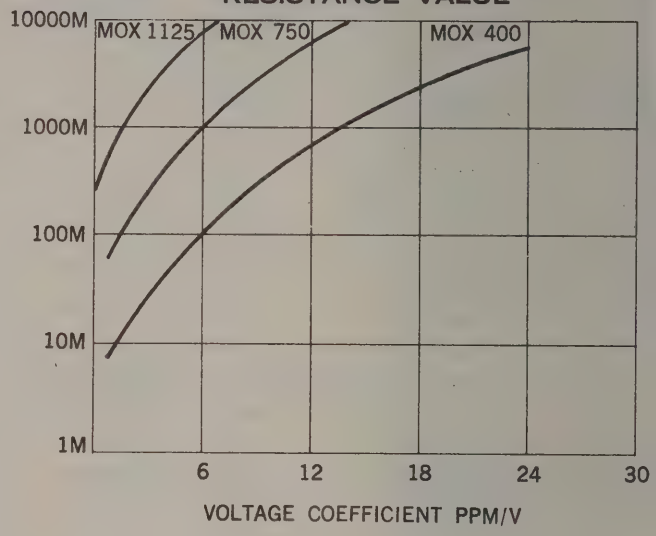
## TEMPERATURE COEFFICIENT AND DERATING INFORMATION

| STYLE | STANDARD 100PPM | STANDARD 250PPM | STANDARD 500PPM |
|---|---|---|---|
| 400F | 100K-10M | 10M-500M | N/A |
| 400A | 100K-500M | 500M-1000M | 1000M-2500M |
| 401 | 100K-200M | 200M-1000M | 1000M-1500M |
| 750A | 100K-1000M | 1000M-2000M | 2000M-5000M |
| 701 | 100K-400M | 400M-2000M | 2000M-2500M |
| 1125A | 100K-1500M | 1500M-3000M | 3000M-10KM |
| 1101 | 100K-600M | 600M-2500M | N/A |
| 1 | 10K-300M | 300M-1000M | N/A |
| 2 | 20K-600M | 600M-2000M | N/A |
| 3 | 30K-900M | 900M-3000M | N/A |
| 4 | 40K-1200M | 1200M-4000M | N/A |
| 5 | 50K-1500M | 1500M-5000M | N/A |
| 6 | 60K-1800M | 1800M-6000M | N/A |
| F | 20K-300M | 300M-3000M | N/A |
| G | 20K-500M | 500M-5000M | N/A |
| H | 20K-700M | 700M-7000M | N/A |

In addition to the above, a Special Temperature Coefficient of ±50PPM/C is available on the MOX-400A series up to 30M, on the 750A series up to 60M, and on the 1125A series up to 100M.

When determining the Temperature Coefficient of RD Series resistors, the above table applies to the total resistance part. The Temperature Coefficient of tracking between the two resistors will be better than ±25PPM/C.

(TYPICAL) VOLTAGE COEFFICIENT vs. RESISTANCE VALUE



The above curves apply to Victoreen's MINI-MOX series resistors only. As an option, MINI-MOX resistors that have been screened for special low voltage coefficients are available.

As a rule, Victoreen's MAXI-MOX resistors exhibit far better Voltage Coefficients than the MINI-MOX resistors. Typically, these V.C.'s range from .5PPM/V on the larger sizes to 2PPM/V on the Mox 1 series.

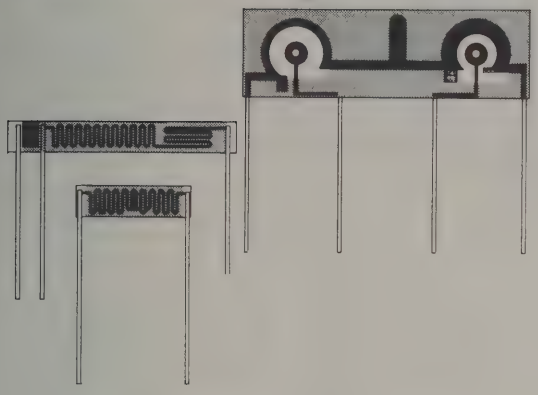
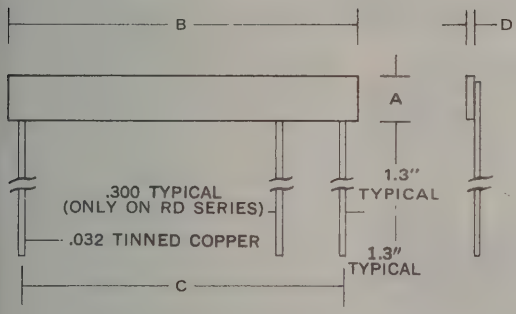
VICTOREEN

# TECHNICAL DATA COMPONENTS





- Wide Resistance Range — 1 to 5000 Megohms
- Full Load Stability — Typically Better than +1% for 1000 Hours at 70°C
- Power Rating — To 6 Watts
- Voltage Rating — 20 KV
- Excellent High Voltage, High Temperature
- Noninductive Design

Victoreen's "F" series Slim-Mox were initially conceived to provide drift protection against various potting compounds, when used under an epoxy conformal coating. Field experience has shown, however, that in these potted applications, or in applications requiring higher power dissipation, this special high temperature coating can stand on its own. For a versatile, small size, higher power resistor consider Victoreen's "F" series Slim-Mox. For applications requiring high stability and environmental protection Victoreen's conformal epoxy should be used. For other applications or information not presented here, contact the Applications Engineering Department at VICTOREEN.

## RX-I HI-MEG RESISTORS

VICTOREEN HI-MEG RESISTORS were originally designed for use in electrometer circuits where a high order of performance is required. HI-MEG resistors achieve a high degree of accuracy and stability, and operate at this high level for a long period of time. The HI-MEGS are manufactured in accordance with MIL-R-14293A, characteristic T, and therefore are measured at 20 volts ±1 volt. Reference to the average voltage coefficient curve below will indicate that deviations from the marked resistance value may be encountered when used at higher voltages. By special order, Victoreen can supply resistors with resistance measurements at specified voltages.

ELEMENT: The resistor element is a carbon coated glass rod, the ends of which are banded with silver to obtain the best electrical contact. Wire leads extend from the ends of the element.

GLASS SEAL: HI-MEGS are vacuum sealed in a glass envelope which is treated with a special silicone varnish which keeps the resistor relatively free from the effects of moisture. Care should be exercised however, to avoid contamination in handling, such as fingerprints, which might result in reduced effective resistance.

NOISE: The noise level is negligible for most uses.

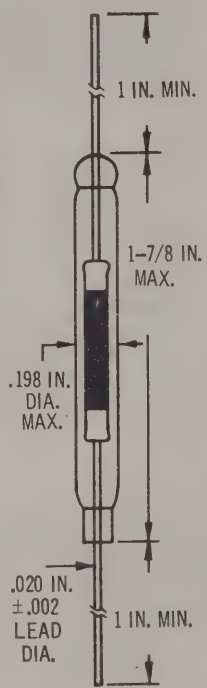
POWER RATING: The power rating for any HI-MEG resistor is equal to one divided by the resistance in megohms.

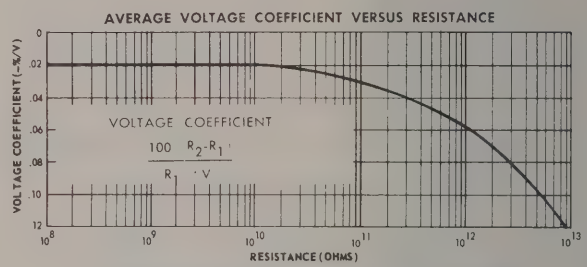
RESISTANCE: HI-MEG resistors available in values from $10^7$ to $10^{14}$ ohms.

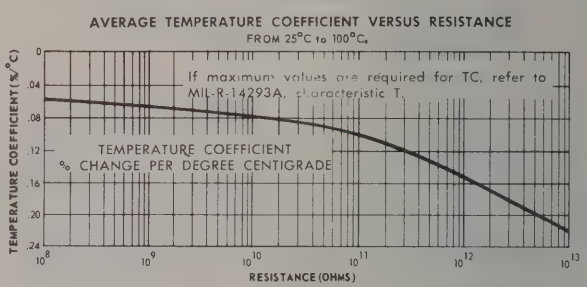
TOLERANCE: HI-MEG resistors can be supplied in the following tolerances: 1% below $10^{12}$ ohms, 2% and 5% below $10^{13}$ ohms, and 10% over the entire range. Refer to the price list for standard tolerance availability.

MAXIMUM WORKING VOLTAGE: 1000V.

MAXIMUM OPERATING AMBIENT TEMPERATURE: 100°C.







AVERAGE TEMPERATURE COEFFICIENT VERSUS RESISTANCE

## GV3 HI-VOLTAGE REGULATING DIODE

- Current capabilities to 700ua.
- Regulation of the order of 10 volts per 100 micro-amps.
- Designed to regulate high voltage power supplies for portable radiation detection instruments and photo-multiplier tubes, as DC coupling elements and for other high voltage-low current applications.
- Shock: 100g-11ms per Mil. Std. 202C method 202B.
- Vibration: 10-55cps-10g.

These Victoreen HV Regulators available in any desired nominal voltage ±2.5% from 400 volts to 2500 volts at the customary test point of 50ua. All characteristics such as maximum and minimum currents, regulation, etc., may be interpolated from the table below.

### COMMONLY USED TYPES

| TYPE | NOM. VOLTAGE @ 50ua TEST POINT | TOL. | CURRENT IN MICROAMPERES MIN. | MAX. | PEAK | REGULATION* (MAX.) | ALTITUDE |
|---|---|---|---|---|---|---|---|
| GV3B-400 | 400V | ±10V | 5 | 300 | 400 | 20V | 72,000 |
| GV3A-1000 | 1000V | ±15V | 10 | 500 | 750 | 40V | 65,000 |
| GV3A-2500 | 2500V | ±37V | 25 | 400 | 1400 | 85V | 50,000 |

*This regulation is the change in voltage over useful range of current from MIN. to MAX.

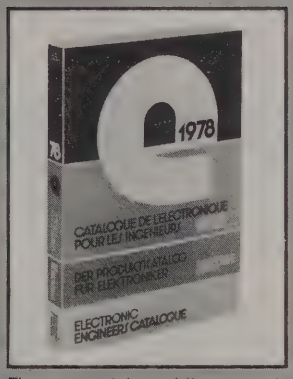
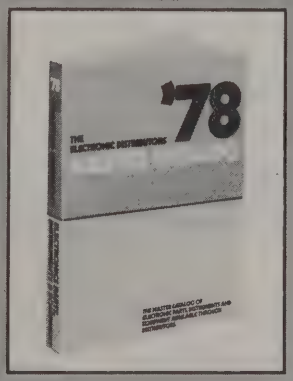
The "blue-ribbon" catalog/directory that has become "the standard of the industry" for electronic engineers, buyers and specifiers.

**ELECTRONIC ENGINEERS CATALOGUE**



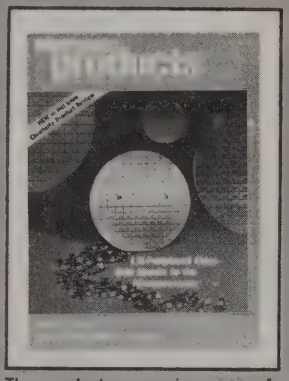
The new catalogue/directory of electronic products available to and from Western Europe and the United Kingdom. Designed especially for the European electronics engineer.

**ELECTRONIC DISTRIBUTORS MASTER CATALOG —**



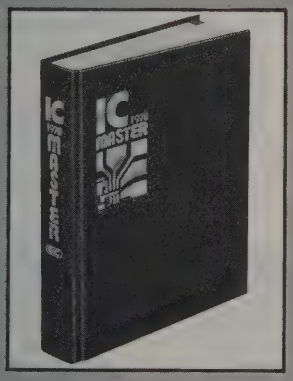
The only national catalog designed exclusively for distributors and their customers featuring electronic parts, instruments and equipment.

**ELECTRONIC PRODUCTS MAGAZINE —**



The products magazine . . . A 100% product-oriented magazine including hundreds of new products and special features every month.

**IC MASTER AND THE UPDATES —**



The only complete single-source directory including all IC devices manufactured in the United States. Updated three times yearly with accumulative supplements.

**eem FILE SYSTEM —**

The only filing system designed especially for the electronics engineer. Instant retrieval and organization of data sheets and catalogs.

**UTP CUSTOM CATALOGS —**

The Cadillac of individualized catalogs for the electronic parts distributor, featuring solely his lines and services.

**UNITED COST AND PRICING SERVICES —**

The electronic distributors' proven method of being up to the minute on his cost and selling prices.

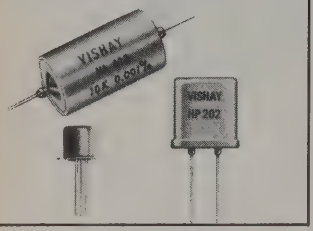
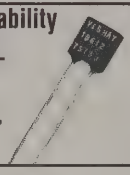
## Hermetically-sealed resistors, metrology and laboratory grade



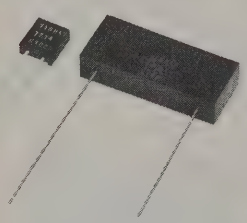
| MODEL NUMBER | RESISTANCE (OHMS) | TOLERANCE[1] | POWER @25°C | TCR[2] | TCR TRACKING[2] | DIMENSIONS (excluding leads) (inch) [mm] |
|---|---|---|---|---|---|---|
| HA412 | 5-100k | To ±0.001% | 0.30W | 1 ppm/°C | 3 ppm/°C max. | 0.625 (15.875) L x 0.375 (9.525) Dia. |
| HA414 | 5-200k | | 0.50W | | | 1.000 (25.400) L x 0.375 (9.525) Dia. |
| HA512 | 5-300k | | 0.75W | | | 0.625 (15.875) L x 0.500 (12.700) Dia. |
| HA516 | 5-600k | | 1.50W | | | 1.000 (25.400) L x 0.500 (12.700) Dia. |
| HA518 | 5-1M | | 2.50W | | | 1.500 (38.100) L x 0.500 (12.700) Dia. |
| HP202 | 5-100k | | 0.30W | | | 0.430 (10.922) x 0.435 (11.049) x 0.185 (4.699); lead spacing 0.150 (3.810) |
| VHM-1 | 50-20k | To ±0.02% | 0.05W @125°C | 2.5 ppm/°C | 5 ppm/°C max. | 0.210 (5.334) H x 0.230 (5.842) Dia. (std. T018 case) |

## Established-reliability resistors, ERMIL style RNC90Y (Mil-R-55182/9, Char. Y)



| MODEL NUMBER | RESISTANCE (OHMS) | TOLERANCE[1] | POWER @125°C | TCR[2] | TCR TRACKING[2] | DIMENSIONS (excluding leads) (inch) [mm] HxLxW |
|---|---|---|---|---|---|---|
| S444 | 1-100k | To ±0.005% | 0.30W | 2.5 ppm/°C | 5 ppm/°C max. | 0.350 (8.890) x 0.310 (7.874) x 0.110 (2.794); lead spacing 0.150 (3.810 |

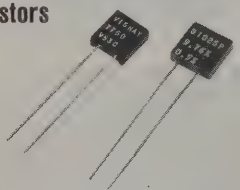
## Precision resistors, high-performance industrial and aerospace grade



| MODEL NUMBER | RESISTANCE (OHMS) | TOLERANCE[1] | POWER @125°C | TCR[2] | TCR TRACKING[2] | DIMENSIONS (excluding leads) (inch) [mm] HxLxW |
|---|---|---|---|---|---|---|
| S102C | 1-100k | To ±0.005% | 0.30W | 2.5 ppm/°C | 5 ppm/°C max.; 3 ppm/°C typical | 0.326 (8.280) x 0.302 (7.670) x 0.105 (2.667); lead spacing 0.150 (3.810) |
| S104 | 1-200k | | 0.50W | | | 0.520 (13.208) x 0.565 (14.351) x 0.150 (3.810); lead spacing 0.400 (10.160) |
| S105 | 1-300k | | 0.75W | | | 0.520 (13.208) x 0.810 (20.574) x 0.150 (3.810); lead spacing 0.650 (16.510) |
| S106C | 0.5-600k | | 1.00W | | | 0.520 (13.208) x 1.190 (30.226) x 0.245 (6.223); lead spacing 0.900 (22.860) |
| HS102C* (ruggedized) | 1-100k | | 0.30W | | | 0.430 (10.922) x 0.435 (11.049) x 0.185 (4.699); lead spacing 0.150 (3.810) |

*Shorter height dimensions available on special order.

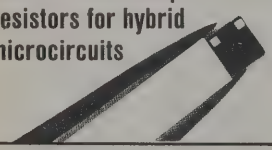
## Value-engineered and standard stock precision resistors



| MODEL NUMBER | RESISTANCE (OHMS) | TOLERANCE[1] | POWER @ 125°C | TCR[2] | TCR TRACKING[2] | DIMENSIONS (excluding leads) (inch) [mm] HxLxW |
|---|---|---|---|---|---|---|
| V53C | 1-100k | To ±0.02% | 0.30W | 10 ppm/°C | 10 ppm/°C typical | 0.326 (8.280) x 0.302 (7.670) x 0.105 (2.667); lead spacing 0.150 (3.810) |
| S102SP* | 10-100k* | ±0.5% (±1.0% EOL) | 0.30W | | – | 0.375 (9.525) x 0.320 (8.128) x 0.120 (3.048), lead spacing 0.150 (3.810) |

*Available only in standard values per E192 list (Table IV), Mil-R-55182.
For < +1% design-tolerance (end-of-life) applications.

## Micro and minichip resistors for hybrid microcircuits



| MODEL NUMBER | RESISTANCE (OHMS) | TOLERANCE[1] | POWER @70°C | TCR[2] | TCR TRACKING[2] | CHIP DIMENSIONS (inch) [mm] LxWxT |
|---|---|---|---|---|---|---|
| V5X5 | 5-5k | To ±0.005%* | 0.05W | 2.5 ppm/°C | 5 ppm/°C max. | 0.050 (1.270) x 0.050 (1.270) x 0.017 (0.432) |
| V15X5 | 50-25k | | 0.10W | | | 0.150 (3.810) x 0.050 (1.270) x 0.017 (0.432) |

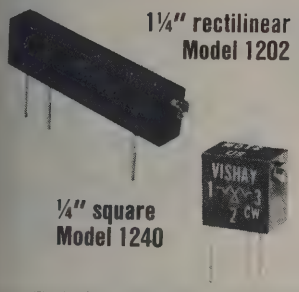
*User-calibratable to ±0.005%

## Hermetically-sealed precision power resistors

| MODEL NUMBER | RESISTANCE (OHMS) | TOLERANCE[1] | POWER @25°C | TCR[2] | TCR TRACKING[2] | DIMENSIONS (excluding leads) (inch) [mm] HxLxW |
|---|---|---|---|---|---|---|
| VHP-3 | 10-39.2k | To ±0.01% | 10W* | 2.5 ppm/°C | 5 ppm/°C max. | 0.346 (2.03) x 1.530 (38.86) x 1.00 (25.4); std T03 case |

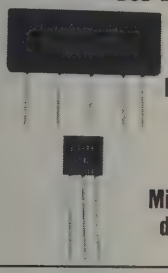
* 10W when chassis-mounted, 3W in free air.

## Precision trimming potentiometers



| MODEL NUMBER | RESISTANCE (OHMS) | POWER @85°C | TCR | NO. OF TURNS | DIMENSIONS (excluding leads) HxLxW (inch) (mm) AND TERMINATION STYLES |
|---|---|---|---|---|---|
| 1202<br>RJR12 style | 2, 5, 10, 20<br>50, 100, 200,<br>250, 500, 1k,<br>2k, 2.5k, 5k,<br>10k, 20k<br>All values<br>±5% or ±10% | 0.50W | +5 ±5 ppm/°C from −55°C to +25°C;<br>−5 ±5 ppm/°C from +25°C to +150°C | 25 ± 2 | 0.325 (8.255) x 1.250 (31.750) x 0.195 (4.953)<br>Type P: In-line pins<br>Type Y: Staggered pins<br>Type L: Flexible leads<br>Type LB: Panel-mount with flexible leads |
| 1240<br>RJR26 style | 5, 10, 20,<br>50, 100, 200,<br>500, 1k,<br>2k, 5k<br>All values<br>±5% | 0.25W | | 21 ± 2 | Type X: Edge-mount, side-adjust;<br>Type W: Edge-mount, top-adjust<br>0.250 (6.350) x 0.250 (6.350) x 0.175 (4.445)<br>Type P: Flat-mount, side-adjust<br>0.175 (4.445) x 0.250 (6.350) x 0.250 (6.350) |

## Standard unitized circuits



| MODEL NUMBER[1] | NO. OF RESISTORS | R VALUE OF EACH RESISTOR[2] | TOL. RATIO BETW. RESISTORS @25°C | TCR RATIO BETW. RESISTORS (−55°C to +125°C) | DIMENSIONS (excluding leads) HxLxW (inch) (mm) |
|---|---|---|---|---|---|
| 300190,1 | 2 | 100Ω-100kΩ | ±1.0%, ±0.5%, ±0.1%, ±0.05%, ±0.02%, ±0.01%, ±0.005% | 5 ppm/°C | 0.520 (13.208) x 0.565 (14.351) x 0.150 (3.810) |
| 300192, 3,4 | 3 | 100Ω-100kΩ | | 5 ppm/°C | 0.520 (13.208) x 0.810 (20.574) x 0.150 (3.810) |
| 300195,6, 7,8,9 | 4 | 100Ω-100kΩ | | 5 ppm/°C | 0.520 (13.208) x 1.190 (30.226) x 0.245 (6.223) |
| 300210 | 3 | 100Ω-100kΩ | | 5 ppm/°C | 0.520 (13.208) x 0.810 (20.574) x 0.150 (3.810) |
| 300211, 12 | 4 | 100Ω-100kΩ | | 5 ppm/°C | 0.520 (13.208) x 1.190 (30.226) x 0.245 (6.223) |
| 300144 | 2 (1 chip) | 100Ω-40kΩ[3] | | 1 ppm/°C | 0.320 (8.128) x 0.295 (7.493) x 0.100 (2.540) |
| 300145 | 4 (2 chips) | 100Ω-40kΩ[3] | | 1 ppm/°C,<br>5 ppm/°C[4] | 0.375 (9.525) x 0.375 (9.525) x 0.200 (5.080) |

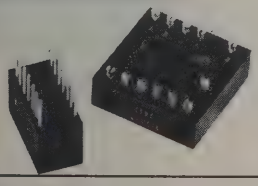
[1] Standardized circuits used throughout, with individual R values selected by user. For the 300144 and 300145 models, standard R ratio sets are available in addition to standard circuits. Consult factory for details.

[2] Resistance values below 100Ω are available. Consult factory.

[3] 40kΩ is the maximum resistance value per chip, and is divided between the two resistors on the chip.

[4] 1 ppm/°C between resistors R1 and R2 and between R3 and R4; 5 ppm/°C for all resistors as a set.

## Standard and custom resistance networks



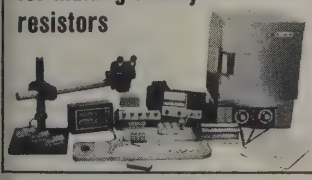
**CUSTOM AND STANDARD BINARY LADDER NETWORKS, BCD LADDERS, ETC.**

- Up to 16 bits
- ½ LSB to ±0.001 full-scale accuracy
- 25-ppm total impedance stability over 3 years

Besides designing completely custom precision networks to your most demanding specifications, Vishay offers standard binary R-2R ladder networks in 4-bit to 16-bit configurations (voltage-fed) with resistance values from 100 ohms to 50kΩ; 2R to 100kΩ.

Three basic package styles: **Profile 500,** 0.750" (19.05mm) W x 0.500" (12.70mm) H; **Profile 375,** 1.230" (31.242mm) W x 0.365" (9.271mm) H. Lengths dependent on number of bits: min. 0.700" (17.78mm) for 4-bit Profile 500 to 2.14" (54.356mm) for 16-bit ladder; min. 0.730" (18.542mm) for Profile 375 to 2.59" (65.786mm) for 15-bit package. **Profile 200,** 1.0" (25.4mm) W x 1.0" (25.4mm) L x 0.200" (5.08mm) H only.

## In-plant station for making Vishay resistors



**BENCHTOP STATION FOR CALIBRATING AND ENCAPSULATING VISHAY RESISTORS IN YOUR OWN PLANT**

**Model 290424** (115V 60Hz) or **Model 290425** (220V 50Hz) gives you a complete facility for obtaining custom resistors of Vishay quality within your own plant or laboratory. Ideal for breadboarding, prototype, and even for production runs.

Select a Vishay resistor chip of a resistance value closest to the final value you want. Then calibrate according to simple instructions provided, to tolerances as close as ±0.005%. Make resistors of any value from 2Ω to 100kΩ. Call for further information.

## 1. Standard Tolerances

| TOLERANCE | SERIES | | | | | | | |
|---|---|---|---|---|---|---|---|---|
| | HA, HP | VHM-1 | S444 | S | V53C | S102SP | VHP-3 | V-Chip |
| ±0.001% | | | | | | | | |
| ±0.0025% | | | | | | | | |
| ±0.005% | | | | | | | | |
| ±0.01% | | | | | | | | |
| ±0.02% | | | | | | | | |
| ±0.05% | | | | | | | | |
| ±0.1% | | | | | | | | |
| ±0.25% | | | | | | | | |
| ±0.5% | | | | | | | | |
| ±1.0% | | | | | | | | |

Recognized measurement limitations impose restrictions on practical tolerance attainable when selecting low-resistance-value resistors. Consult Applications Engineering Department for exact limits.

## 2. Standard TCR and TCR Tracking

| SERIES | TCR | TCR TRACKING |
|---|---|---|
| HA, HP | +1 ±1.5 ppm/°C from 0°C to +25°C;<br>−1 ±1.5 ppm/°C from +25°C to +60°C | 3 ppm/°C max. |
| VHM-1, S444, S, HS, VHP-3, V-Chip | +2.5 ±2.5 ppm/°C from −55°C to +25°C;<br>−2.5 ±2.5 ppm/°C from +25°C to +125°C | 5 ppm/°C max.,<br>3 ppm/°C typical |
| V53C | ±10 ppm/°C, ref.@ +25°C | 10ppm/°C typical |
| S102SP | | — |

TCR characteristics, including tracking, are standard down to:
100Ω —V-Chip, VHM-1, VHP-3
50Ω —S, HS, V53C, S102SP
40Ω —S444
Consult Applications Engineering Department for further details.

# Allen-Bradley Trimming Potentiometers

**TYPE E:**
Cermet, single turn, 0.5W at 70°C, 10 ohms to 2.5 megs, ±10%, pin terminals, 14 types, top and side adjustment, linear taper. TCR <±35 PPM/°C.

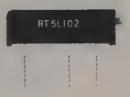
**TYPE D:**
Cermet, single turn, 0.5W at 70°C, 10 ohms to 2.5 megs, ±20%, pin terminals, 8 types, top and side adjustment, linear taper. TCR <±35 PPM/°C.

**TYPE 90:**
Cermet, single turn, 0.5W at 70°C, 1.0W at 40°C, 100 ohms to 2 megs, ±20%, pin terminals, top and side adjustment, linear taper. TCR ±100 PPM/°C.

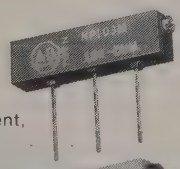
**TYPE S:**
Cermet, single turn, 0.5W at 85°C, 50 ohms to 1 meg, ±10%, pin terminals, top and side adjustment, linear taper. TCR <±35 PPM/°C.

**TYPE A:**
Cermet, single turn, 0.5W at 85°C, 10 ohms to 2.5 megs, ±10%, pin terminals, top and side adjustment, 6 types, linear taper. TCR <±35 PPM/°C.

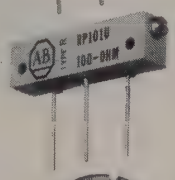
**TYPE MT:**
Cermet, 20 turns, 0.5W at 70°C, 10 ohms to 2.5 megs, ±10%, pin terminals, 7 types, top and side adjustment, linear taper. TCR <±35 PPM/°C.



**TYPE RT:**
Cermet, 20 turns, 1.0W at 40°C, 10 ohms to 2.5 megs, ±10%, pin terminals, 4 types, linear taper, .250 inch or .340 inch high types. Translucent housing also available in any of the lead configurations. TCR <±35 PPM/°C.



**TYPE N.**
Hot-molded composition, 25 turns, 0.33W at 50°C, 100 ohms to 2.5 megs, ±10% and ±20%, pin terminals, linear taper.



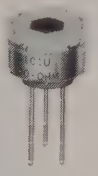
**TYPE R:**
Hot-molded composition, 25 turns, 0.25W at 70°C, 100 ohms to 2.5 megs, ±10% and ±20%, pin or solder lug terminals, linear taper

**TYPE F:**
Hot-molded composition, single turn, 0.25W at 70°C, 100 ohms to 5 megs, ±10% and ±20%, pin or solder lug terminals, top and side adjustment, 5 standard tapers.

**TYPE FD:**
Dual version of Type F; front section: solder lug only, rear section: pin or lug. Well suited for Bridged-T or L-pad attenuator applications.

**TYPE BT:**
An all plastic version of the Type FD for excellent performance at high frequencies. Two terminal configurations available. Also well suited for Bridged-T or L-pad attenuator applications

**TYPE O:**
Hot-molded composition, single turn, 0.4W at 70°C, 100 ohms to 5 megs, ±10% and ±20%, pin or solder lug terminals, 5 standard tapers



**TYPE Y:**
Hot-molded composition, single turn, 0.25W at 50°C, 100 ohms to 5 megs, ±10% and ±20%, pin or solder lug terminals, 5 types, top and side adjustment, 5 standard tapers

## SPECIFICATIONS

| Type | Publication Number | Resistance Element and Adjustment Turns | Resistance Range and Tolerance | Power Rating | Voltage Rating (RMS or DC) | Operating Temperature Range | Terminal Types | Case Dimensions in Inches (millimeters) | Enclosure |
|---|---|---|---|---|---|---|---|---|---|
| E | 5219A | Cermet Single Turn | 10 Ohms to 2.5 Megohms ±10% | 0.5 Watt @ 70°C | 300V | −55°C to +125°C | Pin | 0.375 (9,53) Square by 0.19 (4,83) Thick | Immersion Sealed |

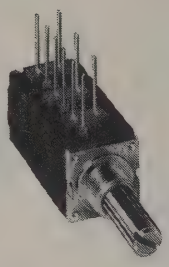
| BT | 5236 | | | Consult Factory | | −40°C to +120°C | Front: 3 Lugs Rear: 3 Pins or Front: 2 Pins Rear: 2 Pins | 0.500 (12,70) Diameter by 0.535 (13,59) | Dust and Splash Resistant |
| O | 5235 | | | 0.4 Watt @ 70°C | 350V | −55°C to +150°C | Pin or Solder Lug | 0.500 (12,70) Diameter by 0.531 (13,49) | Immersion Sealed |
| Y | 5209 | | | 0.25 Watt @ 50°C | | −55°C to +100°C | Pin or Solder Lug | 0.500 (12,70) Diameter by 0.359 (9,13) | Dust and Splash Resistant |

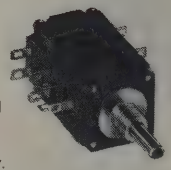
# Allen-Bradley Variable Resistors

**SERIES 70 MOD POT®:** Modular design innovated by Allen-Bradley offers almost unlimited combinations: single, dual, triple or quadruple sections. Options include PC or solder lug terminals, variety of switches, vernier drives, concentric shafts, hot-molded composition, cermet or conductive plastic resistance elements.



**SERIES 72 MOD POT®:** Similar to Series 70, except the bushing and shaft are non-metallic. Available in single or dual combination only.

**SERIES 73 MOD POT®:** Similar to Series 70, except the bushing is of a more economical design. Available in single or dual combination only.



## SPECIFICATIONS

| Type | Publication Number | Resistance Element | Resistance Range and Tolerance | Power Rating (Linear Taper) | Voltage Rating (RMS or DC) | Operating Temperature Range | Number of Sections Available | Case Dimensions in Inches (millimeters) | Enclosure |
|---|---|---|---|---|---|---|---|---|---|
| Series 70 | 5217 | Cermet | 100 Ohms to 1 Megohm ±10% | 2.0 Watts @ 70°C | 350V | −55°C to +150°C | 1, 2, 3 or 4 | Lug terminal: 0.594 *(15.08)* Deep Pin terminal: 0.625 *(15.88)* Square (Single Section) | Dust and Splash Resistant |
| | | Hot-Molded Composition | 50 Ohms to 10 Megohms ±10%, ±20% | 1.0 Watt @ 70°C | | −55°C to +120°C | | | |

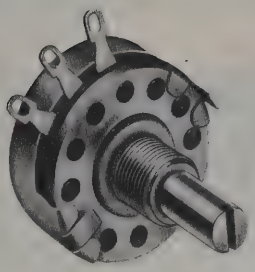
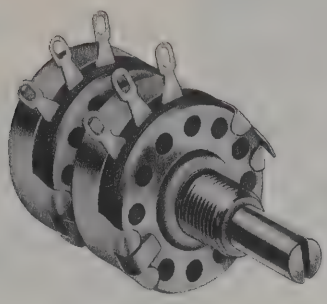
[1] All depth dimensions are maximum.

**TYPE J (RV4):**
Standard of the industry for quality. Hot-molded composition, 50 ohm to 5 megs, ±10% and ±20% (special values to 1000 megs available), 2.25W at 70°C, single, dual, triple sections available. Switch for single or dual sections.

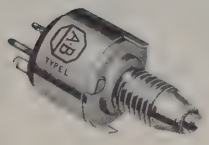




**TYPE EJ:**
Extra long life version of the Type J with rotational life exceeding one million rotations, single or dual configurations. Slip clutch available.

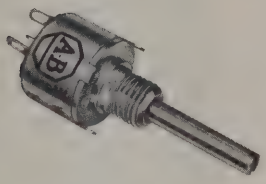
**TYPE K:**
A 3.0W at 70°C version of the popular Type J.

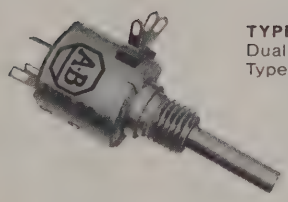
**TYPE G (RV6):**
Hot-molded composition, 100 ohms to 5 megs, ±10% and ±20%, 0.5W at 70°C, single section available with or without SPST switch.



**TYPE L:**
Hot-molded composition, 100 ohms to 5 megs, ±10% and ±20%, 0.8W at 70°C, single section.

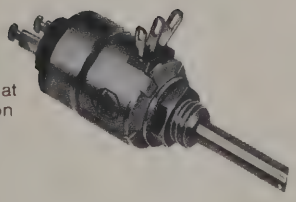
**TYPE W (RV6):**
Hot-molded composition, 100 ohms to 5 megs, ±10% and ±20%, 0.5W at 70°C, single section.



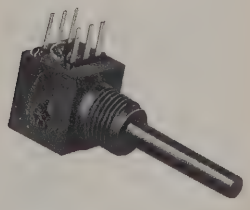


**TYPE GD:**
Dual section version of Type G

**TYPE WR:**
Radial-lead version of Type W. Available with or without switch. Switch versions offer contacts that close at start of clockwise rotation (TYPE WRS) or with switch with contacts that close at start of counter-clockwise rotation (TYPE WRH).



**TYPE M:**
Miniature conductive plastic, 100 ohms to 1 meg, ±20%, 0.1W at 40°C, single and dual sections available with or without SPDT switch. 5 terminal options. Non-metallic case, bushing and shaft.



**TYPE SP:**
Cermet, 50 ohms to 1 meg, ±10%, 1.0W at 70°C, single section. Only ⅜ inch diameter.

Standard options for most types include linear and non-linear tapers, a variety of shafts, bushings, shaft endings, shaft lengths, and hardware.

Types GD, J and the multi-section MOD POT® with composition tracks are well suited for attenuator applications.

*Reverse rotation models.
†High profile models.

**Notes:**
1. Resistance tolerances shown as ±10% are for resistence values >100Ω and <500KΩ. Other values are ±20%.
2. All Helipot cermet trimming potentiometers have essentially infinite resolution.
3. Prices and specifications subject to change without notice.

BECKMAN

# Duodial® & Digidial®
# TURNS-COUNTING DIALS

**RB SERIES**—1-13/16" (46,04mm) diameter dials finished in satin chrome with black-filled numerals and divisions (RBD has matte black finish and white-filled numerals and divisions). Built-in vibration-proof locking mechanism—knob and locking lever cap made of black nylon. Models can be used with most potentiometers, or other device, having from 1 to 15 mechanical turns.

**2600/2610 SERIES**—Miniature 7/8" (22,23mm) diameter versions of the RB Series. Ideally suited for applications where panel space is limited. Primarily for use with 7/8" (22,23mm) diameter multi-turn potentiometers but can be used with devices of any size having from 1 to 15 mechanical turns. All models have satin chrome finish, black-filled numerals and divisions, vibration-proof locking mechanism with black nylon cap, and black nylon knob. Series 2610 has 100 divisions.

**2620 SERIES**—Compact 1" (25,4mm) diameter provides panel space savings while retaining excellent readability. White numerals on black background for fiftieths of a turn, and black numerals on white background for full turns. May be used with devices with from 1 to 10 adjustment turns. Positive locking mechanism prevents accidental changes of setting, due to vibration or sudden shock. Rugged black housing and knob help assure long life and carefree operation. Model 2621 is designed for mounting on 1/8" (3,17mm) shafts, Models 2626 and 2627 mount on ¼" (6,35mm) shafts.

**900 SERIES**—Ideally suited to applications where precise settings and readability are required. 4¾" (12,07cm) diameter permits greater accuracy of setting. Outer dial is graduated in complete turns, inner vernier dial is graduated in hundredths. Settings can be made easily to three significant figures and estimated accurately to a fourth. For rapid changing of settings, an eccentric finger-hole is provided in the adjustment knob. The inner vernier dial and knob are made of plastic to eliminate body capacitance which might affect the setting. Since the knob is connected to the potentiometer shaft, backlash is thereby eliminated.

**BH SERIES** — Models BH462 and BH1462 offer quality appearance and reliable performance. High contrast black numerals on a clear anodized aluminum or grey plastic background allow ease of readability in either high or low ambient lighting. The primary dial is rigidly fixed to the shaft eliminating backlash. Ten complete turns of adjustment offer a full range of settings from 000 to 999. Combining precision features with attractive design are good reasons to use Beckman's Model BH462 and BH1462 on your next application.

**210 SERIES**—Miniature dials that have the same distinctive styling as the 205 Series, yet occupy less than 50% of the panel area. Their small size and excellent readability make them an ideal choice for use with potentiometers having a 1-13/16" (46,04mm) diameter or less. They have die cast zinc case finish with matte black enamel. Brushed aluminum locking lever prevents accidental movement and can be actuated without disturbing the setting.

# MFT™ THE MFT™ BREAKTHROUGH

BOURNS announces the Multi Function Trimmer . . .
. . . THE FUTURE IN TRIMMER/RESISTOR TECHNOLOGY.

Bourns has combined the world's best technologies used in producing cermet trimmers and cermet fixed resistor networks. The result is NINE new multiple trimmer and resistor network combinations. Revolutionary!

Packaged in the popular Dual In-Line Pin (DIP) configuration, the MFT trimmer truly marks the future in trimmer/resistor technology for the Analog World.

## SPECIFICATIONS

### GENERAL

**Electrical**

DC Resistance (±) any node to any other node ..... 20%
DC Resistance Ratio R1/R1 + R2 (±) ..... 2%
Rated Voltage .. $\sqrt{P \cdot R}$ P = Power, R = Resistance; Up to 400V Absolute Max.
Total Package Power @ 85°C ..... 1.00 Watt (Max.)
@ 125°C ..... 0.40 Watt (Max.)
Resistance Voltage Coefficient ..... 50ppm/V (Max.)
Dielectric Withstanding Voltage ..... 350 VRMS (Max.)
Insulation Resistance ..... 1,000MΩ (Min.)

**Environmental**

Temperature Range, Operational ..... −55°C to +125°C
Storage ..... −55°C to +150°C
Temperature Coefficient, −55°C to +125°C, R1 or R2 .....100ppm/°C (Max.) Temperature Coefficient, Tracking −55°C to +125°C, R1 with respect to R2 ..... 50ppm/°C (Max.)
Temperature Coefficient, Tracking, any ratio involving trimmer wiper ..... 100ppm/°C (Max.)
Terminal Strength, Pull .....4.5 lbs./30 sec. Bend ..... 8 ounces
Solderability ..... 80% coverage (Min.)
Resistance to Soldering Heat (TRS), 260° for 10 seconds ..... ±1.25%
Load Life 1,000 hours @ 85°C (TRS) ..... 3.0% (Max.)
Short Time Overload (TRS), 2.5 x RATED Voltage for 5 Seconds .. 0.25% (Max.)
Moisture Resistance ..... 1000MΩ (Min.)

**Physical**

Package Outline ..... JEDEC DIP
Flammability ..... UL 94V-1

### POTENTIOMETER

**Electrical**

Range of R1 + R2 ..... 500Ω, 1KΩ, 5KΩ, 10KΩ, 50KΩ, 100KΩ, 500KΩ
Total Power Dissipation @ 85°C ..... 0.25 Watt (Max.)
@ 125°C ..... 0.10 Watt (Max.)
Contact Resistance Variation (±) ..... 1%
Adjustability
(±) In-Circuit Resistance (Rheostat) ..... 0.10%
(±) Voltage Division (Divider) ..... 0.05%
Actual Electrical Travel (±15°) ..... 280°
End Resistance ..... 2Ω (Max.)

**Environmental**

Rotational Life ..... 200 Cycles (Min.)
Max. Resistance Shift @ 200 Cycles ..... 4% (Max.)
Vibration, 30G's, 45 Hz to 2Hz, Contact Bounce ..... 0.1 ms (Max.)
(±) TRS ..... 1%
Shock, 100G's, Contact Bounce ..... 0.1 ms (Max.)
(±) VRS ..... 1%
Low Temperature Exposure (TRS), 24 hours @ −55°C ..... 2.0% (Max.)
High Temperature Exposure (TRS), 24 hours @ +125°C ..... 3.0%
Humidity (TRS) ..... 2.0%

**Physical**

Adjustment Torque ..... 5 oz.-in. (Max.)
Mechanical Stops ..... Solid

### FIXED RESISTORS

**Electrical**

Resistance Ratio Range (R1/R1 + R2) ..... .1, .2, .3, .4, .5, .6, .7, .8, .9
Total Power Dissipation @ 85°C ..... 0.25 Watt (Max.)
@ 125°C ..... 0.10 Watt (Max.)

**Environmental**

Low Temperature Exposure (TRS), 24 hours @ −55°C ..... 0.25%
High Temperature Exposure (TRS), 24 hours @ +125°C ..... 0.50%
Humidity (TRS) ..... 0.25%

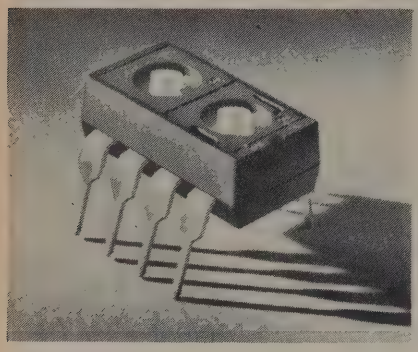
# MULTI FUNCTION TRIMMER/MODEL 7102B

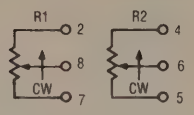
Two Single Turn Cermet Trimmers
In An 8-Pin DIP



## FEATURES

- Reduced total circuit manufacturing costs
- Reduced PC board space
- The first low cost, sealed trimmer compatible with auto-insertion equipment
- Better temperature tracking than discretes
- Improved circuit performance
- Reduced circuit design time
- Increased reliability
- Five Resistance Values for R1
  R1: 100Ω, 1KΩ, 10KΩ, 100KΩ, 500KΩ
- Five Resistance Ratios
  R2/R1: 1, 2, 10, 100, 1000

## SCHEMATIC



## PART NUMBER BUILD UP

7102B-XXX-XXX

From Ratio Matrix
I.E.-211 = R2/R1, 1:2

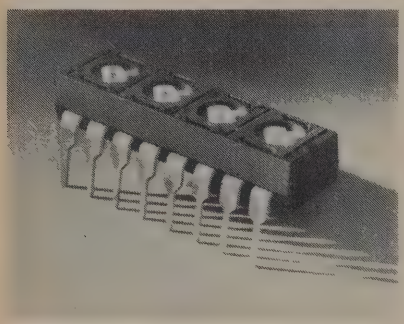
# MULTI FUNCTION TRIMMER/MODEL 7104D

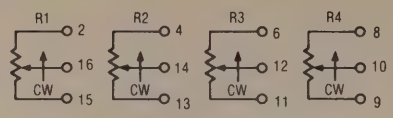
Four Single Turn Cermet Trimmers
In A 16-Pin DIP



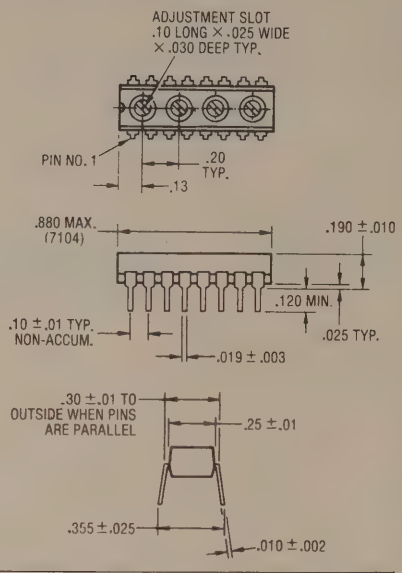
## FEATURES

- Reduced total circuit manufacturing costs
- Reduced PC board space
- The first low cost, sealed trimmer compatible with auto-insertion equipment
- Better temperature tracking than discretes
- Improved circuit performance
- Reduced circuit design time
- Increased reliability
- Compatible with auto-test equipment
- Five Resistance Values for R1
  R1: 100Ω, 1KΩ, 10KΩ, 100KΩ, 500KΩ
- Five Resistance Ratios
  R2/R1: 1, 2, 10, 100, 1000
  R3/R1: 1, 2, 10, 100, 1000
  R4/R1: 1, 2, 10, 100, 1000

## SCHEMATIC



## DIMENSIONS



## PART NUMBER BUILD UP

1. Determine required R values from circuit design.
2. Assign lowest R value the designation R1.
3. Rank remaining three R values in descending order of ratio with respect to R1.
4. Search ratio set chart top to bottom, left to right for appropriate ratio set dash number.
5. Use R code matrix to determine R code for appropriate R1 value vs ratio set dash number. R code matrix also determines R2, R3 and R4 value assignment (last three columns).

## EXAMPLE:

1. Required values are: 100K, 1K, 1K and 10K
2. Assign R1 = 1K
3. Rank remaining values: 1000 (100K), 10 (10K), 1 (1K)
4. Search ratio set chart, add ratio set dash number -424
5. Consult R code matrix column heading 1K (R1 value), -424 row. Resistance code is -102. Complete part number is 7104D-424-102 R code matrix, last 3 columns, gives: R2 = 100K R3 = 1K, R4 = 10K

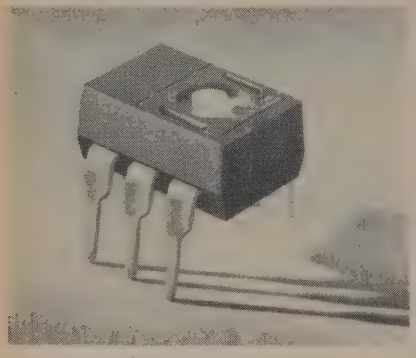
# MULTI FUNCTION TRIMMER/MODEL 7105A

One Single Turn Cermet Trimmer With One Series Fixed Resistor In A 6-Pin DIP



## FEATURES

- Reduced total circuit manufacturing costs
- Reduced PC board space
- The first low cost, sealed trimmer compatible with auto-insertion equipment
- Better temperature tracking than discretes
- Improved circuit performance
- Reduced circuit design time
- Increased reliability
- Compatible with auto-test equipment
- Total Resistance = TR = R1+R2
- Seven Values
  R1+R2: 500Ω, 1KΩ, 5KΩ, 10KΩ, 50KΩ, 100KΩ, 500KΩ
- Nine Resistance Ratios
  $\frac{R1}{R1+R2}$: .1, .2, .3, .4, .5, .6, .7, .8, .9

## SCHEMATIC

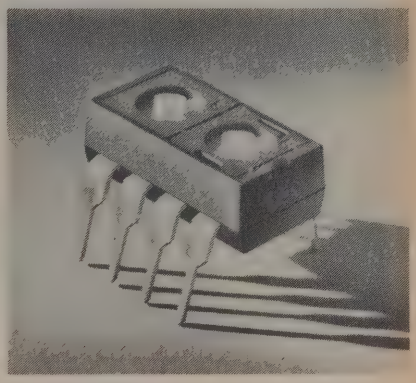
# MULTI FUNCTION TRIMMER/MODEL 7125B

Two Single Turn Cermet Trimmers
With Series Fixed Resistors,
Equivalent To Two Model 7105A
In A Single 8-Pin DIP



## FEATURES

- Reduced total circuit manufacturing costs
- Reduced PC board space
- The first low cost, sealed trimmer compatible with auto-insertion equipment
- Better temperature tracking than discretes
- Improved circuit performance
- Reduced circuit design time
- Increased reliability
- Compatible with auto-test equipment
- Total Resistance = TR = R1+R2
- Seven Values
  R1+R2: 500Ω, 1KΩ 5KΩ, 10KΩ, 50KΩ, 100KΩ, 500KΩ
- Nine Resistance Ratios
  $\frac{R1}{R1+R2}$: .1, .2, .3, .4, .5, .6, .7, .8, .9
- **R3 and R4 are Duplication of R1 and R2**

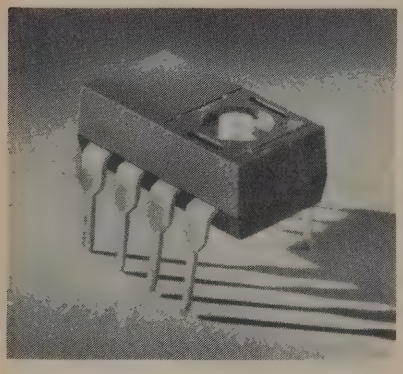
## MULTI FUNCTION TRIMMER/MODEL 7106B

One Single Turn Cermet Trimmer With
Two Series Fixed Resistors
In An 8-Pin DIP



### FEATURES

- Reduced total circuit manufacturing costs
- Reduced PC board space
- The first low cost, sealed trimmer compatible with auto-insertion equipment
- Better temperature tracking than discretes
- Improved circuit performance
- Reduced circuit design time
- Increased reliability
- Compatible with auto-test equipment
- Seven Values for R1+R2+R3
  R1+R2+R3: 500Ω, 1KΩ, 5KΩ, 10KΩ, 50KΩ, 100KΩ, 500KΩ
- Eight Resistance Ratios
  $\frac{R3}{R1+R2+R3}$: .1, .2, .3, .4, .5, .6, .7, .8
  $\frac{R1+R3}{R1+R2+R3}$: .2, .3, .4, .5, .6, .7, .8, .9

### SCHEMATIC

### PART NUMBER BUILD UP

7106B-XXX-XXX

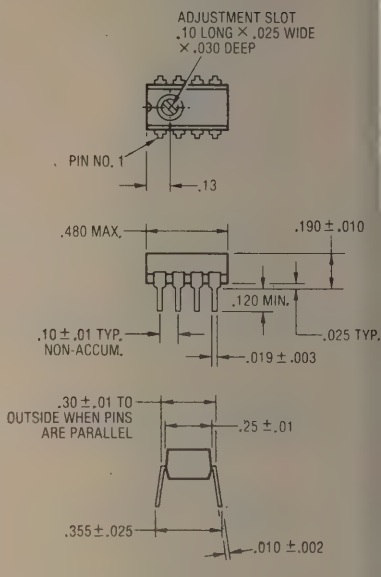
From Ratio Matrix

I.E. -137, $\frac{R3}{R1+R2+R3} = .3$

$\frac{R1+R3}{R1+R2+R3} = .7$

Standard R Code
For R1+R2+R3
I.E. -102 = 1000Ω

### DIMENSIONS



### RATIO MATRIX

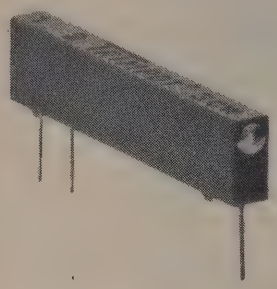
# MODEL 20

SIP Trimpot® Potentiometer
Cermet Element



## FEATURES

- Lower PC board profile, only .185″ off the board
- Machine insertable SIP design provides extra cost savings
- High density board spacing, fits on standard .100″ grid
- Stable cermet element offers continuous resolution
- High power rating: 0.50 watt at 70°C
- Low temperature coefficient: 100 ppm/°C over −55°C to +125°C temperature range
- Sealed to MIL-R-22097 (standard); withstands industrial cleaning processes
- Wiper assembly idles at both ends of travel, eliminating the possibility of travel from forced adjustment

BOURNS® Model 20 sealed SIP potentiometer offers a thin package width and machine insertability together with outstanding performance and quality.

## SPECIFICATIONS

**Electrical Characteristics**

Standard Resistance Range (see chart) . . 10 to 5,000,000 ohms
Resistance Tolerance . . . . . ±10% standard
Absolute Minimum Resistance . 3.0% or 1.0 ohm, whichever is greater
Continuity . . . . . Maintained for full mechanical range
Insulation Resistance: 500 volts DC . . . . . 100 megohms minimum
Contact Resistance Variation, Maximum . . . . . 3.0% or 1.0 ohm whichever is greater
Resolution . . . . . Infinite
Setability, Voltage Divider Mode . . . ±0.05% all resistances
Rheostat Mode . . . . . ±0.1% all resistances

**Environmental Characteristics**

Power Ratings:
25°C . . . . . 0.75 watt
70°C . . . . . 0.50 watt
125°C . . . . . 0 watt
Operating Temperature Range . . . . . −55°C to +125°C
Temperature Coefficient . . . ±100 ppm/°C, all resistances maximum
Humidity, MIL-STD-202, Method 106 . . . . . 20 megohms minimum insulation resistance after removal from chamber
Seal . Meets immersion requirements of MIL-R-22097
Vibration . . . . . 20Gs
Contact Bounce . . . 1 millisecond maximum
Wiper Shift, Maximum . . . . . 2.0%
Shock . . . . . 50Gs
Contact Bounce and Wiper Shift . Same as vibration
Load Life . . . . . 1000 hours 0.5 watt at 70°C
Mechanical Life . 200 cycles without discontinuity
Dielectric Strength
Room Conditions . . 1000 volts AC
80,000 ft. (0.8″ hg) . . 250 volts AC

Specifications are subject to change without notice

**Physical Characteristics**

Markings . . Manufacturer's name or symbol, wiring diagram, date code, resistance and manufacturer's part number (customer's part number optional)
Appearance . . Legible markings, no physical defects
Shaft Torque . . 5.0 oz.-in. maximum all resistances
Mechanical Adjustment . . . . . 15 turns ±3
Mechanical Stops . Wiper assembly idles
Weight . . . . . 0.40 grams maximum
Terminals . . . . . Solderable pins

**Metric Conversion Chart**

| Inch | mm | Inch | mm |
|---|---|---|---|
| .001 | .025 | .065 | 1.65 |
| .002 | .051 | .079 | 2.00 |

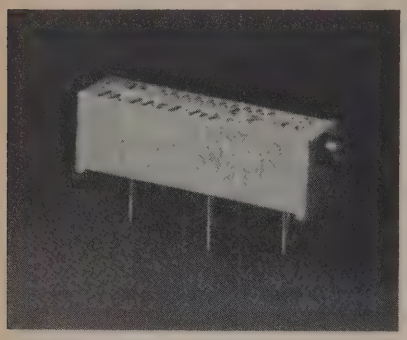
## MODEL 3006

Commercial Trimpot® Potentiometer
Cermet Element



### FEATURES

- Low cost
- Low PC board profile, only ¼" off the board
- Stable cermet element offers continuous resolution
- High power rating: 0.75 watt at 70°C
- Low temperature coefficient: 100 ppm/°C over −55° to +125°C temperature range
- Sealed to MIL-R-22097 standard; withstands industrial cleaning processes
- 16 independent wiper contacts assure excellent setability
- Wiper assembly idles at both ends of travel eliminating the possibility of damage from forced adjustment

### SPECIFICATIONS

**Electrical Characteristics**

Standard Resistance Range (see chart on front) . . . 10 to 2,000,000 ohms
Resistance Tolerance . . . . . ±10% standard, closer tolerances available
Absolute Minimum Resistance . 3.0% or 1.0 ohm, whichever is greater
Continuity . . . . . Maintained for full mechanical range
Insulation Resistance, 500 volts DC . . . . . 100 megohms minimum
Contact Resistance Variation, Maximum . . . . . 3 ohms or 3%, whichever is greater
Resolution . . . . . Infinite
Setability (Voltage Divider) . 0.02%

**Environmental Characteristics**

Power Ratings:
25°C . . . . . 1.25 watt
70°C . . . . . 0.75 watt
125°C . . . . . 0 watt
Operating Temperature Range . . . . . −55° to +125°C
Temperature Coefficient . . . . ±100 ppm/°C all resistances maximum
Humidity, MIL-STD-202, Method 106 . . . . . 20 megohms minimum insulation resistance after removal from chamber
Seal . . . . . Meets immersion requirements of MIL-R-22097
Vibration . . . . . 20Gs
Contact Bounce . 0.1 millisecond maximum
Wiper Shift, Maximum . . . . 2.0%
Shock . . . . . 50Gs
Contact Bounce and Wiper Shift . . Same as vibration
Load Life . . . . 1,000 hours 0.75 watt at 70°C
Mechanical Life . 200 cycles without discontinuity
Dielectric Strength
Room Conditions . 1000 volts AC
80,000 feet (0.8" hg) . 250 volts AC

**Physical Characteristics**

Shaft Torque . . 5.0 oz.-in maximum
Markings . Manufacturer's name or symbol, wiring diagram, date code, resistance and manufacturer's part number (customer's part number optional)
Appearance . . . . Legible markings, no physical defects
Mechanical Adjustment . . 15 turns nominal
Mechanical Stops . Wiper assembly idles
Weight . . . . Approximately 0.1 oz.
Terminals . . . . . Solderable pins

Specification Note: Closer performance tolerances can be supplied upon request.

Specifications are subject to change without notice.

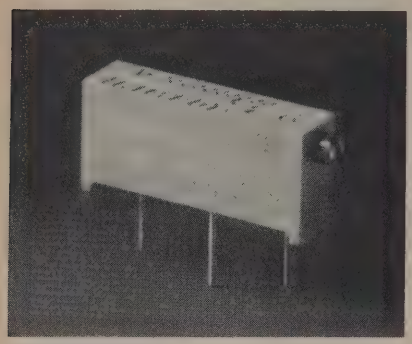
# MODEL 3009

Commercial E-Z-Trim® Potentiometer
Cermet Element



## FEATURES

- Mil-Spec immersion seal gives trouble-free operation after P.C. board processes
- Low temperature coefficient: ±100 ppm/°C over entire resistance and temperature range
- Stable, infinite resolution PALIRIUM® Cermet element and outstanding ±0.05% setability
- Tinned pins for compatibility with automated and hand soldering methods
- .021 diameter pins alleviate complicated circuit board fabrication
- Space-saving size: .75″ x .19″ x .35″ with RJ11 pin configuration
- Date code traceability
- Wiper assembly idles at both ends of travel, preventing damage from forced adjustment

## SPECIFICATIONS

**Electrical Characteristics**

Standard Resistance Range . . . 10 ohms to 2 megohms

Resistance Tolerance . . . . . ±10% standard, closer tolerances available

Absolute Minimum Resistance* . . . 2.0% or 1.0 ohm, whichever is greater

Continuity* . . . . Maintained for full mechanical range

Insulation Resistance, 500 volts DC . . . . . 100 megohms minimum

Resolution . . . . . Infinite

**Environmental Characteristics**

Power Ratings:
25°C . . . . . 0.75 watt
125°C . . . . . 0 watt

Operating Temperature Range . . . . . −55° to +125°C

Temperature Coefficient . . . . ±100 ppm/°C all resistances maximum

Humidity, MIL-STD-202, Method 106 . . . . . 20 megohms minimum insulation resistance after removal from chamber

Seal* . . . . . Mil-Spec immersion

Vibration . . . . . 20Gs

Contact Bounce . 0.1 millisecond maximum

Wiper Shift, Maximum . . . . 2.0%

Shock . . . . . 50Gs

Load Life . . 1000 hours 0.75 watt at 25°C

Mechanical Life . 200 cycles without discontinuity

Dielectric Strength
Room Conditions . . 1000 volts AC
80,000 feet (0.8″ hg) . 250 volts AC

**Physical Characteristics**

Shaft Torque* . 5.0 oz-in. maximum

Markings* . . Manufacturer's name, wiring diagram, date code, resistance and manufacturer's part number (customer's part number optional)

Appearance* . Legible markings, no physical defects

Mechanical Adjustment* . . 20 turns nominal

Mechanical Stops* . . . . . Wiper assembly idles

Weight . . . . . Approximately 0.1 oz.

Terminals . . . . . Printed circuit pins

* Inspection Note: 100% or statistical sampling inspection performed to insure highest quality.

Specification Note: Closer performance tolerances can be supplied upon request.

Specifications are subject to change without notice.

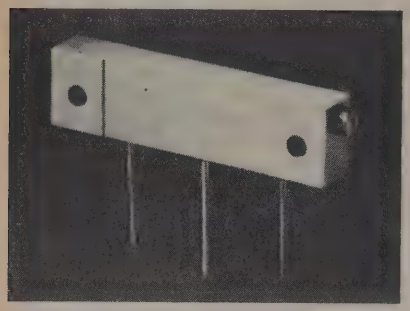
## MODEL 3059

Potentiometer — 1¼″ Long
Industrial — Cermet



### FEATURES

- Meets or exceeds all requirements of MIL-R-22097, Characteristics C, F, Style RJ12 and MIL-R-39035, Style RJR12
- Complete resistance range: 10 ohms to 2 megohm
- High operating temperature (150°C)
- High power dissipation 1.0 watt at 70°C

### SPECIFICATIONS

**Electrical Characteristics**

Standard Resistance Range .... 10 ohms to 2 megohm
Resistance Tolerance ..... ±10% standard, closer tolerances available
Absolute Minimum Resistance ... 2 ohms maximum
Continuity ..... Maintained for full mechanical range
Insulation Resistance, 500 volts DC .... 1000 megohms minimum
Contact Resistance Variation, Maximum ..... 3 ohms or 3.0%, whichever is greater
Adjustability*
Voltage Ratio ..... ±0.05%
Resistance ..... ±0.10%

**Environmental Characteristics**

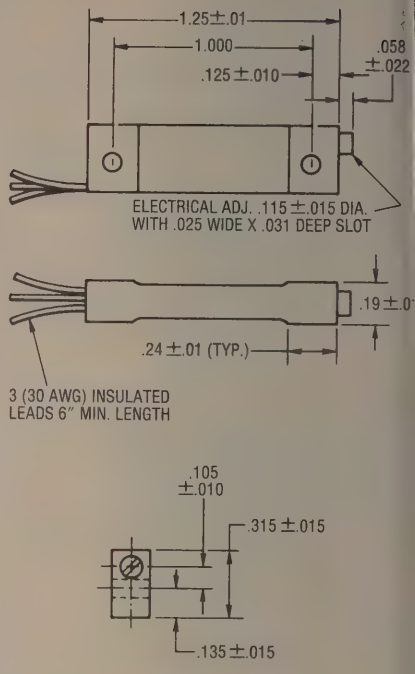
Power Ratings:
70°C ..... 1.0 watt or 400 volts maximum
150°C ..... 0 watt
Operating Temperature Range ..... −55° to +150°C
Temperature Coefficient .... ±100 ppm/°C all resistances maximum
Humidity, MIL-R-22097 ..... 100 megohms minimum insulation resistance after removal from chamber
Vibration ..... MIL-R-22097, 20Gs
Contact Bounce . 0.1 millisecond maximum
Wiper Shift, Maximum .... 1.0% voltage ratio
Shock ..... MIL-R-22097, 50Gs
Contact Bounce and Wiper Shift .. Same as vibration
Salt Spray .... Meets MIL-STD-202, Method 101A
Load Life ..... 1000 hours per MIL-R-22097
Resistance Shift, Maximum . 2.0%
Mechanical Life . 200 cycles without discontinuity
Dielectric Strength ... MIL-R-22097
Room Conditions .. 900 volts AC
70,000 feet ..... 350 volts AC

**Physical Characteristics**

Immersion Leak Test .... No leaks
Shaft Torque .. 5.0 oz.-in. maximum
Markings ... Manufacturer's name, wiring diagram, date code, resistance and manufacturer's part number (customer's part number optional)
Appearance .... Legible markings, no physical defects
Mechanical Stops . Wiper assembly idles
Weight ..... Approximately 0.1 oz.
Terminals:
L .... Teflon-insulated, standard leads, 30 AWG (0.024 O.D.) 7 strands/38 AWG
P, Y ..... Solderable circuit pins
J ..... Solderable solder lugs

### DIMENSIONS

**L**



Specification Note: Closer performance tolerances can be supplied upon request.

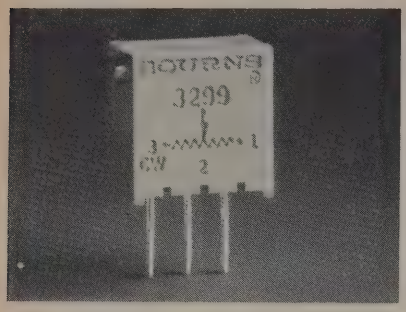
## MODEL 3299

Commercial Cermet Potentiometer
⅜" Square



### FEATURES

- Very low cost
- Typical CRV of 3% (1% available)
- High power rating: ½ watt @ 70°C
- Small size: .375" x .395" x .240" high
- Low T.C.: ±100 ppm/°C over entire temperature and resistance range
- Sealed to withstand wave-soldering and cleaning processes

## SPECIFICATIONS

**Electrical Characteristics**

Standard Resistance Range . 10 ohms to 1,000,000 ohms
Resistance Tolerance ..... ±10% standard, closer tolerances available
Absolute Minimum Resistance ..... 5 ohms, all resistances
Continuity ..... Maintained for full mechanical range
Insulation Resistance, 500 volts DC .... 1000 megohms minimum
Contact Resistance Variation Maximum ..... 3 ohms or 3%, whichever is greater. Consult factory for 1%

**Environmental Characteristics**

Power Ratings:
70°C ..... 0.5 watt or 300 volts maximum
125°C ..... 0 watt
Operating Temperature Range ..... −55° to +125°C
Temperature Coefficient per MIL-R-22097 .... ±100 ppm/°C all resistances maximum
Moisture Resistance, MIL-STD-202D, Method 103B . 10 megohms minimum insulation resistance after removal from chamber
Seal ..... Withstands industrial cleaning processes
Vibration ... Exceeds MIL-R-22097, 20Gs
Contact Bounce . 0.1 millisecond maximum
Wiper Shift, Maximum .... 1.0% voltage ratio
Shock ..... Exceeds MIL-R-22097, 100Gs
Contact Bounce and Wiper Shift .. Same as vibration
Salt Spray .... Meets MIL-R-22097
Load Life ..... 1000 hours per MIL-R-22097
Resistance Shift, maximum . 3%
Mechanical Life . 200 cycles without discontinuity
Dielectric Strength ... MIL-R-22097
Room Conditions .. 900 volts AC minimum
70,000 feet ..... 350 volts AC minimum

**Physical Characteristics**

Shaft Torque ... 3 oz.-in. maximum
Markings ... Manufacturer's name, wiring diagram, date code, resistance and manufacturer's model number (customer's part number optional)
Mechanical Adjustment ..... 25 ±5 turns
Mechanical Stops . Wiper assembly idles
Weight ..... Approximately .04 oz.

## DIMENSIONS

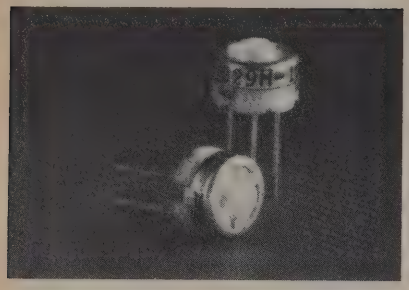
## MODEL 3329

Single Turn, Commercial
Cermet Element



### FEATURES

- Low cost commercial Cermet single turn capable of meeting MIL-R-22097
- Space saving size: 0.25″ dia. x 0.18″ high
- Low temperature coefficient: ±100 ppm/°C over entire temperature and resistance range
- 0.5 watt power rating at 85°C
- Extended temperature range: −55° to +150°C
- Sealed to withstand any wave soldering and immersion cleaning process

### FEATURES

**Electrical Specifications**

Standard Resistance Range . . . 10 ohms to 1 megohm
Resistance Tolerance . . . . . 20% standard, closer tolerances available
Absolute Minimum Resistance . . . . . 2 ohms
Continuity . . . . . Maintained for full mechanical range
Contact Resistance Variation Maximum . . . . . 3 ohms or 3% whichever is greater
Insulation Resistance, 500 volts DC . . . . 1000 megohms minimum

**Environmental Specifications**

Power Ratings:
85°C . . . . . 0.5 watt
150°C . . . . . 0 watt
Operating Temperature Range . . . . . −55° to +150°C
Temperature Coefficient . . . . ±100 ppm/°C all resistances maximum
Humidity, MIL-STD-202, Method 103 . . . . . 10 megohms minimum insulation resistance after removal from chamber
Vibration . . . Exceeds MIL-R-22091, 30Gs
Contact Bounce . 0.1 millisecond maximum
Shock . Exceeds MIL-R-22097, 100Gs
Contact Bounce . . . . . Same as Vibration
Salt Spray . . . . Meets MIL-R-22097
Load Life . . . . . 1000 hours per MIL-R-22097
Mechanical Life . 200 cycles without discontinuity
Effective Electrical Rotation . . 240° nominal
Dielectric Strength . . . MIL-R-22097 Room Conditions . . . 500 volts AC minimum

**Physical Specifications**

(85°C) Immersion Leak Test . . . . . No leaks
Markings . . . Date code, resistance, and manufacturer's model number
Appearance . . . . Legible markings, no physical defects
Mechanical Stops . . . . . Solid
Shaft Torque . . 5.0 oz.-in. maximum
Weight . . . . Approximately 0.08 oz.
Terminals H.P.W. . . . . Tinned pins

Specification Note: Closer performance tolerances can be supplied upon request.

Specifications are subject to change without notice.

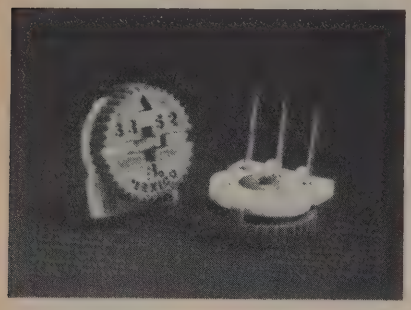
## MODEL 3352

Commercial, Cermet Variable Resistor
⅜″ Diameter



### FEATURES

- Adjustability of ±0.05% voltage ratio
- Low temperature coefficient of ±100 ppm/°C
- 0.75 watt power at 40°C
- CRV is 1% of 1 ohm
- Designed to withstand circuit board processes

### SPECIFICATIONS

**Electrical Characteristics**

Standard Resistance Range . . 10 to 5,000,000 ohms
Resistance Tolerance . . . . . ±20% standard, closer tolerances available
Absolute Minimum Resistance . . . 2 ohms maximum
Adjustability:*
Voltage Ratio . . . . . ±0.05%
Resistance . . . . . ±0.10%
Contact Resistance Variation . 1 ohm or 1%, whichever is greater
Insulation Resistance, 500 volts DC . . . . 1000 megohms minimum

**Physical Characteristics**

Markings . . . . Resistance value and manufacturer's model number
Mechanical Stops . . . . . Solid
Shaft Torque . . 5.0 oz.-in. maximum
Weight . . . . Approximately 0.01 oz.
Terminals . .020 in. Dia. Solderable Pins

**Environmental Characteristics**

Power Ratings:
40°C (250 volts AC Maximum . . . . . 0.75 watt
85°C . . . . . 0.50 watt
125°C . . . . . 0 watt
Operating Temperature Range . . . . . −55° to +125°C
Temperature Coefficient . . . . ±100 ppm/°C
Humidity, MIL-STD-202, Method 103 . . . . . 10 megohms minimum resistance after removal from chamber
Vibration . . . Exceeds MIL-R-22097, 30Gs
Contact Bounce . 0.1 millisecond maximum
Shock . Exceeds MIL-R-22097, 100Gs
Contact Bounce . 0.1 millisecond maximum
Load Life . . . . . 1000 hours per MIL-R-22097
Resistance Shift Maximum . . 3%
Mechanical Life . 200 cycles without discontinuity
Effective Electrical Rotation . . 205° ±10°
Dielectric Strength . . . MIL-R-22097
Sea Level . 500 volts AC minimum

* The precision with which the output voltage ratio or output resistance of a device can be set to the desired value.

Specification Note: Closer performance tolerances can be supplied upon request.

Specifications are subject to change without notice.

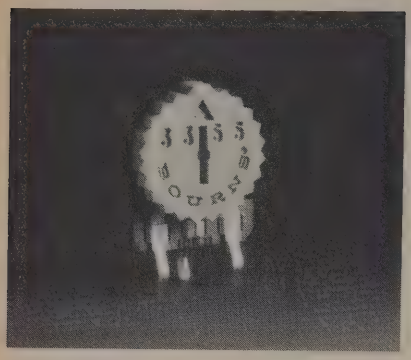
## MODEL 3355

Single Turn Conductive Plastic Economy Trimmer



### FEATURES

- Available from 100 ohms to 5 megohms
- Resistance tolerance ±20-± 30%
- Rated 0.25 Watt maximum at 70°C
- Tempco less than ±500 ppm/°C
- Flame retardant construction meets UL94V-1
- Integral thumbwheel is standard
- Board wash capability
- Adjustability 0.1%

### SPECIFICATIONS

**Electrical Characteristics**

Standard Resistance Range . . 100 ohms to 5 megohms
Resistance Tolerance . . . . . ±20%
Adjustability:* (above 1 meg) ±30%
Voltage Ratio . ±0.1% maximum
Resistance . . . ±0.2% maximum
Contact Resistance Variation . . 1% maximum
Absolute Minimum Restistance . . . 2 ohms maximum
Effective Electrical Angle . . . . 240° ±10°
Voltage Coefficient . . . . . .08%/volt maximum

**Environmental Characteristics**

Power Ratings:
25°C . . . . . 0.50 watt
70°C . . . . . 0.25 watt
100°C . . . . . 0 watt
Operating Temperature Range . 0°C to 100°C
Temperature Coefficient . . . . . 500 ppm/°C maximum
Humidity, 24 hours at 95% RH . . . . . Resistance shift ±7.5 % maximum
Vibration . . . . . 30Gs
Contact Bounce . 0.1 millisecond maximum
Shock . . . . . 100Gs
Contact Bounce . 0.1 millisecond maximum
Load Life . 100 hours, 70°C, ¼ watt
Resistance Shift . ±5% maximum
Mechanical Life . 200 cycles without discontinuity
Flammability . . . . . Meets UL94V-1
Solvent Resistance . . . . Withstands most cleaning solvents and detergents
Resistance Shift . ±5% maximum

**Physical Characteristics**

Mechanical Rotation . . . 260° ±10°
Markings . . . Manufacturer's name, model number, resistance value
Appearance . . . . Legible markings, no physical defects
Mechanical Stops . . . . . Solid
Adjustment Torque . . . . . 3 oz.-in. maximum
Weight . . Approximately 1.3 grams
Terminals . Solderable snap-in pins

* The precision with which the output voltage ratio or output resistance of a device can be set to the desired value.

Blue is the standard color on all adjustment wheels. Optional colors (available only on the Standard Thumbwheel style) are: Black, White, Violet, Green, Yellow, Orange, Red and Brown. Consult the factory for ordering these optional colors.

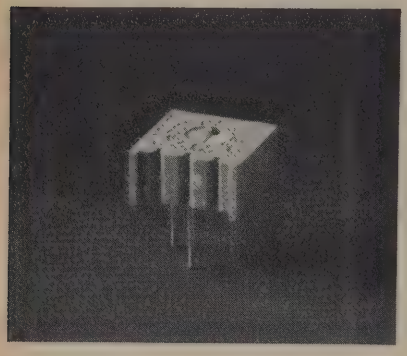
## MODEL 3386

Commercial, Cermet Potentiometer
3/8" Square



### FEATURES

- Low tempco of ±100 ppm/°C
- Extended temperature range: −55° to +125°C
- 0.5 watt power rating at 85°C
- Typical CRV of 1%
- Fourteen standard terminal styles
- Sealed to withstand immersion
- Adjustability of ±0.03% voltage ratio

### SPECIFICATIONS

**Electrical Characteristics**

Standard Resistance Range .... 10 to 2,000,000 ohms
Resistance Tolerance ..... 10% standard, closer tolerances available
Absolute Minimum Resistance .. 2 ohms maximum
Adjustability:*
Voltage Ratio ..... ±0.03%
Resistance ..... ±0.10%
Contact Resistance Variation ..... 1 ohm or 1% maximum whichever is greater
Insulation Resistance, 500 volts DC .... 1000 megohms minimum

**Physical Characteristics**

Seal ..... MIL-R-22097 immersion
Markings .. Date code, resistance value, and model number
Appearance .... Legible markings, no physical defects
Mechanical Stops ..... Solid
Shaft Torque . 5.0 oz.-in. maximum
Weight .... Approximately 0.03 oz.
Terminals . .020 in. Dia. Solderable Pins

**Environmental Characteristics**

Power Ratings:
85°C (300 volts AC Maximum) ..... 0.5 watt
125°C ..... 0 watt
Operating Temperature Range ..... −55° to +125°C
Temperature Coefficient .... ±100 ppm/°C
Humidity, MIL-STD-202, Method 103 ..... 10 megohms minimum insulation resistance after removal from chamber
Vibration ... Exceeds MIL-R-22097, 30Gs
Contact Bounce . 0.1 millisecond maximum
Shock . Exceeds MIL-R-22097, 100Gs
Contact Bounce . 0.1 millisecond maximum
Load Life ..... 1000 hours per MIL-R-22097
Resistance Shift Maximum .. 3%
Mechanical Life . 200 cycles without discontinuity
Effective Electrical Rotation .. 280° ±15°
Mechanical Rotation ... 310° ±15°
Dielectric Strength ... MIL-R-22097
Room Conditions .. 900 volts AC minimum

Specification Note: Closer performance tolerances can be supplied upon request.

Specifications are subject to change without notice.

* The precision with which the output voltage ratio or output resistance of a device can be set to the desired value.

## MODELS 3391, 3392

Single Turn Conductive Plastic Subminiature Potentiometer with Optional Switch

### FEATURES

- Conductive plastic elements for long life and stability
- O-ring for seal against dust and moisture
- Switch with detent
- Linear or non-linear tapers to amplifier circuits

BOURNS Models 3391 and 3392 are subminiature, single turn adjustment potentiometers specifically designed for applications requiring extremely compact, high density circuitry. Applications include hearing aid volume controls, subminiature paging systems, hand-held probes, other miniature equipment and hybrid circuits.

Options include: axial or radial leads, flat knob or dome cap, with or without switches, CW or CCW tapers plus six (6) color tones.

### SPECIFICATIONS

**Electrical Characteristics**

Resistance Range . 1K to 500 K ohms
Resistance Tolerance ..... 20% standard
Minimum End Resistance .. 5 ohms maximum
Contact Resistance Variation .. 3% maximum
Resistance Taper ... (See Figure 4)
Insulation Resistance ... 1 megohm minimum
Switch Resistance
  On Position .... 1 ohm maximum
  Off Position . 1 megohm minimum
Switch Current .. 100 ma maximum

**Environmental Characteristics**

Power Ratings:
  40°C (100 volts AV or 3 ma maximum) ..... 1/20 watt
Operating Temperature Range ..... −30°C to +70°C
Shock ..... 100Gs
  Total Resistance Shift .... ±2% maximum
Rotational Life
  (Without Switch) .. 50,000 cycles
  (With Switch) ..... 25,000 cycles
Load Life 1000 Hours
  Resistance Shift. ±15% maximum
Humidity, 24 hours @ 95%
  Resistance Shift After Removal From Chamber ..... ±10% maximum (±25% maximum above 50K ohm)

**Physical Characteristics**

Mechanical Rotation .... 220° ±5°
Adjustment Torque ..... .5 oz.-in. maximum
Stop Strength ... 3 oz.-in. minimum
Terminals .... Solderable flat leads

Beige is the standard color on all adjustable caps and knobs. Optional colors are: Brown, Black, Tan, Tan/Pink and Pink.

Specifications are subject to change without notice

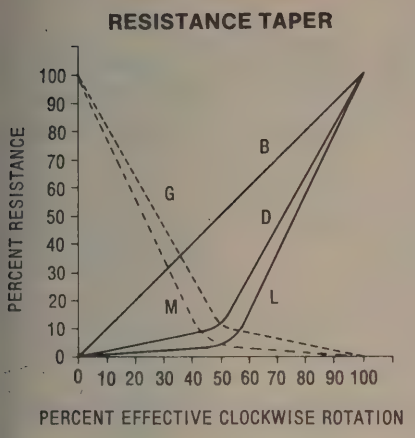
## RESISTANCE TAPER



## PART NUMBERING INFORMATION

**3391 A — 1 — 102 D**

Model:
3391 — Flat Cap Model (Cap attached)
3392 — Dome Cap Model (Cap not included)*

* Part numbers for Standard Dome Caps
H160-1 Black H160-4 Tan
H160-2 Brown H160-5 Tan/Pink
H160-3 Beige H160-6 Pink

Terminal:
A — Axial
R — Radial

Special Types:

Model 3391 (Cap Attached)
1 — W/O Switch, Black
2 — W/O Switch, Brown
3 — W/O Switch, Beige
4 — W/O Switch, Tan
5 — W/O Switch, Tan/Pink
6 — W/O Switch, Pink
11 — With Switch, Black
12 — With Switch, Brown
13 — With Switch, Beige
14 — With Switch, Tan
15 — With Switch, Tan/Pink
16 — With Switch, Pink

Model 3392 (Cap ordered separately)*
1 — W/O Switch
11 — With Switch

Resistance Code: 1K Ohm

Taper:
B — Linear
D — CW, 10% Audio
G — CCW, 10% Audio
L — CW, 2% Audio Non-Standard
M — CCW, 2% Audio Non-Standard

## MODEL 80 MODULAR POTENTIOMETERS

| Model No. | Description |
|---|---|
| 81/82 | Single/multiple ⅝″ square — bushing mount Cermet and conductive plastic elements |
| 83/84 | ⅝″ square — 10-turn wirewound |
| 85/86 | Same as 81/82 with rotary switch module |
| 87/88 | Semi-precision single/multiple ⅝″ square—bushing mount Cermet and conductive plastic elements |

This family of ⅝″ square Bourns modular potentiometers combines the design versatility of advanced construction with factory assembled reliability and quality assurance. An exclusive shaft torque control feature provides a remarkably consistent feel unit to unit.

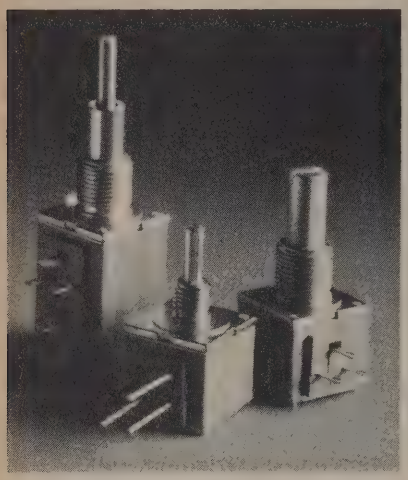
# MODEL 81/82

Modular Potentiometer Single or Multiple ⅝" Square Sections Bushing Mount Cermet and/or Conductive Plastic Elements



BOURNS® Model 81/82 MODULAR potentiometer combines the design versatility of advanced modular construction with factory assembled reliability and quality assurance. The net result is a consistently high quality ⅝" square panel potentiometer that can be delivered in single or multiple section configurations to suit your specific applications . . . from off-the-shelf components . . . at low cost. The Model 81/82's unique shaft torque control feature provides a smooth, high quality feel that will enhance the "human engineering appeal" of your equipment. This feature enables Bourns to produce a panel potentiometer that has a remarkably consistent feel (torque range only .3 to 2.0 oz.-in.) from unit-to-unit . . . regardless of the number of modules ganged on a single shaft.

## SPECIFICATIONS

### Electrical Characteristics

| | Conductive Plastic | Cermet |
|---|---|---|
| Standard Resistance Range | | |
| (Tapers A, B, H & E) | (B & E) 250 to 5,000,000 ohms | (A & H) 50 to 5,000,000 ohms |
| (Tapers C, D, F & G) | (D & G) 1000 to 2,500,000 ohms | (C & F) 1000 to 2,500,000 ohms |
| Resistance Tolerance | ±20% standard (B, D & G tapers) ±10% available (E taper) | ±10% standard (A, C and F tapers) ±5% available (H taper) |
| Independent Linearity | (B & E tapers) ±5% | (A & H tapers) ±5% |
| Absolute Minimum Resistance | 2 ohms | 2 ohms |
| Continuity | Maintained for full mechanical angle | Maintained for full mechanical angle |
| Theoretical Electrical Travel | 240° ±5° | 240° ±6° |
| Maximum Contact Resistance Variation (Tapers A, B, H & E) | (B & E) ±1% or 3Ω, whichever is greater | (A & H) ±1% or 3Ω, whichever is greater |
| (Tapers C, D, F & G) | (D & G) ±2% | (C & F) ±2% |
| Resolution | Infinite | Infinite |
| Dielectric Strength | MIL-R-23285 | MIL-R-23285 |
| Sea Level | 1000 Volts RMS | 1000 Volts RMS |
| 70,000 Ft. | 500 Volts RMS | 500 Volts RMS |
| Insulation Resistance (500 Volts DC) | 1000 megohms | 1000 megohms |
| Power Rating at 70°C | | |
| Single Section | 1 Watt | 2 Watts |
| Multiple Section | .5 Watts/Section | 1 Watt/Section |
| Roll-on/Roll-off | .25% max. (B & E tapers) .1% max: CCW (D taper); CW (G taper) .5% max: CW (D taper); CCW (G taper) | .5% max. (A & H tapers) .1% max: CCW (C taper); CW (F taper) 1.0% max: CW (C taper); CCW (F taper) |

### Environmental Characteristics

| | Conductive Plastic | Cermet |
|---|---|---|
| Temperature Range | −65° to +125°C | −65° to +150°C |
| Temperature Coefficient Over Temperature Range | ±1000 ppm/°C | ±150 ppm/°C |
| Vibration, 15G's (Single Section) | MIL-R-23285 | MIL-R-23285 |
| Maximum Wiper Shift | 5% of total resistance | 5% of total resistance |
| Maximum Total Resistance Shift | ±2% | ±2% |
| Shock, 30G's (Single Section) | MIL-R-23285 | MIL-R-23285 |
| Maximum Wiper Shift | 5% of total resistance | 5% of total resistance |
| Maximum Total Resistance Shift | ±2% | ±2% |
| Load Life | 1000 Hrs. | 1000 Hrs. |
| Maximum Total Resistance Shift | ±10% | ±5% |
| Rotational Life | 100,000 Cycles | 100,000 Cycles |
| Maximum Total Resistance Shift | 10 ohms or ±12% | 10 ohms or ±12% |
| Moisture Resistance | | |
| Maximum Total Resistance Shift | ±10% | ±5% |

### Mechanical Characteristics

| | Conductive Plastic | Cermet |
|---|---|---|
| Shaft Torque | | |
| Single Section (A & B Bushing) | .5 to 1.5 oz.-in. | .5 to 1.5 oz.-in. |
| Single Section (C & E Bushing) | .3 to 1.5 oz.-in. | .3 to 1.5 oz.-in. |
| Dual Section (All Bushings) | .5 to 2.0 oz.-in. | .5 to 2.0 oz.-in. |
| Triple Section (All Bushings) | .5 to 2.0 oz.-in. | .5 to 2.0 oz.-in. |
| Quadruple Section (All Bushings) | .5 to 2.0 oz.-in. | .5 to 2.0 oz.-in. |
| Shaft Locking Torque with Locknut @ 10 lb. in. (B & E Bushing) | 20 oz.-in. | 20 oz.-in. |
| Stop Strength | ② 4 lbs.-in. | ② 4 lbs.-in. |
| Total Mechanical Travel | 300° ±5° | 300° ±5° |
| Weight (Single Section) | 21 Gms. max. | 21 Gms. max. |
| Each Additional Section | 6 Gms. max. | 6 Gms. max. |
| Terminals | ① Printed circuit terminals or solder lugs | |
| Markings | Manufacturer's symbol, wiring diagram, date code, resistance, manufacturer's P/N | |

① Model 81/82 performance not guaranteed after being subjected to printed circuit board cleaning procedures.

② Consult factory for dual concentric shafts.

| N Plain 1/4" D. x 3/8" L. | F Single, Flatted | 24 | |
| | K Dual Concentric 1/8" D. Outer - 1st Sec. Plain End 3/64" D. Inner - Other Sec. | 32 | |
| E Locking 1/4" D. x 1/2" L. | E Single, Slotted, 1/8" D. | 20 | |

* Available in Cermet only. Audio tapers available from 1K ohm to 2.5 megohm only.

NOTES:
1. Taper and Resistance Code for 1st Section.
2. Taper and Resistance Code for 2nd Section.
3. Shaft length code is based on the number of 1/32" increments in the length from the mounting surface (FMS). Shaft lengths other than those listed are available on special order. Dual concentric shaft length code indicates length of inner shaft. Standard length of outer shaft is 3/8" less. Consult factory for non-standard concentric shaft lengths or module drive combinations.
4. Other anti-rotation lug options, resistance values, tapers and shaft end styles are available on special order. Consult factory for details.

## MOUNTING HARDWARE

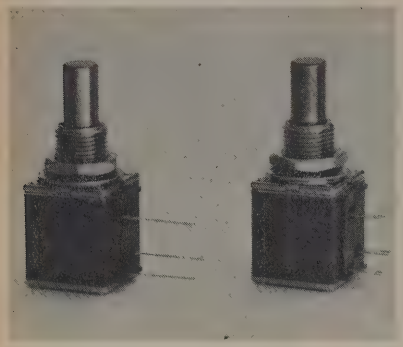
# MODEL 83/84

Modular Potentiometer
⅝" Square 10-Turn, Wirewound



## SPECIFICATIONS

**Electrical Characteristics**

Resistance Range . 200 ohm to 100K
Resistance Tolerance ..... ±5%
Linearity (Independent) .. ±0.25% maximum
Effective Electrical Angle ... 3600° +10°/−0°
Absolute Minimum Resistance .... 1.0 ohm or 0.1%, whichever is greater
Noise .... 100 ohm ENR maximum
Power Rating:
25°C ..... 1.8 watts
70°C ..... 1.0 watt
125°C ..... 0 watt
Dielectric Strength @ Sea Level .... 1000 volts AC minimum
Insulation Resistance, 500 volts DC .... 1000 megohms minimum

**Environmental Characteristics**

Temperature Range ..... −55° to +125°C
Temperature Coefficient over Temperature Range . ±50 ppm/°C
Vibration ..... 15 Gs
Wiper Bounce .. 0.1 milliseconds maximum
Shock ..... 50Gs
Wiper Bounce .. 0.1 milliseconds maximum
Load Life ..... 1000 hours
Resistance Shift . 2.0% maximum

**Mechanical & Physical Characteristics**

Mechanical Rotation ..... 3600° +15°/−0°
Shaft Runout ..... .006 in. T.I.R.
Shaft End Play ..... .014 in. T.I.R.
Shaft Radial Play .... .005 in. T.I.R.
Rotational Life .... 1,000,000 Shaft Revolutions
Stop Strength . 48 oz.-in. minimum[1]
Torque (1 or 2 section) .... 0.25 to 2.0 oz.-in.
Weight .... Approximately 0.75 oz.
Marking . Manufacturer's name and part number, resistance value, wiring diagram & date code

[1] Consult factory for dual concentrics

**Resolution Table**

| Resistance (ohms) | Resolution (%) |
|---|---|
| 200 | .048 |
| 500 | .036 |
| 1K | .029 |
| 2K | .024 |
| 5K | .023 |
| 10K | .019 |
| 20K | .015 |
| 50K | .011 |
| 100K | .0095 |

## DIMENSIONS

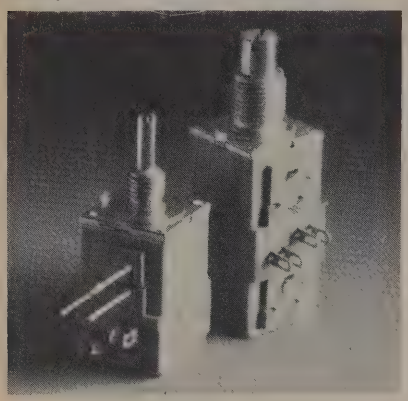
## MODEL 85/86

Model 81/82 Modular Potentiometer with Rotary Switch Module (Pat. Pend.)



The BOURNS® Model 81/82 "Modular" Potentiometers are available with optional rotary switch modules for applications where integral "on-off" function control is desired. The combination is designated the Model 85/86.

Switch modules may be ganged behind a primary potentiometer module in any combination of up to three switches and/or secondary potentiometer modules.

A positive action "non-tease" detent design with low actuation torque, compliments the smooth feel of the Model 81/82 Potentiometer.

Contacts of fine silver with gold overlay provide exceptionally low contact resistance for reliable operation in low level analog or logic circuits.

## SPECIFICATIONS

**Electrical Characteristics**

Contacts:
DPST . . . 2 N.O. & N.O./N.C. Std.
DPDT . . . . . 2 Pr. Transfer-Std. (Break before make)
Power Rating (Resistive Load):
DPST . . 2 A. @ 125 VRMS-60 Hz. or 2 A. @ 28 V. DC, 1A @ 250 VRMS-60 Hz.
DPDT . . . 1A @ 125 VRMS-60 Hz. or 1A. @ 28V. DC
Dielectric Strength
Sea Level . 1000 VRMS minimum
Insulation
Resistance . . . . . 1000 megohms
Contact Resistance (.1 V. DC-10 ma.) . . 10 milliohms maximum
Contact Bounce . . . . 5 milliseconds maximum

**Mechanical Characteristics**

Detent Actuation Torque (Each Section-Switch Module only) . . . . . 3-7 oz.-in.
Shaft Torque (Out of Detent, 2-4 Module Assembly) . 0.5-2 oz.-in.
Detent . . . . . CW or CCW-Std.
Actuation Angle . . . . . 20° ±5°
Contacts . . . . . Fine Silver with Gold Overlay
Terminals . . . . . Solder Lug only
Standard Orientation . In-Line with Control Terminals
Optional . . . . . Rotated 90° CCW from Standard
Terminal Strength (Before and After Soldering Heat Exposure) . . . 2 lb. minimum

**Environmental Characteristics**

Operating Temperature Range . . . . . 0° to +70°C
Power Rating . . . . . As Specified
Contact Resistance . 10 milliohms maximum
Actuating Torque (SW. only) . . . . . 3-7 oz.-in.
Exposure Temperature Range . . . . . −65° to +125°C
Vibration 8Gs (Dual Section) . . . . . 44-2000 Hz.
Contact Resistance . 10 milliohms maximum
Contact Bounce . 0.1 millisecond maximum
Shock, 20Gs (Dual Section):
Contact Resistance . 10 milliohms maximum
Contact Bounce . 0.1 millisecond maximum
Rated Power Load . 25,000 Cycles
Rotational Life (50% Duty Cycle @ Actuating Torque (SW only) . . . . . 2-7 oz.-in.
Moisture Resistance . MIL-STD-202, Method 106
Contact Resistance . 10 milliohms maximum
Insulation Resistance (After 24 Hours @ Room Temperature) . 100 megohms minimum
Housing Material . . . . . High Temperature, Flame Retardant Thermosetting Plastic

Note: Refer to Model 81/82 for potentiometer specifications.

## NOTES

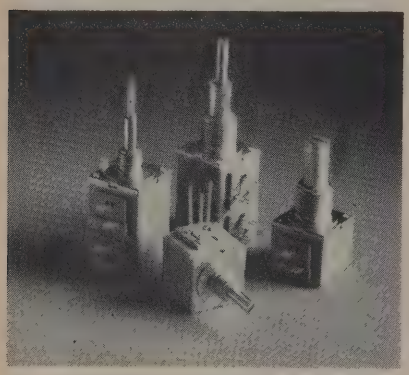
1. Taper and Resistance Code for 1st Section.
2. Switch Code for 2nd Section. See back page for Switch Code and description of switches available at special option.
3. Shaft length code is based on the number of 1/32" increments in the length from the mounting surface (FMS). Shaft lengths other than those listed are available on special order. Dual concentric shaft length code indicates length of inner shaft. Standard length of outer shaft is 3/8" less. Consult factory for non-standard concentric shaft lengths or module drive combinations.
4. Other anti-rotation lug options, resistance values, tapers and shaft end styles are on special order. Consult factory for details.

Specifications are subject to change without notice.

Specification Note: Closer performance tolerances can be supplied upon request.

# MODEL 87/88

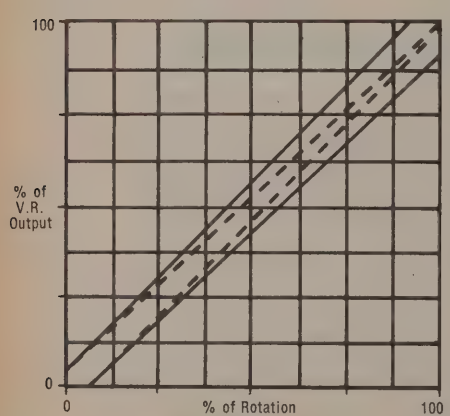
Semi-Precision/Modular Potentiometer/
Single or Multiple ⅝" Square Sections
Bushing Mount/Cermet and/ or
Conductive Plastic Elements



The BOURNS® Model 87/88 semi-precision modular potentiometer is a unique new control designed to fill the performance and price gap between low-cost industrial controls and single-turn precision potentiometers.

The 87/88 is available with either cermet or conductive plastic resistive elements with a zero-based linearity as low as 2% standard or 1% optional. This linearity will satisfy the more exacting requirements of applications where the output of the equipment must be related to a front panel control (dial) setting.

An exclusive shaft torque control feature provides a remarkably consistent feel (torque range of only .3 to 2.0 oz.-in.) from unit-to-unit, regardless of the number of modules ganged on a single shaft.



**ZERO BASE LINEARITY**

CCW end of overlay is fixed at the zero reference point. Only the CW end can be moved for best position.

## MODEL 3500

⅞″ Diameter 10-Turn Bushing Mount Wirewound Element

### FEATURES

- 0.20% linearity — standard)
- 20% longer resistance element in a compact housing only 1.00″ long
- Extended temperature range −65° to +125°C
- Housing high temperature, moisture resistant thermosetting plastic
- SILVERWELD® termination eleminates vulnerable single wire termination
- Performance of Model 3500 is guaranteed by the Bourns Reliability Assurance Program which includes individual inspection to published electrical and physical characteristics
- Custom design capability is available to satisfy your most demanding and difficult special requirements

### SPECIFICATIONS

The specifications listed below are for the standard model. Modifications of all types (mechanical, electrical and environmental) can be custom engineered to your specific requirements.

**Electrical Characteristics**

Resistance Range ..... 50 ohms to 500K ohms
Resistance Tolerance ..... ±3%
Linearity (Independent) .. ±0.20%
Resolution ..... See standard resistance table
Effective Electrical Angle ... 3600° (+10°/−0°)
Absolute Minimum Resistance .... 1.0 ohm or 0.1%, whichever is greater
Noise ... 100 ohms ENR maximum
Power Ratings:
70°C ..... 2.0 watts
125°C ..... .0 watt
Dielectric Strength ... MIL-R-12934
Room Conditions . 1500 volts AC minimum
70,000 feet (0.8″ hg.) . 400 volts AC minimum
Insulation Resistance
500 volts DC .... 1000 megohms minimum

**Environmental Characteristics**

Temperature Range ..... −65° to +125°C
Temperature Coefficient of Wire[1] ..... 20 ppm/°C maximum
Humidity ... MIL-R-12934 humidity cycling
Vibration ..... MIL-R-12934, 20Gs
Wiper Bounce ... 0.1 millisecond maximum
Wiper Shift ..... 0.1% maximum
Shock ..... MIL-R-12934, 100Gs
Wiper Bounce and Wiper Shift . Same as Vibration
Load Life . MIL-R-12934, 1000 hours
Resistance Shift . 2.0% maximum
Sand and Dust ..... MIL-E-5272
Fungus ..... MIL-E-5272
Salt Spray ..... MIL-R-12934

**Mechanical and Physical Characteristics**

Mechanical Angle ..... 3600° (+10°/−0°)
Shaft Runout ..... .002 in. T.I.R.
Lateral Runout ..... .005 in. T.I.R.
Pilot Diameter Runout . .002 in. T.I.R.
Shaft End Play ..... .005 in. T.I.R.
Shaft Radial Play .... .003 in. T.I.R.
Rotational Life[1] .... 2,000,000 shaft revolutions
Stop Strength . 96 oz.-in. maximum
Ganging ..... 2 cups maximum
Torque ..... 0.6 oz.-in. maximum
Add 75% for additional cup
Weight ..... Approximately 1.0 oz.
Terminals . Gold-plated solder lugs
Markings . Manufacturer's name and part number, resistance value and tolerance, linearity tolerance, wiring diagram, and data code.

**Notes:**

[1] Consult manufacturer for complete specification details for resistance below 500 ohms.

Specification Note: Closer performance tolerances can be supplied upon request.

Specifications are subject to change without notice.

## MODEL 3540

⅞″ Diameter 10-Turn Bushing Mount Wirewound Element

### FEATURES

- Small size: extends ¾″ behind panel
- High performance at low cost
- Unique, rugged, mechanically locked construction
- Direct terminal-to-element, SILVERWELD® bond eliminates vulnerable multi-joint connections
- Linearity: 0.25%
- Temperature Range: —55°C to +125°C
- Factory options available:
  - 2 section unit with single or concentric shafts
  - Anti Rotation Lug
  - High Shaft Torque
  - Tight Linearity
  - Tight Resistance Tolerance
  - Many Others

### SPECIFICATIONS

**Electrical Characteristics**

Resistance Range ... 100 ohms to 100K ohms
Resistance Tolerance ..... ±5%
Linearity (Independent) .. ±0.25%
Resolution ..... See standard resistance table
Effective Electrical Angle ... 3600° (+10°/—0°)
Absolute Minimum Resistance ... 1.0 ohm or 0.1%, whichever is greater
Noise ... 100 ohms ENR maximum
Power Ratings:
70°C ..... 2.0 watts
125°C ..... 0 watt
Second Section (-135 or -468) . 1.5 Watts at 70°C
Dielectric Strength ... MIL-R-12934
Sea Level ..... 1000 volts AC minimum
Insulation Resistance
500 volts DC .... 1000 megohms minimum

**Environmental Characteristics**

Temperature Range ..... —55° to +125°C
Temperature Coefficient of Wire[1] ..... 20 ppm/°C maximum
Vibration ..... MIL-R-12934, 15Gs
Wiper Bounce ... 0.1 millisecond maximum
Shock ..... MIL-R-12934, 50Gs
Wiper Bounce ... 0.1 millisecond maximum
Load Life . MIL-R-12934, 1000 hours
Resistance Shift . 2.0% maximum

**Mechanical and Physical Characteristics**

Mechanical Angle ..... 3600° (+10°/—0°)
Shaft Runout ..... .003 in. T.I.R
Lateral Runout ..... .005 in. T.I.R
Pilot Diameter Runout . .003 in. T.I.R
Shaft End Play ..... .010 in. T.I.R
Shaft Radial Play .... .003 in. T.I.R
Rotational Life[1] .... 1,000,000 shaft revolutions
Stop Strength .. 75 oz-in. minimum
Torque ..... 0.5 oz.-in. maximum
Weight ..... Approximately .75 oz
Terminals . Gold-plated solder lugs
Markings . Manufacturer's name and part number, resistance value and tolerance, linearity tolerance, wiring diagram, and date code

**Notes:**

[1] Consult manufacturer for complete specification details for resistance below 200 ohms.

Specification Note: Closer performance tolerances can be supplied upon request.

# MODEL 3541

10-Turn, HYBRITRON™ Potentiometer
⅞″ Diameter, Bushing Mount

## FEATURES

- HYBRITRON™ conductive plastic-on-wirewound element
- Compact size: ⅞″ diameter, ¾″ depth
- Rotational life: 5,000,000 shaft revolutions
- Rugged, mechanically locked construction
- Linearity: 0.25%
- Temperature range: —55°C to +125°C
- Options available include: 2 section unit with common or concentric shafts and anti-rotation lug
- Temperature coefficient ±100 ppm

Bourns has combined the best features of both wirewound and conductive plastic resistance elements in a new composite we call HYBRITRON™.
The result is a precision potentiometer with exceptionally long life and infinite resolution . . . PLUS a low temperature coefficient and good stability. This hybrid element is used in Bourns new Model 3541 10-turn unit.

The 3541 employs Bourns exclusive SILVERWELD® direct, terminal-to-element bond for the ultimate in reliability.

## SPECIFICATIONS

**Electrical Characteristics**

Resistance Range . . . . 1K ohms t 100K ohm
Resistance Tolerance . . . . ±10%
Linearity (Independent)[1] . ±0.25%
Resolution . . . . . Essentially infinit
Effective Electrical Angle . . . 3600 (+10°/—0°
Output Smoothness . . . . . 0.015% maximun
Power Ratings:
70°C . . . . . 2.0 watt
125°C . . . . . 0 wat
Second Section
(-135 or -468) . . 1.5 watts at 70°C
Dielectric Strength . . . MIL-R-39023
Sea Level . . . . . 1000 volts AC minimum
Insulation Resistance
500 volts DC . . . . 1000 megohms minimum

**Environmental Characteristics**

Temperature
Range . . . . . —55° to +125°C
Temperature Coefficient . . . . ±100 ppm/°C maximum
Vibration . . . . . MIL-R-39023 15Gs
Wiper Bounce . . . 0.1 millisecond maximum
Shock . . . . . MIL-R-39023, 50Gs
Wiper Bounce . . . 0.1 millisecond maximum
Load Life . MIL-R-39023, 1000 hours
Resistance Shift . 5.0% maximum

**Mechanical and Physical Characteristics**

Mechanical Angle . . . . . 3600° (+10°/—0°)
Shaft Runout . . . . . .003 in. T.I.R.
Lateral Runout . . . . . .005 in. T.I.R.
Pilot Diameter Runout . .003 in. T.I.R.
Shaft End Play . . . . . .010 in. T.I.R.
Shaft Radial Play . . . . .003 in. T.I.R.
Rotational Life[1] . . . . 5,000,000 shaft revolutions
Stop Strength . . 75 oz.-in. minimum
Torque[2] . . . . . 0.5 oz.-in. maximum
Weight[2] . . . . . Approximately .80 oz.
Terminals . . . . . Solder lugs
Markings . Manufacturer's name and part number, resistance value and tolerance, linearity tolerance, wiring diagram, and date code.

**Notes:**

[1] From 1% to 99% VR output.

[2] Single Unit specification.

Specification Note: Closer performance tolerances can be supplied upon request.

## MODEL 3600

KNOBPOT® Potentiometer ¾" Diameter
10-Turn Bushing Mount
Wirewound Element

### FEATURES

- KNOBPOT® precision potentiometer and readout concept.* Potentiometer, knob, and readout dial in one package requiring less front panel space than most dials alone
- Readability, Repeatability, and Phasing. New clock face readout provides excellent readability and setting accuracy previously available only in larger diameter dials. (Repeatability, within 0.1% voltage ratio. Phasing of dial readout to potentiometer performed at factory within ±0.5%.)
- Mounting: Only two drill holes required. Simple installation — place unit in drilled panel and secure with locskwasher and nut
- Self-locking feature provides excellent stability during vibration and shock
- Customized Dial Face Capability — Special numeral and increment marking, special color combinations

### SPECIFICATIONS

**Electrical Characteristics**

Standard Resistance Range . 100 ohms to 250K ohms
Resistance Tolerance* ..... ±5%
Accuracy (correlation of dial reading to output) ..... ±0.5% voltage ratio
Repeatability of dial reading ..... 0.1% voltage ratio
Resolution ..... See standard resistance table
Effective Electrical Angle ... 3600° normal
Absolute Minimum Resistance* .... 1 ohm or 0.1%, whichever is greater
Noise During Adjustment* .... 100 ohms ENR maximum
Power Ratings:
25°C ..... 1.5 watts
85°C ..... 0 watt
Dielectric Strength .. MIL-STD-202
Room Conditions . 1000 volts AC
70,000 feet ..... 400 volts AC

**Environmental Characteristics**

Temperature Range ..... −65° to +85°C
Temperature Coefficient of Resistance Wire[1] ... 20 ppm/°C maximum
Humidity . MIL-STD-202, Method 103
Vibration ..... MIL-R-12934, 10Gs
Wiper Bounce ... 0.1 millisecond
Wiper Shift ..... 0.2% maximum
Shock ..... MIL-R-12934, 50Gs
Wiper Bounce and Wiper Shift . Same as Vibration
Load Life ..... 1000 hours
Resistance Shift . 2.0% maximum
Sand and Dust ..... MIL-E-5272
Salt Spray ..... MIL-R-12934
Fungus ..... MIL-E-5272

## MODEL 3610

Digital KNOBPOT® Potentiometer
⅞" Diameter, 10-Turn,
Snap-in Mounting, Wirewound Element

### FEATURES

- Integral digital readout, knob and potentiometer
- The high accuracy of this model is enhanced by excellent visual readability. Numbers are as easy to read as those on much larger readout devices
- Saves space 2 ways: a small diameter of only ⅞", an extension behind the panel of less than ⅞"
- Guaranteed accuracy: a premounted, prephased assembly with maximum possible error between electrical output and dial reading specified at ±.5% for all resistances. This error is the combination of terminal base linearity and dial accuracy
- Simple to install: new snap-in mounting cup saves time and labor and provides a shock-resistant mounting
- Recessed lens offers protection from breakage, especially during installation
- Specials, such as custom knobs, readout faces, higher accuracies and a handy removal tool are readily available. Consult any Bourns sales office

### SPECIFICATIONS

**Electrical Characteristics**

Standard Resistance Range . 100 to 250,000 ohms
Resistance Tolerance ..... ±5%
Accuracy (correlation of dial reading to output) ..... ±0.5% voltage ratio
Repeatability of dial reading . 0.1% voltage ratio
Resolution ..... See standard resistance table
Effective Electrical Angle ... 3600° nominal
Absolute Minimum Resistance ..... 1 ohm or 0.1%, whichever is greater
Noise During Adjustment . 100 ohms ENR maximum
Power Ratings:
25°C ..... 1.5 watts
85°C ..... 0 watt
Dielectric Strength .. MIL-STD-202
Room Conditions .. 1000 volts AC
70,000 feet ..... 400 volts AC

**Environmental Characteristics**

Temperature Range ..... −25° to +85°C
Temperature Coefficient of Resistance Wire[1] .... 20 ppm/°C maximum
Humidity ..... MIL-STD-202, Method 103 B, Cond. B
Vibration ..... MIL-R-12934, 10Gs
Wiper Bounce ... 0.1 millisecond maximum
Wiper Shift ..... 0.2% maximum
Shock ..... MIL-R-12934, 50Gs
Wiper Bounce and Wiper Shift . Same as Vibration
Load Life ..... 1000 hours
Resistance Shift . 2.0% maximum

**Mechanical and Physical Characteristics**

Mechanical Angle ..... 3600° (+20°/−0°)
Rotational Life[1] ..... 50,000 dial revolutions
Stop Strength ..... 20 oz.-in.
Torque, oz.-in. ..... 1 minimum, 7 maximum (starting) 7 maximum (running)
Weight ..... 0.7 oz.
Marking .... Manufacturer's name, part number, resistance value and date code.

**Notes:**

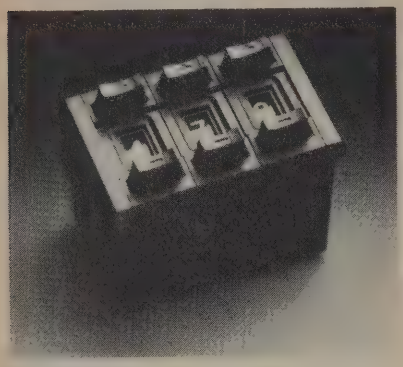
## MODEL 3680

Digital Potentiometer Snap-in Mounting, Pushbutton Action, Cermet Elements.



### FEATURES

- 0% to 99% capability by 0.1% steps
- In-Line Digital readout
- Accuracy (Dial Reading to Output Ratio) ±0.5% full scale
- Convenient snap-in mounting with bezel
- Stable Bourns proprietary built-in Cermet Resistors
- Small panel space
- Rear solder lug terminals fit AMP series 110 receptacles (dual purpose solderable)
- 100 ppm/°C tempco
- 2 watts power rating
- 10 ohms-1 Megohm standard total resistance range
- Temperature range −25°C to +85°C
- Rectangular to match other panel components

### SPECIFICATIONS

**Electrical Characteristics**

Standard Resistance Range . . . 10 ohms to 1 megohm
Resistance Tolerance . . . . . ±1.0%
Absolute Minimum Resistance . 3 ohms or .2% of total resistance whichever is greater
Resolution . . 3681 =10%; 3682 = 1%; 3683 = .1%; 3684 = .01%; 3685 = .001%
Insulation Resistance @ 500 VDC . . . 1000 megohms min.
Power Ratings:
25°C . . . . . 2 watts
85°C . . . . . 0 watt
Dielectric Strength @ Sea Level . . . . . 1000 volts AC
Accuracy:
Dial Reading to Output Ratio . . . . . ±.5% full scale
Rheostat Mode . ±1% of indicated Tolerance
Repeatability of Dial Reading . . 0.1% of full scale

**Environmental Characteristics**

Temperature Range . . . . . −25° to +85°C
Vibration @ 10G Contact Bounce . 0.1 millisecond maximum
Wiper Shift . . . 0.2% voltage ratio
Shock @ 50G . . Same as Vibration
Load Life @ 1000 Hours Total Resistance Shift . . . ±2.0%
Temperature Coefficient . . . . . ±100ppm/°C

**Mechanical and Physical Characteristics**

Expected Life . . . . . 100,000 button operations/decade
Weight . . . . . Approximately .78 oz
Terminals .11 wide x .016 thick . . . . Tinned solder lugs for 3 #20 AWG wires
Marking . . . . Manufacturer's name, wiring diagram, part number, resistance value, date code
Readout Marking . . . . . 10 positions

Specification Note: Closer performance tolerances can be supplied upon request.

Specifications are subject to change without notice.

If you're designing panels with precision data entry or setpoint controls, consider the BOURNS Model 3680 Digital Potentiometer . . . another innovative product from Bourns.

The 3680 integrates a precision incremental decade potentiometer with an easy-to-read digital display, AND a speedy pushbutton control action. It is handsome, accurate, and a "snap" to install.

Everything is INSIDE the Model 3680 . . . no resistors or mini-PC boards are required . . . nothing clutters the back of the unit to steal precious space.

## MODEL H-700

Turns Counting Dial
¾" Diameter, 10-Turn

### FEATURES

- Markings are machine engraved
- Cam detent for positive lock
- No extra panel drilling required
- Corrosion resistant, all-metal construction assures reliable performance in rugged environmental applications

The BOURNS® H-700 series vernier turns counting dials are precision machined of stainless steel and aluminum for accuracy, long life and superlative operating smoothness. These units have both the looks and feel of fine, high quality instruments.

A positive action transfer mechanism assures perfect indexing of the secondary scale. Transfer points are quiet and accurate.

### SPECIFICATIONS

**Mechanical and Physical Characteristics**

Number of Turns ..... 10
Dial Divisions ..... 50
Readability — Ten Turns .... 1 part in 500
Torque—Running, While Mounted ... 2.0 oz.-in. maximum
Markings ... H-721 White On Black Background
H-771 Black On Aluminum Background
Set Screw Tightening Torque .... 20 in. lbs. maximum

**Environmental Characteristics**

Operating Temperature Range ..... −15° to +85°C
Mechanical Life ..... 10,000 cycles
Humidity-No Damage .. 96 hours @ 95% RH

**Shaft and Bushing Requirements**

Shaft Extension Beyond Panel .... .600 minimum .800 maximum
Bushing Extension Beyond Panel .... .225 maximum (Including Shaft C Ring where applicable)

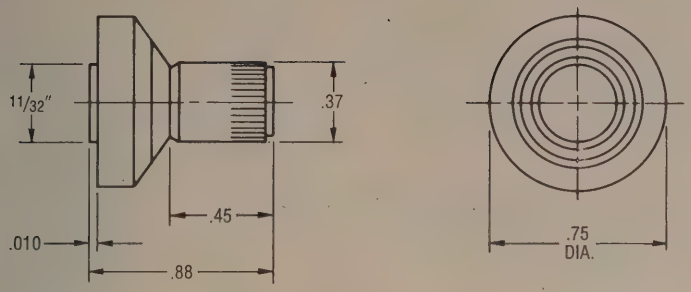
Specification Note: Closer performance tolerances can be supplied upon request.

Specifications are subject to change without notice.

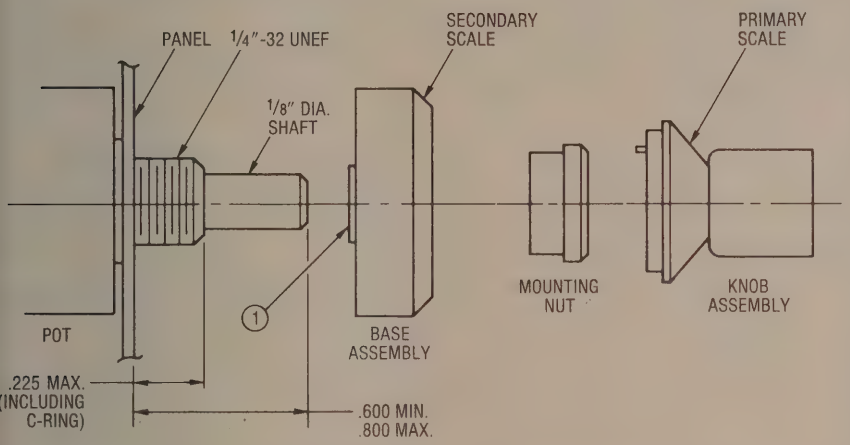
| Part No. | Body Finish | Brake | Shaft Dia. |
|---|---|---|---|
| H-721 | BLACK | NO | ⅛" |
| H-771 | CLEAR | NO | ⅛" |

BOURNS
TRIMPOT PRODUCTS DIVISION
DEPT. EM 1200 COLUMBIA AVENUE
RIVERSIDE, CALIFORNIA 92507
PHONE (714) 781-5122

## DIMENSIONS



Note: Dials also available on special order for 3/32" dia. shafts. They may be ordered in black or clear finish. Consult factory for details.



## MOUNTING REQUIREMENTS

Drill a hole in the panel to accommodate the potentiometer; nothing special is required for the dial. The unthreaded portion of the potentiometer bushing must not project through the panel. The shaft length, measured from the face of the panel, should be a minimum of .600 and a maximum of .800. The .600 dimension is an absolute minimum and in some cases optimum performance is not obtained.

[1] Notice that there is a short, 11/32" diameter, projection at the rear of the dial. This is required to hold the dial away from the panel to permit the turns-counting scale to turn freely. This dial will not function properly if this projection can fall through the panel. Suggested panel hole diameter is .281.

## MODEL H-1400

Turns Counting Dial
1″ Diameter, 10-Turn

### FEATURES

- Molded and filled markings
- Cam detent for positive lock
- No extra panel drilling required
- Corrosion resistant, plastic and metal construction
- Smooth, reliable performance in most severe environmental conditions
- Low cost

The BOURNS® H-1400 series of analog turns counting dials are precision engineered and manufactured of plastic and metal construction for best balance of quality/cost. The resultant product delivers exceptional smoothness, accuracy and long life at very low cost.

A positive action transfer mechanism assures perfect indexing of the secondary scale. Transfer points are quiet and accurate.

### STANDARD STYLES

| Part No. | Body Finish | Brake | Shaft Dia. |
|---|---|---|---|
| H-1411 | BLACK | NO | ¼″ |
| H-1412 | BLACK | YES | ¼″ |
| H-1461 | GRAY | NO | ¼″ |
| H-1462 | GRAY | YES | ¼″ |
| H-1421 | BLACK | NO | ⅛″ |
| H-1422 | BLACK | YES | ⅛″ |
| H-1471 | GRAY | NO | ⅛″ |
| H-1472 | GRAY | YES | ⅛″ |

### SPECIFICATIONS

**Mechanical and Physical Characteristics**

Number of Turns . . . . . 10
Dial Divisions . . . . . 50
Readability — Ten Turns . . . 2 parts in 1000
Torque—Running, While Mounted . . . 2.0 oz.-in. maximum
—With Brake Engaged . 5.0 oz.-in. minimum
Markings . . (H-1411, H-1412, H-1421 & H-1422) White on Black Background
(H-1461, H-1462, H-1471 & H-1472) Black on Gray Background
Set Screw Tightening Torque . . . . 20 in. lbs. maximum

**Environmental Characteristics**

Operating Temperature Range . . . . . −15° to +70°C
Mechanical Life . . . . 10,000 cycles
Humidity—No Damage . 96 hours @ 95% RH

**Shaft and Bushing Requirements**

Shaft Extension Beyond Panel . . . . .675 minimum
.875 maximum
Bushing Extension Beyond Panel . . . . .297 maximum
(Including Shaft C Ring where applicable)

Specification Note: Closer performance tolerances can be supplied upon request.

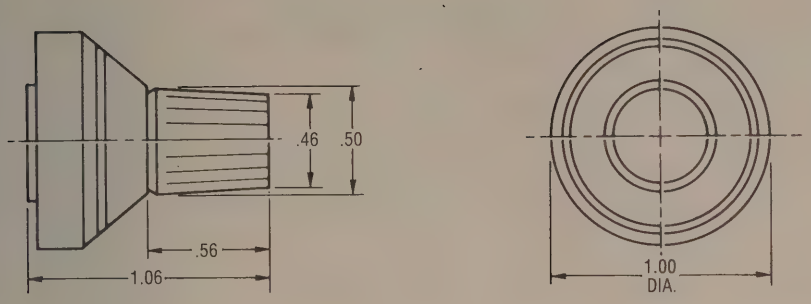
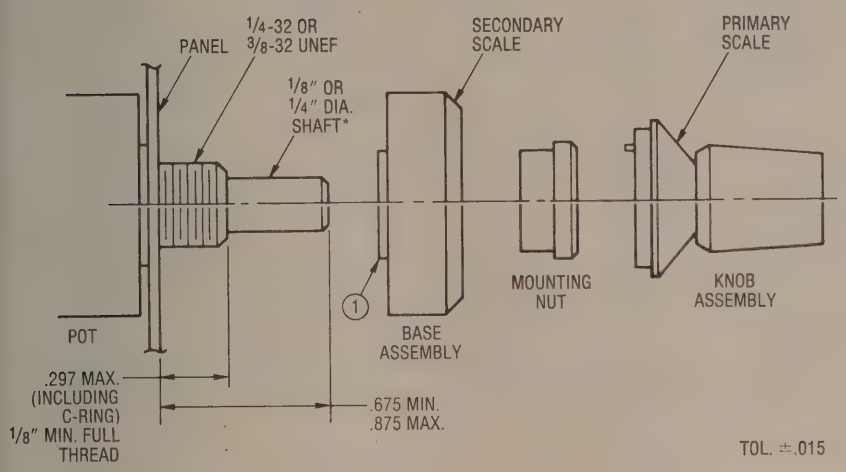
## DIMENSIONS



* Note: Dials also available on special order for 3/32" dia. shafts. They may be ordered in black or gray finish, with or without a brake. Consult factory for details.



## MOUNTING REQUIREMENTS

Drill a hole in the panel to accommodate the potentiometer; nothing special is required for the dial. The unthreaded portion of the potentiometer bushing must not project through the panel. The shaft length, measured from the face of the panel, should be a minimum of .600 and a maximum of 1.000. The .600 dimension is an absolute minimum and in some cases optimum performance is not obtained.

[1] Notice that there is a short, one half inch diameter, projection at the rear of the dial. This is required to hold the dial away from the panel to permit the turns-counting scale to turn freely. This dial will not function properly if this projection is recessed in the panel. Suggested panel hole diameter is 0.406 for 3/8" dia. bushings, and .281" diameter for 1/4" bushings.

# HIGH PRECISION POTENTIOMETERS

## CUSTOM PRECISION POTENTIOMETERS

BOURNS also produces a wide variety of precision potentiometers for exacting applications in industrial and military markets. These models are specifically designed for extensive custom modifications to fit a broad range of unique applications. They include:

1 B-LINE™ single-turn precision potentiometers with aluminum housing. Potentiometers in this series are in diameters of 7/8", 1 1/16" and 2", bushing or servo mount. Wirewound, and conductive plastic elements are available in each size — 12 standard models in all.

2 Single-turn precision potentiometers with plastic housing.

3 Servo-mount multi-turn potentiometers.

4 Non-linear function potentiometers, available in most models.

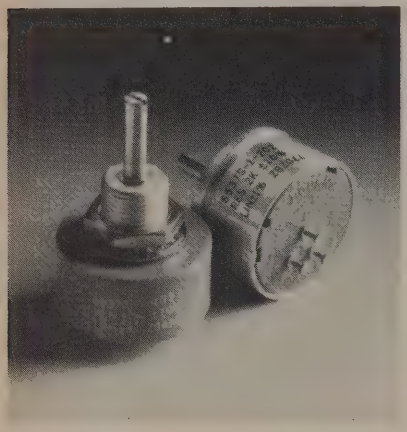
## MODEL 6537
**SERVO MOUNT**

## MODEL 6637
**BUSHING MOUNT**

⅞" Diameter, Single-Turn Potentiometer
Conductive Plastic Element



### FEATURES

- Infinite resolution element
- Standard linearity: 1.0%; special linearities available
- Extended temperature range: −65°C to +125°C
- Output smoothness: 0.1% standard
- Custom design capability available
- Molded-in rear terminals
- Precious metal contact
- Fire retardant high temperature thermoset plastic housing (bushing)

### SPECIFICATIONS

**Electrical Characteristics**

Resistance Range ..... 1K ohm to 100K ohm
Resistance Tolerance ..... ±10%
Linearity (Independent)
Standard ..... ±1%
Resolution ..... Essentially Infinite
Effective Electrical Angle .... 340° ±3°
End Voltage ..... 0.5% maximum
Output Smoothness ..... 0.1%
Power Rating:
70°C ..... 1 watt
125°C ..... 0 watt
Dielectric Strength —
Sea Level .... 750 VAC minimum
Insulation Resistance,
500 VDC . 500 megohms minimum

**Environmental Characteristics**

Operating Temperature Range ..... −65° to +125°C
Vibration (Contact Bounce 0.1 millisecond maximum) . 15Gs
Shock (Contact Bounce 0.1 millisecond maximum) . 50Gs

**Mechanical and Physical Characteristics**

Mechanical Angle .... Continuous
Backlash ..... 0.1° maximum
Shaft Runout ..... 0.005 T.I.R.
Shaft End Play ..... 0.005 T.I.R.
Shaft Radial Play ..... 0.005 T.I.R.
Pilot Diameter Runout (Servo) ..... 0.0025 T.I.R.
Lateral Runout (Servo) . 0.003 T.I.R.
Rotational Life .... 10,000,000 shaft revolutions
Torque (Starting and Running) . 0.50 oz.-in. maximum
Terminals . Rear terminals turret type

Specification Note: Closer performance tolerances can be supplied upon request.

Specifications are subject to change without notice.

# PRECISION POTENTIOMETERS

## SINGLE TURN WIREWOUND

SERVO POT (PVR11)

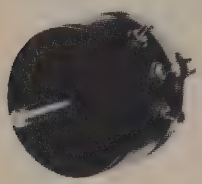
ROTARY TRIMMER (RV 1/2)

PANEL CONTROL (TP09)

MEETS MIL-R-12934 MEETS MIL-R-19

**Precision Servo Pots**
**Size:** 05, 09, 11, 15, 18, 20 & 30
**Standard Resistance Ranges:** 200 ohms to 250 K ohms
**Wattage Ratings:** 1, 1.5, 2, 3, and 4 watts (approx. 1 watt per inch of diameter)
**Rt TOL:** ±5% standard, ±1% special
**Linearity:** to ±0.25%

## SINGLE TURN CONDUCTIVE PLASTIC



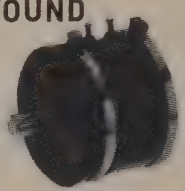
**Conductive Plastic Pots®**
**Size:** 09, 11, 15, 18, 20 & 30
**Rt TOL:** 10% standard, 4% special
**Life:** 50,000,000 revolutions
Taps located within ±2°, ±1° optional

**ALL MEET OR EXCEED MIL-R-39023**

Linear or special functions
Multiple ganging with independent phasing
**Standard Resistance Ranges:** 500 ohms to 250 K ohms
**Power Rating:** 1.0 watt to 2.5 watts @ 70°C
**Linearity:** ±0.5% to 0.03%
Res. Temp. Coefficient: 300 ppm/°C max.

## MULTI-TURN WIRE WOUND

09 Series
3, 5, 10 & 20 Turn



18 Series
3, 5, &10 Turn

20 Series
3, 5, & 10 Turn

**Sizes:** 09, 18, 20, —3, 5, 10, 20 Turn Potentiometers
Multiple-cup ganging with independent phasing
All welded internal connections
250 to 500 K ohms
**Rt TOL:** ±5% standard, ±1% optional
Multiple taps
Wattage up to 4 watts (approx. 1.5 watts per inch of diameter)
**Linearity:** to ±.015%
**Temperature Coefficient:** 0.002%/°C

**ALL MODELS TESTED TO MEET OR EXCEED ML-R-12934**

## CONCENTRIC SHAFTS 2 GANG MINIATURE

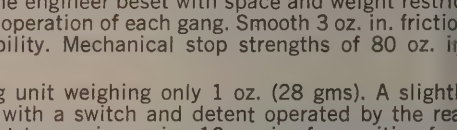
A new series of miniature 2-gang potentiometers with aerospace quality and performance ca pability, the Series PVR05, is now available to the engineer beset with space and weight restri tions. Dual concentric shafts allow independent operation of each gang. Smooth 3 oz. in. frictio torque on each shaft provides adjustment stability. Mechanical stop strengths of 80 oz. i prevents damage to the unit.

All this is available in a .625" dia. x 1.500" long unit weighing only 1 oz. (28 gms). A slight longer unit (1.750") weighing 1.16 oz. (33 gms) with a switch and detent operated by the re potentiometer shaft is also available. The detent torque is a crisp 10 oz. in. for positive fe

Price and delivery varies with the many design variations of the new series.

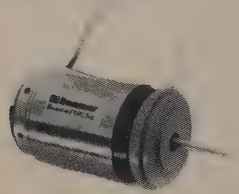
## VARI (F)UNCTION MODULES

Unitized Pot-Clutch Modules consisting of potentiometers, clutches, spring returns, synchro, brake combinations on an in line module.



MC 11-37 CONFIGURATIO

## DC TORQUER CP POTENTIOMETER COMBINATION



**DESIGNED TO MEET OR EXCEED ENVIRONMENT TESTS CONDUCTED IN ACCORDANC WITH MIL-R-5272**
**TYPICAL SPECIFICATIONS**

**Motor**
**Excitation:** 12 VDC max.
**Stall Current:** .57 amps
**Stall Power:** 6.9 watts
**Stall Torque:** 1.2 oz. in.
**Rotor Resistance:** 21.3Ω
**Torque/Amp:** 2.1 oz. in/amp

**Potentiometer**
**Total Resistance:** 500Ω-100KΩ
**Linearity:** .5% std, .1% special
**Electrical Angle:** 340°
**Resolution:** Essentially infinite
**Shaft Runout:** .003 TIR
**Radial Play:** .003 TIR
**End Play:** .005 Max.

**Motor-Pot Combination**
**Starting Voltage:** .5 volts max.
**No Load Speed:** 7200 RPM
**Inertia:** 2.2 GM-CM²
**Operating Temp. Range:** −55°C to +71°C
**Weight:** 2.1 oz. max.
**Winding Temp.:** 100°C max.

NOTES:
Motors with different torques, voltages, power requirement, etc., are available.
Special pot functions, conformities, taps, extra gangs, etc., are available.
Other size units with motors from .6" dia. to 1.35" dia. available.
Size 08, 09, 11, 15 mounting available.

## CUSTOM DESIGNED POTENTIOMETERS AND ROTATING COMPONENTS TO MEET SPECIAL REQUIREMENTS

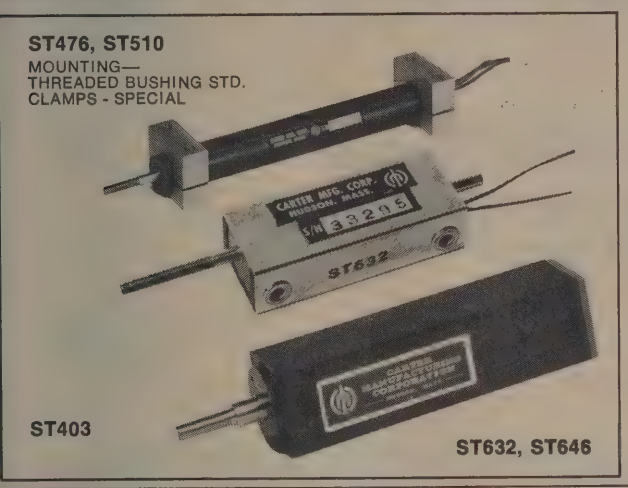
Non-linear and Special Functions
Hostile Environments
Extended Life
Miniaturization
Vari (f)unction Packages

# CARTER POTENTIOMETERS

## RECTILINEAR / WIRE WOUND / CONDUCTIVE PLASTIC

Carter Manufacturing Corp. is an organization of engineers and craftsmen specializing in the unusual in potentiometers and switch engineering and their manufacture. Since our founding in 1955 we have developed full capability in wire wound and conductive plastic potentiometers. We welcome the opportunity to work with you for your unique requirements as well as standard commercial or mil types.

## RECTILINEAR POTENTIOMETERS / WIRE OR CONDUCTIVE PLASTIC

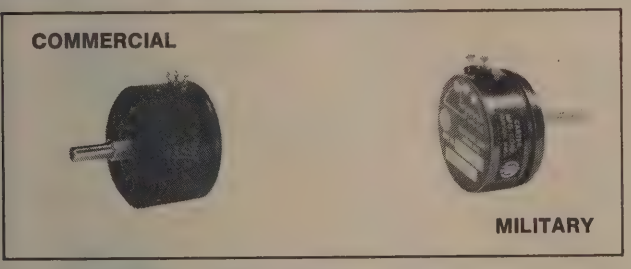


Carter manufactures many custom variations of rectilinear potentiometers. When requesting quotations please specify stroke, resistance, linearity, any taps, any switching, environmental requirements and quantity.

Wire wound and conductive plastic elements can also be furnished for special requirements.

| Type | Size | Stroke | Res.Ω | Std. Lin. | Spl. Lin. | Elements | Watts 125° |
|---|---|---|---|---|---|---|---|
| ST476 | ½" Dia. | To 8" | 50K/" Max. | 2% Stroke | .25% Stroke | 1 or 2 | 1 |
| ST510 | ¾" Dia. | To 12" | 100K/" Max. | 2% Stroke | .25% Stroke | 1 or 2 | 1.5 |
| ST403 | 1¼" x 1¼" | To 36" | 150K/" Max. | 2% Stroke | .25% Stroke | 1 or 2 | 2 |
| ST632 | 5/16" x ½" | To 4" | 60K/" Max. | 2% Stroke | .25% Stroke | 1 | .25 |
| ST646 | ½" x ½" | To 6" | 50K/" Max. | 2% Stroke | .25% Stroke | 1 or 2 | 1 |

## WIRE WOUND / CONDUCTIVE PLASTIC / SINGLE TURN POTENTIOMETERS MILITARY / COMMERCIAL



### GENERAL SPECIFICATIONS

**Resistance Tolerance:** WW ±5%, C/P ±10% Std. (Spl. avail.).
**Function Angles:** Spl. available.
**Rotation:** WW with stops, continuous available.
C/P continuous, stops available.
**Taps:** WW taps to single turn of wire with positive elimination of failure.
C/P taps of low resistance or zero width available.
**Power Rating:** To zero watts at 150°C.
**Ambient Temp.:** −65°C to +125°C std. (to 150°C available).

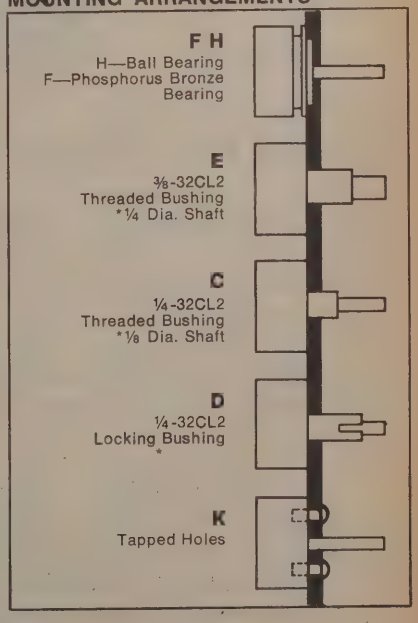
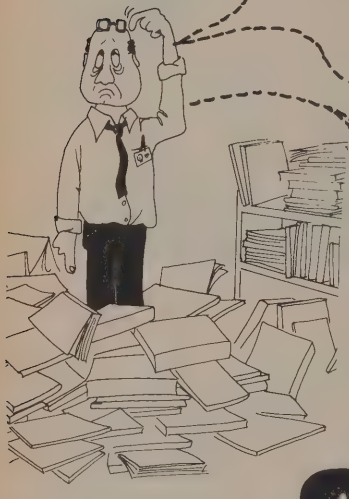
### MOUNTING ARRANGEMENTS



**CARTER MANUFACTURING CORPORATION**
DEPT. EM, SUGAR ROAD • BOLTON, MASSACHUSETTS 01740 • TELEPHONE (617) 779-5501

***What can I use to keep all the manufacturers' product data I receive in order?***

***What system makes filing or retrieving manufacturers' catalogs fast and easy?***



***Which file system have thousands of engineers purchased because they know it works?***

# eem FILE SYSTEM

## THE ONLY FILE SYSTEM DESIGNED SPECIALLY FOR THE ELECTRONIC ENGINEER!

The publishers of **eem** have put together a unique filing system for electronic product information. The complete system includes: a product index booklet which classifies electronic products into 3,000 listings both alphabetically and by product group, and 45 file folders imprinted with the **eem** product sections (extra gummed labels included for expanding the system.)

As you receive manufacturers' catalog data sheets, technical bulletins, or clip magazine articles, jot down the proper Product Section Numbers from the **eem** PRODUCT-TO-SECTION INDEX. Then simply file in order. When you require information on a specific product, refer to PRODUCT-TO-SECTION INDEX again to locate the correct file folder. It's simple, and you'll always have the necessary data to compare, specify and buy, right at your fingertips.

**Here's how to order your eem FILE SYSTEM:**

For the complete system send $10 (plus tax; N.Y., 8%, CA, 6½%) in check or money order to:
United Technical Publications, Inc.,
645 Stewart Avenue, Garden City, N.Y. 11530
Att: Circulation dept.

For an **eem FILE SYSTEM** without file folders send $7.50 (plus tax; N.Y. 8%; CA, 6½%).

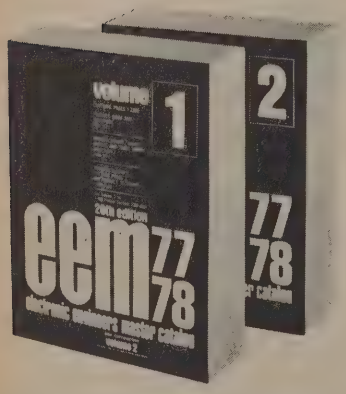
# we know

## 41 years of experience in

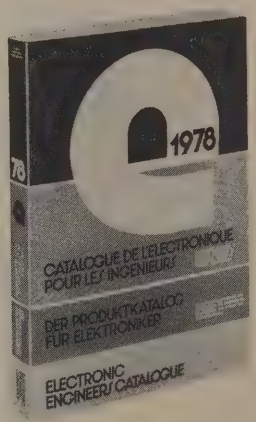
## United

## Electronics Division



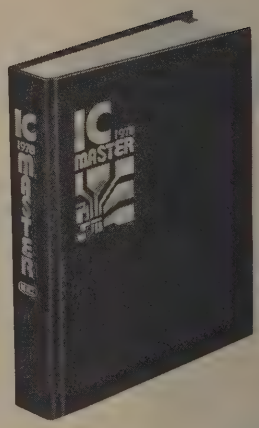
**eem/ELECTRONIC ENGINEERS MASTER CATALOG —**

The "blue-ribbon" catalog/directory that has become "the standard of the industry" for electronic engineers, buyers and specifiers.



**ELECTRONIC ENGINEERS CATALOGUE —**

The new catalogue/directory of electronic products available to and from Western Europe and the United Kingdom. Designed especially for the European electronics engineer.



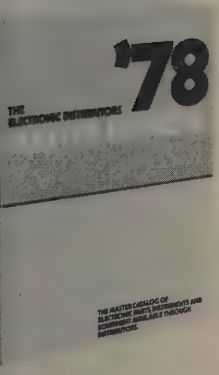
**IC MASTER AND THE UPDATES —**

The only complete single-source directory including all IC devices manufactured in the United States. Updated three times yearly with accumulative supplements.

# our stuff...

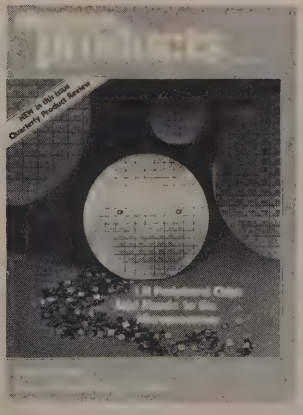
## cataloging, 21 editions of eem

## Technical Publications



**ronic Distributors**
**TER CATALOG —**

nly national catalog designed ively for distributors and their ners featuring electronic parts, ments and equipment.



**ELECTRONIC PRODUCTS MAGAZINE —**

The products magazine . . . A 100% product-oriented magazine including hundreds of new products and special features every month.

**eem FILE SYSTEM —**

The only filing system designed especially for the electronics engineer. Instant retrieval and organization of data sheets and catalogs.

**UNITED COST AND PRICING SERVICES —**

The electronic distributors' proven method of being up to the minute on his cost and selling prices.

**UTP CUSTOM CATALOGS —**

The Cadillac of individualized catalogs for the electronic parts distributor, featuring solely his lines and services.

(1) Also available in 3- & 5-turn rotation.
(2) Also available in 3-turn rotation.
(3) Also available in ¾" diameter.
(4) Environmental specs for commercial pots: enclosed construction, 10G at 2,000 cycles vibration, 50G shock.

N/A means not applicable.

All Military styles are fully qualified to the applicable Mil-Spec either Mil-R-12934 (wirewound) or Mil-R-39023 (non-wirewound)

# MINIATURE TURNS—COUNTING DIALS

These dials enable the accurate positioning of multi-turn devices. Each was specially designed to complement the Duncan line of precision multi-turn potentiometers. Despite their compact size, all dials afford the optimum in readability — precise readings can be made at a glance, and from any angle. Convenient and economical, they require only the minimum in panel drilling and mounting hardware. Six models in all, four are offered for use with standard ¼-inch shafts, while two are available for use with ⅛-inch shafts. All dials feature a positive-action lock.

## ELEMENTS: AN INDIVIDUALIZED APPROACH TO YOUR POTENTIOMETER REQUIREMENTS

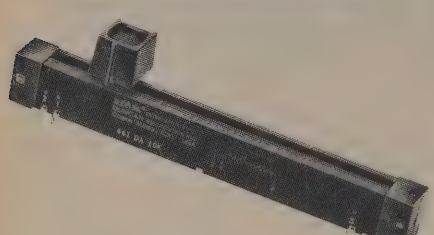
Many applications indicate the use of a conductive plastic element combined with a wiper arm instead of a complete potentiometer assembly. This approach may result in reduced space requirements, lower cost and a reduction in driving torque. Duncan RESOLON® lends itself to this approach because it can be co-molded with a substrate of virtually any configuration.

The selection of the wiper to be used with a RESOLON element is quite critical and can radically affect contact resistance, output smoothness and operating life. Wherever possible we should be permitted to design and supply the wiper assembly for most effective "mating" with the element.

Elements in any configuration can be produced with single or multiple tracks or with low resistance conductive plastic collector bars.

# DUNCAN CONDUCTIVE PLASTIC SLIDELINE CONTROLS

## SERIES 400
## METRIC SERIES M400



In addition to broadcast and recording, Series 400 is ideally suited to a great number of instrumentation applications. In transportation as throttle controls for rapid transit and people-moving equipment . . . pollution monitoring equipment, solar energy instrumentation and tone/speed controls for copying machines.

Available in 2¾" and 4¼" stroke lengths with single or dual elements. Offered with either printed circuit pins or solder type flat terminals which accept quick-connect receptacles. Special features include center taps and either SPST or DPST switches with gold-plated contacts at no increase in package size.

**KNOBS AVAILABLE**

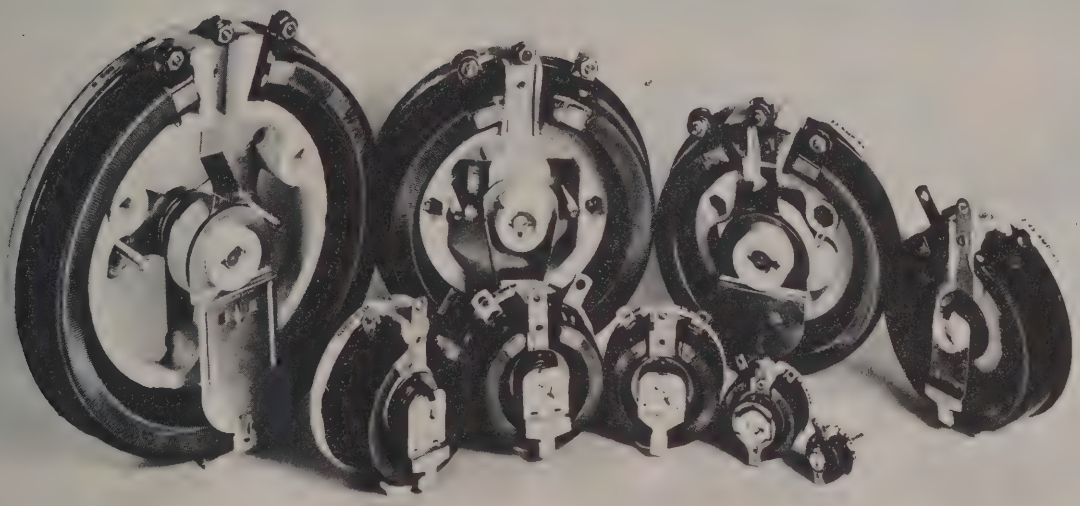
# POWER RHEOSTATS

## MEET THE MEMCOR FAMILY OF HIGH QUALITY WIRE-WOUND POWER RHEOSTATS



All MEMCOR Power Rheostats are vitreous enamel coated. The core and base are bonded together with vitreous enamel, thereby contributing markedly to the heat dissipation.

Standard tolerance: ±10%, ±5% available as a special.

| TYPE | POWER (Watts) | RESISTANCE RANGE | DIAMETER | WEIGHT |
|---|---|---|---|---|
| R12½ | 12½ Watt | 1 - 5000 Ohms | 7/8" | .035 Lbs. |
| R25 | 25 Watt | 1 - 5000 Ohms | 1 1/16" | 0.23 Lbs. |
| R50 | 50 Watt | 0.5 - 10,000 Ohms | 2 15/16" | 0.45 Lbs. |
| R75 | 75 Watt | 0.5 - 10,000 Ohms | 2¾" | 0.60 Lbs. |
| R100 | 100 Watt | 0.5 - 10,000 Ohms | 3⅛" | 0.72 Lbs. |
| R150 | 150 Watt | 0.5 - 10,000 Ohms | 4" | 1.50 Lbs. |
| R225 | 225 Watt | 1 - 2500 Ohms | 5" | 2.18 Lbs. |
| R300 | 300 Watt | 1 - 2500 Ohms | 6" | 3.0 Lbs. |
| R500 | 500 Watt | 1 - 2500 Ohms | 8" | 3.75 Lbs. |
| R1000 | 1000 Watt | 1 - 2000 Ohms | 12" | 10.0 Lbs. |

Special Rheostats with Tapered Sections, Locking Devices, Off Positions, Tandem Mountings, Special Shafts on Bushing, and many other variations can be supplied.

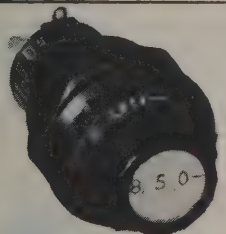
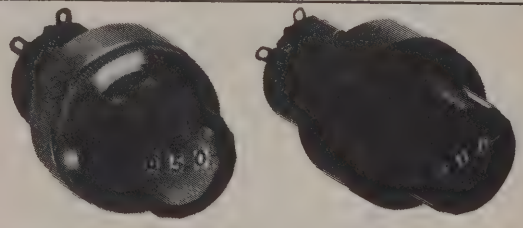
POT/DIAL COMBINATIONS



## COMBO® 1 — WITH LOCK

Model DA850 or DA20.
Combines a DA-10 digital dial with a Model 850 or MW20 multi-turn pot. Potentiometers available in 3, 5 or 10 turns.
Mounts in 1.25" dia. panel hole.
50 pc. price, $16.69



## COMBO® 3 — WITHOUT LOCK

Model DA850NL or DA20NL.
Combines DA-10 dial with choice of seven multi-turn pots. Dials available with black or white faces and numbers. Adaptors available in clear or black anodize.
Mounts in 1.187" dia. panel hole.
50 pc. price, $16.69

1. Extended resistance range available.
2. Tighter tolerances available.
3. 3, 5, 20 turns not specified here.
4. Model MR46, from .5Ω to 20Ω is slide-wire.
5. All units available in metric sizes.
6. Some resistance values priced higher.

No minimum order required.
Terms: 1%-10 — Net 30.
FOB: Oceanside, Calif.

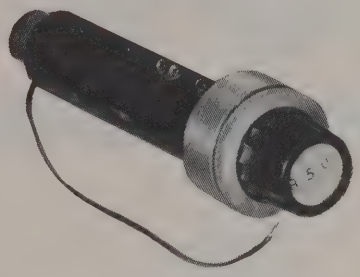
# MOTORIZED POTS-OIL-FILLED POTS

## MOTOR-CONTROLLED POTENTIOMETERS

### (MULTI-TURN AND SINGLE-TURN)

ELECTRO TECHNIQUES offers for the first time a complete line of motor-controlled potentiometers with motor operating currents low enough to respond accurately from operational amplifier outputs. All Electro Techniques Rotary Potentiometers can be motorized for your applications.



### MC20-1

**MOTORS AVAILABLE**

DC VOLTAGES: 1½, 2, 3, 6, 12,
Larger Motor Pot Avail., 24 VDC
RPM: 6000 to 20,000
GEAR RATIOS: 3.1/1 to 980,000 to 1
TORQUE: Up to 85 oz. inches

### MC20-1 WITH DIGITAL DIAL

**EXAMPLE:**

MODEL MC20-1 with 6 volt DC motor (19000 RPM) with 1670/1 gear ratio. Gear train operates at approximately 11 ma current, and clutches at approx. 20 ma. Potentiometer turns at 10 RPM. Size: ⅞" dia. x 3½" long.

NOTES: Model MC20-1 shown above includes motor, gear train, clutching coupler, and potentiometer assembled by Electro Techniques.

### FEATURES:

HIGH SPEED DC MOTOR allows voltage pulsing to advance pot in constant increments.

LOW CURRENT OPERATION allows max. performance with less bulky power supplies and components.

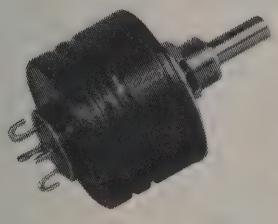
MAY BE OPERATED from op amp types such as 301, 741, 748 or dual 1458. Operating current approx. 12 ma and clutching current approx. 20 ma.

DOUBLE BALL JOINT adjustable mechanical slip clutch and alignment coupler maintains smooth and consistent turning of potentiometer without damage.

MOUNTING CLAMPS may be rotated or laterally moved for chassis mounting, or clamps may be removed and unit panel mounted. Motorpot will work in conjunction with any Electro Techniques turns counting dials.

PANEL MOUNTING allows manual adjustment during off Voltage periods.

MOST COMMON SLEW RATES are: 1, 3, 5, 10 and 30 RPM at the potentiometer.



SO-30

## OIL-FILLED POTENTIOMETERS (WIREWOUND AND FILM)

Electro-Techniques offers a complete line of **standard** oil-filled potentiometers for applications in corrosive and contaminated atmospheres requiring long load life.

Consult our factory for the type of oil filled potentiometer required for upgrading your reliability.

**THE LEADING MANUFACTURER OFFERING MOLDED CONDUCTIVE PLASTIC, WIREWOUND, CONDUCTIVE PLASTIC FILM, & HYBRID TECHNOLOGIES**

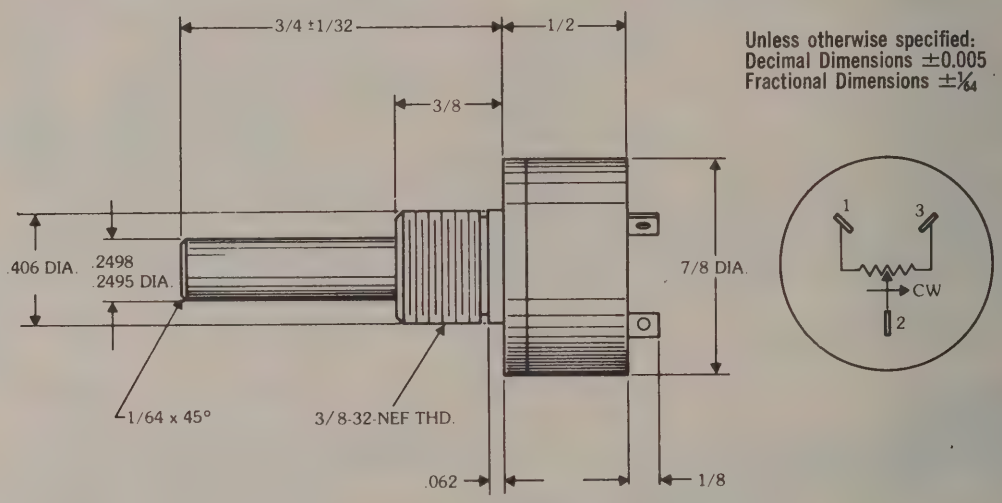
## IMPORTANT NOTES ON FACTORY STOCK & VOLUME PRODUCTION CAPABILITIES

The products shown on these first four NEI pages are low cost precision conductive plastic potentiometers which are available from factory stock. These products are **not** sold through distributors. Deliveries range from a few days to a few weeks.

The last two NEI pages show our custom design capabilities in wirewound and conductive plastic. In both custom and standard products, NEI has volume production facilities in five plants capable of producing millions of units.

## ECONOPOT® MKIII LOW COST RESISTOFILM™ CONDUCTIVE PLASTIC POTENTIOMETERS

(Priced from $1.95 to $4.95. No pot in its price range approaches MKIII.)



### ELECTRICAL DATA

**Standard Resistance Range:** 1K ohms to 100K ohms
**Standard Resistance Tolerance:** ±20%
**Electrical Travel, Theoretical:** 270°
**Standard Linearity:** ±1.0%
**Power Rating:** 70°C, 1 Watt
125°C, 0 Watt
**Output Smoothness:** ±0.25%
**Resistance Temperature Characteristic:** ±5%
**Temperature Coefficient:** ±400 ppm/°C
**Dielectric Strength:** 1000 Vrms
**Resolution:** Virtually Infinite

### MECHANICAL DATA

**Shaft Torque:** 1.0 oz.-in. max.
**Mechanical Travel:** 300° ±5°
**Shaft:** Stainless Steel
**Contacts:** Precious Metal
**Stop Strength:** 5 in.-lbs. nominal

### ENVIRONMENTAL DATA

**Rotational Life:** 5 Million Cycles (less than 5% resistance shift)
**Load Life:** 1000 Hours (less than 5% resistance shift)
**Shock (20 G's):** Per MIL-R-23825
**Vibration (20 G's):** Per MIL-R-23825
**Operating Temperature:** −65°C to +125°C

## SPECIFICATIONS

### ELECTRICAL

**Resistance per inch of stroke length:** 50K ohms per inch maximum
**Stroke length, Standard:** up to 30"
**Special:** up to 100"
**Number of Elements:** single or dual
**Total Resistance Tolerance:** ±10%
**Independent Linearity, Standard:** ±1%
**Special:** ±0.1% (for stroke lengths over 4")
**Power Rating:** 0.5 watts per inch stroke at 25°C
**Resolution:** essentially infinite
**Insulation Resistance:** 1000 megohms minimum

### MECHANICAL

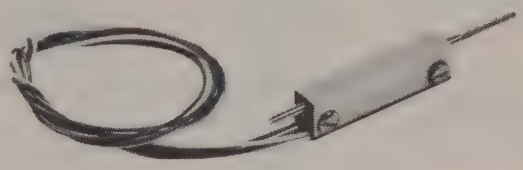
**Case Width, Standard:** 1" or 1¼" square & ½" O.D. round
**Starting Torque:** 4 oz.-in.
**Taps:** available (specify location & type i.e.: current or voltage)
**Mounting:** flanges or brackets available
**Connectors:** available

**Note:** The shaft can be rotated without detrimental effect to the unit.

## OTHER LINEAR MOTION DESIGNS AVAILABLE

### HIGH RELIABILITY DUAL-ELEMENT UNITS

Originally designed to be a rocket propellant valve position monitor, this unit has two potentiometer elements (one for control and one for telemetry), plus a single-pole double-throw switch. Linearity tolerance is only ±0.001" and position reference must be maintained after repeated linear shaft accelerations of 3000 G's. 24 were used in each rocket.

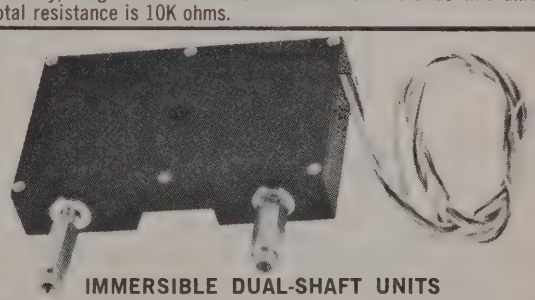


### MINIATURE DOUBLE-ENDED UNITS

**LMFL-101** Dimensions: ¼"W x 5/16"D x 1¼"L. This conductive plastic design features a double-ended shaft extension and can be actuated from either end, sensing a stroke length of 0.18". High accuracy, long life and infinite resolution characterize this unit. Total resistance is 10K ohms.

### WIREWOUND ROUND CROSS-SECTION UNITS

**LMWS-205** This wirewound unit is typical of linear motion units designed to meet specific configuration requirements. It features a precisely located center tap, a resistance of 2K ohms ±5%, 0.1% resolution, and an absolute linearity of 0.5%. Mechanical stroke length is 2".



### IMMERSIBLE DUAL-SHAFT UNITS

**LMFT-121** Dimensions: 1¾"L x 2⅞"W x ½"D. This unique package was designed specifically for total immersion in water. It features two separate elements independently actuated. Both are center tapped, with leads provided. Total resistance is 5K ohms with 1% accuracy and ¾" stroke length.

# PRECISION POTENTIOMETERS

## CUSTOM DESIGNS
## SINGLE-TURN PRECISION WIREWOUND TYPES

### RELATIVE MERITS OF CONDUCTIVE PLASTIC AND WIREWOUND

The major advantages of conductive plastic potentiometers over wirewounds are infinite resolution and longer life. In most other respects, the two types are comparable. NEI has made it a strong point over the years to maintain **balanced** capability in conductive plastic and wirewound potentiometers. Each has its advantages in given applications, and NEI is the **only** company that can objectively recommend and supply either type.

# OHMITE® vitreous enameled rheostats (potentiometers)

Now, Ohmite offers TWELVE sizes in its line of famous rheostats.

In all Ohmite rheostats, the resistance wire is wound on a solid ceramic core. The turns are locked in place with tough, protective vitreous enamel or Ohmicone® silicone ceramic. Pivoted, universal action mounting of the brush, assures perfect contact. Metal-graphite contact brushes, varied to fit current and resistance, insure good contact with negligible wear of the wire. Terminals at each end of the winding permit connection of the unit as a potentiometer.

**NOW, FOR ITS RATING, INDUSTRY'S SMALLEST RHEOSTAT!**

Items in LIGHT FACE print are available from stocking distributors but are not normally stocked in depth. Parentheses indicate non-stock standard items subject to a minimum handling charge per item.**

# OHMITE® molded composition potentiometers

STYLE CMU
MIL STYLE
RV4N

Ohmite molded composition potentiometers (Type AB) provide high quality and dependable performance.

Because the resistance element is a thick, solid-molded ring, longer life and smoother operation are obtained. This is due also to the molded composition contact. Units are dust and splash proof, fungus and corrosion resistant and meet the requirements of military specification MIL-R-94.

**STOCK "POTS" — MIL Units are stamped with MIL and Commercial Designations.**

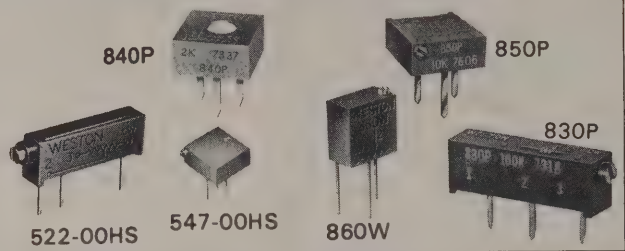
## GENERAL PURPOSE CERMET

**Square, rectangular, and round**

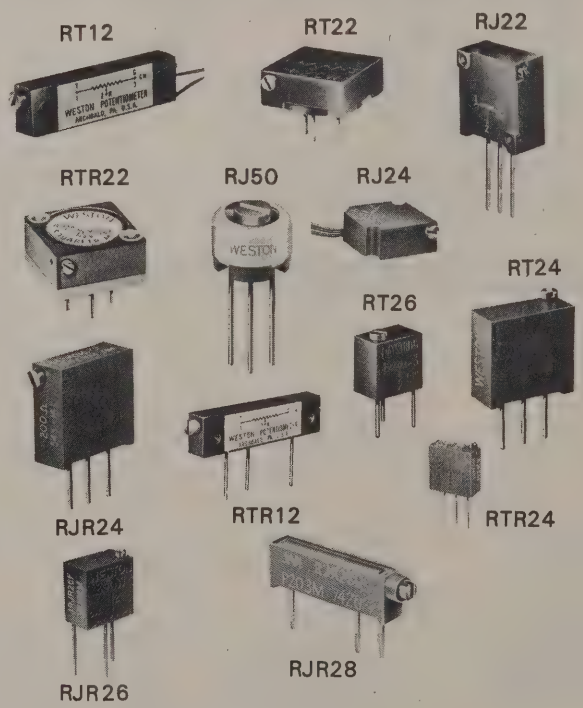


## GENERAL PURPOSE WIREWOUND

**Square, rectangular, and round**

## MILITARY GRADE

**All styles qualified to military specifications**



NOTES: • All units are humidity resistant per MIL-STD-202, Method 106.

• Model 1000 & 567-105HS contain solid stops. All other units are manufactured with slip clutch (wiper idles) for mechanical protection.

- Sealed to guard against contaminants: Sealed to withstand "Flow" Soldering and Industrial type immersion cleaning
- Wide resistance range, 100 ohms to 1 megohm
- WESTON Hi-Stability cermet element
- Mechanical protection, stop and clutches
- Resolution, essentially infinite
- Adjustments ratio 16 to 1

| SERIES 860 | SPECIFICATIONS | | WP-160 FEB. 1978 |
|---|---|---|---|
| | DESCRIPTION | VALUE | |
| ELECTRICAL | Standard resistance range | 100 ohms to 1 megohm | |
| | Resistance tolerance | ± 10% | |
| | End resistance | 2 ohms or .1% whichever is greater | |
| | Contact resistance variation | 3% or 3 ohms, whichever is greater | |
| | Temperature coefficient | ± 100 P.P.M./°C max. | |
| | Power rating | 0.25 watt (in still air) at 85°C | |
| | Insulation resistance | 1000 megohms minimum (500 V.D.C.) | |
| | Dielectric strength | 600 V.A.C. room conditions | |
| | Maximum working voltage | 200 V.D.C. (RMS) or within power rating, whichever is less | |
| | Continuity | Maintained for full mechanical range | |
| | Resolution | Essentially infinite | |
| MECHANICAL | Mechanical protection | Slip clutch, wiper idles | |
| | Mechanical adjustment | 16 turns nominal | |
| | Rotational life | 200 cycles min. with no discontinuity | |
| | Torque | 3 oz. in. maximum | |
| | Weight | .5 gram maximum | |
| ENVIRONMENTAL | Operating temperature range | -55°C to +150°C | |
| | Moisture resistance | MIL-R-22097, MIL-STD-202, Method 106 | |
| | Shock | 100 G's per MIL-R-22097 | |
| | Vibration | 20 G's 10 to 2000 cycles per MIL-R-22097, Test Condition D | |
| | Load life | 1000 hrs. @ rated power per MIL-R-22097 | |
| | High temperature exposure | MIL-R-22097 | |
| | Low temperature operation | MIL-R-22097 | |

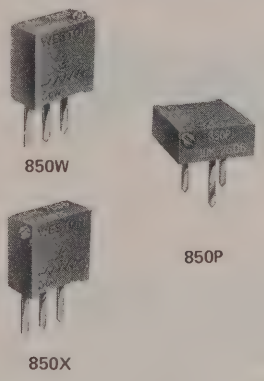
WESTON SQUARETRIM POTENTIOMETERS 3/8" LOW COST CERMET



- Sealed to guard against contaminants; Sealed to withstand "Flow" Soldering and Industrial type immersion cleaning.
- Weston hi-stability cermet element
- Wide resistance range, 10 ohms to 2 megohm
- Resistance tolerance ± 10%
- Resolution, essentially infinite
- Adjustability — 22 turns nominal
- High power — 0.5 watt at 70°C
- Wide operating temperature range -55°C to +150°C
- Temperature coefficient ± 100 PPM/°C max.

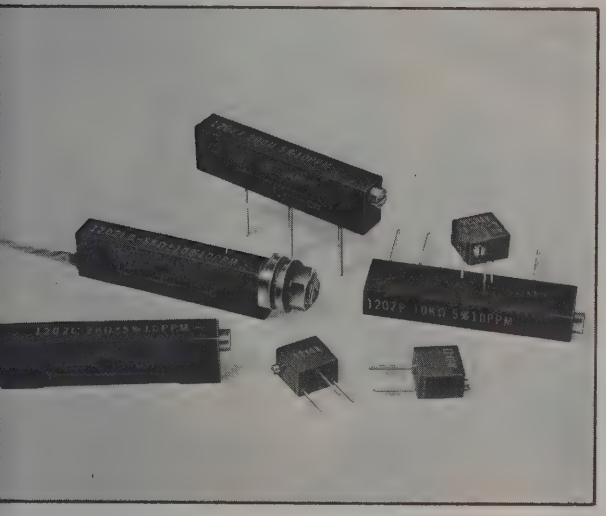
VISHAY RESISTIVE SYSTEMS GROUP

# Precision Bulk Metal® trimming potentiometers

VISHAY RESISTIVE SYSTEMS GROUP • 63 Lincoln Highway, Malvern, PA 19355 • Phone (215) 644-1300 • TWX 510-668-8944



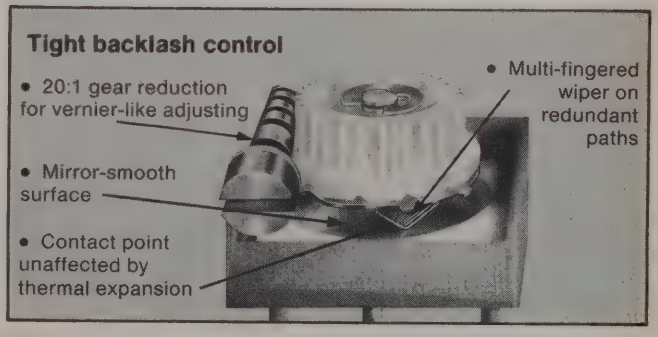
- **Settability** to 0.01% typical (Model 1240), 0.05% max (all models).
- **Setting stability** 0.5% max ΔR after shock and vibration.
- **Load-life stability** 1.0% max ΔR (Model 1240), 2.0% max ΔR (Model 1202) after 10,000 hr at full power and 85°C.
- **TCR** 10 ppm/°C (end-to-end) over full Mil range (−55°C to +150°C).
- **Pin configurations** for ¼" sq, ⅜" sq, ⅜" rd, ¾" rect, 1¼" rect.
- **Unmeasurable hop-off.**

shay RJR12-style (Model 1202 1¼" rectangular) and JR26-style (Model 1240 ¼" square) precision trimming otentiometers are designed and manufactured to meet exceed the Characteristic H requirements of Mil-R-9035, the most demanding specification yet issued for mmers.

The unique Vishay Bulk Metal®resistive element sed in these trimmers presents a mirror-smooth planar sistance surface to a multi-fingered wiper. his combination, operating over redundant current aths, virtually eliminates the possibility of catastrophic ilure.

The bulk-metal element makes possible additional portant advantages over other precision trimmer chnologies: The substantially thick (>2.5μm) metal mina, bonded to a ceramic substrate, is kept in its rgin state, unstressed through manufacturing, ndling, and storage—not subjected to bending, abra-on, and subsequent stress relief as is wire wound on a obbin or mandrel—a definite advantage for low TCR. flat monolithic surface has no hills and valleys as do rns of wire which cause stepwise resolution as the per slides over them. Being a solid layer of a special etal alloy, it does not suffer the haphazard dispersion of resistive particles characteristic of cermet elements—another advantage in tight settability and sure setting stability. Finally, it enjoys the long-term electrical stability that only a solid piece of metal can provide—its very hard surface won't wear from wiper travel, and won't experience chemical etch in corrosive environments.

Complete information on Vishay trimmers is available in Bulletin TR-600. For information on Vishay precision fixed resistors, see our selection guide in EEM (Resistors, Fixed) and send for specific literature.



Tight backlash control
• 20:1 gear reduction for vernier-like adjusting
• Mirror-smooth surface
• Contact point unaffected by thermal expansion
• Multi-fingered wiper on redundant paths

# CATALOGUE DE L'ELECTRONIQUE POUR LES INGENIEURS
# DER PRODUKTKATALOG FÜR ELEKTRONIKER
# ELECTRONIC ENGINEERS CATALOGUE

**The 1978 edition is out...and the response is in...**
**IMMEDIATE AND OVERWHELMING**

**ACCEPTANCE**

The ELECTRONIC ENGINEERS CATALOGUE is the only comprehensive, trilingual catalogue/source-directory of electronic products available to—and from—Western Europe.

It is divided into three distinct sections: 1. **The Product Index and Directory,** which lists more than 3,000 product headings & cross-references alphabetically in English with their French and German equivalents. 2. **The Manufacturers' Catalogue Section,** which is a compilation of Manufacturers' Catalogues in alphabetical order. 3. **The Manufacturers' Sales Offices and Trade Marks Directory,** which alphabetically includes country, address, telex or TWX numbers of the Manufacturers' main and local sales offices and/or agents.

The ELECTRONIC ENGINEERS CATALOGUE offers U.S. manufacturers the most cost-efficient method of distributing their catalogue data to **25,000** electronic engineers and buyers throughout Western Europe. It represents the carefully conceived application of the time-proven **eem** "cataloging" concept to the elusive European marketplace.

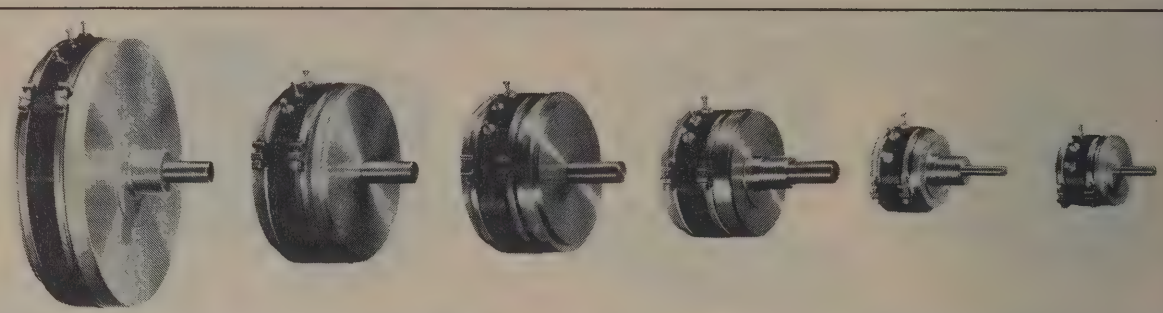
# PRECISION POTENTIOMETERS
## 7/8″ to 3″ Diameter 1 to 6 Watts



These high performance devices will equal or exceed the appropriate military specifications, as well as those of competitive devices.

Factory services will supply a wide range of mechanical, electrical and environmental modifications. Standard options include special shafts, shaft seals, stops, anti-rotation pins . . . multicup assembly, voltage taps, 1% T.R. tolerance and independent linearity as low as 0.1%.

### ELECTRICAL CHARACTERISTICS

**Resistance Tolerance:** ±3%
**Effective Electrical Angle:** 350° ±2°
**End Settings:** 1Ω or 0.1% whichever is greater
**Noise Ohms ENR:** 100 maximum
**Dielectric Strength:** MIL-R-12934
**Sea Level:** 1,000 volts AC minimum
**Insulation Resistance, 500 volts DC:** 1,000 megohms min.

### MECHANICAL & PHYSICAL CHARACTERISTICS

**Mechanical Angle:** Continuous
**Shaft Runout:** .001 in. (.025mm) T.I.R.
**Shaft End Play:** .005 in. (.127mm) T.I.R.
**Shaft Radial Play:** .002 in. (.051mm) T.I.R.
**Pilot Surface Runout:** .0015 in. (.0381mm) T.I.R.
**Lateral Runout:** .002 in. (.051mm) T.I.R.
**Rotational Life:** 1,000,000 shaft revolutions

### MECHANICAL & PHYSICAL CHARACTERISTICS (Cont'd)

**Moment of Inertia:** 16.0 gm cm²
**Ganging:** 15 cups maximum
**Terminals:** Gold plated turrets

### ENVIRONMENTAL CHARACTERISTICS

**Operating Temperature Range:** −65°C to 125°C
**Temperature Coefficient of Wire:** 20 ppm/°C maximum
**Humidity:** MIL-R-12934, humidity cycling
**Vibration:** MIL-R-12934, high frequency
**Wiper Bounce:** 0.1 millisecond maximum
**Shock:** MIL-R-12934, 100G
**Wiper Bounce and Wiper Shift:** Same as vibration
**Rotational Load Life:** MIL-R-12934 par. 4.6.20.2, 1,000 hrs.
**Resistance Shift:** 5.0% maximum
**Salt Spray:** MIL-R-12934

**SERIES 5100** Popular 2 piece heat sink designed for circuit board mounting. The top and the base may be ordered separately.

| Part Number | Figure | For Case Style | Size, Inches L | W | H | TR °C/W |
|---|---|---|---|---|---|---|
| 5166B | A | TO-66 | 1.32 | .89 | .609 | 14 |
| 5166C | A | TO-66 | 1.32 | .89 | .609 | 14 |
| 5166B (Base) | A | TO-66 | 1.32 | .89 | .609 | 16 |

**SERIES 5200** Designed to maximize heat transfer unitizing a 2 piece heat sink. Black anodized base may be ordered with a gold chromate uninsulated top where electrical contact is needed.

| | | | | | | |
|---|---|---|---|---|---|---|
| 5203B | A | TO-3 | 1.53 | 1.25 | .515 | 12 |
| 5203C | A | TO-3 | 1.53 | 1.25 | .515 | 12 |
| 5203B (Case) | A | TO-3 | 1.53 | 1.25 | .515 | 14 |

**SERIES 5300** Lightweight heat sink for plastic power semiconductors. The 5307 accommodates one device, and the 5306 accommodates one or two devices. Excellent for circuit board applications.

| | | | | | | |
|---|---|---|---|---|---|---|
| 5306B | B | Blank | 1.18 | 1.00 | 0.50 | 19 |
| 5306B-13 | B | Two Holes (Plastic Power) | 1.18 | 1.00 | 0.50 | 19 |
| 5307B | B | Blank | 0.71 | 1.00 | 0.50 | 25 |
| 5307B-14 | B | Two Holes (Plastic Power) | 0.71 | 1.00 | 0.50 | 25 |

**SERIES 5425 & 5632** Low cost — space saving, vertically mounted heat sink for plastic power semiconductors. Nickel plated units are available where soldering of mounting tabs are desired.

| | | | | | | |
|---|---|---|---|---|---|---|

| 5531C-66 | D | TO-66 | 1.00 | 1.63 | 1.0 | 13 |

**SERIES 5600** Vertically mounted — low cost — heat sink for plastic power transistors, Triacs, and SCR's. Mounting tabs designed for either soldering (nickel finish) or bending.

| | | | | | | |
|---|---|---|---|---|---|---|
| 5630B | E | Plastic Power (One Slot) | 1.38 | 1.00 | 0.500 | 10 |
| 5630C | E | Plastic Power (One Slot) | 1.38 | 1.00 | 0.500 | 11 |
| 5630D | E | Plastic Power (One Slot) | 1.38 | 1.00 | 0.500 | 14 |

**SERIES 5000** Series 5000 is ideal for circuit board applications where space is a premium. It provides free circulation of air from all sides and accepts all popular semiconductors case styles.

| | | | | | | |
|---|---|---|---|---|---|---|
| 5000-005-TO-3 | F | TO-3 | 1.81 | 1.81 | 0.50 | 7.3 |
| 5000-0075-TO-3 | F | TO-3 | 1.81 | 1.81 | 0.75 | 6.1 |
| 5000-010-TO-3 | F | TO-3 | 1.81 | 1.81 | 1.00 | 5.4 |
| 5000-0125-TO-3 | F | TO-3 | 1.81 | 1.81 | 1.25 | 5.0 |

**SERIES 60130** The new Series 60130 heat sink was specifically designed for the tab mount plastic case type semiconductor. Available with pins for circuit board solder mount or without pins for a self-threading screw mount. Longer lengths available upon request.

| | | | | | | |
|---|---|---|---|---|---|---|
| 60130-010 | G | Plastic Power (3 Holes) | 1.0 | 1.38 | 0.50 | 13.6 |
| 60130-010-P | G | Plastic Power (3 Holes) | 1.0 | 1.38 | 0.50 | 13.6 |
| 60130-015 | G | Plastic Power (3 Holes) | 1.5 | 1.38 | 0.50 | 12.0 |
| 60130-015-P | G | Plastic Power (3 Holes) | 1.5 | 1.38 | 0.50 | 12.0 |

**SERIES 5013** Minimum amount of board space required and at a very low cost.

| | | | | | | |
|---|---|---|---|---|---|---|
| 5013B | H | TO-3 | 1.88 | 1.40 | 0.50 | 14.0 |
| 5014B | H | TO-3 | 1.88 | 1.40 | 0.75 | 12.0 |
| 5015B | H | TO-3 | 1.88 | 1.40 | 1.00 | 10.0 |
| 5016B | H | TO-3 | 1.88 | 1.40 | 1.25 | 8.0 |

**SERIES 5007** Two piece interated circuit package heat sink removes heat from both top and bottom. Designed for 14 and 16 pin dual in line up to 0.82" in length.

| Part Number | Figure | For Case Style | Size, Inches L | W | H | TR °C/W |
|---|---|---|---|---|---|---|
| 5007A | I | IC's 14 and 16 Pins | 1.24 | 0.75 | | 28 |

**SERIES 5010** One piece heat sink for 14 and 16 pin integrated circuit package. Bonded with AAVID's Ther-O-Bond 1500 for maximum thermal efficiency.

| | | | | | | |
|---|---|---|---|---|---|---|
| 5010B | J | IC's 14 and 16 Pins | 0.75 | 0.604 | .177 | 35 |
| 5010C | J | IC's 14 and 16 Pins | 0.75 | 0.604 | .177 | 38 |

**SERIES 3225** Low cost heat sink that is easy to install.

| Part Number | Figure | For Case Style | Size, Inches Dia. | H | TR °C/W |
|---|---|---|---|---|---|
| 3225B | K | TO-5 | 0.75 | 0.40 | 50 |
| 3225C | K | TO-5 | 0.75 | 0.40 | |
| 3226B | K | TO-5 | 0.75 | 0.40 | 60 |
| 3226C | K | TO-5 | 0.75 | 0.40 | |

**SERIES 60495R & 60150R** Extruded heat sink designed for minimum amount of mounting space. The Model 60150R incorporates the highly efficient radial fin design.

| | | | | | | |
|---|---|---|---|---|---|---|
| 60495R-3B | L | Blank | 3.0 | 1.39 | 1.50 | 2.8 |
| 60495R-3B-H1 | L | TO-3 | 3.0 | 1.39 (Base) | 1.50 | 2.8 |
| 60150R-3B | M | Blank | 3.0 | 3.96 | 1.60 | 1.7 |
| 60150R-3B-H1 | M | TO-3 | 3.0 | 3.96 | 1.60 | 1.7 |

**SERIES 5051** High performance — economical 5051 thru 5059. One piece heat sink for TO-3 and TO-66 devices, saves additional labor and cost by allowing device and sink to be mounted with same hardware.

| | | | | | | |
|---|---|---|---|---|---|---|
| 5051B | N | TO-3 | 1.78 | 1.78 | 0.50 | 6.9 |
| 5052B | N | TO-3 | 1.78 | 1.78 | 0.75 | 6.3 |
| 5053B | N | TO-3 | 1.78 | 1.78 | 1.00 | 5.7 |
| 5054B | N | TO-3 | 1.78 | 1.78 | 1.25 | 5.3 |
| 5056B | N | TO-66 | 1.78 | 1.78 | 0.50 | 6.9 |
| 5057B | N | TO-66 | 1.78 | 1.78 | 0.75 | 6.3 |
| 5058B | N | TO-66 | 1.78 | 1.78 | 1.00 | 5.7 |
| 5059B | N | TO-66 | 1.78 | 1.78 | 1.25 | 5.3 |

**SERIES 3230-5** The 3230-5 heat sink provides extra surface area for cooling. May be secured using boss which clears a 4-40 screw.

| Part Number | Figure | For Case Style | Size, Inches Dia. | H | TR °C/W |
|---|---|---|---|---|---|
| 3230B-5 | O | TO-5 | 0.75 | 0.25 | 43 |
| 3230C-5 | O | TO-5 | 0.75 | 0.25 | |

**SERIES 5690** Highest power dissipation per unit cost.

| | | | | | | |
|---|---|---|---|---|---|---|
| 5690B-3 | P | TO-3 | 1.83 | 1.83 | 1.31 | 4.5 |
| 5690B-66 | P | TO-66 | 1.83 | 1.83 | 1.31 | 4.5 |

**SERIES 5423** Space saving — clamps over the TO-3 case using virtually no additional board space.

| | | | | | | |
|---|---|---|---|---|---|---|
| 5423 | Q | TO-3 | 1.56 | 1.06 | 0.50 | 85 |
| 5425 | Q | TO-3 | 1.56 | 1.06 | 0.75 | 63 |
| 5427 | Q | TO-3 | 1.56 | 1.06 | 1.00 | |

**SERIES 3201** Low cost TO-5 heat sink provides a very high ratio of heat dissipation to volume occupied. Ideal for components card applications.

| Part Number | Figure | For Case Style | Size, Inches Dia. | H | TR °C/W |
|---|---|---|---|---|---|
| 3201B | R | TO-5 | 0.50 | 0.25 | 65 |

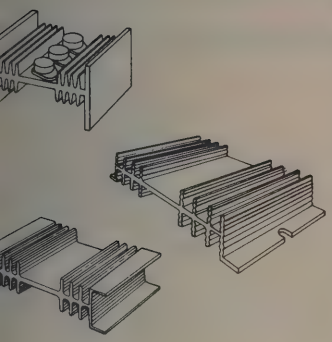
**e DELBERT BLINN COMPANY has for many years designed, fabricated and supplied specialty hardware items r the rapidly changing and expanding electronics industry. Our vast experience in plastic and metal fabrica- on guarantees you the best possible service for your particular needs regardless of quantity.**



## HEAT SINK DISSIPATORS

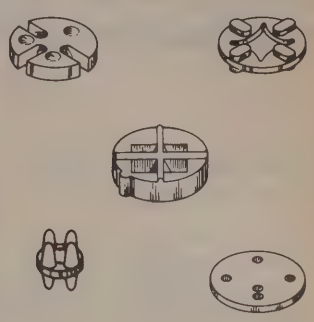
Efficiency, light weight and economy are incorporated in a complete line of professionally engineered heat sinks available in a variety of sizes and shapes. Material: Aluminum 6063-T5 alloy, mill finish. Lengths to 5 ft. available. (Serrations--U.S. Pat. No. 3163207). Can be cut, drilled, anodized or painted to your specifications.

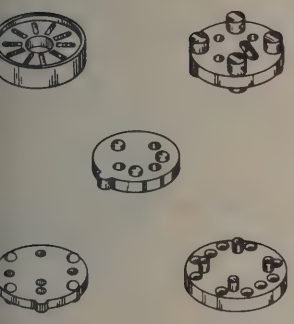
CATALOG SERIES — AHS

## NYLON TRANSISTOR PADS

Precision molded from Zytel 101 (MIL-P-20693), these pads provide an economical insulator and thermal barrier with high dielectric strength. Resist continuous exposure to 135° C.

CATALOG SERIES — TPN





## DIALLYL PHTHALATE TRANSISTOR PADS

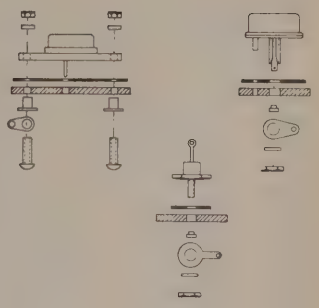
Available with and without stand-offs in configurations for all applications, these pads are molded of glass-filled Diallyl Phthalate (Mil-M-14F SDG) and provide an excellent mounting base. They resist continuous exposure to 400° F. and offer very high dielectric strength.

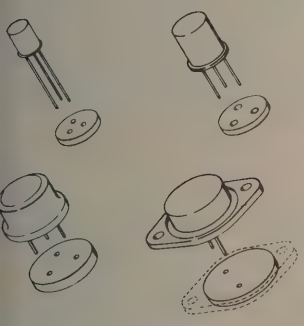
CATALOG SERIES — TPD

## MOUNTING KITS

These and other standard kits incorporating mica, beryllium oxide or anodized aluminum insulators provide the parts necessary to mount all semi-conductors. Special materials and configurations can also be furnished to your specifications.

CATALOG SERIES — MK





## BERYLLIUM OXIDE TRANSISTOR HEAT SINKS

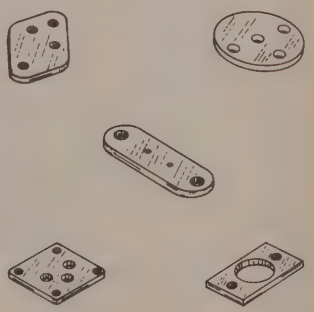
Made of high purity (99+%) sintered BeO, these sinks provide a satisfactory solution to the design engineer where electronic applications require both dielectric insulation and high heat transfer.

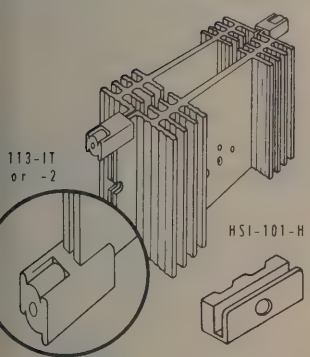
CATALOG SERIES — BOS

## MICA INSULATORS

Delbert Blinn mica insulators are precision stamped from quality controlled stock and will withstand temperatures to 1000° F. with negligible dehydration. Standard thickness is .002 ± .001. Other designs, shapes, thicknesses or tolerances are available on special order.

CATALOG SERIES — MI





## HEAT SINK MOUNTING INSULATOR

Delbert Blinn mounting insulators are precision molded of Micralon "202" and provide a practical, compact and economical method for mounting and insulating all standard heat sinks.

These insulators are capable of continuous operation to 175° C. and have a dielectric strength of 340 V/MIL.

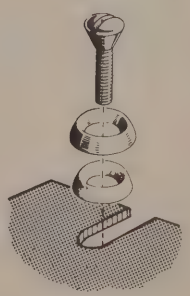
CATALOG SERIES — HSM

## NYLON CUP WASHER FILLERS

Employed as insurance against damage, these quality fillers are molded from high strength Polyamide (nylon) and guarantee chip and crack free panel installation.

Available in Nos. 6, 8, 10 and 12 screw sizes.

CATALOG SERIES — NWF



**any other heat sink, trans- or pad and specialty items t shown above are avail- le.**

**rite for additional informa- n.**

When custom designs or modifications of standard electronic hardware parts are needed, our years of experience in the molding, extruding, stamping and fabrication of metal and plastic parts enables us to supply you with parts unsurpassable in quality.

We can help you successfully meet competition in today's highly competitive market.

Panasonic

# ZNR TRANSIENT/SURGE ABSORBERS

Panasonic ZNRs are zinc oxide nonlinear resistors whose resistance changes as a function of the applied voltage. The ZNR has a bilateral and symmetrical V-I characteristic curve. Gives your circuit clamping protection in either direction. The ZNR thus provides a highly reliable and economical way to protect against repeated high voltage transients and surges such as those produced by lighting, switching surges and noise spikes.

## FEATURES

- Excellent clamping voltage characteristic and fast response time (<50 nsec.) when subjected to impulse surges. Eliminates the discharge lag that is indicative of gap-type arrestors.
- Bilateral and symmetrical V-1 characteristic curve. The ZNR can, therefore, be used both in AC and DC circuits, for protection of either positive or negative transients.

**IMMEDIATELY AVAILABLE FROM STOCK**

## STANDARD VOLT RANGE

| Part Number | Varistor Voltage $V_1$ mA (V) | Maximum Allowable Voltage AC rms (V) | DC (V) |

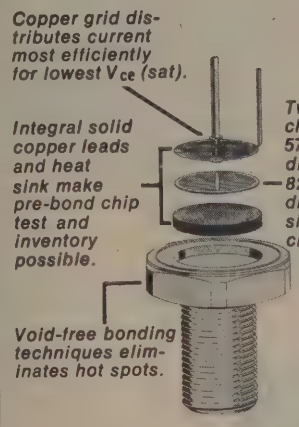
**TRANSISTOR FEATURES**

High Current Gains: 10 min. @ 300A
High Collector Voltage: to 650V
Low Saturation Voltage: 0.5V max. @ $I_C = 300A$
Second Breakdown Resistant: $E_{s/b} = 6$ Joules, $I_{s/b}$ — SOAR Specified
Manufactured to MIL Specs: MIL-S-19500
Power Dissipation Ratings: to 625 Watts

**POWERBLOCK POWER SYSTEM FEATURES**

High KVA Product
High Current Gains
Savings in Space & Weight
Savings in Ckt. Assembly Costs
Customized Options Available
Power Dissipation Ratings: to 1200 Watts



Copper grid distributes current most efficiently for lowest $V_{ce}$ (sat).
Integral solid copper leads and heat sink make pre-bond chip test and inventory possible.
Two choices: 570 mil diam. or 820 mil diam. single chips!
Void-free bonding techniques eliminates hot spots.

# UNITED PRICING REPORTS

## the single source that speeds up invoicing, pricing, quoting, purchasing and estimating

Electronic component prices change so fast, you'd need a team of people just to keep up.

United Pricing Reports is the better way. When you subscribe to Pricing Reports you receive 1500 pricing sheets (3000 pages) of the latest prices, as of the date we ship them to you.

This gives you, in a single source, up-to-the minute selling prices on more than 500,000 electronic components.

United Pricing Reports gives you accurate resale prices at the exact moment you need them. Not hours or days later. So it helps you eliminate frantic phone calls, letter writing and catalog scanning to check on prices when you write an invoice or type a purchase order.

## Twice weekly price updates.

One week after you receive your Pricing Reports source book (1500 pricing sheets) you begin receiving twice weekly price updates. You simply take these new price pages and replace the now obsolete pages with them.

The whole process is simple. All information is organized alphabetically by manufacturer. And each manufacturer's price schedule is listed by part number in numerical/alphabetical sequence.

One more thing. When we promise twice weekly updates, we deliver. 52 weeks a year, consistently. Not monthly or every other month. We have a tradition of delivery on our promises, and we're certainly not going to stop now.

# HY-A-SIL HIGH-AMPERE SILICON RECTIFIERS

## FEATURES

- High Operating Temperature, 190°C (Up to 120°C ambient)
- High Operating Voltage (Up to 600 p.i.v.)
- High Efficiency (99% compared to about 75% for selenium)
- Excellent Regulation (4% compared to about 15% for selenium)

# METOXILITE LO-$V_F$ SUPER-FAST RECOVERY SILICON RECTIFIERS

A high efficiency fast recovery axial lead silicon rectifier for high frequency applications. Ideally suited as core drivers and design of high frequency converters. The Semtech Metoxilite case provides the ultimate in hermeticity and ruggedness. The metal oxides which form the outer case material are fused directly to the high temperature bonded tungstaloid pin junction assembly. The Super Fast Metoxilite is suitable for use in consumer, industrial, military and space programs.

# METOXILITE LO-CURRENT SILICON RECTIFIERS

Metoxilite is Semtech's new multipurpose high current axial lead silicon rectifier, ideally suited for small electronic package design. Through utilization of new design and manufacturing techniques, the Metoxilite device provides the ultimate in hermeticity and ruggedness. The metal oxides which form the outer case material are fused directly to the high temperature metallurgically bonded assembly. The Metoxilite device exceeds environmental requirements of current military and space program specifications. A general purpose rectifier suitable for all applications.

# METOXILITE SILICON RECTIFIERS — ALSO AVAILABLE TO NEW MSFC/NASA AND MILITARY SPECIFICATIONS (JAN, JTX AND JTXV)

**200 TO 1000 VOLTS**
**LOW REVERSE LEAKAGE**
**SOLID INTERNAL CONSTRUCTION**
**SUPERIOR THERMAL SHOCK RESISTANCE**
**FOR NEW PACKAGING DESIGN**

A multi-purpose, high current axial lead silicon rectifier, ideally suited to maximize small electronic package designs. Metoxilite (fused metal oxides) is fused to the metallurgically bonded junction/tungsten-pin assembly forming a "tough" subminiature package. Hermetically sealed and designed to meet stringent temperature cycling, humidity and other environmental requirements per MIL-STD-750A. A general purpose rectifier for use in military, space, industrial and consumer product applications, such as: power supplies, AC to DC converters and control circuits.

# OTHER JAN TYPE SILICON RECTIFIERS

Semtech Corporation provides a multipurpose Hermetic Seal Silicon Rectifier incorporating advance design and engineering techniques never before available to the electronics industry at a nominal cost. This new rectifier utilizes solid internal construction with a package combining high mechanical strength, superior thermal shock resistance, rugged hermetic seal, high dielectric strength and excellent thermal conductivity properties.

REFER TO INFORMATION ON METOXILITE SILICON RECTIFIERS FOR DEVICES THAT ARE AVAILABLE TO NEW MSFC/NASA AND MILITARY SPECIFICATIONS.

# METOXILITE "MINISTIC" HIGH VOLTAGE SILICON RECTIFIERS — FAST RECOVERY

Semtech Corporation introduces a new Sub-Sub-Miniature High Voltage Metoxilite Rectifier. Ideally suited for low current high voltage applications and multiplier circuits. Improved reverse leakage and reverse recovery parameters at elevated temperatures. A silicon multi-junction device utilizing a high temperature tungsten pin bonded construction with expansion coefficients matched. The void-free, solid monolithic technology results in corona-free operation. The Metoxilite hermetic seal meets or exceeds stringent temperature cycling and humidity requirements of military, space, industrial and consumer-product applications.

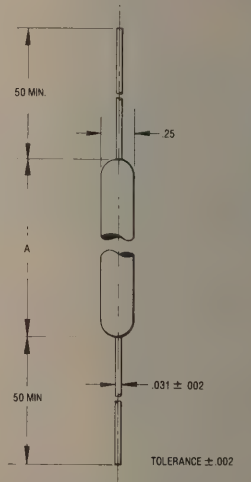
Storage Temperature: −55°C to +150°C.
Operating Temperature: −55°C to +150°C.

① Recovery conditions: 5 MA forward current to 10 MA reverse current. Recovery time measured when rectifier recovers to 2.5 MA.

NOTE: When utilized at maximum PIV ratings subminiature high voltage rectifiers should be used in oil environment or encapsulated in epoxy or other types of conformal coatings.
Above available with Io of 50 MA at 55°C as Types SMHF20K and SMHF30K



SMFR20K SMFR30K

# BI-POLARITY SILICON TRANSIENT SUPPRESSORS

This new series of silicon bi-polarity transient suppressors is unique in that a single device will provide voltage transient protection symetrically (i.e., provide protection for A.C. signals in addition to D.C.). This new series of devices has peak pulse power ratings of 500 or 1500 watts for 1 millisecond and its response time is effectively instantaneous (less than 1 x $10^{-12}$ sec.). Therefore, these versatile devices have many protection applications where large voltage transients can permanently damage voltage-sensitive components. Its response time affords protection for integrated circuits, MOS devices, hybrids, and many other voltage-sensitive components. The devices are encased in Semtech's Metoxilite, fused directly to the high temperature metallurgically bonded assembly. For use in commercial, industrial, military and space programs.

**Characteristics @ 25°C applies in either direction.**

**Can be supplied as JAN, JANTX, or JANTXV to MIL-S-19500/516 (EL).**

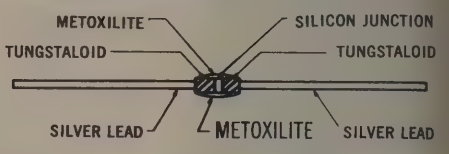
# METOXILITE LOW DYNAMIC IMPEDANCE SILICON VOLTAGE REGULATORS



This new series of devices offers significantly lower dynamic impedance when compared at the same operating current to those presently available. For a given dynamic impedance requirement, these regulator diodes can be operated at a lower bias current. Regulation, ripple reduction and efficiency will be improved when these devices are used as regulators.

Cased in Metoxilite, they provide the ultimate in hermeticity and ruggedness. The metal oxides which form the outer case are fused directly to the high temperature metallurgically bonded assembly. This Metoxilite device exceeds requirements of current military and space program specifications.

# METOXILITE LOW DYNAMIC IMPEDANCE SILICON VOLTAGE REGULATORS

This new series of devices offers significantly lower dynamic impedance when compared at the same operating current to those presently available. For a given dynamic impedance requirement, these regulator diodes can be operated at a lower bias current. Regulation, ripple reduction and efficiency will be improved when these devices are used as regulators.

Cased in Metoxilite, they provide the ultimate in hermeticity and ruggedness. The metal oxides which form the outer case are fused directly to the high temperature metallurgically bonded assembly. This Metoxilite device exceeds requirements of current military and space program specifications.

# HIGH VOLTAGE MONOLITHIC CERAMIC CAPACITORS

## IDEAL FOR HIGH VOLTAGE HIGH DENSITY POWER SUPPLIES

We have a high density high voltage monolithic capacitor that meets present day equipment design criteria. Offering higher volumetric efficiencies and voltage stability over wide temperature ranges.

### HIGHER CURRENT CAPABILITIES

In addition to high voltage the inherent design offers higher current carrying capabilities than previously available in ceramic monolithic capacitors of similar size.

### "GOLD CAP" RADIALS

Construction: Monolithic radial leaded and dip coated
Voltage: 1, 2, 3, 4 & 5 KV
Capacitance: 18 pF to .39 μFd.
Dimensions: (Body) From .40″L x .35″H x .25″T to .80″L x .75″H x .35″T

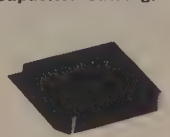
### "MONO" CHIPS

Construction: Monolithic with end terminations
Voltage: 1, 2, 3, 4 & 5 KV
Capacitance: 18 pF to .39 μFd.
Dimensions: (Body) From .25″L x .20″W x .15″T to .65″L x .60″W x .25″T

"GOLD CAP"

Semtech capacitors are now available in quantity from stock at pricing low enough for use in commercial applications.

**Contact your nearest Semtech office for our new High Voltage Capacitor Catalog.**



"MONO"

## TWO DIELECTRIC TYPES

| DIELECTRIC | NPO | X7R |
|---|---|---|
| Temperature Coefficient (T.C.) | Less than 30 ppm/°C; −55°C to +125°C | ±15% −55°C to +125°C |
| Dissipation Factor (D.F.) | Less than .0015 (.15%) at 1 kHz, 1 VAC, 25°C | 2.5% max 1 kHz, 1 VAC, 25°C |
| Insulation Resistance (I.R.) | 100K megΩ or 1000 megΩ microfarads, whichever is less (25°C, 500 VDC) | 100K megΩ or 1000 megΩ microfarads, whichever is less (25°C, 500 VDC) |
| Aging | 0 | 1% per decade |
| Dielectric Withstanding Voltage | 1.2 Times Rated Voltage*, at 25°C | 1.2 Times Rated Voltage*, at 25°C |
| Dimensional Tolerance | ±.010 or ±5%, whichever is greater | ±.010 or ±5%, whichever is greater |

*Dielectric Withstanding Voltage Tests are conducted with changing current limited to 10 mA and the discharge current limited to 5A.

# "COMPAC" BRIDGE RECTIFIERS

## MULTI-PURPOSE

**SOLID SILVER LEADS: DIAMETER .031 ±.002"; LENGTH ⅞" MINIMUM**
**OPERATING AND STORAGE TEMPERATURE −55°C TO +150°C**

Sub-miniature, rugged, highly-reliable and economical, are the only adjectives necessary to describe Semtech's "Compac" silicon bridge rectifiers. Incorporating Semtech's Supratxial silicon junctions, solid silver leads and high-temperature molding compounds, the units provide maximum mechanical, thermal and electrical reliability. These silicon bridge rectifiers will meet stringent requirements of military, industrial and consumer products applications.

## "COMPAC-3" SILICON 3 PHASE

Semtech now offers a line of "Compac" sub-miniature medium power, 3-phase full wave bridge rectifiers. These units utilize Semtech's unique Supratxial silicon junctions. Sub-miniature size makes these bridge rectifiers easy to package. Use of high temperature compounds provides excellent mechanical, thermal and electrical reliability. These silicon bridge rectifiers easily satisfy the stringent requirements of military and industrial as well as consumer applications.

# "ALPAC"® SILICON BRIDGE RECTIFIERS

Semtech Corporation introduces "ALPAC" a complete line of Single Phase Silicon Bridge Rectifier circuits. Designed in Aluminum Cases to provide maximum thermal conductivity and simple installation. "ALPAC" universal terminals, insulated from case, provide a 3 way electrical connection: fast disconnect, wire wrap around and hole wire insert for soldering.

Internally the device utilizes the Semtech high performance solid double heat sink junctions designed for mechanical strength and eliminating the use of solders for improved reliability. The bridges are designed for utilization in power supplies, AC to DC converters and motor control circuits.

# "ALPAC® JR." SILICON BRIDGE RECTIFIERS

Semtech offers "Alpac Jr." Designed in aluminum cases (turret terminals, insulated from case) to provide maximum thermal conductivity and simple installation. Internally the "Alpac Jr." utilizes the Semtech high performance solid double heat sink junctions. The bridges are designed for utilization in power supplies, AC to DC converters, motor control circuits, etc.

# "ALPAC® SR." SILICON BRIDGE RECTIFIERS

Semtech offers a wide choice of high current silicon bridge rectifiers for military and industrial applications. Leading the "Alpac Sr." family of heavy-duty products, these bridge rectifiers incorporate high-performance, solid, double tungstaloid pin, silicon junctions, insulated terminals, and light weight, easy-to-mount aluminum cases. Aluminum cases also provide maximum thermal conductivity. "Alpac Sr." bridges are designed for utilization in power supplies, AC to DC converters and motor control circuits.

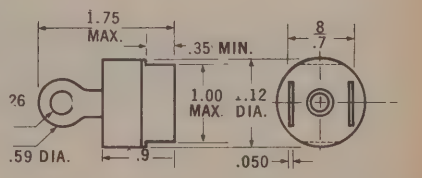
TECHNICAL BULLETIN MB25



Maximum Operating & Storage Temperature —55°C to +150°C.
Mounting Torque 35-40 Inch Lbs.
**OFHC—Oxygen Free High Conductivity,
* $V_F$ is measured at pulse $I_F$ duration = 1.0 millisecond.

Standard part comes with No. 8 A.W.G. Flex Leads
Add letter W after Type No.
—Add Letter L after type number to specify lug type.
Recovery conditions: 0.5 amp forward current to 1.0 amp reverse current. Recovery time measured when rectifier recovers to .25 amp and performed on each diode prior to assembly.

## 3-PHASE ½ WAVE BRIDGE

Semtech Corporation introduces a new series of "CuPac" 150 high current silicon 3 phase ½ wave bridges with fast recovery characteristics. OFHC** insert base allows the internal Metoxilite rectifiers to be heat sunk. The secondary epoxy case provides a long external leakage path necessary for P.I.V. to 600 volts.

# "SLIMPAC" HIGH VOLTAGE-HIGH CURRENT SILICON RECTIFIERS

The Semtech's "Slimpac" is a new high density high voltage high current silicon rectifier for use in industrial and military applications which require small, lightweight rectifiers without compromise on the required high reliability criteria. Designed and tooled to be efficiently mass produced, "Slimpac" can be used economically in existing applications. The rectifier can be utilized in all standard, single and polyphase rectifier circuits. Designed to be corona free, the unit is capable of meeting stringent electrical, mechanical, and environmental specifications.

# "KV-PAC" HIGH VOLTAGE SILICON RECTIFIERS, DOUBLERS AND CENTER TAPS

New high voltage silicon rectifier assemblies in a rugged, functional design. "KV-PAC" has easy-to-use mounting slots and universal 3-way electrical connections. Designed to operate at 0.6 Amp when utilized as a half-wave rectifier, doubler and 1.2 Amps in a center-tap, or bridge circuit application. Economical, for usage in commercial and industrial applications such as power supplies for the microwave ovens.

# HIGH VOLTAGE MODULES

High voltage modules ("HVM"), a new building block approach for high voltage requirements. The devices can be stacked to provide either higher voltage assemblies or other circuit configurations such as doublers, center taps and bridges. "HVM" completely eliminates all external component parts and solder joints usually found in devices of this type. All components are encapsulated and connected to metal discs that, in turn, serve as compensation, cooling fins and corona protection. Internally, "HVM" utilizes the Semtech Metoxilite silicon rectifiers. Easy to assemble and mount, simple to screw together; meets the various circuit configurations and equipment mounting requirements.

# "KILOVOLT-STAC" HIGH VOLTAGE SILICON RECTIFIERS

The Semtech "KILOVOLT-STAC" is a new high density, high voltage, silicon rectifier for use in commercial, industrial and military applications. Designed and tooled to be efficiently mass produced, "KILOVOLT-STAC" can be used economically in existing applications. The rectifier can be utilized in all standard, single and polyphase rectifier circuits and is specifically adaptable for use in power supplies for X-ray equipment. These devices are cylindrical in shape and thereby provide easy mounting in either air or oil. Designed to be corona-free, "KILOVOLT-STAC" rectifiers are capable of meeting stringent electrical, mechanical and environmental specifications.

# "STACPAC"

"Stacpac", a new concept in power rectifier stacks for use in high voltage, high current applications. Unique in design, "Stacpac" completely eliminates all the external component parts and solder joints usually found in devices of this type. All components are encapsulated and connected to aluminum discs, that in turn serve as compensation, cooling fins and corona protection. Internally, "Stacpac" utilizes the Semtech solid construction, double tungstaloid, silicon rectifiers. "Stacpac" was designed specifically to streamline packaging, replace multiple stud rectifiers and auxiliary compensation in high voltage, high current applications.

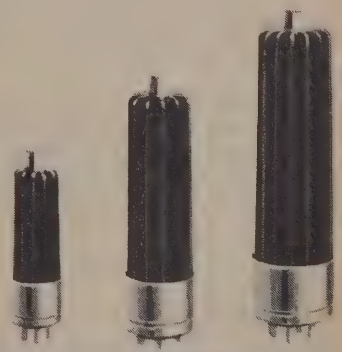
## TUBE-PAC" HIGH VOLTAGE SILICON RECTIFIERS

UBE-PAC" is Semtech's new line of silicon, high-voltage rectifiers intended as a direct plug- replacement part for most popular mercury-vapor and vacuum glass tube-type rectifiers.

signed to last the life of the equipment, Semtech's "TUBE-PAC" are smaller, corona-free, ssipate heat more effectively and eliminate filament power. No special adaptors are re- ired to use Semtech's "TUBE-PAC."



R (SEMTECH TUBE REPLACEMENT PRECEEDS STANDARD EIA TUBE TYPE NUMBER).

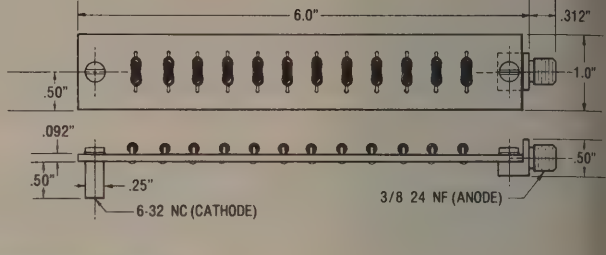
# "X-WAY STIC" HIGH VOLTAGE SILICON RECTIFIERS

The Semtech "X-Way Stic" is a new high voltage, silicon rectifier for use in commercial and industrial applications. The rectifier can be utilized in all standard, single and poly-phase rectifier circuits and is specifically adaptable for use in power supplies for X-ray equipment. The "X-Way Stic" utilizes hermetically sealed Metoxilite multi-chip rectifiers on a fiber glass strip. The Metoxilite rectifier techniques were initially developed for high reliability aerospace programs. Now this technology is available at low pricing for use in consumer equipment.



| Type* | Peak Reverse Voltage Operating KV | Peak Reverse Voltage Test KV | Reverse Current At PRV uA | Average Rectified Current @ 55°C Oil mA | Recurrent Surge 10 Cycles @ 60 Cycles Amps | Single Cycle Surge @ 8.3 mS Amps | Forward Voltage @ 50mm Volts |
|---|---|---|---|---|---|---|---|
| X100KS | 100 | 125 | 1.0 | 150 | 7.5 | 25 | 160 |
| X125KS | 125 | 150 | 1.0 | 150 | 7.5 | 25 | 190 |
| X150KS | 150 | 175 | 1.0 | 150 | 7.5 | 25 | 220 |

* "X-Way Stic" can also be supplied without termination hardware, standoff (cathode) and 3/8 stud (anode), add letter "W" after type number.

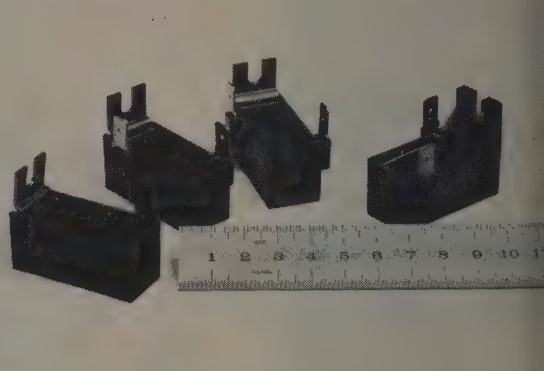
Operating and storage temperature: −55°C to +150°C.

Derate current linearly from 150 mA at 55°C to zero at 150°C.
All specifications are at 25°C unless otherwise noted.

NOTE: In order to achieve rated voltage and current, the rectifiers should be submerged in Shell Diala Oil AZ or equivalent electrical insulating oil.

# "MOR-PAC II" HIGH VOLTAGE SILICON RECTIFIERS FOR MICROWAVE OVENS

The MOR-PAC (Microwave Oven Rectifier Pac) silicon rectifier was designed specifically for use in Microwave ovens. Parameters are specified to meet the unique characteristics of the Magnetron power supply. A high voltage Metoxilite multi-chip silicon rectifier encapsulated to provide better heat dissipation and simple mounting.



## SPECIFICATIONS

Types: SCMW 10, 11, 12, 13, 20 & 22

Voltage Breakdown ($V_B$) @ 100 UA (Per *) — 12 KV Min.

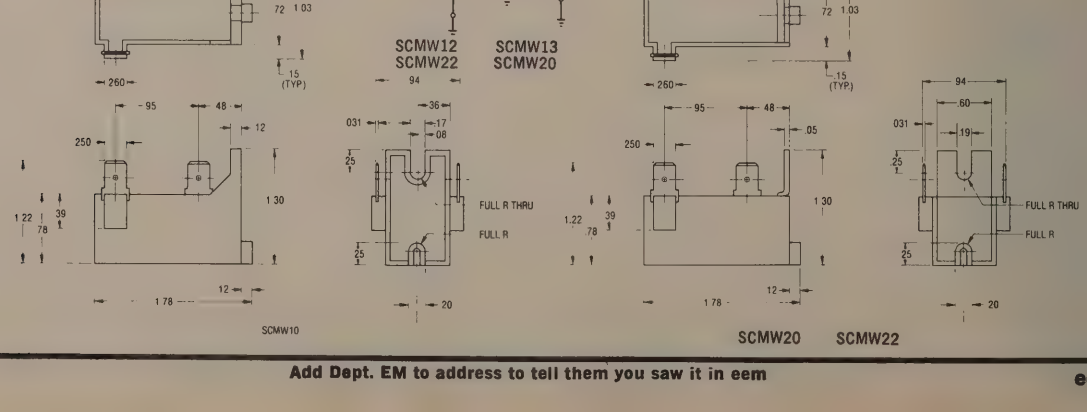
Maximum Reverse Operating Voltage (Ep) — 5 KV

Average Rectified Current ($I_o$) @ 55°C $T_c$

| | |
|---|---|
| SCMW-10 | 350 MA |
| SCMW-11 | 400 MA |
| SCMW-12 | 400 MA |
| SCMW-13 | 400 MA |
| SCMW-20 | 700 MA |
| SCMW-22 | 750 MA |

Operating and Storage Temperature — −55°C to +150°C

* Transient rating — one millisec. pulse non-recurrent



SEMTECH
CORPORATION 652 Mitchell Road, Newbury Park, California 91320 (805) 498-2111, (213) 628-5392 / TWX: 910-336-1264

# N-CHANNEL ENHANCEMENT-MODE VMOS POWER FETS

- **High Speed Switching**
- **CMOS to High Current Interface**
- **TTL to High Current Interface**
- **High Frequency Linear Amplifiers**
- **Line Drivers**
- **DC to DC Converters**
- **Switching Power Supplies**

## BENEFITS

- Directly Interfaces to CMOS, TTL, DTL and MOS Logic Families
  Low Drive Current ($I_{GSS}$ <10 μA)
- Permits More Efficient and Compact Switching Designs
  Typical $T_{ON}$ and $T_{OFF}$ <5 nsec
- Minimizes Component Count and Design Time/Effort
  Drives Inductive Loads Directly
  Fan Out from a CMOS Logic Gate >100
  Easily Paralleled with Inherent Current Sharing Capability
  High Gain
- Improves Reliability
  Free from Secondary Breakdown
  Voltage Derating
  Inherently Reduces Output Current as Temperature Increases
  Input Protected from Static Discharge

## ABSOLUTE MAXIMUM RATINGS

NUMBER ONE IN SEMICONDUCTOR ACCESSORIES

# Heat Sinks and Semiconductor Accessories

## Heat Sinks ①

DIP HEAT SINKS One piece heat sinks for 14 and 16 pin integrated circuits. 6020A clips securely into place requiring no mounting hardware or epoxy. Other styles bond to DIP with epoxy, require no extra board space, and may be added after assembly.

| PART NO. | FIG. | CASE STYLE | NOMINAL SIZE LENGTH | WIDTH | HEIGHT | TR② °C/W |
|---|---|---|---|---|---|---|
| 6010B | A | DIP | .750 | .604 | .212 | 55 |
| 6011B | B | DIP | .750 | .250 | .190 | 65 |
| 6012B | B | DIP | .730 | .250 | .190 | 65 |
| 6020A | C | DIP | 1.000 | .725 | .500 | 40 |

TO-5 ENCAPSULATING HEAT SINKS Two piece heat sinks for positive retention under shock and vibration. Top and body grip transistor flange for maximum heat transfer.

| | | | | | |
|---|---|---|---|---|---|
| 1101A | D | TO-5 | .500 HEX | .390 | 10 |
| 2205B | E | TO-5 | .812 DIA | .340 | 41 |
| 2211B | E | TO-5 | .625 DIA | .310 | 49 |
| 2215B | E | TO-5 | .750 DIA | .350 | 37 |

TO-5 ECONOMY PRESS-ON HEAT SINKS One piece light weight coolers. May be installed with no special tools after board assembly.

| | | | | | |
|---|---|---|---|---|---|
| 1115B | F | TO-5 | .375 DIA | .400 | 68 |
| 1116B | F | TO-5 | .351 DIA | .370 | 18* |

Consult Thermalloy catalog for dimensions. MIL SPEC parts available.

INSUL-COTE Insul-Cote is a neatly packaged Thermalfilm or mica insulator PRE-COATED with Thermalcote thermal grease. Available in individual packets or high volume "Ammo Pack" for use with Thermalloy's Insul-Cote dispenser. Below is a partial listing of Insul-Cote Insulators. For case style consult table above.

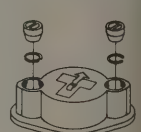
| INSUL-COTE WITH THERMALFILM I | | INSUL-COTE WITH .002/.003 MICA |
|---|---|---|
| 43-03-1AP | 43-66-1AP | 56-03-2AP |
| 43-03-2AP | 43-66-2AP | 56-66-2AP |
| 43-03-3AP | 43-77-2AP | 56-77-2AP |
| 43-03-4AP | 43-77-9AP | |

For other INSUL-COTE pre-coated insulators, individual packets, or production dispenser, consult factory.

MOUNTING PADS Prevent heat damage during soldering, facillitate board clean-up, prevent solder bridges, assure uniform device height, and simplify board repair. Designate material and color as suffix to part no. Materials: (-N) Nylon, or (-DAP) Diallyl Phthalate. Example: 7717-N RED

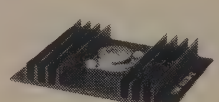
| CASE STYLE | PART NO. | LEADS | O.D. | THK |
|---|---|---|---|---|
| TO-5 | 7717-4 | 4 | .375 | .075 |
| | 7717-5 | 4 | .350 | .125 |
| TO-18 | 7717-7 | 4 | .250 | 125 |
| | 7717-18 | 4 | .200 | .100 |
| | 7717-152 | 3-4 | .200 | .045 |
| TO-18 LEAD CONVERSION to TO-5 | 7717-44 | 4 | .305 | .125 |
| to .150 Dia Cir | 7717-93 | 4 | .230 | .055 |
| IC LEAD | 7717-107 | 8 | .430 | .130 |
| IC LEAD CONVERSION .250 to .350 | 7717-222 | 8 | .365 | .070 |
| .200 to .400 | 7717-19 | 8 | .500 | .275 |
| EPOXY .05 in-line to TO-5 | 7717-2 | 3 | .305 | 125 |

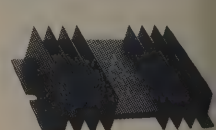
TO-3 COVER Insulating cover for TO-3 transistor includes lock washers for electrical connection of mounting screws to collector, test probe hole, and screw covers. Available in white glass filled nylon, Part No. 8903NW, or 94V-0 UL APVD BLACK THERMOPLASTIC POLYESTER, Part No. 8903VB.

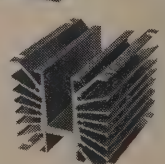


THERMALCOTE — a superior thermal point compound. Improves heat transfer across interface.
1 oz. tube . . . . . Part No. 249
2 oz. jar . . . . . Part No. 250
1 lb. . . . . Part No. 251

CUSTOM FABRICATED EXTRUDED HEAT SINKS Industry standard extrusion profiles are immediately available from Thermalloy stock. Many additional shapes are available at no tooling charge on a minimum order basis.







# TRW CAPACITORS

## SOLID STATE OPERATION

### TRW Molded Diodes

GENERAL CHARACTERISTICS

- Molded Encasement
- Uniform Sizes—Ideal for Auto-insertion
- Available in 1.0, 1.5, 2.5, 5.0 Watt Ratings

JEDEC types 1N4728 thru 1N4764

1N5923 thru 1N5956

1N5018 thru 1N5051

1N5344 thru 1N5388

TRW zeners are designed to operate in applications where high steady state power dissipation and or large zener surge currents may be encountered. They provide an economical and reliable solution to circuit problems where stud-mounted devices have previously been used.

### TRW Transient Voltage Suppressor

GENERAL CHARACTERISTICS

- Molded Encasement
- Full Voltage Range
- Storage Temp. Range . . . —65°C to 175°C.
- t clamping (0 volts to BV min) . . . 1 x $10^{-12}$ sec.
- 8.2 V thru 200 Volts
- Available in Three Ratings
  - 500 watts (0.5 Joules)
  - 1000 watts (1.0 Joules)
  - 1500 watts (1.5 Joules)

The TRW Transient Voltage Suppressor is an extension of the TRW Zener technology. It utilizes the devices' capability to rapidly change impedance value from a very high standby value to a very low conducting value when subjected to high energy transients. The Transient Voltage Suppressor effectively shunts potentially damaging effects to sensitive systems, equipment or components by clamping the voltage at some predetermined level.

## TRW HIGH POWER NPN SILICON TRANSISTOR

Available in Std. Types Like . . .

| | |
|---|---|
| 2N3771 | 2N6258 |
| 2N3772 | 2N6570 |
| 2N3773 | 2N6571 |
| 2N6259 | |

TRW BRT-60 (60 Amp.)

A high current, high power mesa transistor made by the single diffusion process. Extremely rugged and capable of handling large amounts of current, it is designed to be used in applications requiring high power dissipations.

The device is supplied in the TO-3 case. Typical applications are shunt regulators, high power amplifiers, power switching circuits, AC-DC converters, hammer drivers and various other applications.

# TRW RF SEMICONDUCTORS

## TRW HAS THE INDUSTRY'S BROADEST LINE OF RF TRANSISTORS AND HYBRIDS

- Linear Microwave Transistors
- Linear Broadband Amplifiers
- Linear HF/SSB Power Transistors
- Broadband Microwave Transistors
- Discrete Microwave Transistors
- Navigation Band Pulse Transistors
- UHF Discrete Power Transistors
- VHF Power Transistors
- VHF Aircraft Radio Transistors (AM Service)
- UHF Broadband JO* Transistors
- CATV Hybrid Amplifiers
- CATV Discrete Transistors
- M.I.C Power Amplifiers
- Low Voltage Power Transistors
- Mobile Radio Transistors

## NOTES

[1] Available but not recommended for use in new design.
[2] Package options are available.
[3] Rated for AM service.
[4] Linear Hybrid Amplifier.
[5] Low Noise Transistor.
[6] Linear Class A Transistor.
[7] Mobile Radio Hybrid Amplifier.
[8] 22V operation also available.
[9] Rated for Pulsed Power Operation.

# HIGH POWER HEAT SINKS (Extruded)

## HOW TO ORDER

### SELECT STYLE:

From Performance Table and Profile Illustrations select Style to meet requirements.

### SELECT FINISH:

#1 Unfinished Aluminum
#2 Chromate Conversion (MIL-C-5541) Irridite
#3 Dull Black Anodize (MIL-A-8625a)—Standard Finish

### DETERMINE HOLE PATTERN:‡ (See Figs.)

0 = Blank (No holes)
A = TO-3 Pattern
C thru C7 = SCR mtg.
F = TO-3 Pattern
G thru G8 = SCR mtg.
H thru H5 = SCR mtg. (Threaded)
T = TO-66 Pattern

### DETERMINE LENGTH:

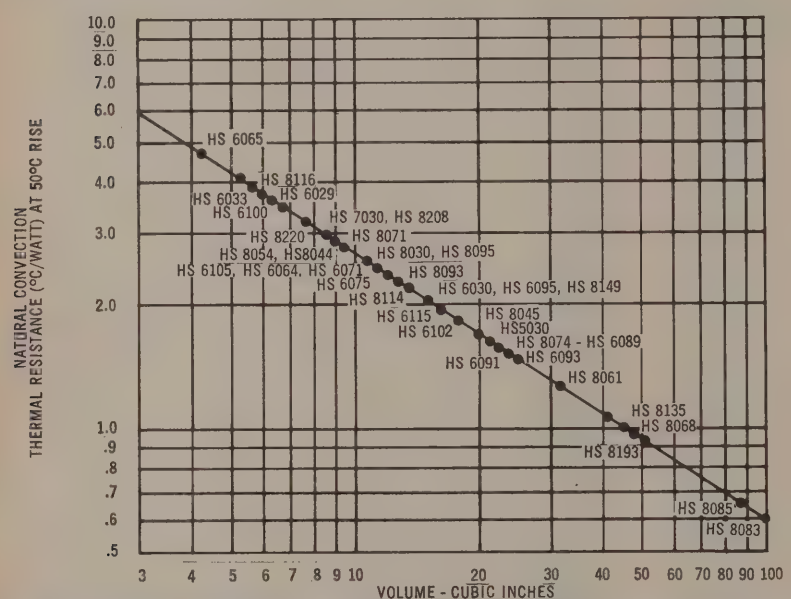
2 = 2″ 4 = 4″ 6 = 6″
3† = 3″ 5 = 5″

### EXAMPLE:

HS 7030 - 3 - B - 3
STYLE — FINISH — HOLES — LENGTH

NOTES:
1- * Indicates that sink utilizes serrated fins to achieve greater surface area.
2- Dimensions given are for reference only.
3- Material: Aluminum 6063-T5.
4- Tolerances: Standard mil tolerances.
5- T.R. - Thermal Resistance - Value indicated is based on a 3 inch length of sink.
6- † Industry standard length.
7- ‡ To order heatsinks with mounting holds only, use hole pattern #MH. Example HS6071-3-0-3-MH.

## SELECTION GUIDE



The curve, a straight line plot on log paper shows the natural convection thermal resistance (°C/watt) at a 50°C rise of the heat sink mounting surface above ambient, versus the volume occupied by the heat sink. The volume is based on a 3 inch length of each sink.

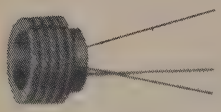
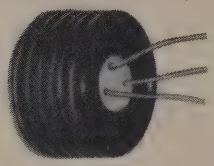
# MEDIUM POWER HEAT SINKS

FOR E. I. A. JEDEC OUTLINES: TO-1, TO-5, TO-7, TO-8, TO-9, TO-11, TO-12, TO-16, TO-18, TO-24, TO-25, TO-28, TO-29, TO-33, TO-39, TO-40, TO-42, TO-43, TO-44, TO-45, TO-46.



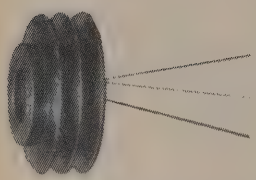
## 6025

**Weight:** .06 oz.
**Finish:** Irridite, unless otherwise specified
**Dia.:** ½" **Lgth.:** ¼"



## 8039

**Weight:** .145 oz.
**Finish:** Dull Black Anodize (MIL-A-8625a) unless otherwise specified
**Dia.:** ¾" **Lgth.:** 11/32"



## S8020

**Weight:** .148 oz.
**Finish:** Dull Black Anodize (MIL-A-8625a) unless otherwise specified
**Dia.:** 1" **Lgth.:** 13/32"

## HOW TO ORDER

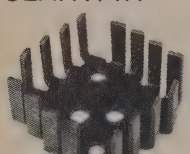
FINISH:
Dull Black Anodize (per MIL-A-8625a) standard finish.

Irridite Finish (per MIL-C-5541)

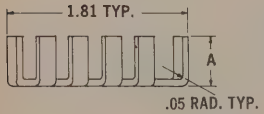
SUFFIX:
Determine the exact diameter of the type semiconductor to be used, since there is a large variation in semiconductor case diameters. Select appropriate suffix from table.

| Applies to: | Suffix | Semiconductor Mtg. Hole Dia. (inches) ±.003" |
|---|---|---|
| S8020 | P | .518 |
| | N | .498 |
| | M | .480 |
| | L | .397 |
| | K | .370 |
| | J | .353 |
| All Models | H | .335 |
| | G | .330 |
| | F | .318 |
| | E | .314 |
| | D | .294 |
| All Models | C | .271 |
| | B | .245 |
| | A | .177 |

## SLANTFIN



Here's a new line of heat sinks designed with slanted vane fins to utilize air flow in multiple directions for superior heat dissipation.
The high thermal efficiency of these lightweight heat sinks enables them to dissipate as much heat as heavier and more costly impact extruded and cast heat sinks.
Ready for immediate delivery, these new vemaline SlantFin heat sinks are designed to accommodate plastic power packs and can be easily mounted to printed circuit boards.



| Part No. | Dim. A |
|---|---|
| 6045 | .50 |
| 6046 | .75 |
| 6047 | 1.00 |
| 6048 | 1.25 |

### ORDERING INFORMATION

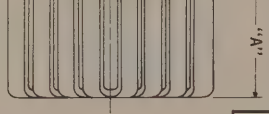
Example: **6045-3-A** unit is ½" high, with a Black Anodized finish and has a TO-3 hole pattern.

| Model No. | Hole Pattern Suffix TO-3 | TO-66 |
|---|---|---|
| 6045 | -A | -T |
| 6046 | -A | -T |
| 6047 | -A | -T |
| 6048 | -A | -T |

| Finish |
|---|
| 1 - NO FINISH |
| 2 - YELLOW IRRIDITE |
| 3 - BLACK ANODIZE |

## DIAMOND-SHAPED

Vemaline's unique and economical Diamond-Shaped heat sink is the perfect space-saving cooler for high heat dissipation efficiency.
Made to accommodate plastic power packs, this lightweight heat sink conforms to TO-3 and TO-66 hole patterns for easy circuit-board mounting, as well.
Ready for immediate delivery, Vermaline's low-priced Diamond-Shaped heat sink delivers quality performance.



| Part No. | Dim. A |
|---|---|
| 6148 | .500 |
| 6149 | .750 |
| 6150 | 1.00 |
| 6151 | 1.25 |

| Model No. | Hole Pattern Suffix TO-3 | TO-6 |
|---|---|---|
| 6148 | -A | -T |
| 6149 | -A | -T |
| 6150 | -A | -T |
| 6151 | -A | -T |

### ORDERING INFORMATION

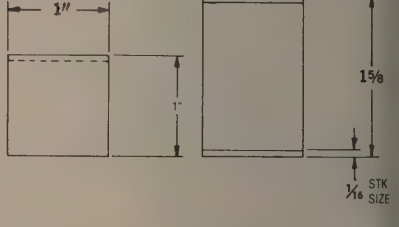
Example: **6148-3-A** unit is ½" high, with a Black Anodized finish and has a TO-3 hole pattern.

| Code | Hole Pattern For | Code |
|---|---|---|
| 3 | TO-3 | -A |
| 0 | TO-66 | -T |
| 2 | — | — |

| | Finish |
|---|---|
| 3 | BLACK ANODIZE |
| 0 | NO FINISH |
| 2 | YELLOW IRRIDITE |

## MAXIFIN

A new high efficiency component, the Vemaline MaxiFin heat sink is specifically made to reduce heat build-up while it keeps costs down.
Designed for 10 watt and under power heat dissipation, the lightweight MaxiFin circulates air to provide maximum cooling for power packs. Easily mounted on printed circuit boards, it comes in two models to fit TO-3 and TO-66 patterns.
Ready for immediate delivery, the Vemaline MaxiFin heat sink has a one inch fin height and can meet diverse heat reduction requirements.



### ORDERING INFORMATION

Example: **6147-3-7** unit is 1" high, has a gold Irridite finish, and a TO-66 hole pattern.

| Part No. | Hole Pattern |
|---|---|
| 6147-A | TO-3 |
| 6147-T | TO-66 |

| Finish |
|---|
| -1 NO FINISH |
| -2 BLACK ANODIZE |
| -3 GOLD IRRIDITE |

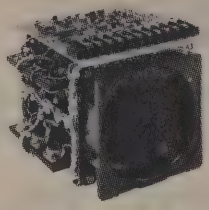
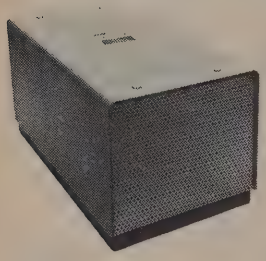
# BULOVA®

# LINEAR D.C. SERVO AMPLIFIERS

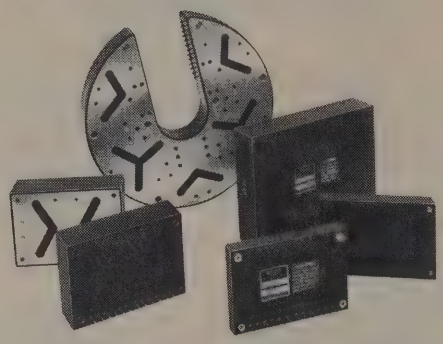
**25 to 1000 Watts**



**FAN COOLED, 500, 750 and 1000 Watts**



The Bulova Series DCA/FC Servo Amplifiers are all forced air cooled. Heat sinks and fans are integral in all units.



**EPOXY ENCAPSULATED, 25 to 600 Watts**

## Features

- Dual Usage—Current or Voltage Amplifier
- Wide Bandwith—10kHz Small Signal, 1kHz Full Power
- Adjustable Gain
- Adjustable Current Limit
- Current or Voltage Feedback
- Integral Heat Sink
- Continuous 100% Dissipation (Fan Cooled Units)

## Typical Applications

- DC Servo Motors
- DC Torque Motors
- Servo Valves
- Low Inertia Motors
- Deflection Coils

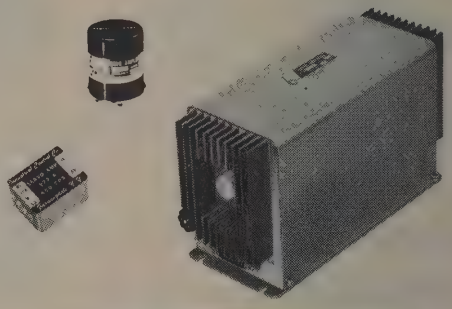
# SERVO COMPONENTS

## INSTRUMENTS, AMPLIFIERS and ACCESSORIES

***FOR MILITARY AND INDUSTRIAL CONTROL SYSTEMS***

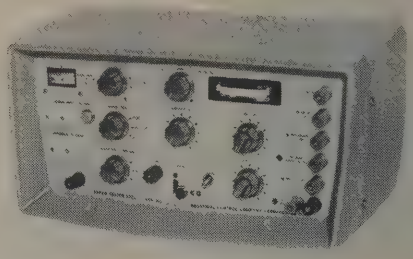
### SERVO AMPLIFIERS

- DC, pot and synchro inputs
- 60 and 400 ~ outputs
- 972A (.5 cu in, 9 watts), to 1078A (1 KW DC)
- Solid-state and magnetic amplifiers



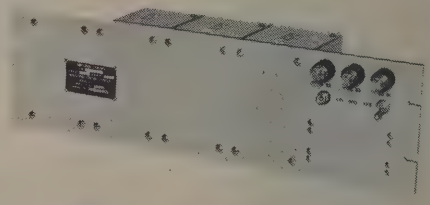
### SERVO TESTERS

- 100C, general purpose use
- 103A, prod and field test
- Frequency and transient response
- For DC and AC servos



### SYNCHRO AMPLIFIERS and FREQUENCY CHANGERS

- 929R, 90V./line, 400 ~ stators
- 820C, 90V./line, 60 ~ stators
- Buffer CX's from CT and TR loads
- Electromechanical and solid-state



### SERVO DEMONSTRATORS

- Laboratory experiments
- Industrial training
- Synchro and pot data
- 60 and 400 ~ models

### SYNCHRO DIRECTORS

- Generate 1 and 36 speed stator voltages
- Constant velocity and harmonic motion modes
- Computer programmed
- 60 and 400 ~ stator outputs

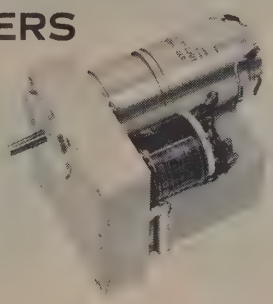
# SERVO SYSTEMS

## STANDARD MODULES or SPECIALS

***MIL-GRADE AND FAST DELIVERY***

### High Torque SYNCHRO REPEATERS



- 770 Series for 400 ~
- 847 Series for 60 ~
- 8′ error
- 300 oz in shaft torque
- 117V. line power

### Two Speed SYNCHRO REPEATERS

- 1038 Series for 400 ~
- 921 Series for 60 ~
- 16, 25 and 36 speed
- Shafts at high and lo speed
- 117V. line power

### DC and AC POT FOLLOWERS

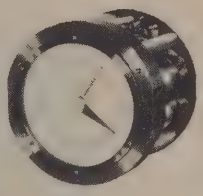
- 900 Series
- DC, 60 or 400 ~ inputs
- 1, 3 or 10 turn pots
- Torques to 300 oz in
- 117V. 60 or 400 ~ power

### Precision DC VELOCITY SERVOS

- 982 Series for 60 ~
- 983 Series for 400 ~
- ±10V. DC command
- 117V. line power
- Wide range of torques and speed

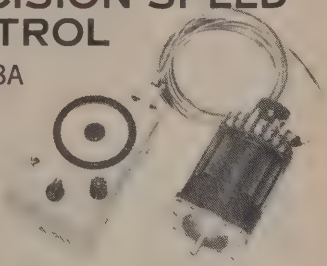
### 3 Axis SERVO INDICATOR

- type 909A



### Bi-Directional PRECISION SPEED CONTROL

- type 923A



### Process Control DELAYED SIGNAL GENERATOR

- type 849B

### Custom Assemblies TO CUSTOMER SPECS.

- type 869A (typ.)

# AIRPAX™ MAGNETIC CIRCUIT

A North American Philips Company

■ Airpax magnetic circuit breakers have been used for many years to solve the protection problems inherent with fuses and thermal breakers. Magnetic breakers are the acknowledged standard in military equipment, computer systems, ground fault personnel protection systems, and other industrial equipment. Airpax magnetic breakers eliminate the replacement problem inherent with fuses. The minimum trip current is not affected by temperature extremes, as in the case with fuses and thermal breakers. Precise protection is provided.

| Model Designation | T11 | AP/UP | 203 | APG/UPG |
|---|---|---|---|---|
| | | | | |
| DIMENSIONS |  DIMENSIONS IN BRACKETS [ ] ARE IN MILLIMETERS. |  |  |  |
| GENERAL DESCRIPTION AND APPLICATIONS | The T11 is a single pole, single throw, series trip magnetic breaker that combines power switching and reliable protection in one tiny, aesthetically pleasing package. It can be operated at either dc or 50/60Hz, eliminating the need to specify and stock separate units. The T11 offers a choice of six attractive handle colors plus a variety of mounting hardware. The patented snap-action mechanism increases operational life of up to five times that previously available. It also eliminates possible operator "teasing" of the contacts and minimizes arcing. For more information, request Bulletin 2014. | Types AP and UP are sealed electromagnetic circuit protectors qualified to the requirements of specification MIL-C-39019. AP and UP protectors will withstand up to 100G shock applied repeatedly in any plane, as well as 10G vibration from 10 to 2000 Hz under full load, which makes their use practical in mobile equipment. All will operate at rated value between —40°C and +100°C. For more information, request Bulletin 2001. | Combines over-current protection with ON-OFF switch and pilot light functions, for use in high quality industrial, medical, and military equipment where reliable protection and attractive appearance are demanded. Optional colors, plus a single rocker actuator for multipole assemblies, provide ease of operation and panel uniformity. An optional illuminated handle can be used to indicate circuit condition. Snap-in front panel mounting provides economy and simplifies installation. Optional flush mounting also available. For more information, request Bulletin 2009. | APG/UPG circuit breakers are suitable for use in any situation where low cost precision operation is required. Multipole assemblies have a single toggle handle — a unique feature which simplifies mounting (handle per pole, optional). Also available with a rocker arm actuator for improved panel appearance, as well as a panel seal toggle version for marine or military environments. For more information, request Bulletin 2003. |
| Number of Poles | 1 | 1, 2, 3 | 1, 2, 3 | 1, 2, 3, 4 |

# BREAKERS

Airpax circuit breakers, with the exception of the T11, are available in many mechanical and electrical configurations to provide maximum versatility for the designer. The following internal circuits are available and can be combined in multipole units.

**SERIES TRIP**
A SPST two-terminal device with the sensing coil and contacts in series with the load being protected.

**SERIES TRIP PLUS AUXILIARY SWITCH**
A SPDT auxiliary switch is added to the series trip unit to provide auxiliary switching functions.

**SHUNT TRIP**
A connection is brought our from the internal coil-contact junction to a third terminal, permitting a shunt across the trip coil.

**RELAY TRIP**
Coil and contact leads are brought out to separate pairs of terminals. This configuration permits the overload sensing coil to be placed in a circuit which is electrically isolated from the trip contacts.

| APL/UPL | 205 | 209 |
|---|---|---|
| | | |
|   |   |   |
| APL/UPL circuit protectors are ruggedly constructed to provide dependable protection under the most severe conditions of use in industrial, military (QPL to MIL-C-55629), marine, or any application where precision protection is required. The versatility of the APL line makes it ideal for special purpose applications. For more information, request Bulletin 2002. | The 205 provides improved electrical performance plus a dust-proof enclosure. All openings in the case (including arc blowout vent and handle) have been sealed with resilient rubber and mylar. Case sections are of tongue and groove construction to provide an overlapping closure. Ideal for application in extremely harsh environments. For more information, request Bulletin 2002. | 209 molded case circuit breakers present to electrical contractors, O.E.M.'s, and panel and equipment builders a more compact, competitive unit. Front or back connected terminal styles. Readily mounted in switch boards, panel enclosures, panel boards, or junction boxes. Family consists of the 209, a labeled circuit breaker; 219 manual motor controller; and 229 appliance controller. For more information, request Bulletin 2012 |

| Recognized (UPL) | Recognized | Recognized/Listed |

## GENERAL CHARACTERISTICS

**Trip Free**
Airpax circuit protectors and circuit breakers will trip open on overload, even when forcibly held on. This prevents the operator from damaging the equipment by restraining the handle in the ON position.

**Trip Indication**
The operating handle moves forcibly and positively to the OFF position on overload.

**Shock**
Protectors will withstand shocks of 100G without tripping, while carrying full rated current, when tested per MIL-STD-202C, Method 213, Test Condition 1.

**Vibration**
Protectors will withstand 10G without tripping, while carrying full rated current, when tested per MIL-STD-202C, Method 201A.

**Ambient Operation**
—40°C to +85°C.

**Insulation Resistance**
100 megohms minimum at 500V dc.

**Dielectric Strength**
1500 ac at 60Hz.

**Endurance**
When the protector is operated as a switch carrying full rated current, at a maximum rate of 6 operations per minute, the operating life will exceed 10,000 operations.

# ALCOSWITCH

**World's smallest toggle switches with most-asked-for features. Our submini size means greater space savings and fulfills critical applications. Uniform 0.1" spacing between all terminals and anchor pins conforms with today's PCB standards. High torque bushings and anti-push-in toggle captivation prevents damage. Flame retardant glass filled diallyl phthalate (DAP) is used on all models to prevent damage during soldering and offers high dielectric. Gold on terminals provides ease in soldering and extends shelf life.**

# ALCOSWITCH

e ALCO TP Series Pushbutton
vitches find applicational uses
instrumentation, telecom sys-
ns, computers, etc. The PC
rsions feature 4 stabilizing
ounts and gold plated contacts/
rminals for dependable intermit-
nt use and good solderability.
ght angle models are most use-
for edge PCB mounting. Dual
tuators conserve space. A vari-
y of actuator types and bushing
tions allows greater versatility.
our choice of normally open or
PDT momentary types.

## DISCOUNT SCHEDULE

X-FACTOR
For quantities under 100.

| | | |
|---|---|---|
| 1-24 | Multiply by | 1.59 |
| 25-49 | Multiply by | 1.15 |
| 50-99 | Multiply by | 1.08 |

250-Over, Quoted on Request.

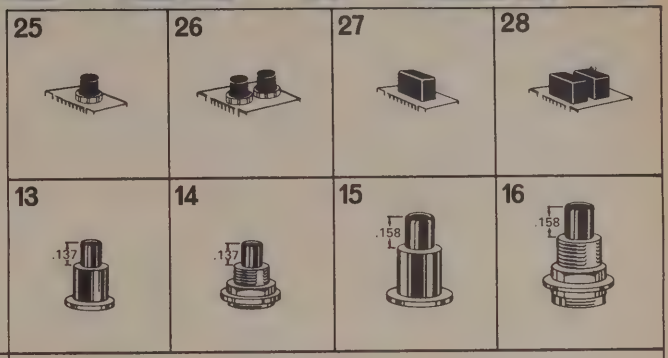
## ▣ ACTUATORS & BUSHINGS

Color choices available for types 25, 26, 27, 28, 13, 14, 15 and 16 shown at right. Specify:

**(0)**-Black, **(2)**-Red, **(6)**-Blue.

**BUSHING SIZE:**

| | |
|---|---|
| None | Types 25 thru 28. |
| .176 Dia. | Type 13. |
| 10-48 | Type 14. |
| .250 Dia. | Type 15. |
| 1/4-40 | Type 16. |



## ◆ RATINGS

Easily identified by 2nd digit in model number.

1. Gold: 0.4VA max. @ 20 VDC.
3. Silver: 3A @ 125 VAC.

Example: TP1**1**CG-PC.

## ▲ TERMINAL TYPES

A Wired, silver.
B Single pole PC, gold.
C Double pole PC, gold.
D Single pole RA, gold.
E Double pole RA, gold.

# ALCOSWITCH

Environmental seals completely encapsulate the case and frame of our standard TT and TP Series. Despite use of a dual case and seal, these switches are much smaller and fully compatible with traditional miniatures. Disposable protective boots are provided to seal the actuator during the PCB cleaning process. This latest technology absolutely solves all of your PC application problems at a reasonable cost.

Our TSS Slide Switch Series utilizes the same basic contact assembly as used in our dependable TT Toggle Switches. Designed for compact PC applications in computers, instrumentation and telephone apparatus. Contacts/Terminals are gold plated for dependable occasional use and good solderability. Dual actuators conserve space when used as program switches. Gold plating is standard.

# ALCOSWITCH

**S-4 SERIES:** Instrument Grade Slide Switches most useful for gramming applications. Fully ulated, low profile DAP cases vide high impact and low loss. minals are epoxy sealed to pre- t contamination by flux and ning agents. Gold plated types recommended for low level tching. PC pins fall into tradi- nal 0.1" grids.

**SA SERIES:** Unique switching ngement allows long life and contact resistance. All models identical in body size and minal placement. Difference in unting and level height. Con- s and terminals are fully gold ed.

**SERIES:** A diverse selection offered to meet any applica- al need. Offering the highest ee of reliability at a reason- cost. Designed for soldering o PC boards or optionally used h standard DIP sockets. Term- s and contacts are of beryllium per, heavy gold plate over nick- o assure dependable service for level use. All models have er molded-in terminals or xy sealed bases.

## DISCOUNT SCHEDULE

Quantities of 25 and over, quoted upon request.

### ACTUATORS

Identified by code column in listings below and as pictured at right.

1. .100" high
2. Flush
3. .095" high

### RATINGS — MSS Series

G - Gold: 0.4VA @ 20V max. (AC or DC). Plating Thickness - .00005".
4 - Silver: 4 amps @ 115 VAC. 2 amps @ 230 VAC.

### ACTUATOR HEIGHT

4. .140" w/tabs
5. .140" w/o tabs
6. .195" w/tabs
7. .195" w/o tabs

### RATINGS — MSSA Series

G - Gold: 0.4VA @ 20V max. (AC or DC). Plating Thickness - .00005".
4 - Silver: 300ma @ 125 VAC.

### ACTUATORS

8. Rocker
9. Slide
10. Double Slide
11. Piano
12. Double Piano

### RATINGS — DIP Series

Non-Switching: 50 VDC @ 100 ma.
Switching: 5 VDC @ 100 ma (typ.). 24 VDC @ 25 ma (max.).
Plating Thickness - .00003".

**PJ SERIES:** Programming Jumpers span standard DIP sockets .300" on centers connecting opposing contacts in IC patterns. No more poor intermittent contact problems. Easily installed. Body is made of SE-0 glass-filled thermoplastic. Pins are phosphor bronze and gold plated.

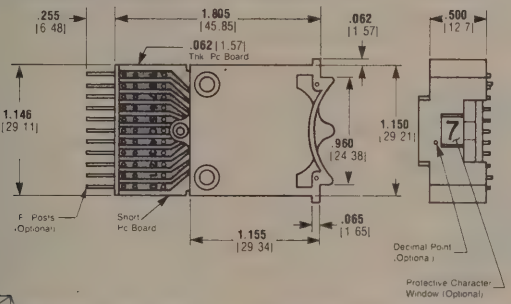
# THUMBWHEEL SWITCHES

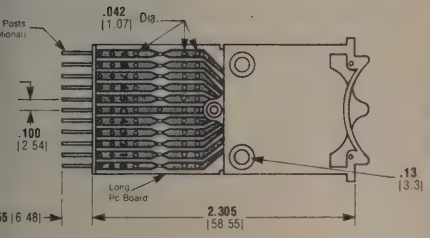
AMP

## INTRODUCTION

AMP thumbwheel switches provide a simple, highly reliable means of manually programming various types of electrical/electronic equipment. These miniature switches are designed for front and rear panel mounting and can be used singly or "stacked" for either individual or matrix output applications. They are ideally suited for use in machine tool and process control systems as well as test equipment, aircraft, various instruments and input data terminals. For more details, ask for AMP Catalog No.73-143.

## .500 [12.7] STANDARD SPECIFICATIONS





**ELECTRICAL**

**Outputs:** Decimal, BCD and BCO. Other codes also available.
**Contact Resistance (pad-to-pad):** .1 ohm (max.).
**Current Rating:** 3 amperes (continuous); .125 ampere (switching).
**Insulation Resistance (74°F [23.3°C], sea level):** 1 x $10^9$ ohms (min.).
**Dielectric Withstanding Voltage:** 500 VDC (min.).
**Capacitance (between any two conductors):** 5 pf (max.).

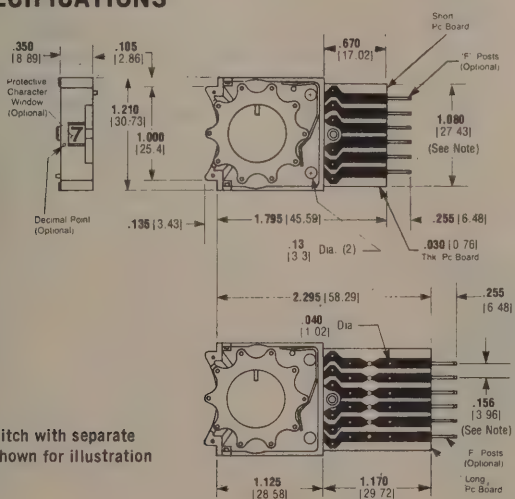
**MECHANICAL**

**Wheel/Dial Positions:** 8 and 10, standard.
**Wheel/Dial Characters:** White, gothic style, .18" [4.57 mm] high (max.).
**Operating Force:** .4 to 1.25 lb. [1.78 to 5.56 N].
**Structural Plastic:** Black, polycarbonate (glossy finish) or polyester (matte finish).
**Protective Character Window:** Clear polycarbonate.
**Printed Circuit Boards:** Flame retardant, glass epoxy laminate.
**Contacts:** Gold-over-nickel plated phosphor bronze.
**Detent Spring:** Phosphor bronze.
**Life:** 1,000,000 detent operations (min.).

**ENVIRONMENTAL (MIL-STD-202)**

**Temperature:** —40°F to + 190°F [—40°C to + 87.7°C].
**Shock:** 25 G in all planes.
**Vibration:** 10-2000 Hz (Method 204B, Condition B).

## .350 [8.89] SPECIFICATIONS



**Note:** 10 position BCD switch with separate common to complement shown for illustration purposes only.

**ELECTRICAL**

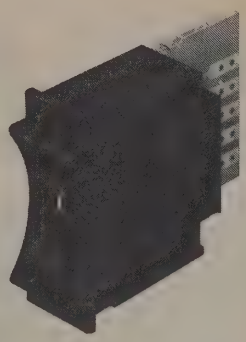
**Outputs:** Decimal and BCD. Other codes also available.
**Contact Resistance (pad-to-pad):** .1 ohm (max.)
**Current Rating:** 3 amperes (continuous); .125 ampere (switching).
**Insulation Resistance (74°F [23.3°C], sea level):** 1 x $10^9$ ohms (min.)
**Dielectric Withstanding Voltage:** 500 VCD (min.)
**Capacitance (between any two conductors):** 5 pf (max.)

**MECHANICAL**

**Wheel/Dial Positions:** 10, standard. Other variations available.
**Wheel/Dial Characters:** White, gothic style, .18" [4.57 mm] high (max.)
**Operating Force:** .4 to 1.25 [1.78 to 5.56 N]
**Structural Plastic:** Black, polycarbonate (glossy finish) or NORYL† (matte finish)
**Protective Character Window:** Clear polycarbonate
**Printed Circuit Boards:** Flame retardant, glass epoxy laminate
**Contacts:** Gold-over-nickel plated phosphor bronze
**Detent Spring:** Phosphor bronze
**Life:** 1,000,000 detent operations (min.)

**ENVIRONMENTAL (MIL-STD-202)**

**Temperature:** —40°F to +190°F [—40°C to +87.7°C]
**Shock:** 25 G in all planes
**Vibration:** 10-2000 Hz (Method 204B, Condition B)



### .500 [12.7] STANDARD

AMP .500 (12.7) standard thumbwheel switches are available as 8 or 10 position switches with outputs in decimal, BCD or BCO. They can be supplied with short or long boards and for mother/daughter board, pc connector, solderless wire or soldered wire connection. Standard housings with a glossy or fine matte finish incorporate a mounting flange to facilitate front or rear panel mounting.

### .350 [8.89]

AMP .350 [8.89] thumbwheel switches are furnished with most of the same capabilities as the .500 [12.7] standard switch, but are intended for use where horizontal mounting space is limited or where a wider switch is unnecessary. Available outputs and options also include the same broad range as the wider switch.

# THUMBWHEEL SWITCHES

## .300 [7.62] BOARD MOUNT MINIATURE THUMBWHEEL SWITCH

### SPECIFICATIONS

#### STACKABLE

**ELECTRICAL**

**Outputs:** BCD. Certain other codes also available.
**Contact Resistance** (pad-to-pad): .1 ohm (max.).
**Current Rating:** 1.5 amperes (non-switching); .125 ampere (switching).
**Insulation Resistance (74°F [23.3°C], sea level):** 1 x $10^9$ ohms (min.).
**Dielectric Withstanding Voltage:** 500 VDC (min.).
**Capacitance (between any two conductors):** 5 pf (max.).

**MECHANICAL**

**Wheel/Dial Positions:** 10, standard*. Certain other variations also available.
**Wheel/Dial Characters:** White, gothic style, .15" [3.8 mm] high (max.).
**Operating Force:** 10 to 14 oz. [2.8 to 3.9 N].
**Structural Plastic (wheel and housing with integral detent spring):** Black, acetal (semi-gloss finish).
**Contacts:** Gold-over-nickel plated phosphor bronze.
**Printed Circuit Boards:** Flame retardant, glass epoxy laminate.
**Life:** 250,000 detent operations (min.).

**ENVIRONMENTAL** (MIL-STD-202)

**Temperature:** −40°F to +190°F [−40°C to +87.7°C].
**Shock:** 25 G in all planes.
**Vibration:** 10-2000 Hz (Method 204B, Condition B).

*A stop pin **(1-22973-0)** can be installed to limit wheel rotation and must be ordered separately. One stop pin allows wheel rotation to all 10 readout positions; two stop pins limit wheel rotation to nine or less readout positions.

#### BOARD MOUNT

**ELECTRICAL**

**Outputs:** Decimal, BCD and BCD 9's complement. Certain other codes also available.
**Contact Resistance (pad-to-pad):** .1 ohm (max.).
**Current Rating:** 1.5 amperes (non-switching); .12 ampere (switching).
**Insulation Resistance (74°F [23.3°C], sea level** 1 x $10^9$ ohms (min.).
**Dielectric Withstanding Voltage:** 500 VDC (min.).
**Capacitance (between any two conductors):** 5 p (max.).

**MECHANICAL**

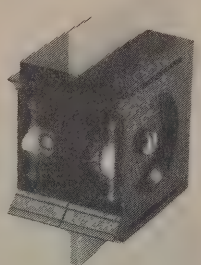
**Wheel/Dial Position:** 10 standard*. Certain othe variations also available.
**Wheel/Dial Characters:** Black on white or white o black, gothic style, .15" [3.8 mm] high (max.)
**Operating Force:** 10 to 14 oz. [2.8 to 3.9 N].
**Structural Plastic (wheel and housing with integra detent spring):** Acetal (semi-gloss finish). Refer t the charts on page 20-48C for available colors.
**Contacts:** Gold-over-nickel plated phosphor bronze.
**Life:** 250,000 detent operation (min.).

**ENVIRONMENTAL** (MIL-STD-202)

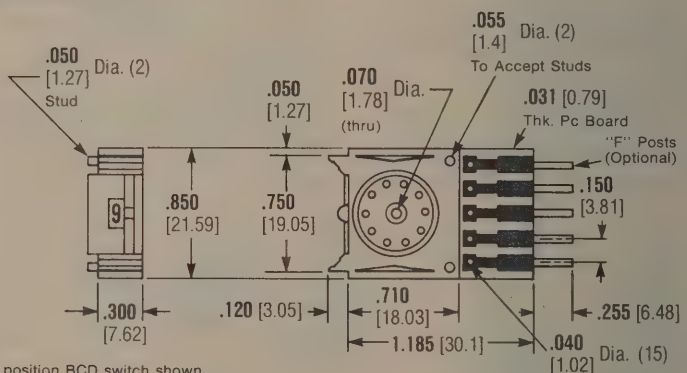
**Temperature:** −40°F to +190°F [−40°C t +87.7°C].
**Shock:** 25 G in all planes.
**Vibration:** 10-2000 Hz (Method 204B, Condition B).

STACKABLE

BOARD MOUNT

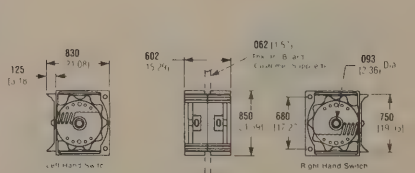


### STACKABLE

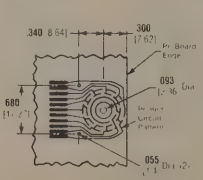


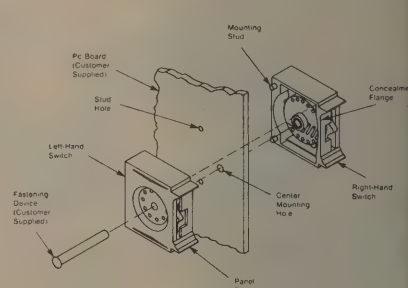
**Note:** 10 position BCD switch shown.

### BOARD MOUNT



Note: 10 position decimal switches and related artwork shown for illustration purposes only. Dimensions are also typical for BCD and BCD 9's complement switches.





Note: The pc board is .062 [1.57] thick. Any suitable fastening device (= 2 screw and nut, rivet, eyelet, etc.) that is comparable to the .093 [2.36] dia. mounting hole and the .602 [15.29] overall width of a left- and right-hand switch assembly may be used for mounting the switches to a pc board.

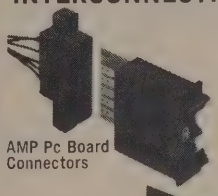
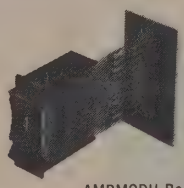
## OPTIONS

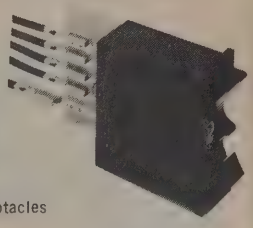
### INTERCONNECTION METHODS



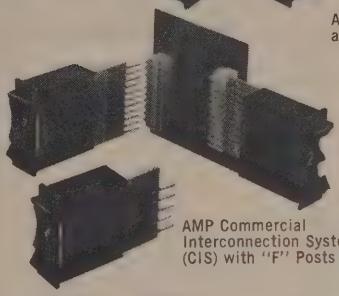
AMP Pc Board Connectors



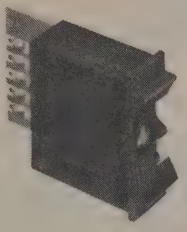
AMPMODU Receptacles and Posts



AMP EDGE Terminals



AMP Commercial Interconnection System (CIS) with "F" Posts



Soldered Wire Terminations

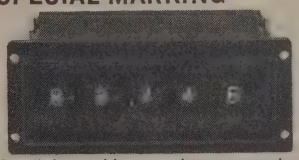
### BOARD LENGTHS

Input/output boards on all AMP switches may be supplied in two lengths. A long board is used where components such as diodes and resistors are required in the switching function and are to be mounted directly onto the board. The short board is used where no such components are needed. All interconnection methods may be used with either board length.

### PROTECTIVE CHARACTER WINDOWS

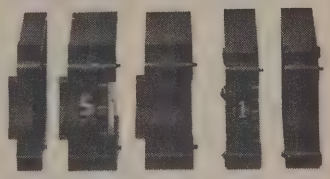
Transparent plastic windows are available on .500 [12.7] and .350 [8.89] switches. They provide protection for the wheel characters against dirt, dust and other contaminants. They are ideally suited for use in industrial environments.

### SPECIAL MARKING



Special marking such as punctuation, abbreviations and symbols can be supplied on switch modules and spacers. These markings are in addition to the special markings which may be obtained on the switch wheels.

### SPACERS



Spacers are available for custom stacking or assembling switch modules. They are supplied with glossy or fine matte finishes. Material construction of the spacers is black polycarbonate (glossy finish) or black thermoplastic (matte finish).

Figure 1. Spacers for .500 [12.7] Standard & Message Wheel Switches.

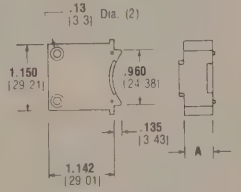


Figure 2. Spacer for .350 [8.89] Switches.

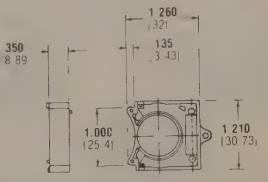

**ASSEMBLY HARDWARE**

When switches are purchased as individual modules, assembly hardware must be ordered separately.

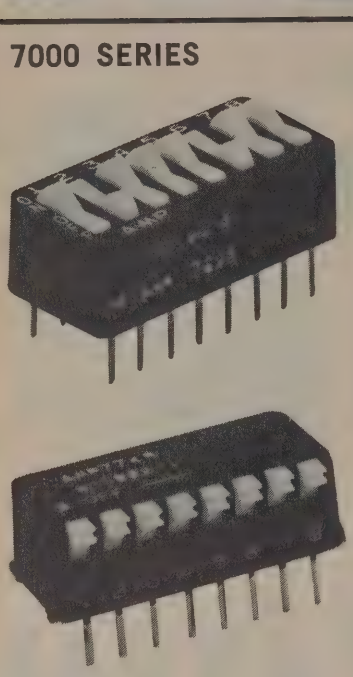
## 7000 SERIES



### FEATURES

- High Density—Low profile, compact design requires a minimum of pc board area.
- Available in standard or right angle versions.
- Simple Operation — Rocker actuators instantly change program.
- Easy Mounting—Switches can be flow-soldered directly to pc board or simply inserted into DIP headers or IC packaging receptacles.
- Economical—Board mounted switches eliminate the need for interconnection wiring to perform switching functions.
- High Reliability—Fully enclosed design protects contact surfaces from environmental hazards. Optional transparent cover is also available.
- Versatile Application — Switches furnished in various sizes, ranging from 1 to 12 positions.

# DUAL-IN-LINE PACKAGE SWITCHES

The AMP Dual In-Line Package Switch provides a highly reliable, low cost means of manually programming various types of electrical/electronic equipment. This unique device is essentially a multiplicity of rocker actuated, single-pole, single-throw switches packaged in a housing with input/output leads on .100" x .300" centers and is specifically designed to be mounted on a printed circuit board. It features a very low profile, and is ideally suited for programming logic functions in computers, test equipment, telephone equipment, process control equipment, etc.

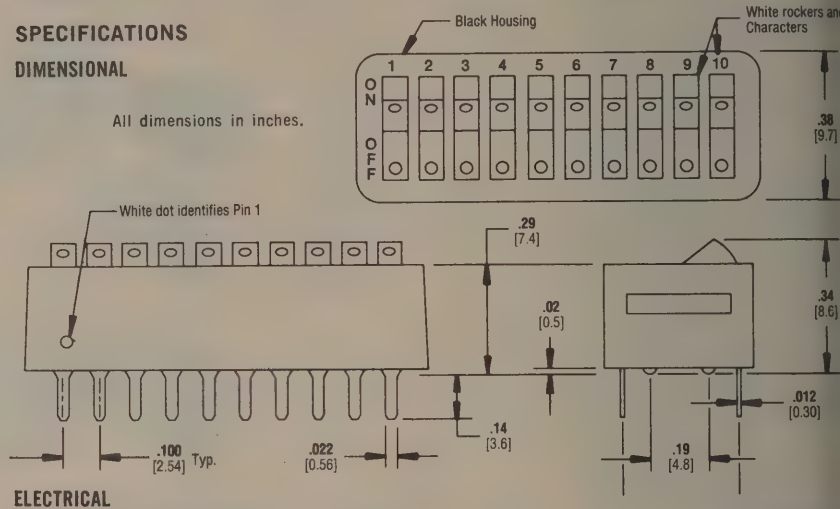
The Dual In-Line Package Switch requires no hardware for mounting and can be either flow-soldered directly to a pc board or simply inserted into AMP's DIP headers or IC packaging receptacles.

The AMP Dual In-Line Package Switch can be supplied in a wide range of sizes, from 1 to 12 positions.

### SPECIFICATIONS

#### DIMENSIONAL

All dimensions in inches.



#### ELECTRICAL

Circuit Current/Voltage Ratings: Nonswitching ..... 1.5A @ 50 VDC
Switching ..... 100 ma @ 5 VDC
25 ma @ 24 VDC

Contact Resistance (50 MV open-circuit, 10 ma) ..... 100 Milliohms (Max.)

Insulation Resistance (@ 100 VDC) Between adjacent open or closed switches:
Initial ..... $1 \times 10^{11}$ Ohms (Min.)
After environmental exposure ..... $1 \times 10^{9}$ Ohms (Min.)

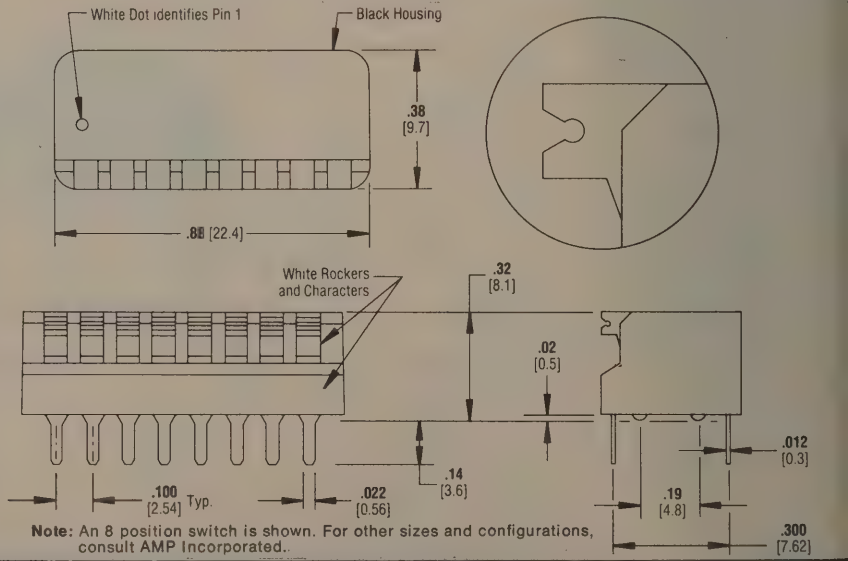
Dielectric Breakdown Voltage ..... 500 VDC (Min.)

Circuit Capacitance (between adjacent switches) ..... 5 Picofarads (Max.)

Shock: Discontinuity shall not exceed 1.0 microseconds when shocked 3 times in each of 6 directions for a combined total of 18 shocks. Shock wave parameters are 20g level, 11 millisecond duration, half sine pulse shape.

Vibration: Discontinuity shall not exceed 1.0 microseconds when tested in accordance with MIL-STD-202 D Method 204, Condition C.

**MATERIAL** Housing ..... Glass-filled polyester
Actuators ..... Polyester
Contacts ..... Beryllium copper, gold-over-nickel plated



**Note:** An 8 position switch is shown. For other sizes and configurations, consult AMP Incorporated.

# DUAL-IN-LINE PACKAGE SWITCHES

## AMP 7030 SERIES RECESSED CAM DIP SWITCHES

### FEATURES

Low Profile above P.C. Board.

Design prevents accidental change of rocker position.

Easy to apply tape processing seal available for top of switch.

Epoxy seal on bottom combined with tape seal on top inhibit contamination of contacts during processing.

94V-0 Rated Material.

Marking on rockers provides excellent legibility for program setting and identification.

### MATERIALS

Switch housing and base are 94V-0 Rated Glass Filled Polyester—color is black with white markings.

Rockers are 94V-0 Rated Unfilled Polyester — color is white with optional red markings.

Contacts are Beryllium Copper with gold over nickel plating.

Sealing Material is epoxy.

### ELECTRICAL & MECHANICAL RATINGS

Contact Resistance . . . . 100 milliohms max.
Ins. Resistance . . . . . $1 \times 10^{11}$ ohms
Dielectric Strength . . . . 500 VDC
Cycle Life . . . . . 7000 Cycles/Pole min.
Capacitance . . . . . 5 picofarads
Operating Temp . . . . . 0°F to 190°F

Current/Voltage Rating . . . . . 24 volts @ 25 ma max. switching

## AMP 7100 AND 7130 SERIES ECONOMY DIP SWITCHES

### FEATURES

Economical substitute where cycle life is not critical.

94V-0 Rated Material.

Low Profile (on 7130 Series).

Marking on rockers provides excellent legibility for program setting (on 7130 Series).

Design prevents accidental change of rocker position (on 7130 Series).

### MATERIALS

Switch housing and base are 94V-0 Rated Glass Filled Polyester—color is blue with white markings.

Rockers are 94V-0 Rated Unfilled Polyester— color is white with optional red markings.

Contacts are copper alloy with gold plate on contact surfaces.

### ELECTRICAL & MECHANICAL RATINGS

Contact Resistance . . . . 100 milliohms max.
Ins. Resistance . . . . . $1 \times 10^{11}$ ohms
Dielectric Strength . . . . 500 VDC
Cycle Life . . . . . 2000 cycles/pole
Capacitance . . . . . 5 picofarads
Operating Temp . . . . . 0°F thru 190°F

Current/Voltage Rating . . . . . 24 volt @ 25 ma max. (switching)

## AMP 7200 AND 7040 SERIES LED DIP SWITCHES AND MOMENTARY CAM DIP SWITCHES

### FEATURES

Momentary or detented rockers available.

Switch leads and LED leads independently terminated for circuit connection versatility.

Permits rapid circuit test or fault indication.

Permits rapid program verification.

Permits Dual-In-Line Packaging of LED's.

94V-0 Rated Materials (Except Diodes).

### MATERIALS

Switch housing and base are 94V-0 Rated Glass Filled Polyester—color is black with white markings.

Rockers are Unfilled Polyester—color is white.

Contacts are Beryllium Copper with gold over nickel plating.

LEDS are epoxy encapsulated GaAsp or GaP Diodes—color is red.

### ELECTRICAL & MECHANICAL RATINGS

Contact Resistance . . . . 100 milliohms max.
Ins. Resistance . . . . . $1 \times 10^{11}$ ohms
Dielectric Strength . . . . 500 VDC
Cycle Life . . . . . 7000 Cycles/Pole min.
Capacitance . . . . . 5 picofarads
Operating Temp . . . . . 0°F to 190°F

Current/Voltage Rating . . . . . .
Contacts
24 volts @ 25 ma
LED's
Operating Voltage—2.0 V max. @ 20 ma
Reverse Voltage—5.0 V max. @ 100 microamps
Power Dissipation—230 mw max. @ 25°C
Lumination—0.4 millicandella min. @ 20 ma

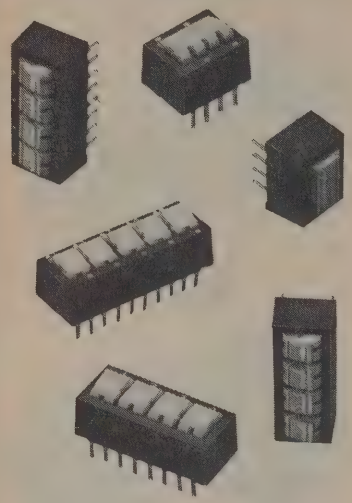
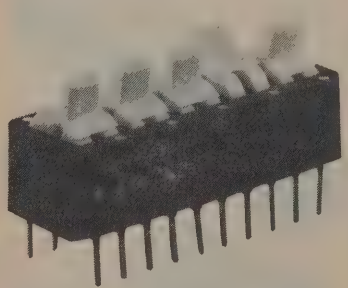
# MULTIPOLE SWITCHES (DUAL-IN-LINE)

## 7010 & 7020 SERIES



The AMP Dual-in-Line Package Multipole switch provides a means of manually programming various types of electrical/electronic equipment. The multipole switch is essentially a multiplicity of single pole switches mechanically coupled to provide switching of various poles simultaneously. The switch is packaged in a housing with input/output leads on .100" x .300" centers and is specifically designed to be mounted on a printed circuit board.

The AMP Multipole Switch can be supplied in a wide range of sizes—from 4 to 10 single pole single throw switches—with the capability of mechanically coupling a maximum of 6 poles within one switch package. These switches can also be furnished with 2 to 5 single pole double throw switches or 1 or 2 double pole double throw switches.



**LEVER ACTUATED SWITCH**

### ELECTRICAL SPECIFICATIONS

SPDT or DPDT Switching—Make before break—Circuit Current/Voltage Ratings

Non-switching
1.5A @ 50 VDC

Switching
100 ma @ 5 VDC
25 ma @ 24 VDC

Contact Resistance (50 MV open-circuit, 2 MA) 100 Milliohms (Max.)

Insulation Resistance (@ 100 VDC)

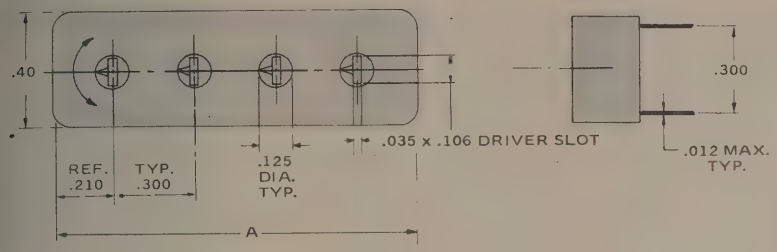
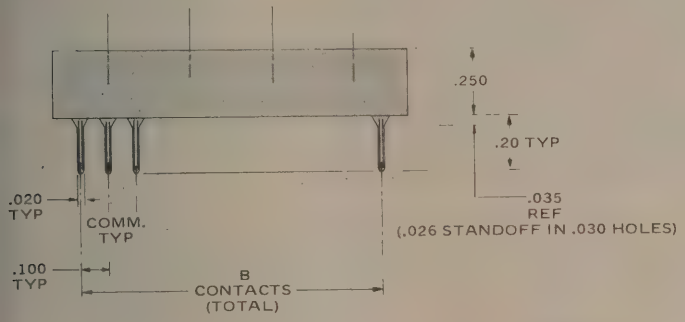
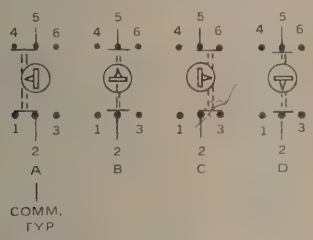
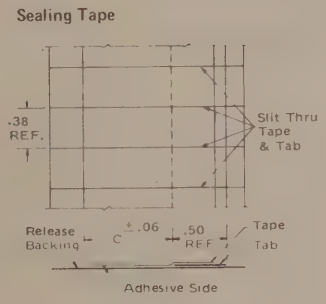
# MINIATURE Double Pole, Double Throw Switch









## SPECIFICATIONS

### Electrical

Circuit Current/Voltage Rating:
Non-switching — 1.0A max. @ 50 VDC
Switching — 100 ma @ 5 VDC 25 ma @ 24 VDC
Contact Resistance — 50 Milliohms (Max.) @ 50 Millivolts open circuit voltage at 10 Milliamps current

Insulation Resistance:
between adjacent closed switches — 1 x $10^9$ ohms (Min.) at 100 VDC
between adjacent open switches — 1 x $10^9$ ohms (Min.) at 100 VDC
Dielectric Breakdown Voltage — 500 VDC (Min.)

### Mechanical

Operating Temperature — 0°F thru 190°F

Life Cycle — 2,000 switch operations (Min.)

### Materials

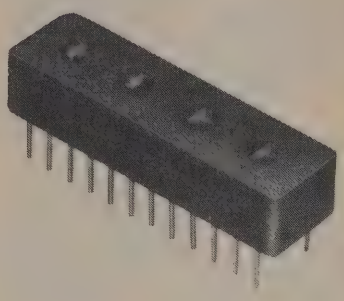
Housing and Actuator — U.L. recognized, 94V-0 rated polyester.
Contacts — Gold-plated copper-nickel alloy.

### Dimensional

All dimensions are in inches unless otherwise noted.

AMP

## 7400 SERIES



The AMP miniature double pole, double throw switch in one to 5 position configurations is a high density, low profile, p.c. board mountable switch suitable for a wide range of logic level switching operation. A small screwdriver is used to position the actuator which is bidirectional and continuously rotatable. Each position has built-in detented action for positive positioning. All switches mounted directly to your board on a .100 Grid pattern can be either flow soldered or inserted into AMP DIP receptacles.

### FEATURES

- High density, low profile (only .250" high)
- Housings made of U.L. recognized, 94V-0 rated polyester material
- Simple operation — screwdriver actuated
- Positive detented action
- Positive control — alternate "off" position rotates in either direction
- Economical — mounts directly to p.c. board eliminating need for costly interconnect wiring
- Choice of sizes from 1 to 5 positions (Four position presently available. Other sizes will be proposed upon request.)

AMP

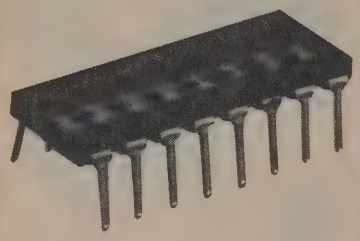
# PROGRAMMABLE DUAL-IN-LINE (DIP) SHUNT

## 7600 SERIES



### FEATURES

- Very low profile — .077" [1.96 mm] above board
- Low cost tamper-proof programming
- Housings made of UL recognized, 94V-0 rated, glass-filled thermoplastic polyester
- Large current capacity — 5 amperes (one conductor)
- Excellent strap visibility for determining state of operation
- Cut straps can be reconnected: by solder bridging, then re-opened; by use of solder wick
- Suitable for DIP handling techniques
- No extra space required for end-to-end mounting
- No loose pieces
- Ideal for volume requirements of similar programs
- Can be supplied pre-programmed
- Variety of marking and color coding possibilities

Dimensioning:
All dimensions in inches and millimeters. Values in brackets are metric equivalents.

Specifications subject to change. Consult AMP Incorporated for latest design specifications.

AMP's programmable DIP shunt provides a means of manually programming various types of electrical/electronic equipment. This unique device is basically a multiplicity of electrically conductive straps packaged in a housing with input/output leads on .100" x .300" [2.54 mm x 7.62 mm] centers. The straps can be retained intact or cut to produce the desired "closed-circuit" and "open-circuit" conditions. The DIP shunt is specifically designed to be mounted on a pc board and is ideally suited for achieving circuit crossovers on single-sided pc boards and can be used for addressing computer terminals.

The AMP programmable DIP shunt is currently available in 2 thru 12-positions, but other sizes can be supplied upon request. A hand tool is available for strap cutting.

### ELECTRICAL

Current Rating — 5 A for 20° Rise Above Ambient (one conductor per shunt)

Insulation Resistance — 1 x $10^{11}$ Ohms (min.) @ 100 VDC

Dielectric Withstanding Voltage — 1000 VDC (min.)

Capacitance:
(Between Adjacent Straps) — 2 pf.
(Across Cut Strap) — 5 pf.

### PHYSICAL AND ENVIRONMENTAL

Temperature — MIL-STD-202, Method 102A, Test Condition D [—65°C thru +125°C]

Moisture Resistance — MIL-STD-202, Method 106D

Terminal Strength (Bend Test) — MIL-STD-202, Method 211A, Test Condition B (5 bending operations)

Solderability* — AMP Specification No. 209-11

Resistance to Soldering Heat* — MIL-STD-202, Method 210A, Test Condition E, Procedure 2

* Cut straps can be reconnected by solder bridging. Solder bridging recommendations are:
—Use low temperature solder.
—Use solder tip approximately 1/32" [0.79 mm] dia.
—Do not let solder tip come in contact with plastic material.

### MATERIALS

Housing — UL Recognized 94V-0 Rated, Glass-Filled Thermoplastic Polyester; Color, Black (other colors available)

Metal Parts — Brass with Electroplated Tin Finish (gold plated I/O legs are optional)

AMP

The AMP Printed Circuit Board Rotary Switches are 16 pin DIP packages with 4 P.D.T. switches which are operated by encoded cams. A shaft with screwdriver slot, lever, or extension turns the cam in either direction to the desired "positive detent" setting. The setting may be outwardly indicated by a pointer. The switches are especially designed for printed circuit board mounting and are completely compatible with the latest packaging techniques. Input/output pins are spaced on .100" x .300" centers, allowing them to be mounted in a board by the normal methods used for 16-lead IC's.

## FEATURES

- 16 Pin DIP
- 8421 Encoding with Complement
- 4 Pole Double Throw
- Positive Detent
- PC Mounted with Edge Actuation
- Optional Actuation Methods

## ELECTRICAL SPECIFICATIONS

Voltage Rating — 120 volts RMS (max.)
Current Rating — 1.0 Ampere (max.)
Contact Resistance — 100 Milliohms (max.)
Dielectric Strength — 300 VAC 60 Hz
Dc Insulation Resistance — 1,000 Megohms

## MECHANICAL SPECIFICATIONS

Contact Material — Phosophor Bronze, Gold-over-Nickel Plated
Detent Release Torque — 1 Oz.-In. (Min.)
Life Expectancy (min.) 2,000 Revolutions

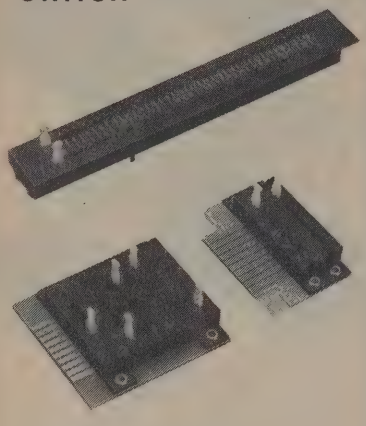
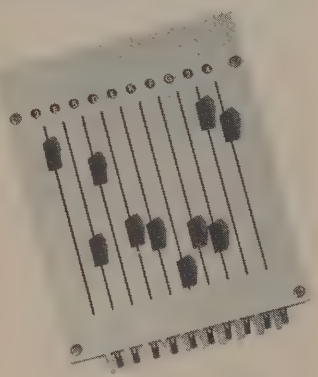
# PULL TO SET SWITCHES/MATRIX SLIDE SWITCHES/ELECTROMECHANICAL RELAYS

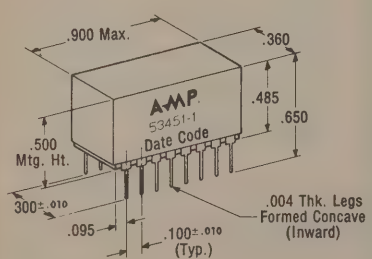
PULL-TO-SET SWITCH



MATRIX SLIDE SWITCHES



RELAY



All dimensions in inches.

## PULL-TO-SET SWITCH

### FEATURES

- Economical low cost switching.
- Modular design for maximum flexibility.
- Choice of board mount assemblies or individual switches to mount on your board.
- Sturdy construction.
- Long life — 25,000 cross-point switching.
- High pressure, positive contact.
- Single pole, ten throw functions.
- Available in 1 x 10, 5 x 10, and 2 x 40 position modules.

## MATRIX SLIDE SWITCHES

### FEATURES

- Contact lifting principle employing detent channel and ball assures longer life by eliminating abrasion and preventing metal smear between pc board conductors.
- Standard switch sizes include 5 x 10, 10 x 10, 5 x 16 and 10 x 16 slide/position configurations.
- Flexible modular design permits various combinations of non-standard switch configurations.
- Standard sizes available with or without visual display.
  Standard visual readouts are legible .125" high white characters on black background.
- Standard readout characters are "0 thru 9" followed by letters "A thru F" on switches having more than 10 slide positions.
- Visual readout characters other than standard characters are available.
- Small physical switch size is due to unique roll-up design of visual display indicators.
- Interchangeable contact finger grips — standard color is black; other colors also available.
- Brushed stainless steel face plate is designed for easy, attractive flush mounting to front panel.
- Gold or nickel plated contacts.
- Slide output tabs mate with AMP "110" Series FASTON Receptacles; pc board connections accept DUO-TYNE Flag One-Piece Pc Edge Connector or various AMP-UNYT Pc Connectors with crimp snap-in contacts.
- High speed machine-applied terminations assure top quality, low cost connections.

## ELECTROMECHANICAL RELAY TWO DPDT (2 FORM C) PART NO. 53451-1

### FEATURES

- Two independent relays per unit.
- 16-pin. DIP-type device compatible with present packaging techniques for IC's.
- DPDT (2 Form C) switch configuration (per relay).
- 4.5 volt relay designed to be IC controlled.
- Also available in 6.0 volt (part no. 1-53451-1)
- Low resistance gold contacts.
- Electromechanical relay with true circuit isolation.
- Correct installation assured by symmetrical package design.
- High sensitivity.
- Fast, reliable, economical switching.

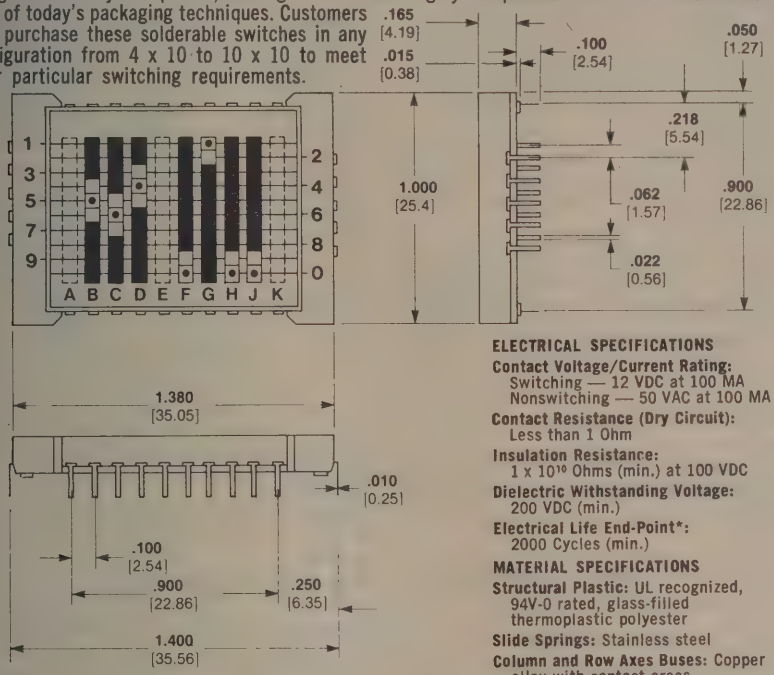
# MINI-MATRIX SLIDE SWITCH / 3510 SERIES ROTARY SWITCH

## INTRODUCTION

AMP Mini-Matrix Slide switches provide a highly reliable, low cost means of manually programming various types of electrical/electronic equipment. These unique devices are basically a multiplicity of manually operated slides which select cross-points in a matrix. They feature an extremely compact design and a very low profile, making the switches highly compatible with the miniaturization standards of today's packaging techniques. Customers may purchase these solderable switches in any configuration from 4 x 10 to 10 x 10 to meet their particular switching requirements.



**ELECTRICAL SPECIFICATIONS**

**Contact Voltage/Current Rating:** Switching — 12 VDC at 100 MA Nonswitching — 50 VAC at 100 MA

**Contact Resistance (Dry Circuit):** Less than 1 Ohm

**Insulation Resistance:** 1 x $10^{10}$ Ohms (min.) at 100 VDC

**Dielectric Withstanding Voltage:** 200 VDC (min.)

**Electrical Life End-Point*:** 2000 Cycles (min.)

**MATERIAL SPECIFICATIONS**

**Structural Plastic:** UL recognized, 94V-0 rated, glass-filled thermoplastic polyester

**Slide Springs:** Stainless steel

**Column and Row Axes Buses:** Copper alloy with contact areas electroplated gold

**Contact Surfaces:** Electroplated gold

* Electrical life end-point is defined as a contact resistance greater than 1 ohm.

## INTRODUCTION FEATURES

AMP 3510 Rotary Switches are designed to meet the programming needs of today's electronic industry. AMP 3510 series switches are specially designed to provide phase locked loop coding, seven segment coding, binary and BCD coding, as well as many other complex custom codes used in communications, entertainment, video games and machine control equipment. Any even number of detent positions, from 18 to 50, can be furnished in the same switch package height and width dimensions. Also, as many as seven layers can be stacked to provide up to 70 output functions per detent position.

Each switch features a bidirectional rotating pc board with fixed, insert molded cantilever brush contacts. Insert molding of the contacts insures accurate positioning as well as closely controlled contact forces. The detent is accomplished by spring loaded stainless steel balls in a molded detent housing. This design assures a positive snap and eliminates hang-up between switching positions. On custom designs, actuator rotation can be limited to less than 360° with the use of stops.

**ELECTRICAL SPECIFICATIONS**

**Circuit Current Rating (at 24 VDC):** Nonswitching — 2.5 amperes (max.); Switching — 125 ma (max.).

**Contact Resistance (at 6 VDC, 40 ma):** 1 ohm.

**Insulation Resistance (at 100 VDC):** 1 x $10^{8}$ ohms (min.).

**Dielectric Withstanding Voltage:** 250 VDC (min.).

**Capacitance:** 5 picofarads (max.).

**MECHANICAL & ENVIRONMENTAL SPECIFICATIONS**

**Contact Life Expectancy:** 25,000 bidirectional rotations at rated load.

**Initial Operating Force:** 0.5 to 2 in.-lb. [2.2 to 8.9 N].

**Temperature:** Operating — −20°F to +190°F [28.8°C to +87.7°C]; Nonoperating — −100°F to +275°F [−73.3°C to +135°C].

**MATERIAL SPECIFICATIONS**

**Housing, Front & Rear Covers:** 94V-0 rated black thermoplastic.

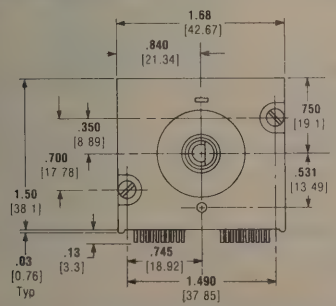
**Operating Shaft:** Zinc alloy or aluminum.

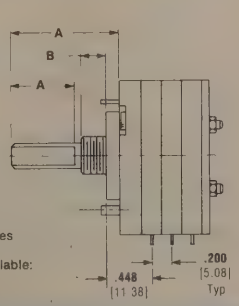
**Connecting Hardware:** Brass or corrosion resistant steel.

**Printed Circuit Boards:** 1 oz. [0.028 kg] copper clad laminate with precious metal plated circuits.

**Contacts:** Copper alloy, precious metal plated.

**Detent Wheel:** Acetal.



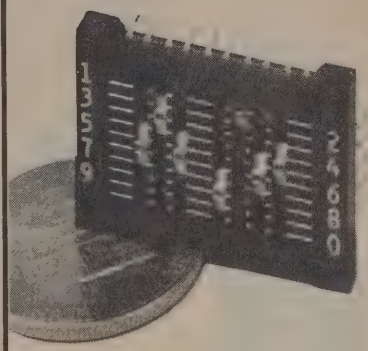


A — Custom shaft configurations and sizes can be provided.

B — Three standard bushing lengths available: .250 [6.35], .375 [9.53] and .500 [12.7].

AMP

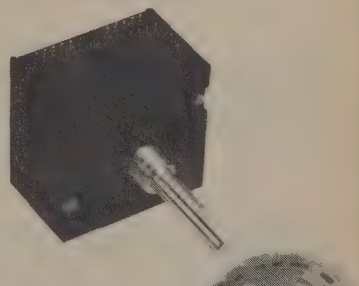
## MINI-MATRIX SLIDE SWITCH



### FEATURES

- 10 x 10 switch occupies only 1" x 1.38" (25.4 mm x 35.05 mm) of area on a pc board
- Very low profile — extends only .165" (4.19 mm) above pc board
- Can be soldered to a pc board with other components
- Plastic parts made of UL recognized, 94V-0 rated thermoplastic polyester
- Customer selects the exact configuration — from 4 x 10 to 10 x 10 — to meet his particular switching requirements

## ROTARY SWITCHES 3510 SERIES



### FEATURES

- Wide choice of sizes
- Code flexibility
- Modular stacking
- Optimum reliability
- Insert molded cantilever brush contacts
- Positive switching
- Compact design
- Enclosed contacts
- Available options

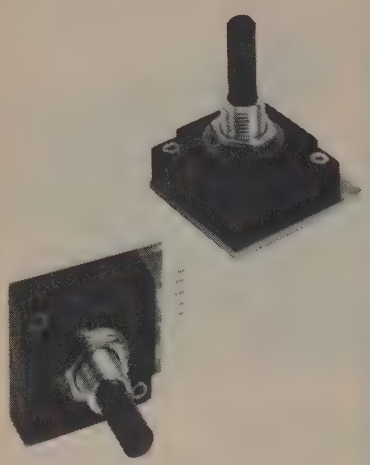
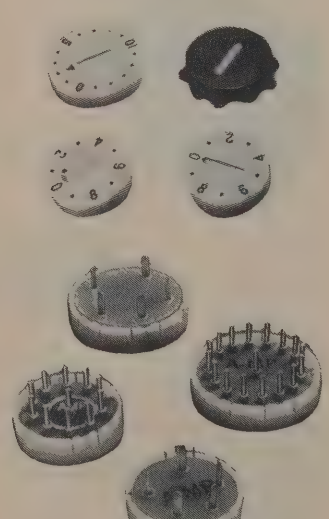
# MULTI-LAYER ROTARY SWITCHES
# PRINTED CIRCUIT BOARD ROTARY SWITCHES

## 3100 SERIES



The AMP Multi-Layer Rotary Switch is specifically designed for logic level circuitry but is capable of controlling electrical circuits that operate at current ratings of 2 amperes, 115 volts ac (nonswitching) and up to 125 milliamperes, 115 volts ac (switching).

## 6000 SERIES



## MULTI-LAYER ROTARY SWITCH 3100 SERIES

### FEATURES

- Code Flexibility — Switch output capabilities include hexadecimal, hexadecimal complement and BCD, plus various other codes re-requiring a maximum of 13 contacts per switch layer.
- Modular Stacking — Switch layers can be stacked for multi-layer operation by a single actuator — without increasing mounting surface dimensions.
- Optimum Reliability — Ruggedly constructed switches consist of molded thermoplastic layers, stainless steel ball and spring detent, brass or corrosion resistant steel hardware, and phosphor bronze contacts with gold-over-nickel plating.
- Positive Switching — Positive detent action of detent wheel assures error-free operation. operation.
- Compact Design — Switches require a minimum of front- or behind-panel mounting space.
- Enclosed Contacts — Contact surfaces are fully protected against dirt, dust and other environmental hazards.

**Note:** All dimensions in inches unless indicated otherwise.

**Specifications subject to change. Consult AMP Incorporated for latest design specifications.**

### SPECIFICATIONS

**ELECTRICAL**

**Circuit Current Rating:**
**Nonswitching** — 2A @ 115 VAC
**Switching** (Resistive Load) — 125 MA @ 115 VAC (Max.)

**Initial Contact Resistance** (Measured from input terminal, thru contact to output terminal) — 100 Milliohms (Max.)

**Insulation Resistance** (@ 250 VDC) — 1 x $10^8$ Ohms (Min.)

**Dielectric Breakdown Voltage** — 300 VDC (Min.)

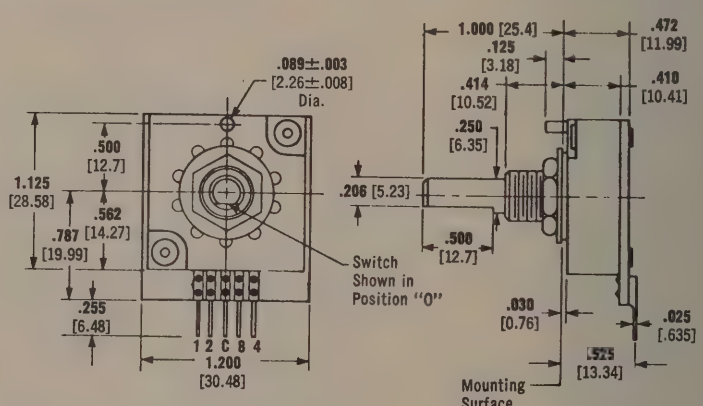
**DIMENSIONAL**

**PHYSICAL AND ENVIRONMENTAL**

**Contact Life Expectancy** — 25,000 Rotations @ Rated Load
**Initial Operating Force** — 1 to 2 Inch/Lbs.
**Operating Temperature** — —40°F to +190°F

**MATERIAL**

**Structural Parts (Switch Layers)** — Glass filled nylon 94-V2
**Operating Shaft and Detent** — Thermoplastic polyester 94-V-O
**Printed Circuit Boards** — Glass epoxy, copper clad
**Contacts** — Phosphor bronze, gold-over-nickel plated
**Hardware** — Brass or corrosion resistant steel



**NOTES:**
1. Knobs for operating switches are to be supplied by the customer.
2. Stops for limiting switch rotation to less than 360° can be provided upon request.

## PRINTED CIRCUIT BOARD ROTARY SWITCHES 6000 SERIES

### FEATURES

- **COMPACT DESIGN** — Small diameter, low profile switches are ideal for pc board mounting.
- **WIDE CHOICE OF OUTPUTS**—8-position binary coded octal, 10-position binary coded decimal, 16-position hexadecimal and 8-, 10- or 16-position single pole.
- **VERSATILE APPLICATION** — Available styles include slotted version for screwdriver or coin actuation, plus bar-type knob and thumbwheel versions for hand rotation.
- **ECONOMICAL** — Board mounting eliminates need for input/output wiring to perform switching functions.
- **POSITIVE SWITCHING** — Contacts have positive detent action; all switch positions easily identified by large readable numerals.
- **OPTIMUM RELIABILITY** — Fully enclosed design protects contact surfaces from dust, dirt and other environmental contaminants.

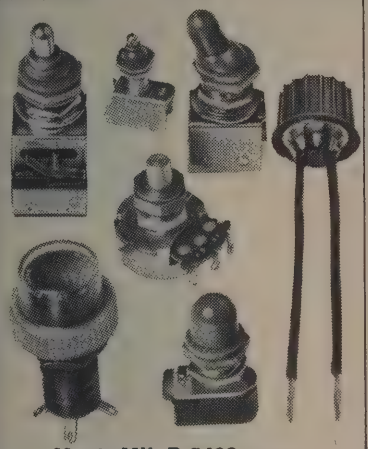
# SWITCH ENVIRONMENTAL SEALING
## Toggle, pushbutton and rotary switch seals



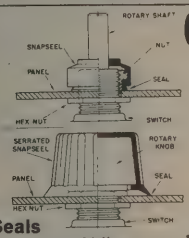
**Meets MIL-B-5423 specs; EMI/RFI-shielded versions available.**

## MIL AND INDUSTRIAL VERSION: HEXSEALS®

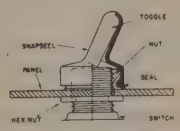
Provide positive high-pressure environmental sealing for all standard switches and rotary shafts with one-piece silicone boots incorporating a molded-in hex nut for water-tight, dust-tight protection. Replacing regular mounting hardware, vibration-resistant Hexseals fit snugly around the switch neck to seal both the panel mounting hole and the switch—even against a 30 foot head of water or gas. Flexible Hexseals allow free motion of shaft or lever. A variety of boot height, diameter and thread sizes are available. Ask for Bulletin HEX-72

| | |
|---|---|
| Material: | Boot: Silicone rubber unless otherwise specified. Silicone rubber conforms to ZZ-R-765-Class III, Gr. 50. Other elastomers available on special order. |
| | Nut: Brass, nickel plated |
| Temp. Range: | —160°F TO +500°F (—106°C TO +260°C) |
| Pressure Range: | Exceeds 15 psi internal and external |
| Shelf Life: | Excess of 25 years |
| Resistant to: | Salt spray, weather, sunlight, ozone, and most acids, |
| Stock Colors: | grey, transparent (Clear); Other colors available on special order. |

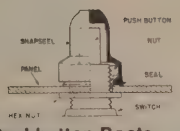
## COMMERCIAL VERSION: SNAPSEALS T.M.



**Rotary Shaft Seals**
Shaft diameter: ¼″ nom.; bushing diameter: ⅜″. For Ratchet Knob Type: knob height: ½″ approx.; knob diameter: ⅝″ approx.



**Toggle Switch Boots**
Bat handle height from panel: ⅞″; bat handle diameter: up to ¼″; bushing diameter: ½″ max.



**Pushbutton Boots**
Pushbutton height from panel: up to 9/16″; pushbutton diameter: up to ¼″; bushing diameter: ⅜″ or 15/32″.

Low-cost, easy-to-install Snapseels slip easily over standard pushbutton, toggle or rotary switches to provide double insulation while sealing against moisture, dirt and dust, solvents, most acids and external pressures of 10 psi. Many sizes. SPECIFICATIONS: Material: black neoprene (other materials and colors available); Operating temperatures: -65°F to +300°F; Shelf Life: 2 years; Mounting nut: nickel-plated brass.
Ask for Bulletin SNP-72

## INDICATOR LIGHT SEALS: RubRglas®-Seel

Transparent and flexible pressure switch boots of glass-clear silicone rubber allow complete visibility of the completely enclosed and sealed lamp filament and "press-to-test" markings. Molded to a corrosion-resistant aluminum nut with an integral gasket rib for firm seating against any panel surface. Wide range of thread sizes available.

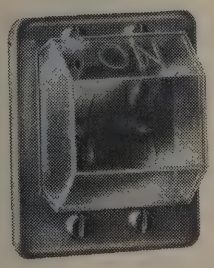
## CIRCUIT BREAKER BOOTS
### Protective RubRglas®-Seals



Shield exposed panel openings and circuit breakers with single, double or triple pole switch handles against weather, salt water, acids and dirt without redesigning equipment or hindering operation. Tough but flexible wide-angle boots made of glass-clear silicone rubber keep switch handles visible and accessible for easy manual operation. Boot assemblies consist of RubRglas shield, cadmium-plated steel frame, self-sealing stainless steel screws (Seelskrews®). Over 25-year shelf life.
Ask for Bulletin No. CB-72

## EXOTIC ELASTOMERS

Extreme precision tolerances in all types of miniature elastomer molding. Cut waste to a minimum by getting the best performance out of vitons, silicones and other hard working materials.

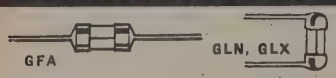
## TRON® SUBMINIATURE PIG-TAIL FUSES



Glass-tube construction with 1-1/2" leads of #24 tinned copper for 1/100-5 amp ratings, #18 tinned copper for 7-15 amp ratings. Hermetically sealed. Color coded to indicate amp ratings. For circuits with fault current of 50 amps or less (1/100-5 amps for 125 V or less, 7-15 amps for 32 V or less). GLN, GLX body size, .140" x .3"; GFA body size, .145" x .3".

| Buss No. | Amperes | Net Price For Ten | Net Price For 100 |
|---|---|---|---|
| GLN | 1/100 | $21.30 | $177.00 |
| GLN | 1/32, 1/20, 1/16, 1/10, 1/8, 3/10, 4/10, 7, 8, 15 | 17.70 | 148.00 |
| GLX | 15/100, 2/10, 1/4, 1/2, 6/10, 3/4, 1, 1-1/2, 2, 3, 4, 5 | 25.60 | 213.00 |
| GFA | 1/100, 1/32, 1/20, 1/16, 1/10, 1/8, 15/100, 2/10, 1/4, 3/10, 4/10, 1/2, 6/10 | 8.50 | 71.00 |
| GFA | 3/4, 1, 1-1/2, 2, 3, 4, 5, 7, 8, 15 | 7.60 | 64.00 |

## SUBMINIATURE PRONG TYPE UNIT

Rated 125 V or less, fault current not over 300 amps; open at 200% within 10 sec or less. Use AF knob for waterproof. Size, .270" dia., .250" lg. (body).

| Buss No. | Amperes | Net Price For Ten | Net Price For 100 |

| ABC | 25, 30 | 125 | 1.95 | 33.00 |

## 1/4 x 1-1/4 inch FUSES

VISUAL INDICATING FUSES

For use with HLD fuseholder. Bright red dot on indicating pin extends from end of fuse when fuse is open even after power is off. Rated 125 V or less, carries 110%, opens at 135% in 1 hour or less. Only 1/4" x 1-1/4".

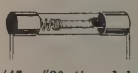
| Buss No. | Amperes | Net Price For Five | Net Price For 100 |
|---|---|---|---|
| GBA | 3/4 | $4.95 | $83.00 |
| GBA | 1, 1-1/2, 2, 3, 4, 5 | 3.70 | 62.00 |

Fiber tube with silver plated indicating pin which extends when fuse is blown. May be used to actuate a signal when used in HKA fuseholder or Signal Fuse Block. Dual tube construction in sizes larger than 5 amps (cannot be used in HKA fuseholder). Voltage, 125 volts, except 8 amp and over which are 32 volts. Size, 1/4" x 1-1/4".

| Buss No. | Amperes | Net Price For Five | Net Price For 100 |
|---|---|---|---|
| GLD | 3/4 | $4.45 | $74.00 |
| GLD | 1, 1-1/2, 2, 3, 4, 5 | 3.50 | 58.00 |
| GLD | 6, 8, 10, 12, 15, 20 | 4.85 | 81.00 |

## 1/4 x 1-1/4 inch FUSES

FUSETRON PIG-TAIL FUSES



Body 1/4" x 1-1/4", #20 tinned leads, 1-1/4". 1/100 to 2-8/10 same as MDL type; 3 to 7 amps same as MDX type. U/L Approved.

| Buss No. | Amperes | Volts | Net Price For Five | Net Price For 100 |

| GJV | 4, 5, 6 | 1.50 | 25.00 |

## 1/4 x 1-1/4 inch FUSES

FUSETRON GLASS TUBE FUSES

Dual-element slow-blowing type, 1/4" x 1-1/4". Fuse link operates only on very high overloads or short-circuits; thermal cutout functions on low overloads (cannot operate quickly on any load, thus providing long time-lag). Carry 110%, open at 135% in 1 hour. MDL 1/100 to 2-8/10 amp and MDX 3 to 7 amp sizes. U/L Approved. MDL type has longer time-lag than MDX type.

| Buss No. | Amperes | Volts | Net Price For Five | Net Price For 100 |

# fuses and holders

## 9/32 x 1-1/4 inch FUSES

### AGS GLASS TUBE FUSES

Test specification; carry, 110%, open at 135% within 1 hour except 35 and 40 amp units which open at 300% in 2 to 4 seconds when tested in standard 30-amp test circuit. Note: These units in sizes larger than 30 amps are not recommended for use in fuse clips or fuseholders as clips will not carry the high currents.

| Buss No. | Amperes | Volts | Net Price For Five | 100 |
|---|---|---|---|---|
| AGS | 1/16 | 250 | $3.85 | $64.00 |
| AGS | 1/8 | 250 | 2.70 | 45.00 |

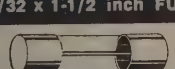
## 13/32 x 1-3/8 inch FUSES

### "QUICK-BLOWING" 600 V FUSES

Designed to protect control circuits, fluorescent lighting circuits or similar uses where quick-blowing characteristics are desired. Use HPC-L fuseholder or 3845 fuse block. U/L Approved. Fiber tube 13/32" x 1-3/8".

| Buss No. | Amperes | Net Price For Ten | 100 |
|---|---|---|---|
| BBS | 4/10, 3/4, 8/10 | $5.10 | $42.00 |
| BBS | 1, 2, 3, 4, 5 | 4.90 | 40.00 |

## 13/32 x 1-1/2 inch FUSES



Glass tube, carry 110%, open at 135% in 1 hour. 3 amp. and smaller sizes U/L listed.

| Buss No. | Amperes | Volts | Net Price For Ten | 100 |
|---|---|---|---|---|
| AGU | 1, 2, 3, 4, 5, 10, 15 | 250 | $3.20 | $26.00 |
| AGU | 20, 25, 30 | 32 | 2.90 | 24.00 |

## 13/32 x 1-1/2 inch FUSES

### MIDGET TYPE FUSES

Up to 15 amp size U/L Approved.

| Buss No. | Amperes | Volts | Net Price For Ten | 100 |
|---|---|---|---|---|
| BAF | 1, 3, 5, 6, 10 | 250 | $2.70 | $22.00 |
| BAF | 15, 20, 25, 30 | 125 | 2.70 | 22.00 |

## 13/32 x 1-1/2 inch FUSES

### INDICATING, LAMINATED TUBE FUSES

Red button on indicating pin extends from end of fuse when fuse is blown. Units are built in accordance with Navy Specifications. These units may be used in Buss HPC-C fuseholders. Voltage, (1-15 amps), 250, others, 125 V.

| Buss No. | Amperes | Net Price For Ten | 100 |
|---|---|---|---|
| MIN | 1, 2, 3, 5, 10, 15, 20, 25, 30 | $7.60 | $64.00 |

### SIGNAL OR VISUAL INDICATING FUSES

MIC fuses have silver-plated indicating pin. Pin may be used as visual indicator or may be used to actuate a signal. MIJ fuses are similar to MIC types except they have been specially designed for complex circuitry as in computers. Voltage, 250 except 20 amps and over which are 32 V.

| Buss No. | Amperes | Net Price For Ten | 100 |
|---|---|---|---|
| MIC | 1, 2, 3, 5, 10, 15, 20, 25, 30 | $8.50 | $71.00 |
| MIJ | 1, 2, 3, 5, 10, 15, 20, 25, 30 | 9.90 | 83.00 |

## 13/32 x 1-1/2 inch FUSES

### HIGH INTERRUPTING CAPACITY FUSES

Type KTK — For use on circuits as high as 100,000 amps and sand filler surrounding a silver fuse at 600 volts or less, AC only. Glass fiber melamine tubes element. Amperes: 1/10, 1/8, 2/10, 1/4, 3/10, 1/2, 3/4, 1, 1-1/2, 2, 3, 4, 5, 6, 8, 10, 12, 15, 20, 25, 30. Lot of 10, Net $18.40. Lot of 100, Net $153.00.

## 13/32 x 1-1/2 inch FUSES

### FUSETRON FIBER TUBE FUSES

Dual-element slow-blowing type, 13/32" x 1-1/2" overall. Fuse link operates only on very high overloads or short circuits; thermal cutout functions on low overloads (cannot operate quickly on any overload, thus providing longer time lag). Carry 110%, open at 135% in 1 hour. 125 and 250 volt sizes U/L Approved.

| Buss No. | Amperes | Volts | Net Price For Ten | 100 |
|---|---|---|---|---|
| FNM | 1/10, 15/100, 2/10, 3/10, 4/10, 1/2, 6/10, 8/10, 1, 1-1/8, 1-1/4, 1-4/10, 1-6/10, 1-8/10, 2, 2-1/4, 2-1/2, 2-8/10, 3-2/10, 3-1/2, 4, 4-1/2, 5, 5-6/10, 6-1/4, 7, 8, 9, 10 | 250 | $7.20 | $60.00 |
| FNM | 12, 15 | 125 | 7.10 | 59.00 |
| FNM | 20, 25, 30 | 32 | 7.10 | 59.00 |

Same as series FNM above, except glass tube instead of fibre tube.

| Buss No. | Amperes | Volts | Net Price For Ten | 100 |
|---|---|---|---|---|
| MDR | 1/10, 15/100, 2/10, 3/10, 4/10, 1/2, 6/10, 8/10 | 250 | $7.20 | $60.00 |
| MDR | 1, 1/2, 1-6/10 | 125 | 7.20 | 60.00 |
| MDR | 2-1/2, 3, 3-2/10, 4, 5, 6-1/4, 8, 10, 15, 20 | 32 | 5.80 | 48.00 |
| MDR | 25, 30, 35, 40 | 32 | 6.40 | 53.00 |

## 13/32 x 1-1/2 inch FUSES

### INDICATING FUSETRON FUSES

Similar to FNM types. Indicating pin extends from fuse when fuse blows. Use in signal fuse block or HPC-C fuseholder (larger than 10 amps units cannot be used in HPC-C). U/L Approved in 0-15 amp sizes.

| Buss No. | Amperes | Net Price For Ten | 100 |
|---|---|---|---|
| FNA | 1/10, 15/100, 2/10, 3/10, 4/10, 1/2, 6/10, 8/10, 1, 1-1/8, 1-1/4,1-4/10, 1-6/10, 1-8/10, 2, 2-1/4, 2-1/2, 2-8/10, 3, 3-2/10, 3-1/2, 4, 4-1/2, 5, 5-6/10, 6, 6-1/4, 7, 8, 10 | $13.40 | $111.00 |
| FNA | 12, 15, 20, 25, 30 | 15.00 | 124.00 |

## TYPE C AND N FUSES, HOLDERS

C. N HC, HN

Matched glass fuses and fuseholders for specific size ranges. Type N fuses are dual-element time-delay or slow-blowing type. 0 to 1-1/4 amp sizes, 1/4" x 1-1/4"; 1-3/10 to 7 amp sizes, 1/4" x 1-7/16". Type C fuses are single-element quick-blowing type. 0 to 3-1/2 amp sizes, 1/4" x 1-1/16"; 3-6/10 to 10 amp sizes, 1/4" x 1-1/4". Holders rated at 250 volts.

### TYPE N FUSES

| Amperes | Holder No. HN- | Volts | Net Price For Five | 100 |

## FUSETRON DUAL-ELEMENT FUSES

Long time-lag prevents useless shut-downs caused by ordinary fuses opening on starting currents or other harmless overloads, yet protects against short-circuits. On normal installations will guard motors against burnout from overloads or single phasing. U/L Listed for motor running and circuit protection up to 250 volts.

| Buss No. | Amperes | Net Price For Ten | Net Price For 100 |

## TRON RECTIFIER FUSES

**For Protection of Semiconductor Rectifiers and Similar Applications**

Especially designed for protection of semiconductor rectifiers, thyristors and other solid state devices. High interrupting capacity and very fast clearing to restrict let-through current and energy to very low values. Give safe short-circuit protection for systems with fault current to 200 kA at 600 volts or less. Carry 100%, open at 1000 secs between 150% and 180% of rating; open within 1 sec at 250% of rating.

### GBB SERIES

Size, 1-1/4" length x 1/4" diameter.

| Buss No. | Amperes | Max. Volts | Net Each |
|---|---|---|---|
| GBB | 1, 1-1/4, 2, 3, 4, 5, 6, 7, 8, 9, 10 | 130 | $1.26 |
| GBB | 12, 15, 20, 25, 30 | 65 | 1.26 |

### KAA SERIES

Size, 1-1/2" length x 13/32" diameter. Also available up to 1000 amps; prices on request.

| | | | |
|---|---|---|---|
| KAA | 1/2, 1, 2, 3, 4, 5, 6, 7, 8, 9, 10, 12, 15, 20, 25, 30 | 130 | $1.67 |

### KAW SERIES

Size, 1-1/2" length x 13/32" diameter.

| | | | |
|---|---|---|---|
| KAW | 1, 2, 3, 4, 5, 7, 8, 10, 12, 15, 20, 25, 30 | 130 | $1.71 |

### KAB SERIES

Size, 9/16" diameter x 2" length, values to 30 amps; 1-7/32" diameter x 3-1/8" length, 70 amps to 200 amps. Also available up to 800 amps; prices on request.

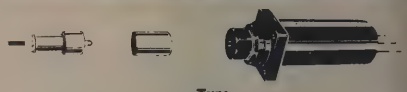
| | | | |
|---|---|---|---|
| KAB | 1/2, 1, 2, 3, 4, 5, 6, 7, 8, 9, 10, 12, 15, 17-1/2, 20, 25, 30 | 250 | $1.90 |
| KAB | 70, 80, 90, 100, 150, 200 | 250 | 8.53 |

### KAC SERIES

Size, 2-7/8" length x 9/16" diameter. Also available up to 800 amps; prices on request.

| | | | |
|---|---|---|---|
| KAC | 1, 2, 3, 4, 5, 6, 7, 8, 9, 10, 12, 15, 17-1/2, 20, 25, 30 | 600 | $2.80 |

## SERIES 70 FUSE



Type HWG*

**SIGNAL-INDICATING • ALARM-ACTIVATING**

For use in telephone and similar applications. Color code indicating pin extends from end when fuse opens. Glass tube construction. Rated 300V.

| Buss No. | Amperes | Net Price For Ten | Net Price For 100 |

## NON-INDICATING FOR 13/32 x 1-1/2 inch FUSES

| Buss No. | Type Mounting | *Fuse Voltage | Current Capacity | Net Each |
|---|---|---|---|---|
| HPC | Panel | 250 or less | 30A | $1.22 |
| HPC-D | Panel | 250 or less | 30A | 2.46 |
| HPG | Panel | 600 or less | 30A | 1.28 |
| HPL-B | Panel | 600 or less | 30A | 3.47 |
| HPS | Panel | 600 or less | 30A | 1.22 |

## VISUAL INDICATING FOR 13/32 x 1-1/2 inch FUSES

| Buss No. | Type Mounting | *Fuse Voltage | Current Capacity | Net Each |
|---|---|---|---|---|
| HPC-C | Panel | 250 or less | 30A | $1.51 |

## LAMP INDICATING FOR 13/32 x 1-1/2 inch FUSES

| Buss No. | Type Mounting | *Fuse Voltage | Current Capacity | Net Each |
|---|---|---|---|---|
| HGC | Panel | 200 to 500 | 30A | $9.72 |

### OTHER STANDARD AND SPECIAL FUSES, BLOCKS AND HOLDERS

If the fuses, fuse blocks and holders shown do not fit your requirements ask for information on other types. Fuses and fuse mountings to meet JAN and Military specifications also available. If you have a special problem in protection, send description or sketch giving number of circuits, type of fuse, terminals, etc., desired. We welcome such inquiries.

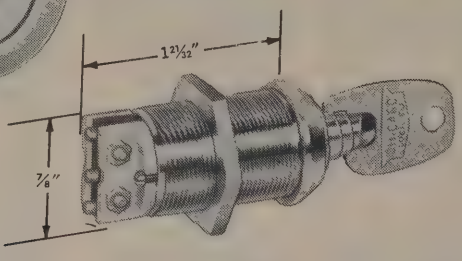
# Maximum Security Switch Locks for every application!

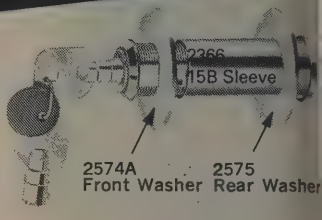
## ACE Switch Locks

**4900 Series** **Ace Locks**
**Underwriter's Listed** **20 tumblers**

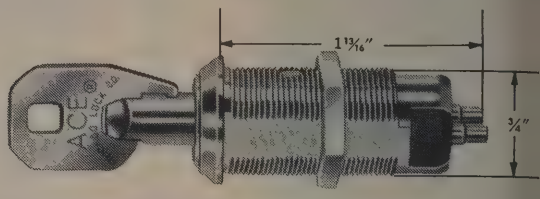


**No. 4902** — SPDT switch lock. Hardened steel cylinder mounted in a brass barrel 7/8" diameter; solder terminals, polished chrome finish. Furnished with micro-switch No. 11SM1.

**No. 4901—(not shown)** Same specs as 4902, except with adjustable sleeve and washers. Adjustable 1-7/8" to 3-3/4" thickness.

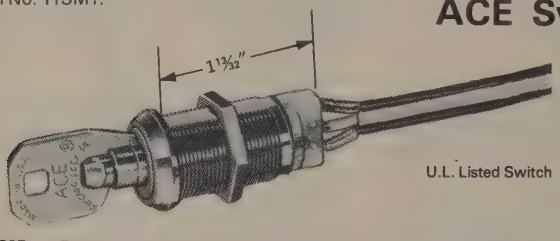


**No. 3039**—SPST switch with adjustable sleeve and washers; dependable wiping contacts. Solder terminals. Lock all brass construction, polished chrome finish. Key removable "off," "on" or "off-on." Also available in die cast outer barrel.



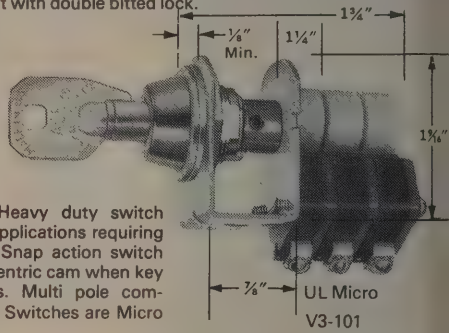
**No. 4073**—Maintaining contact switch. Key removable "off," "on" or "off-on". Also available as 4073-70 with momentary contact switch. All brass construction. Also offered with die cast outer barrel. No. 2274-80 same as 4073 except with double bitted lock.

## ACE Switch Locks



U.L. Listed Switch

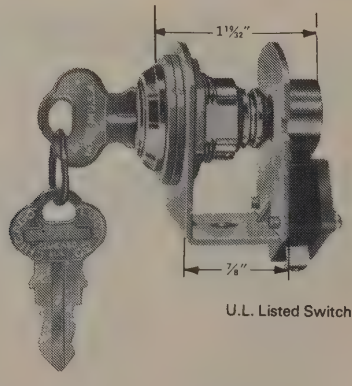
**No. 4235** — Easy to mount, UL Listed switch SPDT, available with silver plated contacts and 10" wire leads. Offered without 10" leads at reduced cost. Furnished with micro-switch 1SX1-H58.



U.L. Listed Switch

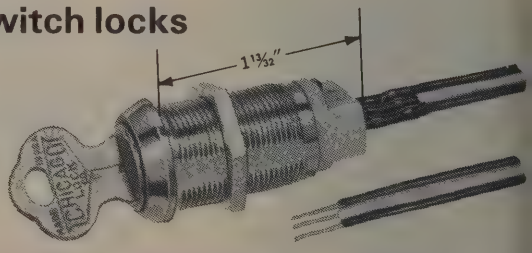
**No. EXA-112-3**—Heavy duty switch lock designed for applications requiring UL Listed switch. Snap action switch actuated by an eccentric cam when key turned 90 degrees. Multi pole combinations available. Switches are Micro No. V3-101.

## Chicago double bitted switch locks



**No. EXD-98**
Same as EXA-112, except with double bitted cylinder. Designed for high current applications. Multiple pole combinations available. Furnished with micro-switch V3-101.

U.L. Listed Switch



**No. 3535** — UL Listed switch, SPDT. Furnished with silver plated contacts and 10" wire leads. Same as 4235 except has double bitted cylinder. Available without 10" leads at reduced cost. Furnished with micro-switch 1SX1-H58.

TIG Series with double actuators

Standard Colors are WHITE, -WH and BLACK, -BL. Other colors available upon request.

Imprinting on Actuators may be had upon request.

**Brackets** — In addition to the illustrations shown, we offer a variety of brackets — offset, flat, angled, open ear, snap-in, etc. Specials can be made upon request. Snap-in style is designed for panel thickness of approximately .040″ to .100″. For mounting information and dimensions consult distributor. This model bracket is available on single, double and three pole Tippettes — Single and double pole lighted Tippettes. Narrow or wide bezels.

**LIGHTED TIPPETTE FEATURES**

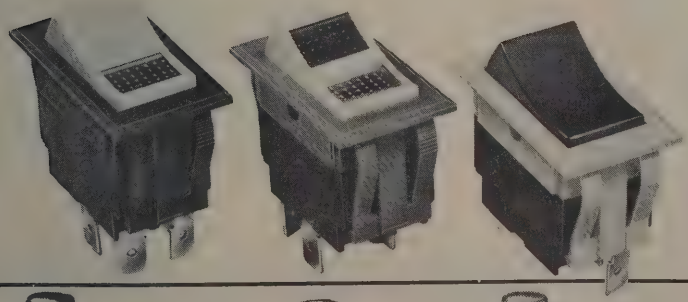
**Actuators, Brackets & Accessories** — Available in the same styles as listed in the Tippette Series. Lenses are Red, Amber, Clear and White. Special variations and colors available.

**Lamp Characteristics**

Neon (Standard)
120*-240 Volts .002 Amps.

Incandescent
6 Volts .20 Amps.
12 Volts .08 Amps.
24-28 Volts .04 Amps.

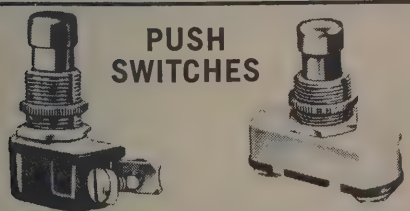
*Available with "High Brightness" in 120.



## CURVED ROCKER TIPPETTES

Insulated all-nylon bracket/bezel and rocker may be molded in any color combination of available Zytel 101 colors. Switch snap-mounts into conventional opening in panel from .030″ to .250″ thick. Available with ratings and circuit characteristics for single and double pole Tippettes and lighted Tippettes listed above. U/L and C.S.A. listings. Rocker may be ordered smooth (no light), or with one or two large-lens indicator lights as illustrated. Legend imprinting may be specified.

## PUSH SWITCHES



Type: PP - Push, On - Push, Off. Maintained. NO Normally Open. Momentary NC Normally Closed. Momentary. All Have 15/32″ Dia. Bushing. Push buttons with color coded caps available.
* Screw Terminals. Others Have Solder Lugs.
† Ratings up to 2 HP available.

# KEYBOARDS and KEYBOARD SWITCHES

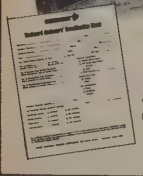
Straightforward electronics adapt readily to your specifications. Many standard keyboards stocked for immediate, "off-the-shelf" delivery. Custom designs available on volume applications with modest engineering, tooling and art work charges.

## KEYBOARD SWITCHES

Gold "crosspoint" contact key design provides high force per unit for contact area and virtually eliminates contact closure interference by contaminates. Choice of types with straight or angled stems.

## TWO VALUABLE DESIGN AIDS YOURS FOR THE ASKING

**84 page catalog and guide** to Cherry keyboards, keyboard switches and the complete line of Cherry snap-action switches.

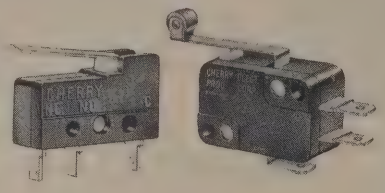


**Six-page Keyboard Designers' Specification Sheet.** Makes it easy for you to spec and order any keyboard design.

# LOW ENERGY

## gold crosspoint contact snap action switches

For positive switching of low energy solid state circuits. Cherry "crosspoint" contact configuration—two gold contact prisms at right angles to each other—provides maximum contact pressure, minimum hazard of contact closure interference.



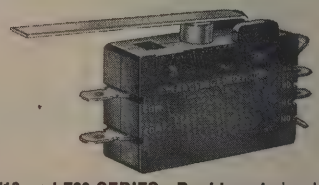
Available in virtually every snap action switch type in the comprehensive Cherry line: general purpose, panel mount pushbutton, light force, miniature, subminiature, weatherproof and open designs.

# GENERAL PURPOSE

## snap action switches

Rugged, compact switches with large overtravel, wear-resistant nylon button, many integral hinged actuator variations.

**E13 and E14 SERIES—Single pole** in choice of 15 and 25 amp electrical ratings.
Switch body: 1-13/16" x 41/64" x 41/64".



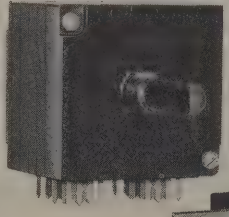
**E19 and E20 SERIES—Double pole** in choice of 15 and 20 amp electrical ratings.
Switch body: 1-13/16" x 1-1/8" x 41/64".

# ROTOCODE

## the new Rotary Switch with Coded Electrical Output

**Combines the coded electrical output of a thumbwheel switch . . . with the shaft actuation of a rotary switch!**

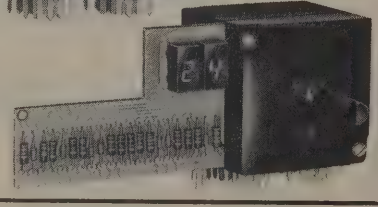
Provides high switching density. Designed for easier, faster, flow-solder installation. High reliability. Readily expandable. Custom designs available.



**All at low, affordable cost!**

BASIC ROTOCODE

LED READOUT ROTOCODE



# PANEL MOUNT

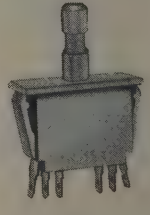
## pushbutton switches

Snap-in mounting in choice of momentary contact action, push-pull (reset), momentary "cheat" interlock, push-push (alternate action). White nylon case.

**E69 SERIES**

**Single pole** with 10 amp electrical rating. Switch body: 1-1/2" x 1" x 11/16".

**E79 SERIES**



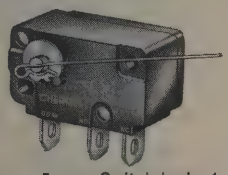
**Double pole** controls two circuits from single actuator.
Electrical rating: 10 amp.
Switch body: 1-1/2" x 1" x 11/16".

# CHERRY

**CHERRY ELECTRICAL PRODUCTS CORP.**
3623 Sunset Avenue, Waukegan, Illinois 60085
PHONE: 312/689-7700—TWX: 910/235-1572

# LIGHT FORCE MINIATURE
## snap action switches

Compact switches with long-life coil spring mechanism. Added internal actuator increases life, decreases operating force while maintaining high contact pressure.



**E51 SERIES**
**Low torque**
Rotary action with feather-light operation. Clockwise or counter clockwise action. Electrical rating: 5 amp. Switch body: 1-1/2" x 1" x 11/16".

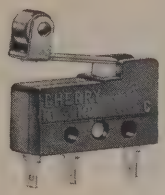
**E22/E23/E33/E34 SERIES**
Operating force as low as 2 grams. Choice of 3, 5, 10 and 15 amp electrical ratings. Switch body: 13/32" x 5/8" x 1-3/32".

# SUBMINIATURE
## snap action switches

Subminiature switches with large overtravel, integral hinged actuators, choice of terminal types with two force and rating ranges and many hinged actuator variations.

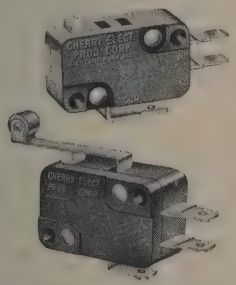
**E61 SERIES**
**Light force** with 5 amp electrical rating.
Switch body: 25/32" x 23/64" x 1/4".

**E62 SERIES**
**Standard force** with 10.1 amp electrical rating. Switch body: 25/32" x 23/64" x 1/4".



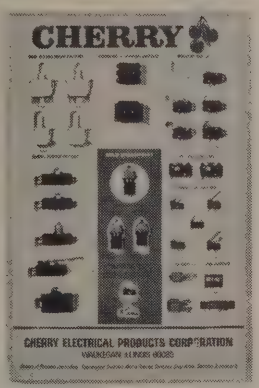
# MINIATURE
## snap action switches

Compact miniature switches with long-life coil spring mechanism, integral hinged actuators, choice of terminal types and four force rating ranges.



**E22/E23/E33/E34 SERIES**—Choice of 3, 5, 10 and 15 amp electrical ratings, operating forces from 15 to 100 grams. Switch body: 13/32" x 5/8" x 13/32".

# $89 DESIGNER'S PROTOTYPE KIT
## for switch users
## ...ONLY $29



**Get this handy switch kit containing 32 Cherry switches** worth $89.04 in handy display to stand on desk or hang on wall. **All for just $29** . . . postage paid.
Enclose check with order or call 312 689-7702.

# THUMBWHEEL and LEVERWHEEL SWITCHES

Avaiable in 18 basic configurations ☐ in a full range of alphanumeric readouts ☐ and output codes ☐ individual digits or ☐ in assemblies of several digits mounted side-by-side ☐ complete with end caps ☐ with many available features and options ☐ in gloss or matte finish.

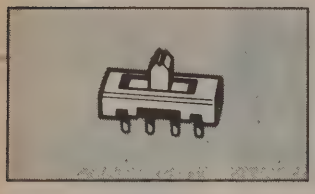
## MINI MIKE SLIDE SWITCHES

Our standard line of high quality miniature slide and snap action switches. Available in SPST, SPDT, DPDT and Form Z" circuit configurations. Low energy switches with contacts of hard gold over barrier. Standard P.C. mounting. Other terminal variations offered.

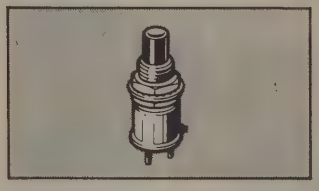
## TAPIT KEYBOARD PUSHBUTTON SWITCHES

A 4 terminal momentary printed circuit switch. SPST — normally closed, Form "Z" alternate circuits available. Contacts of silver. Low energy contacts of hard gold over barrier. Life expectancy: 10,000 actuations. Optional mounting tabs available.



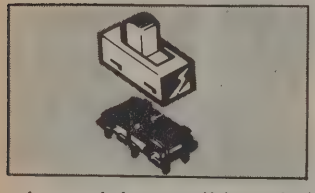
## ECONOMITE SLIDE SWITCHES

Save on cost without sacrificing quality. Our line of low cost miniature slide switches, available in SPDT SP3Position, DPDT and DP4Position circuits. Panel and P.C. mounting available. Black button in various heights. Nominal rating — 300 milliamps 125VAC for 10,000 actuations. Silver plated contacts.



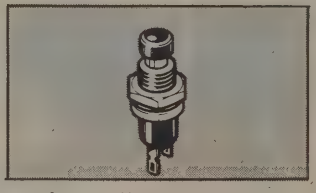
## TO-5 PUSHBUTTON SPASAVER SWITCH

Where space is a consideration, this SPST normally open, momentary switch is extremely useful. Contacts of silver, low energy versions of hard gold over barrier. Printed circuit applications. Available with or without bushing.



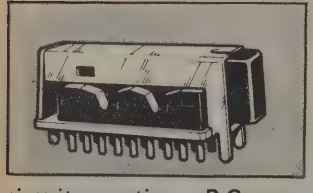
## MR. CLEAN WAVE SOLDERABLE MINIATURE SLIDE SWITCHES

Our new line of wave solderable, anti-contamination, miniature slide switches. Features a unique (patents pending) 2-piece assembly designed to alleviate problems due to contamination by flux and cleaning solvents. Available in SPST, SPDT, DPDT and Form "Z" circuits. Over center snap action mechanism, low energy gold contacts, 50,000 actuations at 10 ma @ 6VDC resistive End of Life Criteria: 100 milliohms. Now available with stand off bases.



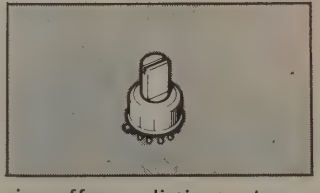
## ECONOMITE MINIATURE PUSHBUTTON SWITCHES

Attractive miniature pushbutton switches, ideal for use in applications requiring a SPST momentary action circuit. Where space, weight and low cost are of importance these switches offer many advantages. Contacts of silver. Low energy versions with gold contacts. These reliable switches are available in a variety of pushbutton colors and include necessary panel mounting hardware.



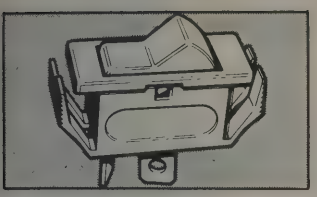
## MODULE SERIES

This line of subminiature slide switches offers a greater number of switching capabilities. SPDT, DPDT, 4PDT and 6PDT circuitry options. P.C. mounting. Momentary and alternate action actuation modes available. Silver contacts. Low energy versions with contacts of hard gold over barrier. Life expectancy 150,000 actuations for SPDT and DPDT versions. 4PDT and 6PDT life expectancy of 10 000 actuations; 250,000 actuations for low energy models.



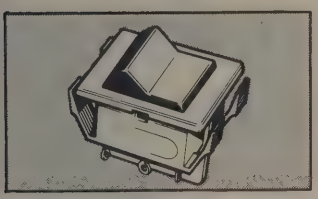
## TO-5 ROTARY SPASAVER SWITCH

This wave solderable subminiature rotary switch gets up to 8 positions into a TO-5 can. The compact size offers a distinct advantage, in view of the increasing cost of P.C. board real estate and the premium on front or rear panel space. P.C., panel and board socket mounting with optional bushing. Actuator moves through 360 degrees in detented steps of 45 degrees. Available with stops as required from 2 to 8 positions. Low energy contacts of hard gold over barrier. Also available in DPDT circuitry. Life expectancy: 10,000 actuations.



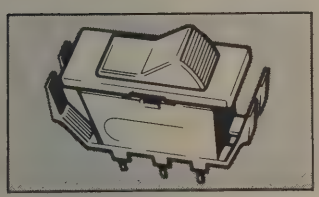
## 26 SERIES SINGLE POLE ROCKER AND PADDLE SWITCHES

Variety enhances the desirability of these switches. Modern styling with a wide range of actuator and case color choices. Solder, screw or slip-on terminals available. U.L. and CSA listings, with ratings up to 10 amps. SPST, SPDT circuits available. Matching panel lights and lighted versions. Special colors, hot stamping and metal bezels optional. Standard silver-cadmium contacts. Heavy duty versions available. Two switches in one case or a switch plus a lens in one case on request. Standard snap-in panel mounting.



## 27 SERIES DOUBLE POLE ROCKER AND PADDLE SWITCHES

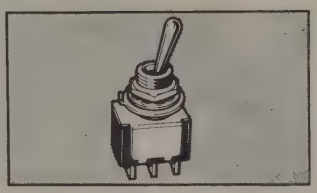
U.L. and CSA listings with ratings up to 10 amps. Compact switches with attractive styling and easy snap-in installation. SPST, SPDT, DPST, and DPDT versions are available. Choice of solder, screw or slip-on terminals. Switches come in a variety of case and actuator colors. Special colors, hot stamping and metal bezels are available on request. Standard silver-cadmium contacts. Lighted versions and matching panel lights are also offered.



## 38 SERIES DOUBLE POLE ROCKER – SINGLE POLE SIZE

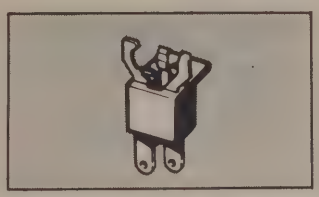
This switch, U.L. listed 6 amps at 125VAC inductive is a DPDT rocker switch in a package no larger than our single pole package. Features modern styling with a snap-in installation. Available in versions of SPST, SPDT, DPST, and DPDT. Solder or slip-on terminals. Heavy duty, low energy and dry circuit versions offered. Black, white, grey color combinations. Matching panel lights and lighted single pole versions available. Special colors, hot stamping and metal bezels optional. Low cost, high quality.

**CALL OR SEND FOR OUR INFORMATIVE 24 PAGE CATALOG WHICH INCLUDES PHOTOS, LINE DRAWINGS, SPECIFICATIONS AND ORDERING INFORMATION ON OUR COMPLETE LINE OF SWITCHES AND INDICATORS.**



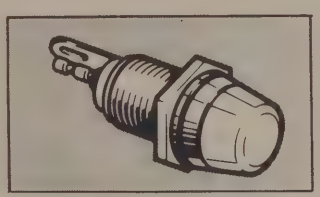
## MINIATURE TOGGLE SWITCHES

Small switches, big in quality and long life. U.L. listed at 5 amps inductive 120VAC. SPDT and DPDT circuits available with solder or P.C. terminals. Life expectancy: 100,000 actuations at rated load for ON-ON versions. All others, 40,000 actuations. Panel or printed circuit mounting make for easy installation where speed, size and cost are at a premium. Includes mounting hardware. Other versions available on request.



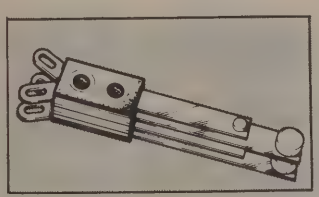
## KLIPSOCKET

For all T-1 ¾ Midget Flange Based Incandescent and Neon Lamps. Bulb engages with nickel - silver contact/terminals which are molded in the glass filled nylon base. Terminals are designed for soldering or slip-on connectors.



## PANEL INDICATOR LIGHTS

Three series of panel indicators to satisify your lighting requirements. Long life and high brilliance. Neon and incandescent versions available. Relampable indicators to fit T-1 ¾ midget flange based lamps. Wide range of color, terminal and lens choices offered. Nylon body mounts, snap-in, snap-out lenses. U.L. listed versions. Watertight models. Chrome bezel option.



## LEAF SWITCHES

Low cost, long life leaf switching, custom designed to fit your application without costly tooling or special designing. Because of our engineering, production, design facilities, and tooling versatility, you can get the exact switch to meet your requirements. Wide variety of actuators, contacts, lifters and blades.

### TOGGLE AND ROCKER SPECIFICATIONS

**CONTACT RATING** – 5 amps with resistive load @ 120 VAC or 28 VDC; 2 amps with resistive load @ 250 VAC.

**ELECTRICAL LIFE** – 100,000 make-and-break cycles at full load on all models ending in 01. All other models 40,000 cycles.

**CONTACT RESISTANCE** – 10 milliohms max. initial @ 2-4 VDC. 100 milliamps for coin silver contacts.

**INSULATION RESISTANCE** – 1,000 megohms min.

**DIELECTRIC STRENGTH** – 1,000 volts RMS @ sea level.

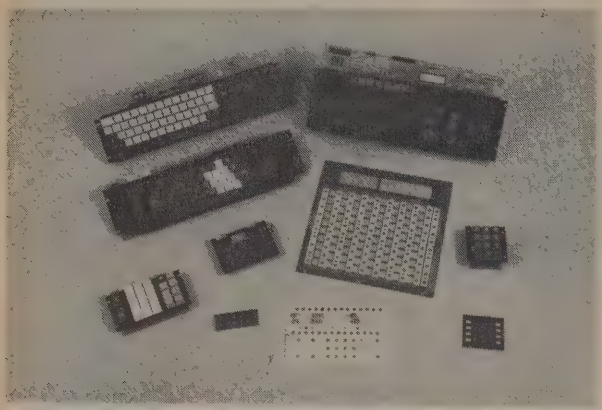
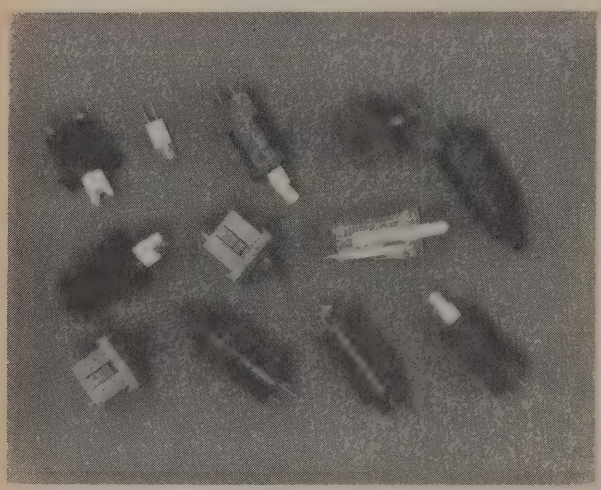
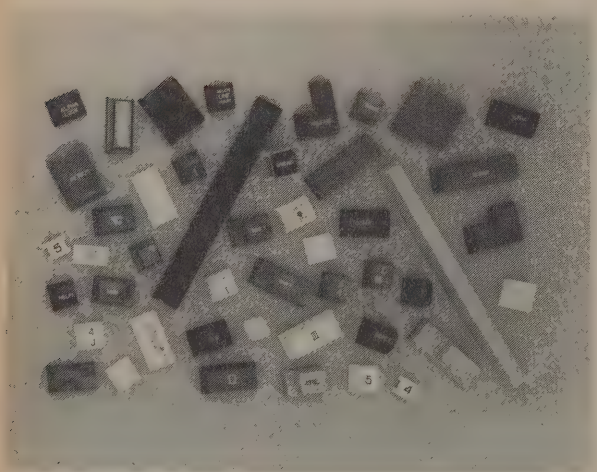
# C. P. CLARE KEYBOARDS AND KEYSWITCHES



STANDARD AND CUSTOM KEYBOARD ARRAYS FOR ANY APPLICATION.



INDUSTRY'S LARGEST SELECTION OF KEYBOARD SWITCH TECHNOLOGIES.



WIDE RANGE OF KEYTOP SIZES, LEGENDS AND COLORS.

## KEYBOARDS AND KEYSWITCHES

Clare has the product selection, low applied cost, service, and quality to solve your keyboard requirements. Here are just a few of the reasons we are a major worldwide keyboard supplier:

- Pushbutton switches have been our specialty for over a decade.
- Standard communications, word processing, and numeric layouts available.
- Direct sales offices and representatives worldwide.
- Complete keyboard layout flexibility.
- Seven quality keyswitch products from which to choose.
  - — S820, S830, and low-profile S880 reedswitches
  - — S870 gold-crossbar switch
  - — S890 solid-state switch
  - — Slimtac and Softac micromotion pads
- Applications consulting to assist in cost effective design.
  - — Dozens of popular shapes with two-shot legends
  - — Over 5,000 tooled two-shot legends including Kata Kana, French, Spanish, German and Russian
  - — Sculptured typewriter shapes.
  - — Matte finish to reduce glare
  - — Changeable legend, lighted, and three-shot legend keytops.
  - — In-house tooling and molding.
- High quality standards to assure product uniformity.
- Complete electronic design capability including TTL, LSI, and microprocessor encoding.
- Lighted and alternate-action keyswitches available for special human factor considerations.
- Extensive engineering support to provide quick phototype efforts on volume programs.
- Continuing R & D to keep designs up-to-date and competitive.

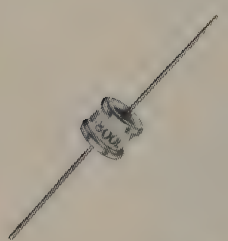
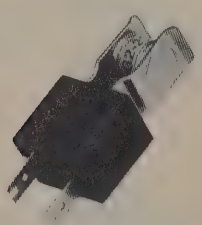
| | | Stud Screw Mtg. | | |





## CG SERIES SURGE ARRESTERS

The GC/CG2 series of Comgaps are surge arresters designed to protect sensitive electronic equipment from damage due to excessive voltages or currents generated by transient phenomena. Their most common application is in the protection of equipment connected to signal lines such as those found in telecommunications, data communications, security, and traffic control systems.

The CG/CG2 series surge arresters are constructed of two metal electrodes hermetically sealed in a gas filled, rugged ceramic cylinder. They perform as voltage dependent switches which can reliably and repeatedly carry large currents for brief periods of time. In operation, application of a sufficient voltage across the Comgap causes an arc to form between the electrodes changing its impedance from greater than 10,000 megohms to a few milliohms in a time period of less than 100 nanoseconds. While conducting in the arc mode the voltage across the surge arrester is less than 30 volts.

CG devices offer low dc breakdown ratings, good performance and extremely low arc voltages. They are recommended for energy transfer applications such as capacitive discharge systems and applications where minimum cost is required.

Life of the CG/CG2 series is a function of the surge current amplitude and duration to which the device is subjected. Transients are by their very nature unpredictable in magnitude and energy content. Life may be in the order of millions of operations, depending on surge current wave shape. Typical end of life is not catastrophic failure but rather a gradual shift of breakdown voltage and lowering of insulation resistance. Life characteristics shown in the data are for the surge current wave shapes based on most commonly occurring transients induced by lightning discharges. End of life is considered to occur when the voltage breakdown varies more than 20% from minimum or maximum rated breakdown voltage.

CG devices offer fast response time, high holdover voltage and high follow-on current capability. The CG2-350 and CG2-350L are REA approved for standard duty protector applications. Both CG and CG2 products are available with or without leads. A companion holder, the CGH-1, permits the mounting of unleaded devices to printed circuit boards where snap-in replacement of the surge arrester is desired.

CG surge arresters are available with DC breakdown ratings from 75 volts through 1000 volts. CG2 surge arresters are available with DC breakdown ratings from 145 volts through 1000 volts.

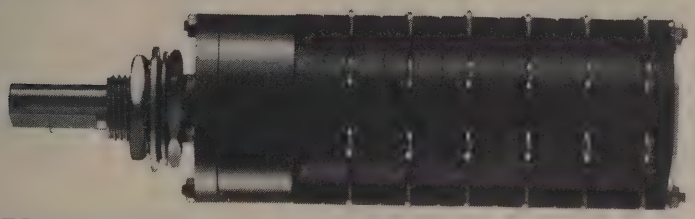
# THAT'S A SWITCH

ACTUAL SIZE



## 3600 SERIES Miniature Enclosed Rotary Switches

A new custom quality rotary switch. The 1-inch 3600 series enclosed miniature; meets MIL-S-3786. A 6 amp. switch for high-rel use in aircraft controls, electronic test equipment in harsh environments.

Quality? Roller bearing silver contacts. Custom quality? Up to 12 decks, 1 to 6 poles per deck; 30, 36, 45 deg. (8, 10 or 12 position). Options like hermetic enclosure; pre-wired to connector.

### TECHNICAL DATA

**Specifications**

Meets or exceeds applicable requirements of MIL-S-3786D. Style SR04
Certified test reports available

**Electrical**

Contact Rating

Current carrying: 10 amps @ 28 VDC
Make & Break: 6 amp resistive @ 115 VAC
6 amp resistive @ 28 VDC
3 amp inductive @ 28 VDC
Dielectric Strength: 1500V RMS
Contact Resistance:
Initial .005 ohms max.
Insulation Resistance:
$10^5$ meg ohms min.

**Mechanical**

Rotational Torque: 5 in. lbs. max.
Weight: 1.7 ounces + .3 ounces/deck
Life: 100,000 cycles min. mechanical
25,000 cycle min. switching 5 amps @ 120 VAC

### ORDERING INFORMATION SAMPLE CODE

36 45-204-3S

- 36 — Cole Basic Switch and Drawing No.
- 45 — Degrees Between Positions
- 2 — Number of Poles
- 04 — Number of Positions
- 3 — Number of Decks
- S — Shorting Decks (Omit for Non-shorting)

## MARK C SERIES PRECISION SWITCHES

### SPECIFICATIONS

**ELECTRICAL**

CURRENT RATING

15 AMPS Continuous Load — Static. Non-Switching
5 AMPS Resistive Load Switching at 115 Volts AC
3 AMPS inductive Load Switching at 115 Volts AC

Voltage Breakdown—1500 volts RMS 60 Hz minimum.

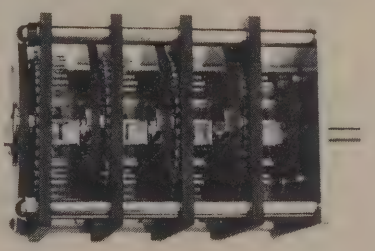
Insulation Resistance—Will Meet Requirements of MIL P 18177 Type GEE and Type GEB As Applicable.

**MECHANICAL**

Unitized deck construction—ease and economy—removed and replaced individually. No excess torque build-up in large multi deck units—no backlash.

Life expectancy—1,000,000 cycles or more, with consistent cleaning and lubrication programs.

Designed and Manufactured—To Meet Applicable Sections of MIL S 3786, MIL STD 202, MIL T 945, MIL A 8625, QQ-P416, MIL STD 167, MIL S 13282 and all design specs.



| Series | Size Sq. |
|---|---|

# Specialty Switches

## Arrow Hart Division

## SPECIFICATIONS

All Arrow-Hart specialty switches are covered by a limited warranty as stated in the company's Conditions and Terms of Sales which are available on request.

All Arrow-Hart switches, except as noted in specific sections, are UL Listed File E1148 Guide WOYR. Many switches are CSA Listed. Contact factory for specific information. The 1600/2600 Series Rocker Switches are UL Listed File E24354 Guide WOYR. In addition, these switches have international listing as follows: CSA (Canada), SEMKO (Sweden), SF (Finland), BS (Great Britain), VDE (Germany), DEMKO (Denmark) and UTE (France). Other approvals are pending.

All dimensions are approximate and for reference only. If specific dimensions are necessary contact factory.

DPST Ball lever. **80602CA**

**OPTIONAL LEVERS**

BALL

COLORED BATON

**421 SERIES**
The 421 Series of quick-make quick-break AC/DC switches are built to handle rugged applications up to 20 amp and 2 HP at 250 V. Widely used in industrial power tools and floor cleaning and polishing equipment. Screw termination.

**602 SERIES**
The 602 Series of heavy duty switches are designed for higher power applications than the 600 Series, above. Screw termination.

## ADDITIONAL MOUNTING HARDWARE FOR TOGGLE SWITCHES

All sleeve mounted switches are furnished with two mounting nuts. One nut goes behind panel to prevent the bushing or sleeve being distorted by overtightening the front panel nut. Arrow-Hart accepts no responsibility for damage to switches that are mounted without the backup nuts.

## SUBMINIATURE SWITCHES

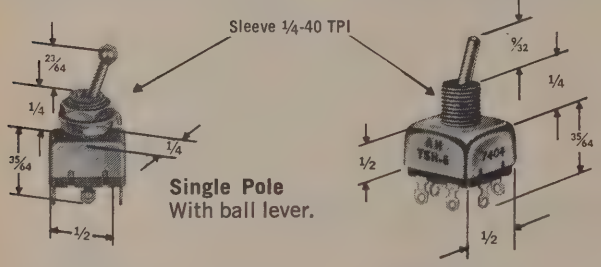
These quality grade subminiature toggle and momentary push-button switches are ideally suited for applications requiring the highest quality standards. The gold plated conatcts permit dependable use in low level circuits, especially where long shelf life is critical. Not currently UL Listed. Consult factory for applications requiring UL Listing.

### GENERAL SPECIFICATIONS

**Exposed metal parts** ..... Gold anodized aluminum
**Dielectric breakdown** ..... Exceeds 1000 V rms
**Contact material** ..... Gold-plated silver buttons
**Movable contact arm** ..... Rhodium-plated silver
**Terminals** ..... Gold plate
**Standard hardware** ..... 2 gold-anodized hex nuts, 1 lockwasher, 2 locating rings (unassembled)
**Additional hardware** ..... Available, see opposite page

**Base** ..... Molded diallyl phthalate
**Contact mechanisms** ..... TS type — knee action. TC, TE, TG, TM type — Rocker action. PM type — Leaf blade with wiping action. PMQ type—Snap acting butt type.
**Toggle rating** ..... 5 amp, 125 V AC—5 amp 29 V DC
**Pushbutton rating** ..... 1 amp 115 V AC, 2 amp 29 V DC (except PMQ3 rated at 7 amp 125 V AC, 5 amp 250 V AC, 5 amp 29 V DC)
**Termination** ..... Solder lug. P.C. Termination available
**Slotted sleeve** ..... ¼" dia., ¼" long
**Colored lever adapters** ..... Available
**Colored pushbuttons** ..... Available

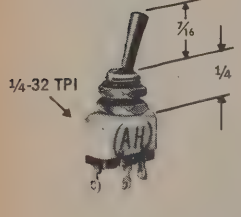
## TOGGLE SWITCHES / SMT SERIES SINGLE AND DOUBLE POLE



**Single Pole**
With ball lever.

**SP** width ¼"
**DP** width ½"

**Double Pole**
With lever to accept colored bat lever adapter.



Color lever adapter assembled. For Single or Double Pole Switches. See opposite page for ordering information.

### MOUNTING HARDWARE, LEVER ADAPTERS, AND PUSHBUTTON CAPS

#### MOUNTING HARDWARE

All sleeve mounted switches are furnished with two mounting nuts. One nut goes behind panel to prevent the bushing or sleeve being distorted by overtightening the front panel nut. Arrow-Hart accepts no responsibility for damage to switches that are mounted without the backup nuts.

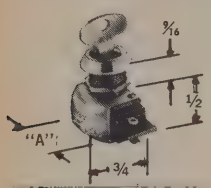
# LOCKING SWITCHES ROTARY KEYLOCK SWITCHES AND BRACKETS

## CANOPY SERIES 3 AMP AC/DC

These power switches offer all the features of the non locking canopy series, with the addition of a locking mechanism for circuit security applications. They can be used for controlled access of a wide variety of electrical equipment.

- Silver Plated Brass Movable (Roller) and Stationary Contacts
- Laminated Bakelite Base Construction
- Tin Dipped Brass Slotted Sleeve
- Zinc Chromate Plated Steel Frame
- One Nickel Plated Steel Key



**STANDARD SECURITY**

| | "A" Dim. |
|---|---|
| SPST SPDT | 1 3/16" |
| DPST DPDT | 1 3/16" |

## INTERMEDIATE SERIES / 715L SERIES 6 AMP AC/DC

This series of power switches is an extension of the canopy line and features higher ratings and wiping contacts. The Standard Security Level versions are used to prevent unauthorized actuation of computers, data processing equipment, and electronic instrumentation. The High Security Level tumbler lock switches are widely used in hospital, business machine, banking, stationary power tool, and alarm system applications. Both versions are ideally suited for any application requiring a locking switch capable of handling either power or low energy loads.

- Wiping Blade Contact Mechanism
- Stationary Contact Silver Plated Brass
- Movable Contact Silver Plated Bronze
- Bakelite Base Construction
- Tin Dipped Brass Slotted Sleeve
- Brass Nickel Plated Dress Nut
- Zinc Chromate Plated Steel Frame
- One Nickel Plated Steel Key (Standard Security Level)
- Two Brass Keys (High Security Level)

INDICATOR

- **Economical**
- **Compact design with popular snap-in mounting**
- **Choice of color**
- **Matching indicator lights**
- **Slow, make and break action**
- **Choice of single pole 1600 Series or double pole 2600 Series**
- **Complete European approvals**

Compact design with popular snap-in mounting. UL, CSA, UTE, BS, VDE, SEMKO, SF and DEMKO listed at 16 amp 250 Vac.

Specified in electronic instrumentation and on medical, data processing, telecommunications and duplicating equipment — the same switch can be used for both domestic and foreign markets.

Offered in a choice of colors. A wide circuit variety for designers and engineers. Lighted and unlighted styles.

### SPECIFICATIONS

| | |
|---|---|
| **Operation** | Rocker lever action, slow make-break, 2 and 3 position maintained 2 position momentary, with and without illumination |
| **Function** | 1600 Series single pole, single throw (SPST) and single pole double throw (SPDT). 2600 Series double pole, single throw (DPST) and double pole, double throw (DPDT) |
| **Mounting method** | Through rectangular aperture by fixing legs on switch which gives a "snap-in" feature |
| **Base** | High grade Nylon 66 |
| **Actuator** | High grade Nylon 66 |
| **Weight** | 1600 Series — 6 grams approx. 2600 Series — 12 grams approx. |
| **Contact rating** | 16A, 250 Vac |
| **Dielectric voltage** | 1000 volts R.M.S. (across contacts) |
| **Insulation resistance** | 50 megohms |
| **Electrical life** | 10,000 cycles minimum at maximum rated voltage and current |
| **Mechanical life** | 50,000 cycles minimum |
| **Lamp specification** | Average life — 25,000 hours for neons (110 volts) and 50,000 hours for filament (6 volts). Wattage: 6 Volts, 0.9 Watts |
| **Temperature range** | −40°C to +85°C |
| **Angular movement** | 2 position 36°, 3 position 18° each side of center |
| **Maximum Panel Thickness** | .118 for both 1600 and 2600 |

### HOW TO ORDER

**NON-LIGHTED:**
Select basic catalog number after determining desired circuit. Then add suffixes for bezel color, actuator color, and termination.

**EXAMPLE NON-LIGHTED:**
1600 (SPST) + 1 (Black Bezel) + 1 (Black Actuator) + E (.250 QC Terminals).
The correct catalog number is 160011E.

**LIGHTED:**
Select basic catalog number after determining desired circuit (and lamp type and actuator color for SPST models). Add suffixes for actuator color, bulb voltage, bezel color and termination.

**EXAMPLE LIGHTED:**
1600 (SPST) + R (Red Actuator) + 1 (110 V Neon) + 1 (Black Bezel) + E (.250 QC Terminals).
The correct catalog number is 1600R11E.

# CW INDUSTRIES SWITCHES

## MICRO-MINIATURE SLIDE SWITCHES

GS-115
Top Actuated

GI-116
Side Actuated

**Circuitry:** SPDT and DPDT with detent.

**Actuation:** Top and side.

**Rating:** From 0.5A to 1.0A at 125V.

The smallest switches made by CW -- occupy less than 1/5 the volume and 1/4 the cross-sectional mounting surface area of standard size slide switches of similar circuitry.

## MINIATURE SLIDE SWITCHES

GF-124
Top Actuated

GI-154 PC
Side Actuated

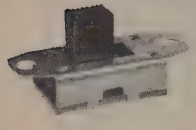
**Circuitry:** Available as single, double, and three pole and 2, 3 or 4 positions, with detent or spring return.

**Actuation:** Top and side (a momentary contact pushbutton switch is also available in this size).

**Rating:** From 0.5A to 8.5A at 125V.

Sized between micro miniature and standard sized switches. More moderately priced than the micro-miniature Switch.

## STANDARD SLIDE SWITCHES



GF-324
Top Actuated

GG-351 PC
Side Actuated

**Circuitry:** Available as single, double, three and four pole and 2, 3 or 4 positions with detent or spring return.

**Actuation:** Top, side, push-pull or toggle.

**Rating:** From 3A to 13A AC; 0.5A DC at 125V; and 8A DC at 12V.

Most moderately priced of all CW switches. Available in a wide variety of mounting options, terminal choices and supplemental features.

## BIFURCATED SWITCHES

GMB-126

GMB-127S

**Circuitry:** SPDT, DPDT, SP 3 Position, and DP 3 Position; break before make and make before break.

**Actuation:** Top.

**Rating:** 0.5A AC-DC at 125V.

These miniature bifurcated switches provide redundant high contact pressure as required in some low current, low voltage applications.

## MINIATURE TOGGLE SWITCHES*

GT-124

**Circuitry:** SPDT and DPDT with detent.

**Actuation:** Toggle.

**Rating:** From 0.5A to 6A at 125V.

Switch mechanism is virtually tease-proof, providing a true 2-position on-off action. Ideal for use in the instrument, appliance, industiral control and communications industries.

*Patented

## DIP SWITCHES

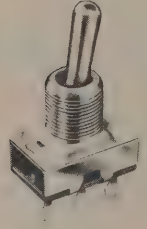
**Circuitry:** SPST in 4 to 10 stations.

**Actuation:** Top.

**Rating:** 100mA at 50V DC non-switching and 100mA at 5V DC switching.

For high density, PC board applications that require multi-station/manual selection on-off switching.

## TOGGLE, ROCKER AND ROTARY SUPERSTRUCTURES FOR STANDARD SLIDE SWITCHES



GT-324

GR1-326

GA-324

CW Industries demonstrates its switch flexibility by offering a simple superstructure that enables the user to easily change many basic switch types into toggle, rocker or rotary switch types. Over 20 versions of each basic switch are possible. Types vary in their mounting bracket, actuating knob or both. This versatility enables users to purchase highly reliable CW switches, with a variety of actuators, at prices far less than switches of similar circuitry.

*CW Engineers are always available to help solve unique switch problems and, if necessary, to work with customers in the development of new switches for new applications.*

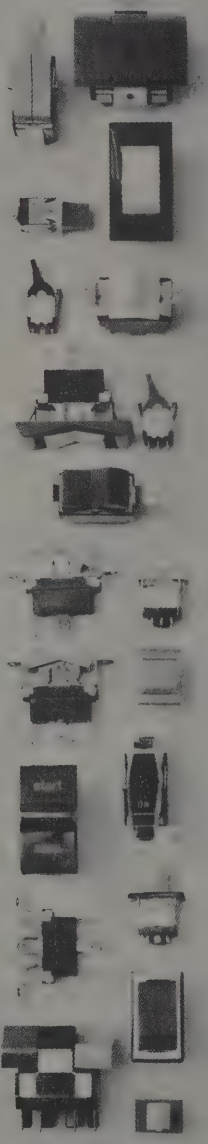
# some special

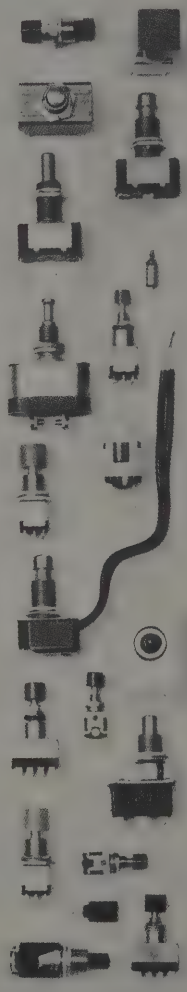
**Toggle Switches**
Bat, lever lock. Designer Line, sealed. Big, broad choice.

**Rocker Switches**
Singles and multiples. Wide, colorful selection range. Legends, too.



From Cutler-Hammer. The broadest line. Styled to meet today's and tomorrow's requirements. They're solid quality, look great, work long and hard. Carried in stock for local availability by Switch Distributors. Backed by Cutler-Hammer sales engineers who can deliver innovative design help for

**Pusbutton Switches**
Choice of sizes, colors, circuits, ratings. Styled to "turn you on".



**Tool Handle & Slide Switches**
Variable speed, reversing. Double insulated.

CONTROL

# reminders

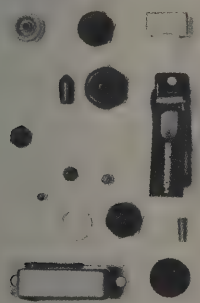
the exact switch or relay you need — when you need it.

It's no wonder so many designers specify Cutler-Hammer. For quality, reliability, availability, and style. For commercial, industrial, and military applications.

We simply offer more — of everything!

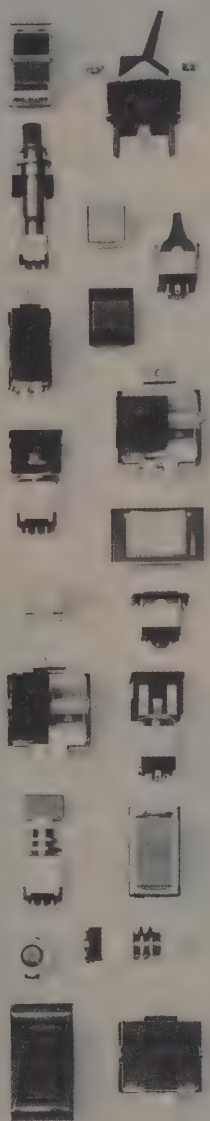
**Snap Switches**
Lever, roller, leaf, and pushbutton actuators. Four terminal styles.

**Switch Accessories**
Guards. Boots. Seals. Caps. Decorator facenuts. And much more to protect, code or customize.

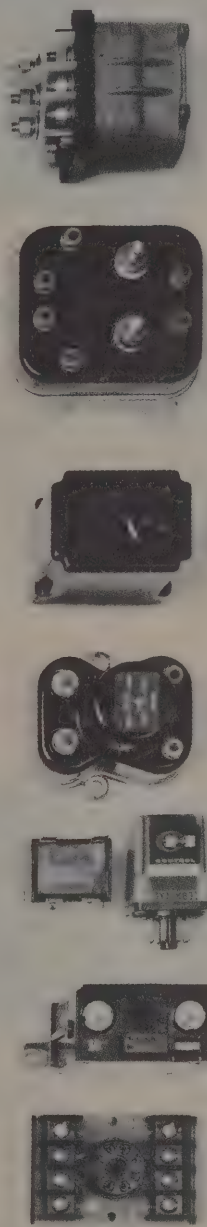


**Rotary Switches**
Precision and general purpose. Single and multiple wafer.

**Illuminated Switches**
Rockers, paddles, pushbuttons, indicators. Snap-in and bushing.



**Relays**
Hermetics, non-sealed, potted. Power, latching, and timing functions.



**p.s.**

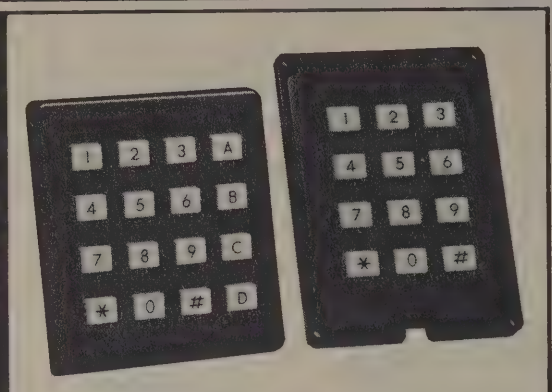
Series KL



Terminal KEYBOARDS

## Low Profile MINIKEY™

A handsome, miniature keyboard with the real tactile response previously available only in full size, full stroke keyboards. Fast, positive contact closures assure swift, comfortable, positive keyboard operation.

- 12 key and 16 key arrays
- Rear-panel or front-panel mounting
- Excellent tactile characteristics
- Interface with all digital logic circuitry
- Matrix, single-pole and TOUCH TONE* operation

*Touch Tone is a registered trademark of A.T. & T.

## Solid State KEYBOARDS

Custom-designed for the volume OEM user, Digitran's solid state keyboards offer superior technical features and are highly cost-effective. They are the *only* capacitive keyboards with a unitized frame and with a single moving-plate capacitive switching element, for vastly improved switching characteristics.

- Patented noise-rejection technique
- All electronics on printed circuit board
- Drip-proof and debris-proof
- Low profile, exceptionally clean appearance
- High reliability, in excess of 100 million MCBF

**THE COMPANY BEHIND THE PRODUCT:** Digitran is a major manufacturer of special-feature miniature and terminal keyboards for a wide variety of data entry applications. In addition, we are the world's largest manufacturer of thumbwheel switches, which we invented in 1959. **SALES NETWORK:** Our network of more than 450 technical representatives and stocking distributors covers all major Free World markets. **INFORMATION ANYTIME, ANYWHERE:** For detailed information and pricing on any of our commercial/industrial switches, contact your nearest Digitran distributor. For information and pricing on our keyboards and sealed Q.P.L. switches, contact your nearest Digitran technical representative. Locations of all Digitran distributors and representatives are listed in this EEM directory. Or you may directly contact:

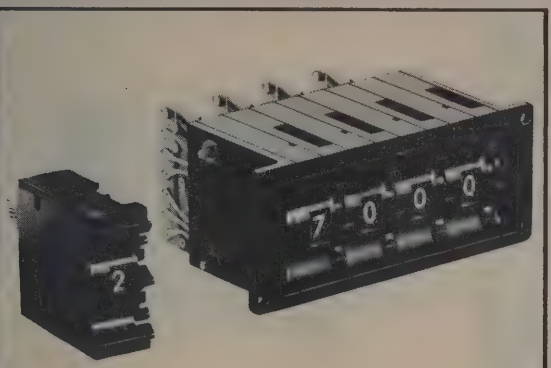
# Digital Switches and Keyboards

# DIGITRAN

Series 200/700



## MINISWITCH®

Small switches for hostile environments, virtually impervious to sand, dust, oils, salt spray, high humidity and temperature, and explosive atmospheres. Identical products except that the Series 200 has potted wire leads and the Series 700 has a potted printed circuit board. Switch width, .500" and cutout height, .980". Q.P.L. approved to MIL-S-22710/15 and MIL-S-22710/20.

- 8, 10, 12 or 16 dial positions
- .250" spacers
- R.F.I. shielding available
- Optional, replaceable Mil-spec lighting
- Active elements enclosed in sealed chamber

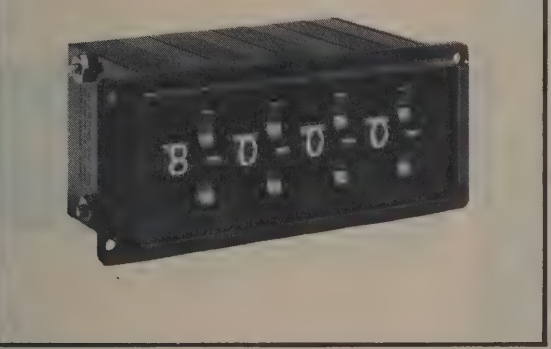
Series 300/13000

## General Purpose DIGISWITCH®

One of the most widely used thumbwheel switches, with more available options, output codes and special termination features than any other switch. Switch width for both products is .500". Cutout height for the rear-mounted 300 is 1.380"; for the front-mounted 13000, it is 2.000".

- 8, 10, 12 or 16 dial positions, with optional stops to limit rotation
- .500" spacers (plus .250" for the 300)
- Message units, for longer legends
- R.F.I. shielding
- Special dial characters

Series 8000

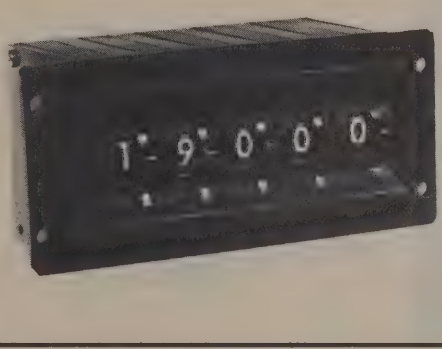


## General Purpose MINISWITCH®

A miniaturized version of the Series 300 DIGISWITCH, with the same high quality, capabilities and special features. Positive detent action. Switch width, .500" and cutout height only .980". Rear-mounted.

- 8, 10 or 16 dial positions, with optional stops to limit rotation
- .250" or .500" spacers
- Special case, spacer and dial marking options
- R.F.I. shielding
- Easy-to-replace lighting, plus lighted decimals

Series 9000/19000



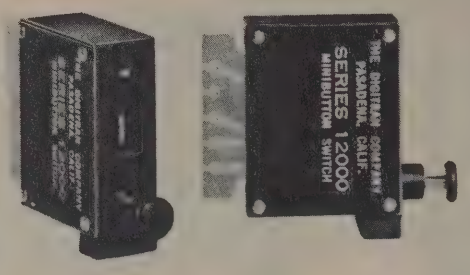
## DIGISWITCH®

Series 9000 features all the attributes of the Series 300 line, with the added benefit of being sealed against hostile environments. Qualified to MIL-S-22710/12. Wide choice of options, output codes and termination features. Switch width, .600", with cutout height of 1.375". Series 19000 is a dust-proof unsealed version of the 9000.

- 8, 10, 12 or 16 dial positions, or with dial stops to limit rotation
- .200" and .400" spacers with or without special markings
- R.F.I. shielding available
- Easy in-line readability from any angle
- Optional, replaceable Mil-spec lighting

# DIGITRAN Digital Switches and Keyboards

Series 12000



## MINIBUTTON®

A reliable, contamination-proof pushbutton-actuated switch for applications requiring panel sealing per MIL-S-22710 Method I and II, such as military communications equipment, and for severe industrial environments. Rear-mounted. No supplemental panel covers, boots or other enclosures required for sealing. Switch width, .500″ and overall height, 1.31″. Qualified to MIL-S-22710/17.

- 8 or 10 dial positions
- Individually mounted switches
- Metal case — no R.F.I. shielding required
- Optional, replaceable Mil-spec lighting
- Glass window that seals switch interior

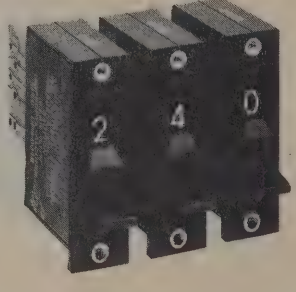
Series 23000

## "Snap-In" SLIMSWITCH

For applications where economy is a primary consideration, and where maximum panel density, good reliability and error-proof positive setting action are required. Large (.170″ high) in-line characters. Switch width only .315″ with cutout height of 1.221″.

- 10 or 11 dial positions, with optional stops to limit rotation
- Snap-in, front mounting, no tools required
- Slim design
- Economically priced
- Self-locking stainless steel snap-on assembly strap

Series 24000

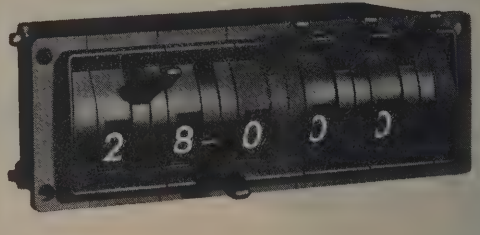


## DIGILEVER®

Modular, bi-directional lever-actuated switches built to perform in any hostile or inert environment and with any type of equipment. Sealed from the front to prevent contamination. Switch width, .480″, overall height, 1.610″. Q.P.L. approved to MIL-S-22710/24.

- 10 dial positions
- Wide viewing angle, with large characters
- Optional, replaceable Mil-spec lighting
- Fast operation, with excellent tactile feel
- Panel sealing is standard

Series 28000



## MINILEVER® Switch

A lever-operated digital switch that can be actuated in either direction. Instantly resets, with a sweep of the hand, all levers in an assembly up or down. Especially advantageous in applications requiring frequent and rapid switch settings. Switch width is .500″ and cutout height is .980″. Rear-mounted.

- 8, 10 or 12 dial positions
- 90° full lever travel
- Broad output code capability
- "Upper" or "lower" window locations
- Positive detent action

# Digital Switches and Keyboards

# DIGITRAN

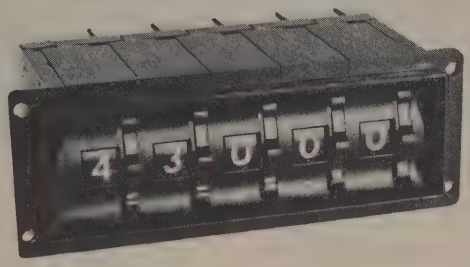
Series 29000

## "Economy" MINISWITCH®

An economical MINISWITCH with traditional Digitran quality. Rear-mounted, with extra-large in-line character readout, plus protection against normal exposure to semi-hostile environments. Switch width, .350" and cutout height, 1.020".

- 10, 11, 12 or 16 dial positions, with optional stops to limit rotation
- Broad output code and configuration availability
- Slim design for high package density
- Dust-proof switching chamber
- Economically priced

Series 43000

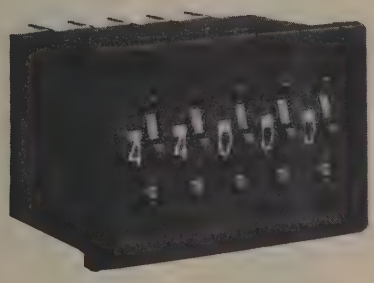


## Low Cost MINISWITCH®

A high-performance digital MINISWITCH at half the list price of comparable switches, featuring optional LED lighting and snap-together assembly for mix-and-match versatility. Rear-mounted. Available with pin or solder terminations. Switch width is .500", cutout height, .980".

- 10 dial positions, with optional stops to limit rotation
- Optional LED lighting
- Snap-together assembly, no tools or hardware required
- Interchangeable with most .500" wide digital switches
- Available in most popular codes

Series 44000

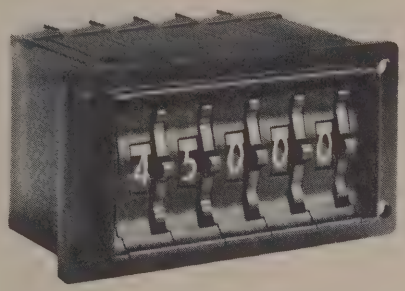


## Low Cost MINISWITCH®

The same quality, performance, options and low price as the Series 43000 MINISWITCH, including snap-together assembly. Designed for front-mounting installations, with switch width of .315" and cutout height of 1.220".

- 10 dial positions, with optional stops to limit rotation
- Optional LED lighting
- No mounting hardware required
- Interchangeable with most .315" (8 mm) wide front-mounted digital switches
- Available in most popular codes

Series 45000



## Low Cost MINISWITCH®

A rear-mounted version of the Series 44000 MINISWITCH with less front surface showing in the panel and more panel space for engraving. Switch width is also .315" and cutout height is .961".

- 10 dial positions, with optional stops to limit rotation
- Optional LED lighting
- Snap-together assembly, no tools or hardware required
- Interchangeable with most .315" wide digital switches
- Available in most popular codes

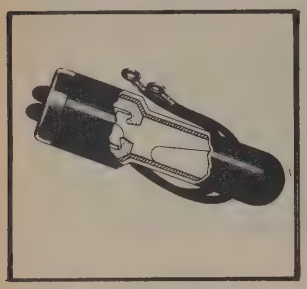
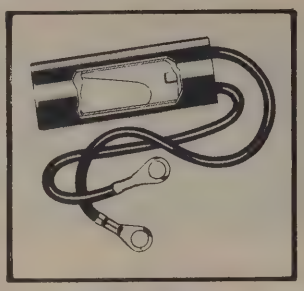
# durakool®

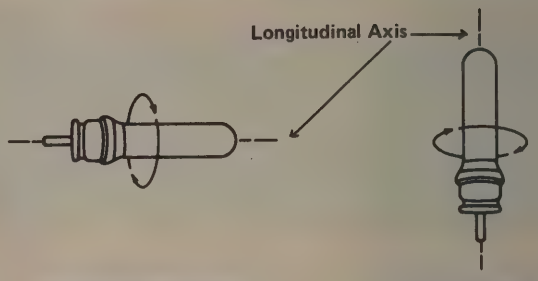
## TILT & TIP OVER SWITCHES



**Mercury-to-Mercury**
Contacts are made and broken through two pools of mercury; clean snap-action, no chatter, little erosion. (G-Series)



**Mercury-to-Metal**
Contacts are made and broken between a pool of mercury and a metal electrode. (A-Series)



**Tilt Switch Mounting**
Tilt switches mount horizontally. Rotation around the longitudinal axis does not affect operation.

**Tip Switch Mounting**
Tip switches mount vertically. Rotation around the longitudinal axis does not affect operation.

All Durakool switch products are of all-steel construction providing compact size and high structural strength. Contact areas are confined within an arc suppressing gas in the hermetically sealed switch body. The absence of moving mechanical parts virtually eliminates wear and contact degradation, assuring long life and consistent switching functions.

In addition to the standard tilt and tip over switches listed, Durakool manufactures thousands of custom switches for specific OEM applications. Special angle, make and break requirements and leaded types are available on special factory order.

| AC (60 Hz) | | | DC | | Tungsten Lamp Loads at 120V 60Hz | *Minimum Recom. Operating Angle |
|---|---|---|---|---|---|---|
| 120V | 240V | 480V | 120V | 240V | | |
| 1 | .7 | — | .5 | .4 | 100W | 15° |

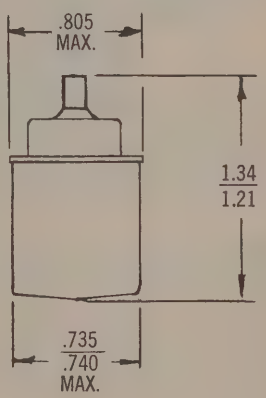
## PROXIMITY SWITCH

**Part No. 3943**

| General Purpose N.O. Contacts | |
|---|---|
| Volts AC | Amps |
| 120 | 20 |
| 240 | 15 |
| 480 | 10 |
| 120 VAC | ½ HP |

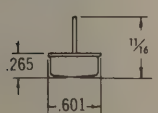
Magnet not supplied by Durakool

Commercially available 1200 Gauss Ceramic Magnets are commonly used.



## TO8 SERIES TIP OVER SWITCH

Durakool TO8 Series mercury Tip Over Switches are of the normally closed contact configuration and are omnidirectional.



TYPE A

TYPE B

TYPE C

TYPE D

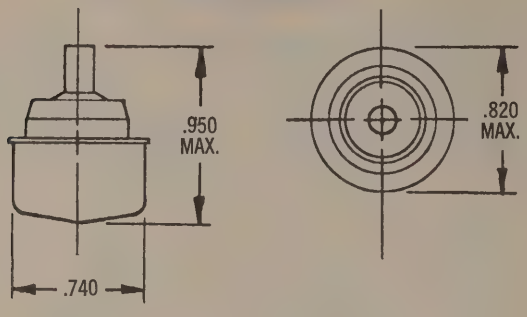
| TYPE | PART # | ANGLE | CONTACT RATING VOLTS/AC | CONTACT RATING AMPS |
|---|---|---|---|---|
| A | TO8-1001 | 17-27° | 120 | 1.7 |
| D | TO8-1002 | 15-35° | 120 | 1.7 |
| C | TO8-1003 | 15-35° | 120 | 1.7 |
| A | TO8-1004 | 10-30° | 120 | 1.7 |
| B | TO8-1005 | 10-30° | 120 | 1.7 |
| A | TO8-1006 | 15-35° | 120 | 1.7 |

Any of the above types can be provided in angle specifications shown. Special vibration dampening types are also available. Consult the factory with your specific requirements for availability.

durakool®

## SAFETY TIP OVER SWITCH/20 AMPS

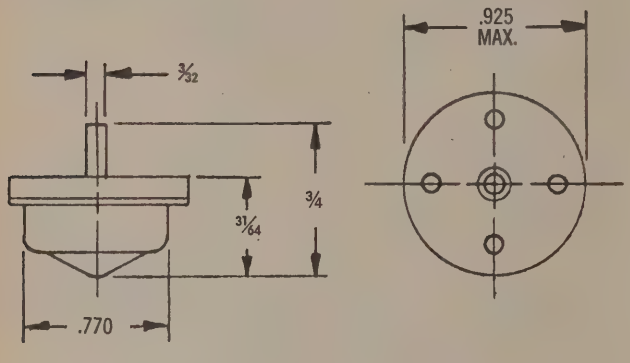
**Part #4282**



N.C. Contacts — 20 Amps @ 120 VAC Resistive
20 Amps @ 24 VDC Inductive
Break Angle — Can be supplied in range of 30° — 70° from vertical + − 15°
Construction — Stainless steel, all welded, hermetically sealed contacts
Long Life — Ideal for kill switch applications
Terminations — Faston tabs or wire leads

## TO3 — TIP OVER SWITCH/15 AMPS

**Part #TO3-1002**

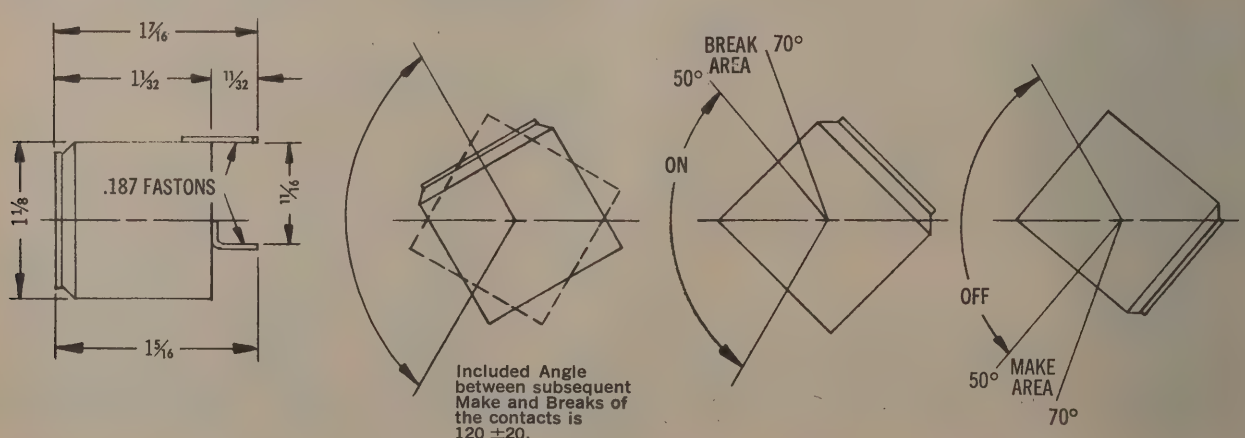


N.C. Contacts — 15 Amp @ 120 VAC Resistive
Break Angle — 30° ±10° from vertical
Construction — All steel, all welded, hermetically sealed contacts
Long Life — Mercury to metal contacts
Terminations — Faston tabs or wire leads

## WIDE ANGLE SWITCH 20 AMP/120° OPERATING ANGLE

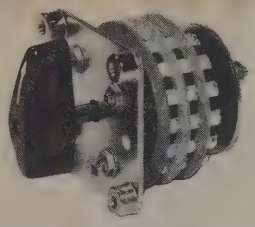
20 Amp general purpose load — ½ H.P. @ 120 VAC
All steel, hermetically sealed construction, long life
Ideal for sump pump and all other liquid level controls & floats

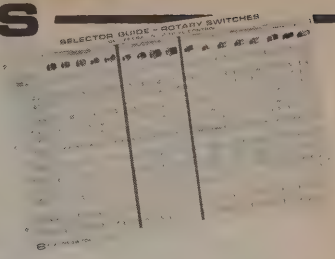
**Part #4236**
**Includes .187 Tab Faston Terminations**



# ROTARY SWITCHES

## DETENT ACTION — for ECONOMY and COMPACTNESS in MULTI-POSITION APPLICATIONS





10 to 30 amp . . . Standard and Miniaturized versions . . . up to 600V , . . up to 75 poles . . . 2 to 16 positions. Excellent for selection and control circuits. Most have UL & CSA approvals . . . military equivalents.

## SNAP-ACTION — for BEST DIRECT CURRENT (DC) SWITCHING CAPABILITY

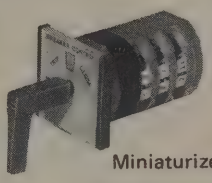
20 to 200 amp . . . Standard and Miniaturized versions . . . up to 600V . . . up to 12 poles . . . 2 to 4 positions. Excellent for switching D. C. Most have UL & CSA approvals . . . military equivalents.

## CAM-ACTUATED — for DIRECT MOTOR CONTROL and COMPACTNESS

6 to 125 amp is Standard and Miniaturized versions . . . up to 600V . . . up to 24 poles . . . 2 to 12 positions. Excellent for motor control applications. Unusually large range of options including indicator lights, spring-return, removeable handles, many handle styles, etc.

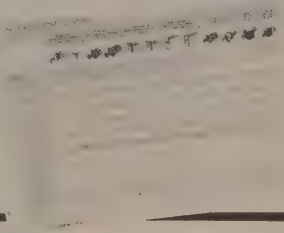
# INSTRUMENT and CONTROL SWITCHES

Standard



Miniaturized

10 to 40 amps . . . up to 600V. Standard & miniaturized versions. Complete line of Voltmeter, Ammeter, Wattmeter, Breaker Control, Synchroscope applications. Special lighted versions.



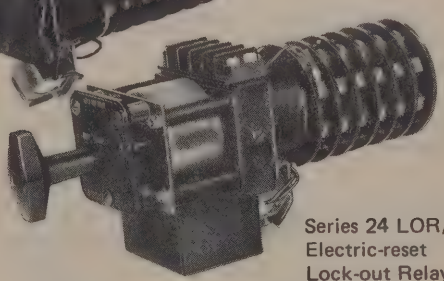
# RELAY DEVICES

## A HIGH SPEED MULTI-CONTACT LOCK-OUT RELAY FOR POWER INDUSTRY APPLICATIONS

- HIGH-SPEED . . . total response time less than 8 milliseconds . . . available for LOR and LOR/ER.
- MULTI-CONTACT . . . up to 40 contacts (20 N/C . . . 20 N/O)
- RATING: 600V . . . 20A Interrupt.
- SEISMIC . . . completely tested to latest seismic specs.

These auxiliary relays are remote-TRIP manual or remote RESET control relays for the purpose of tripping and locking out circuit breakers or other devices automatically when a fault or other predetermined condition exists. Generally used in conjunction with differential relays to protect transformers, buses, rotating machinery, etc.

Series 24 LOR
Manual-reset
Lock-out Relay



Series 24 LOR/ER
Electric-reset
Lock-out Relay

## REMOTE OPERATED CONTROL SWITCH RELAY FOR BOTH MANUAL AND REMOTE SUPERVISORY CONTROL OF POWER CIRCUIT BREAKERS

- Combines the features of manually-operated switch with remote-operated relay
- For all Instrument & Control Applications
- Bi-directional service for breaker control . . . automatic synchroscope timing
- Continuous rating: 30A/600V

Series 24 CSR
Control Switch Relay

Combines present control switches with a remote-controlled solenoid. Manual and supervisory control function in the operational control of power circuit breakers. Eliminates the need for substation redesign with redundant, separate relays when manual substations convert to supervisory control.

## A NEW ROTARY LATCHING SWITCH RELAY

- High-Speed: Less than one cycle total response time
- Multi-contact: 16 NO plus 16 NC
- Compact Size
- Specification: IEEE STD 313
- Seismic Shockproof: IEEE STD 344
- Available with manual override

Series 31 LSR
Latching Switch Relay

Controls up to sixteen NO and sixteen NC contacts in a single device. Provides a compact solution to a variety of relay applications — as a latching relay, a programming relay, a reclosing relay, a seal-in relay, etc. Can also satisfy many switching applications as a manual switch combined with remote-operation like a relay.

# electro-mech

# LIGHTED PUSH-BUTTON SWITCHES

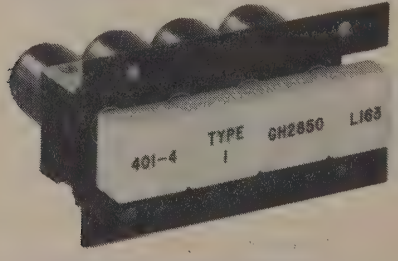
ELECTRO-MECH provides a perfect blend of quality standard products with in-depth experience in answering unique requirements. Proven engineering designs are illustrated by the excellent performance characteristics of each ELECTRO-MECH lighted push-button switch, indicator, and display assembly. Low-bounce, long-life contacts, new innovations in legends, displays, field-service, packaging — all standard features. Whatever your applications, ELECTRO-MECH is prepared to answer your specific needs. Choose from any of the most popular models.

How to fit a square button in a round hole.
SPST-DPDT. High density mountability on less than ¾" centers, the design benefits of ½" square and ½" x ¾" low-profile buttons that just drop in a round hole and secure with a nut from behind the panel.
Momentary or alternate action, reliable circuitry, low bounce, low-profile, unitized housing. All together in the Series 20. Find out about it.
LIGHTED PUSH BUTTON SERIES 20
ELECTRO MECH

## INTERLOCKING SWITCH ASSEMBLIES

*SERIES 500*

Added beauty and long-lasting appearance with handsome chrome barriers between each switch or indicator. Independent or interlocking action. Ten types of tracking action and switching sequences. Up to 12 switches in single or dual row, ⅞" or 1" centers.



## MULTI-STATION SUB-PANEL ASSEMBLIES

*SERIES 400*

Multi-station switch assemblies designed for sub-panel mounting by means of a flanged "U" channel. All standard ELECTRO-MECH switches can be incorporated with several types of mechanical interlocking/lockout actions between stations. Up to 12 stations in one or two row configurations.

## *SERIES 20* SWITCHES

- MOUNTS IN A 5/8" DIA. ROUND HOLE
- HIGH DENSITY MOUNTING ABILITY —LESS THAN 3/4" CENTERS
- LOW PROFILE APPEARANCE IN ONE UNITIZED HOUSING

## LIGHTED PUSH-BUTTON SWITCH PRODUCTS

### GENERAL SWITCH SPECIFICATIONS:

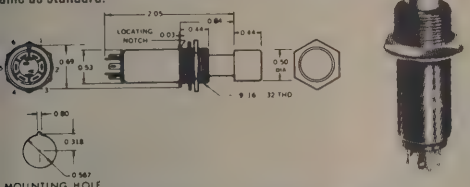
Technical specifications apply to all Electro-Mech Switch models unless otherwise specified:

**Ratings:** 30 Volts DC or 15 Volts AC; 2 amps resistive; 1 amp inductive
**Weight:** 0.8 oz. (approx.)
**Operating Pressure:** 2 lbs. +1 lb.
**Plunger Travel:** 3/16" (approx.)
**Actuations:** 100,000
Accommodates all **"switchlines"** standard lenses. Uses one T1-3/4, AN3140-327, 328, 330 bulb or neon lamp. 3 actuation modes standard also in 2, 3, 4 and 6-pole configuration.

### SWITCHLINE *and* SLIMLINE SWITCHES

**1PST-2PDT** *SERIES 2150*

A new 2100 Series Slimline version of our standard Illuminated Pushbutton Switch featuring silver slide bar action. Add BR after part number for mounting on 5/8" centers. Utilizes AN3140-T 1-3/4 or ALC-100 bulb. All other specifications same as standard.



| | 1PST | | 2PST | | 1 N.O. 1 N.C. | 1PDT | 2PDT |

### SOLENOID HOLD-DOWN

*SERIES 3054*

Switchline Illuminated Pushbutton switches with an integral hold-down coil which is activated with switch. Holds the push-button in the depressed position until coil is de-energized returning it to relaxed position. Available in all circuit configurations up to 6PDT. Same specifications as standard model.

### MINIATURE FRONT PANEL MOUNT MOMENTARY SWITCHES

*SERIES 5000*

An exceptionally short momentary switch available in circuit configurations up to 2PDT. Clear anodized case. All specifications same as standard model except plunger travel which is 3/32".

| | 1PST | | 2PST | | 1 N.O. 1 N.C. | 1PDT | 2PDT |

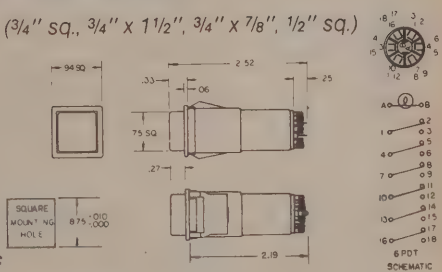
## designer group switches

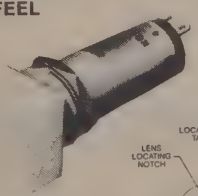
These Electro-Mech Standards feature typical switch functions and mounting options for design flexibility. A choice of dual/quad display units are also available.

*(3/4" sq., 3/4" x 1 1/2", 3/4" x 7/8", 1/2" sq.)*



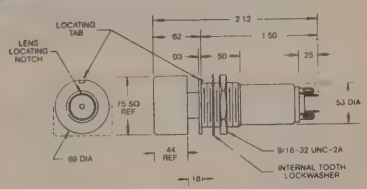
***All Designer Group units feature:***

- **1PST TO 6PDT**
- **MOMENTARY; ALTERNATE ACTION; PUSH-ON REMAIN-IN; PUSH-ON, PUSH-OFF *and* MOMENTARY SNAP-FEEL**



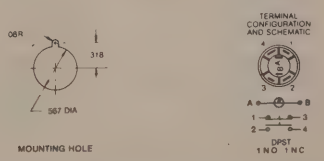
### SHORT HOUSING

*SERIES 6100*
*(3/4" sq.)*



High-density packaging requirements are answered with this shorter, front panel mount, providing the same quality design as standard Electro-Mech model sizes.

- **INDUSTRY'S SHORTEST ALTERNATE-ACTION DESIGN**
- **REQUIRES ONLY 1½" BEHIND PANEL**

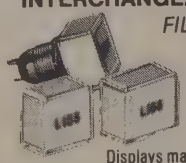


### 10 AMP *Series 4000* DPST-2 N.O.

*for U.L. Applications*

Low profile matches standard industry models. Momentary or Alternate Action design takes any standard lens size. 30 VDC or 115 VAC, 10 A Resistive, 5 A Inductive.

### INTERCHANGEABLE LENSES/ *FILTERS*



*Series 150*

Displays may be changed or buttons replaced. Non-wearing, clear-acrylic lens and filter buttons. Available in standard, Opaque or Contour.

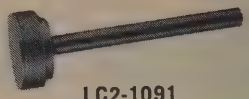
# MERCURY FILM SWITCHES

- **LONG LIFE**
  Self healing mercury contacts are coupled with an almost foolproof energizing mechanism to eliminate contact and frictional wear.
- **HIGH RELIABILITY**
  Operation joins two mercury films. There are no contact interfaces to impede signal passage. Over 2 Billion Cycle MCBF.
- **NO CONTACT BOUNCE**
  Mercury contacts are joined without bounce or noise in a perfect electrical closure.
- **OPERATION IN ANY POSITION**
  A patented design uses strong surface tension forces to hold mercury films securely to wetted surfaces regardless of position.
- **LOW AND STABLE CONTACT RESISTANCE**
  Mercury contacts are renewed with every operation. Contact resistance is low, stable, and independent of load being switched.
- **HIGH STAND-OFF VOLTAGE**
  Large contacts gaps provide 1250 VAC breakdown ratings. A near perfect hermetic seal assures that it will last the life of the switch.
- **RUGGED CONSTRUCTION**
  Perhaps the strongest switching capsule ever made. A sample has literally been hammered into a wooden plank without structural damage. Danger from mercury leakage is eliminated.
- **PERMANENT MAGNET OR COIL ACTUATION**
  Versatile design permits updating all applications where dry reed, or mercury wetted reed, switches have been used in the past.
- **LOW IN COST**
  Priced to serve almost any application LC2 now allows the use of high reliability switching in cost conscious circuits.

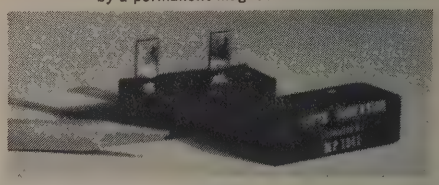
## SPECIFICATIONS

| | |
|---|---|
| Contact Form | Form 'A' SPST-NO(1) |
| Life | Indefinite |
| Reliability (MCBF) | $> 2 \times 10^9$ (2) |
| Rated Contact Load (DC) | 5V, 2 amps<br>24V, 1 amp<br>200V, 0.1amps |
| Contact Resistance | 0.15 ohms |
| Contact Resistance Stability | ‡0.015 ohms |
| Contact Breakdown | 1250 VRMS |
| Contact Bounce | None |

NOTES: (1) Contact factory for Form B; Form C; and latching models.
(2) Based upon tests conducted on over 100 units tested to over $3.4 \times 10^{10}$ operations.
(3) Contact factory for higher voltage models.

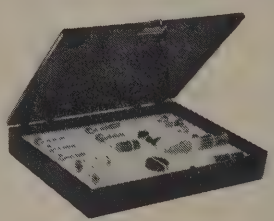


**LC2-1091**
The basic mercury film switch. It may be operated by a permanent magnet or a coil.



**IS1841**
A mercury film equipment interlock switch with actuating permanent magnet assembly.

**LC2P1839**
A rugged bulkhead mounted LC2 switch with mounting hardware.



**ENGINEERING DESIGN KITS**

**DK1-2328** — Contains samples of varying mechanical configurations of the LC2 switch. Mounting hardware, typical permanent drive magnets and complete documentation are included. **Price: $49.00**

**DK2-2329** — Demonstrates the range of ampere turn sensitivities normal to the production output of the switch. A test coil is provided. This kit is helpful in order to determine if selected switch sensitivities are required to serve your application. Complete documentation is included. **Price: $49.00**

# OMNIDIRECTIONAL TILT SWITCHES

| TILT SWITCH SPECIFICATIONS | | |

# TOP ACCESS ROCKER DIP SWITCHES

Grayhill

## SPECIFICATIONS

**Mechanical Life:** 50,000 Operations per Rocker.

**Make and Break Current Rating:** 35,000 Operations at 50 MA, 30 VDC; 25,000 Operations at 125 MA, 30 VDC.

**Contact Resistance:** 100 Milliohms Maximum after life (30 Milliohms initially), measured at 2MA DC and 50 MV (open circuit).

**Insulation Resistance** (at 100 VDC): Between Adjacent Open or Closed Contacts: 50,000 Megohms after life, (100,000 Megohms initially).

**Dielectric Strength:** Between Adjacent Open or Closed Contacts: 500 VAC after life (750 VAC initially).

**Current Carry Rating:** 5 Amps with a maximum contact temperature rise of 20° C.

## MATERIALS AND FINISHES

**Switch Cover, Rocker and Base:** Polyester.

**Shorting Bar:** Brass, Gold plated .00001" minimum over Nickel plated .00005" minimum.

**Base Contacts including Terminals:** Brass, Gold plated .00001" minimum.

**Protective Cover:** Zytel.

## RATING:

**Rating At 24 VDC:** 10 milliamps, resistive.

**Contact Resistance:** Compatible with MOS, TTL and DTL.

**Voltage Breakdown:** 250 VAC between mutually insulated parts.

**Life Expectancy:** 3,000,000 operations per button.

**Contact Bounce:** Less than 4 milliseconds at make, 10 milliseconds at break.

## NOTE:

The 2 of 7 (or 8) "Telephone Code" was developed primarily for audio tone generation. For more critical data input applications, please consult Grayhill for Mean Cycle Before Failure (MCBF) data.

## MATERIALS AND FINISHES:

**Housing:** ABS Plastic (Black).

**Button:** ABS Plastic (White with Molded-in Black Legend).

**Terminals:** Copper Alloy, CDA No. 725.

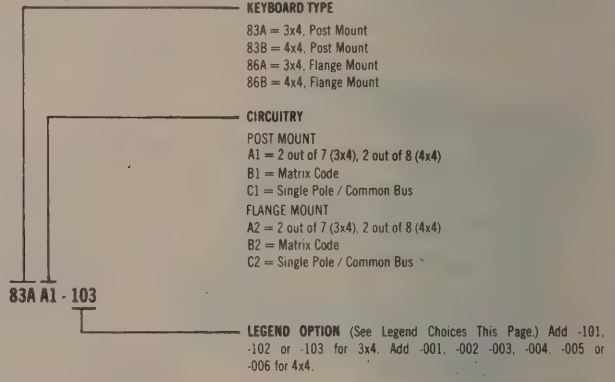
## OPERATING FEATURES:

**Button Travel:** 0.015" nominal, total travel.

**Operating Force:** 220 ± 40 grams.

## ORDERING INFORMATION:

Part number is descriptive and formed in the following manner.



KEYBOARD TYPE
83A = 3x4, Post Mount
83B = 4x4, Post Mount
86A = 3x4, Flange Mount
86B = 4x4, Flange Mount
CIRCUITRY
POST MOUNT
A1 = 2 out of 7 (3x4), 2 out of 8 (4x4)
B1 = Matrix Code
C1 = Single Pole / Common Bus
FLANGE MOUNT
A2 = 2 out of 7 (3x4), 2 out of 8 (4x4)
B2 = Matrix Code
C2 = Single Pole / Common Bus
83A A1 - 103
LEGEND OPTION (See Legend Choices This Page.) Add -101, -102 or -103 for 3x4. Add -001, -002 -003, -004, -005 or -006 for 4x4.

Sample part number orders a 3x4 Post Mount, 2 out of 7 code with a standard telephone legend.

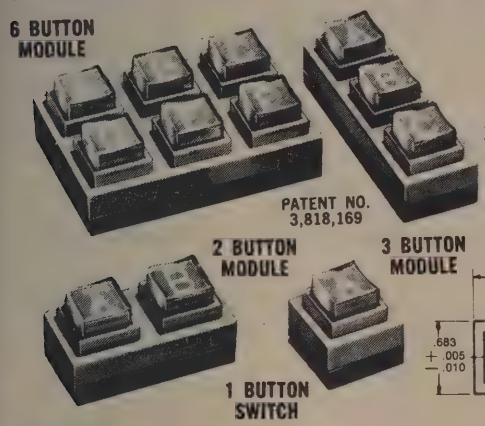
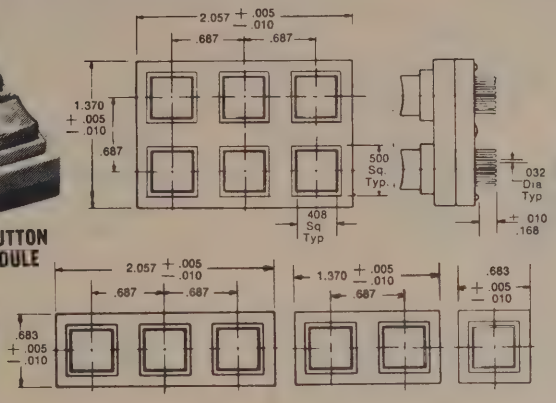
# PUSHBUTTON SWITCH MODULES PC MOUNTABLE—SERIES 82

Grayhill

## SELF-GENERATED LOGIC, 1 TO 4 POLES PER BUTTON, WIDE CHOICE OF CIRCUITRY STACK IN ANY ARRAY, CHOICE OF COLORS, CHOICE OF LEGENDS





**RATING:**
**Rating at 5 VDC:** 100 milliamps. **Life Expectancy:** 1,500,000 operations.
**Contact Resistance:** 25 milliohms or less on a new switch.
**Voltage Breakdown:** 250 VAC between mutually insulated parts.
**Insulation Resistance:** 1,000 megohms minimum.

**OPERATING FEATURES:**
**Button Travel:** 0.130" total travel. **Overtravel:** 0.080".
**Operating Force:** 4-7 ounces (dependent on number of poles).

**MOUNTING:**
Modules are designed to plug into any printed circuit board from $^{1}/_{16}$" to $^{1}/_{8}$" thick. Modules can be stacked horizontally or vertically for any combination of button array and still maintain $^{11}/_{16}$" button centers.

**7-WIRE CODE CAPABILITY UNDER EACH BUTTON**
The GRAYHILL Series 82 Pushbutton Modules represent the most versatile switches now available to generate coded outputs for control systems of all kind: The capabilities are practically endless since any code up to 7-wire can be accomplished right in the switches. CONTACT FACTORY.

**LEGENDS:**
Hot stamped, two-shot molded, or field-legendable with easy slip-ins. Standard telephone legend configuration and many other typical legends readily available.

**ORDERING INFORMATION:**
For hot stamped or two shot molded button.
To order a Series 82 pushbutton module, there are five areas in which information is required:

1. Type of Module: 1-, 2-, 3-, or 6-button.
2. Type of Mounting: Either horizontal or vertical.
3. Circuitry required for each button (A=SPST; B=2PST; C=3PST, etc.)
4. Color for each internal button (GRAY is standard; other available colors are WHITE, RED, GREEN, and BLACK. Colors can be intermixed. For example, Buttons A thru E are GRAY and F is WHITE.)
5. Legending required on button (Button A legend #1, Button B legend #2, etc.)

Upon receipt of your order, a part number will be assigned to facilitate future identification of this part. These numbers are sequentially assigned as the need arises and are non-descriptive.

For prototypes 4PST circuitry can be ordered and pins can be clipped to provide desired circuitry. Coded circuitry cannot be achieved in this manner. These modules are gray in color and are quickly available through your local GRAYHILL distributor.

**PRICES:** With hot stamped or Two shot molded buttons, contact GRAYHILL.

**STANDARD TELEPHONE LEGEND (Reference Picture Above)**
**TWO SHOT MOLDED BUTTONS**

| TOP SIX BUTTONS | | | |
|---|---|---|---|
| Part Number | Circuitry Each Button | Unit Price | 50-99 Pieces |

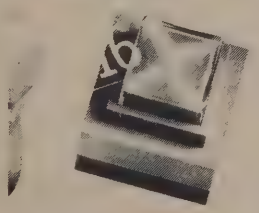
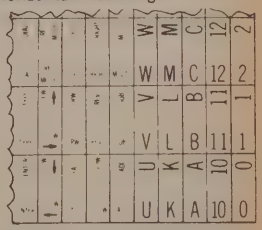
Also available in 2 out of 7 code output — Contact GRAYHILL

## SERIES 82 PUSH BUTTON MODULES WITH INSERTABLE LEGENDS



For prototype and small quantity usage. Switches are available with clear protective cap slotted on one side to allow the insertion of a clear plastic tab imprinted with the legend. A legend sheet is available with all normally required legends for both vertical and horizontal mounting.



Legend sheet is sold separately, GRAYHILL Part No. 82-AC-2017. Contains white legends 0-19, A-Z, and all other normally used symbols and word groups. Simply cut out and insert in slotted button.

**INSERTABLE LEGEND MODULES**

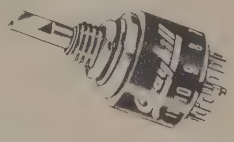
# 1/2" DIAMETER, SINGLE DECK ROTARY SWITCHES—SERIES 50, 51

## OUTSTANDING CIRCUIT VERSATILITY AND A WIDE RANGE OF OPTIONS

AVAILABLE IN STANDARD OR MILITARY STYLES

ADJUSTABLE STOPS PROVIDE IMMEDIATE PROTOTYPES

22½°, 30°, 36°, 45°, 60°, OR 90° ANGLES OF THROW



## OTHER OPTIONS INCLUDE:

- 1 THRU 4 POLES • SEALED OR UNSEALED
- SOLDER LUG OR PC TERMINALS
- FIXED OR ADJUSTABLE STOPS

The most popular Series 50 and 51 rotary switches are fixed stop, with or without panel seals, solder lug or PC terminals. The following drawings (Figures 1 thru 4) show these combinations. The chart at the right lists the switch style that describes the combination and the appropriate drawing that illustrates the combination. The Series 50 is 36° angle of throw and 0 500" diameter. The Series 51 is 22½° or 30° angle of throw and 0.562" diameter. Many other options are available, see following page.

| Type | Terminal | Switch Style | Applicable Figures |
|---|---|---|---|
| Unsealed | Solder Lug | A | 1, 3 |
| Fixed Stop | PC Terminal | P | 1, 4 |
| Sealed | Solder Lug | S | 2, 3 |
| Fixed Stop | PC Terminal | SP | 2, 4 |

## UNSEALED — FIXED STOPS

# 1/2" DIAMETER, SINGLE DECK ROTARY SWITCHES—SERIES 50, 51

Grayhill

**RATING:**

Rated to make and break 200MA for 10,000 cycles of operation or 50MA for 25,000 cycles of operation, resistive load, 115VAC or 30VDC.
For complete load life information, see GRAYHILL Rotary Switch catalog.

**CONTACT RESISTANCE:**

50 milliohms maximum (10 milliohms initially).

**INSULATION RESISTANCE:**

10,000 megohms minimum between mutually insulated parts (50,000 megohms initially).

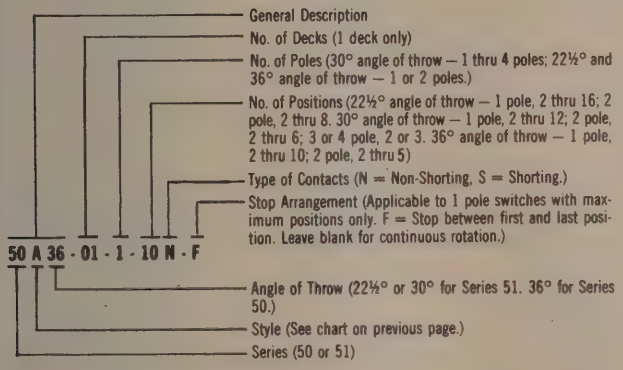
**VOLTAGE BREAKDOWN:**

500VAC between mutually insulated parts.

**CARRY CURRENT:**

6 amperes with a maximum contact temperature rise of 20°C.

**HOW TO ORDER:**



50 A 36 - 01 - 1 - 10 N - F
General Description
No. of Decks (1 deck only)
No. of Poles (30° angle of throw — 1 thru 4 poles; 22½° and 36° angle of throw — 1 or 2 poles.)
No. of Positions (22½° angle of throw — 1 pole, 2 thru 16; 2 pole, 2 thru 8. 30° angle of throw — 1 pole, 2 thru 12; 2 pole, 2 thru 6; 3 or 4 pole, 2 or 3. 36° angle of throw — 1 pole, 2 thru 10; 2 pole, 2 thru 5)
Type of Contacts (N = Non-Shorting, S = Shorting.)
Stop Arrangement (Applicable to 1 pole switches with maximum positions only. F = Stop between first and last position. Leave blank for continuous rotation.)
Angle of Throw (22½° or 30° for Series 51. 36° for Series 50.)
Style (See chart on previous page.)
Series (50 or 51)

**ADJUSTABLE STOPS**

Adjustable stop versions of the Series 50 and 51 Rotary Switches are readily available from local distributor stock. The adjustable stop versions are form, fit and function equivalents to their fixed stop counterparts. Adjustable stop Series 50 and 51 Rotary Switches can be provided in all angles of throw and with or without shaft and panel seal. Contact your local distributor or GRAYHILL for cross reference information between fixed and adjustable stop switches.

**45°, 60° OR 90° ANGLES OF THROW**

The Series 50 Rotary Switch is also available with 45° (8 position), 60° (6 position) or 90° (4 position) angles of throw. These angles of throw are available with 1 or 2 poles per deck, solder lug or PC mount terminals, with or without shaft and panel seal, fixed or adjustable stops and in standard or military types.

**MILITARY STYLE ROTARY SWITCHES**

The Series 50 and 51 Rotary Switches are also available with military type switch materials. Many types of the Series 50 are fully qualified to MIL-S-3786/20. Many types of the Series 51 are fully qualified to MIL-S-3786/35. These documents as well as the QPL (Qualified Products List) should be consulted for complete specification and ordering information. Contact GRAYHILL for additional assistance in specifying military styles Series 50 and 51 Rotary Switches.

**ADDITIONAL STANDARD FEATURES OR OPTIONS**

—Screwdriver Slotted Shafts
—Coded Versions
—Spring Return (Momentary Positions)
—Push-To-Turn or Pull-To-Turn†
—Keylock (Key Operated)
—RFI Grounding†
—Electrostatic or Electromagnetic Shielding†
—Intermix of Shorting and Non-Shorting Contacts†

**RATING:**

Rated to make and break 400MA for 10,000 cycles of operation or 200... for 25,000 cycles of operation, resistive load, 115VAC or 30VDC. Rated to make and break 250MA for 10,000 cycles of operation or 100MA for 25,000 cycles of operation, inductive load (250 Millihenries), 30VDC.

For complete load life information, see GRAYHILL Rotary Switch catalog.

**CONTACT RESISTANCE:**

50 milliohms maximum (10 milliohms initially).

**INSULATION RESISTANCE:**

10,000 megohms minimum between mutually insulated parts (50,000 megohms initially).

**VOLTAGE BREAKDOWN:**

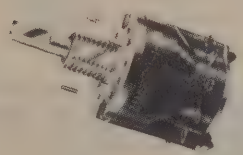
500 VAC minimum between mutually insulated parts.

**CARRY CURRENT:**

4 amperes with a maximum contact temperature rise of 20°C.

### ADJUSTABLE STOPS
### AVAILABLE FROM LOCAL DISTRIBUTOR STOCK

Number of positions per pole can be changed by removing and relocating stop pins in holes in the switch front plate. Available in the single shaft versions with either .125" or .250" diameter; 30° or 36° angle of throw; and solder lug terminals or PC mount.



| Non Adjustable Style From Previous Page | With Adjustable Stops Style Becomes |
|---|---|
| A | AD |
| B | BD |
| AF | ADF |
| BF | BDF |

### SHAFT AND PANEL SEAL

Shaft is sealed by "O" ring inside bushing. Panel is sealed by "O" ring at base of bushing. Seals do not alter dimensions as shown in the drawings when switch is mounted. Panel seal is silicone rubber. Shaft seal is an "O" ring per MIL-P-5516B.

| Non Sealed Style From Previous Page | With Seals Style Becomes |
|---|---|
| A | AS |
| B | BS |
| AF | ASF |
| BF | BSF |

### CONCENTRIC SHAFT SWITCHES

**STYLE C**

Concentric shaft version of Series 71. Available with solder lug or PC mount termination with 30° or 36° angles of throw. Poles per deck limitations are the same as the single shaft versions. Limited to three decks per each section and to a maximum of six poles per section. Contact GRAYHILL for complete ordering and pricing information.

**HOW TO ORDER AND PRICES:** See next page.

**Available Locally Through Your Grayhill Distributor**

# 1/2" DIAMETER, 1/4 AMP, MULTI-DECK ROTARY SWITCHES—SERIES 71

**HOW TO ORDER:**

71 A 30 - 02 - 1 - 12N - C

- 71 — Series
- A — Style (See previous pages)
- 30 — Angle of Throw (30° or 36°)
- 02 — No. of Decks (12 decks max.; also see poles per deck limitation in price table.)
- 1 — No. of Poles per Deck (See circuit diagram for style and angle of throw limitations. Also limited to a maximum of 16 total poles per switch.)
- 12 — No. of Positions (30° angle of throw solder lug — 1 pole, 2 thru 12; 2 pole, 2 thru 6; 3 pole, 2 thru 4, 4 pole, 2 or 3; 5 or 6 pole, 2 only. 30° angle of throw PC mount — 1 pole, 2 thru 12; 2 pole, 2 thru 6. 36° angle of throw — 1 pole, 2 thru 10; 2 pole, 2 thru 5.)
- N — Type of Contacts (N = Non-Shorting, S = Shorting)
- C — Stop Arrangement (Applicable to 1 pole switches with maximum positions only. C = Continuous, F = Stop between first and last position.)

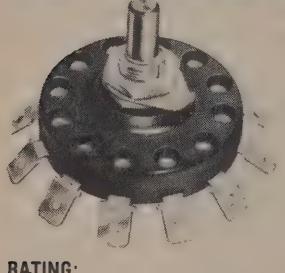
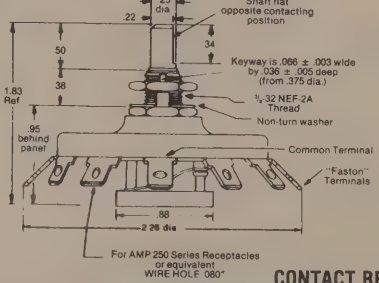
# 15 AMP, UL LISTED ROTARY SWITCHES — 30° ANGLE OF THROW 1 POLE, 2 TO 11 POSITIONS 'FASTON' TERMINALS





CIRCUIT DIAGRAM
Drawings and Spec. For Ref. Only

**RATING:**

Series 19 switches are UL listed at:
15 amps, 120 VAC, non-inductive load. 1 amp, 120 VDC, non-inductive load.
This rating is based on the following criteria:
Overload — 50 operations at 125% rated AC load and 150% rated DC load.
Endurance — 6000 operations at rated load with 900 VAC dielectric strength before and after test.
Temperature Rise — Not to exceed 30°C when carrying rated AC load after endurance test.
Contacts will carry 20 amps at 115 volts AC with 30°C maximum temperature rise.

**CONTACT RESISTANCE:** (Measured at 2 VDC and approximately 100 MA) for new switch approximately 10 milliohms.

**INSULATION RESISTANCE:** Approximately 100,000 meghoms. Between mutually insulated parts.

**VOLTAGE BREAKDOWN:** Approximately 2500 VAC. Between mutually insulated parts.

**HOW TO ORDER:**

Part Number 19101-* UL.

*(Indicate number of positions — 2, 3, 4, etc.)

| Number of Positions | 2 | 3 | 4 | 5 | 6 | 7 | 8 | 9 | 10 | 11 |

# 0.3" DIAMETER ROTARY SWITCHES 10 POSITIONS, 1 OR 2 POLES—SERIES 75

Grayhill

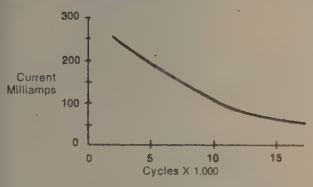
**DESIGNED AS THE WORLD'S SMALLEST ROTARY SWITCH**

**RATED TO MAKE AND BREAK LOGIC LOADS FOR A MINIMUM OF 15,000 CYCLES OF OPERATION**

**NON-SHORTING WIPING CONTACTS**

**RATING:**

**Life Expectancy:**



**CIRCUIT DIAGRAM**

(Switch is viewed from shaft end and shown in position 1.)

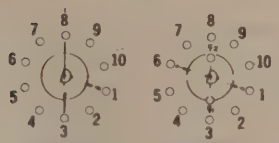


**Chart shown for non-shorting contacts (break before make).**

One cycle is 360° rotation and a return through all switch positions to the starting position. The data for the above curve was measured at sea level, 25°C. and 68% relative humidity with the following life limiting criteria.

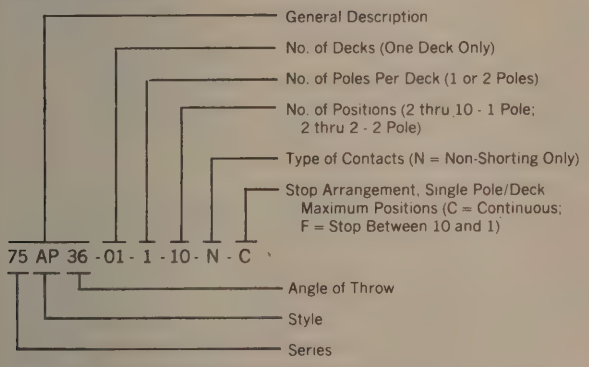
**Voltage:** 115 VAC or 30 VDC, resistive load.

**Contact Resistance:** 50 milliohms maximum. (15 milliohms initially).

**Insulation Resistance:** 10,000 megohms minimum between mutually insulated parts. (50,000 megohms initially.)

**Voltage Breakdown:** 500 VAC minimum between mutually insulated parts.

**HOW TO ORDER:**



General Description
No. of Decks (One Deck Only)
No. of Poles Per Deck (1 or 2 Poles)
No. of Positions (2 thru 10 - 1 Pole; 2 thru 2 - 2 Pole)
Type of Contacts (N = Non-Shorting Only)
Stop Arrangement, Single Pole/Deck Maximum Positions (C = Continuous; F = Stop Between 10 and 1)

### RATING:

**Rated:** To make and break the following loads with 30° or 36° angle of throw: 1 amp., 115VAC resistive; 1 amp., 6 to 28 VDC resistive; 0.25 amp., 115 VAC inductive; 0.02 amp., 115 VDC inductive; 0.10 amp., 6 to 28 VDC inductive; 0.10 amp., 115 VDC resistive. To carry 10 amps continuously.

**Contact Resistance:** .010 ohms initial. After 25,000 cycles of operation .020 ohms maximum.

**Insulation Resistance:** 50,000 megohms minimum (initially).

**Voltage Breakdown:** 1,000 VAC initially (500 VAC or better after most environmental tests).

**Life Expectancy:** 100,000 mechanical cycles of operation.

**Stop Strength:** 15 pound-inches minimum.

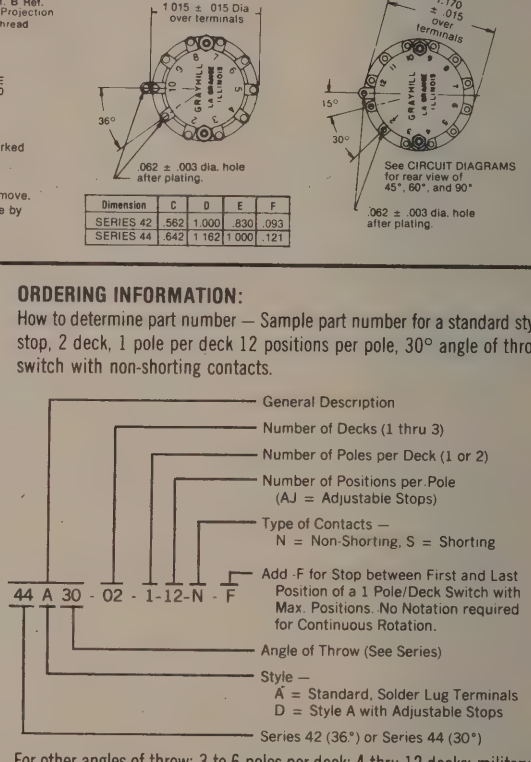
**Rotational Torque:** 20-96 ounce-inches, depending on the number of poles per deck and the number of decks.

**Contacts:** Shorting or non-shorting wiping contacts with over 150 grams contact force.

**Shaft Flat Orientation:** Flat opposite contacting position of pole number one. (See circuit diagram.)

### ORDERING INFORMATION:

How to determine part number — Sample part number for a standard style, fixed stop, 2 deck, 1 pole per deck 12 positions per pole, 30° angle of throw rotary switch with non-shorting contacts.



44 A 30 - 02 - 1-12-N - F
General Description
Number of Decks (1 thru 3)
Number of Poles per Deck (1 or 2)
Number of Positions per Pole (AJ = Adjustable Stops)
Type of Contacts — N = Non-Shorting, S = Shorting
Add -F for Stop between First and Last Position of a 1 Pole/Deck Switch with Max. Positions. No Notation required for Continuous Rotation.
Angle of Throw (See Series)
Style — A = Standard, Solder Lug Terminals D = Style A with Adjustable Stops
Series 42 (36°) or Series 44 (30°)

For other angles of throw; 3 to 6 poles per deck; 4 thru 12 decks; military, sealed, UL listed, or PC mountable styles, contact factory.

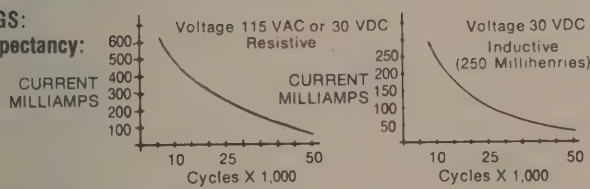
## RATINGS:

**Life Expectancy:**



Switch rating for break before make contacts.

Curve data based on test data conducted at sea level, 25°C, and 68% relative humidity.

Cycle equals 360° rotation and return.

Cycling rate is 10 cycles per minute.

Life limiting or failure criteria for these curves are:

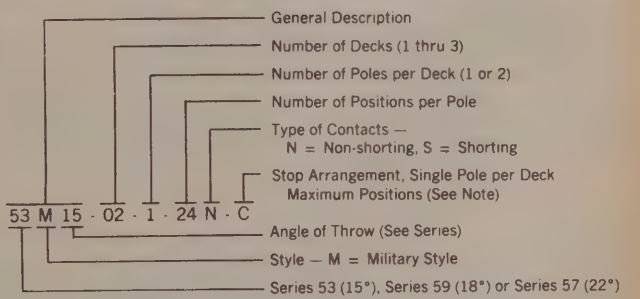
**Contact Resistance:** 50 milliohms maximum (15 milliohms initially).

**Insulation Resistance:** 10,000 megohms minimum between mutually insulated parts. (50,000 megohms initially.)

**Voltage Breakdown:** 500 VAC minimum between mutually insulated parts. These switches will carry 4 amperes with a maximum contact temperature rise of 20°C.

## ORDERING INFORMATION AND PRICES:

How to determine part number: Suffix "C" or "F" is required for a complete part number when ordering single pole/deck switches with maximum number of positions. Sample part number for a 2 deck, 1 pole/deck, 24 position, Style M, 15° angle of throw, non-shorting contact switch without stops:



General Description
Number of Decks (1 thru 3)
Number of Poles per Deck (1 or 2)
Number of Positions per Pole
Type of Contacts —
N = Non-shorting, S = Shorting
Stop Arrangement, Single Pole per Deck
Maximum Positions (See Note)
53 M 15 - 02 - 1 - 24 N - C
Angle of Throw (See Series)
Style — M = Military Style
Series 53 (15°), Series 59 (18°) or Series 57 (22°)

For 3 to 12 poles per deck; 4 thru 12 decks; military qualified, sealed styles, contact factory

## SERIES 53, 57, AND 59 PRICES

| Number of Decks | Dim. A | Poles/Deck and Positions/Pole | | |
|---|---|---|---|---|
| | | 1 Pole | | 2 Pole |
| | | 2-24 | SERIES 53 | 2-12 |
| | | 2-20 | SERIES 59 | 2-10 |
| | | 2-16 | SERIES 57 | 2-8 |
| 1 | .916 | $19 90 | | $20 90 |
| 2 | 1.249 | 27 70 | | 29 70 |
| 3 | 1.582 | 35 50 | | 38 50 |

ALL PRICES SUBJECT TO QUANTITY DISCOUNT. For example, quantities of 100 switches of a single part number are discounted 50% from the above prices.

DISCOUNTS AND PRICES SUBJECT TO CHANGE WITHOUT NOTICE.

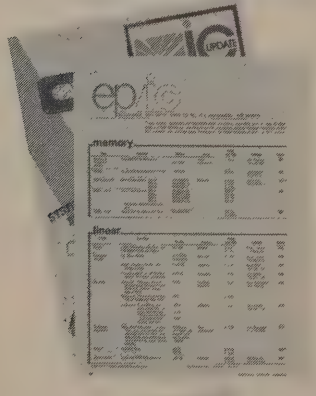
**SUBSCRIBE TO ELECTRONIC PRODUCTS MAGAZINE. IT'S YOUR *COMPLETE* GUIDE TO EVERYTHING THAT'S NEW IN THE FAST-CHANGING WORLD OF ELECTRONIC PRODUCTS AND SYSTEMS.**

**FEATURE STORIES** every month on electronic products, applications and availability.

**FORUMS**—Reports on meetings of manufacturers, users and distributors. Get the very latest news on a wide variety of products.

**NEW PRODUCT NEWS**—Hundreds of new products are introduced each month. You'll get the facts on not only what the new product is, but also where to get it, basic prices and current delivery.

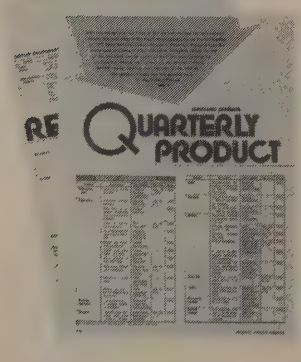
**EP/IC UPDATE**—Exclusive in ELECTRONIC PRODUCTS. A monthly report on *everything* that's new in the fast-moving world of integrated circuits.



**QUARTERLY PRODUCT REVIEW**—Another exclusive in ELECTRONIC PRODUCTS. A complete report of *every* new electronic product introduced in the previous quarter. This feature is in the January, April, July and October issues.

**QUARTERLY PRODUCT PLANNING DIRECTORY**—A compilation of the latest catalogs of a wide variety of electronic products and systems.

**OUTLOOK**—Important industry news affecting electronic products and systems.



**COMPONENT CAPERS**—A humorous look at the strange and wonderful world of electronics.

**MINI-GLOSSARIES,** Quizzes and more—Each and every month for over twenty years the readers of ELECTRONIC PRODUCTS learn something new about the products they work with and specify.

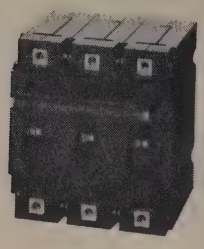
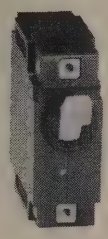
## HYDRAULIC-MAGNETIC CIRCUIT PROTECTORS

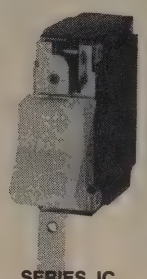
E-FRAME



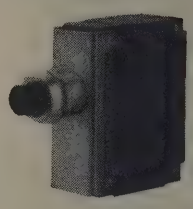
SERIES AM1



SERIES JA



SERIES JC



SERIES JD

With the widest range of styles and electrical ratings in the industry, Heinemann circuit breakers offer almost unlimited options: integral or fractional must-hold ratings from 0.010 to 100A, and in steps to 225A; single- and multipole models; breakers for 50/60Hz, 400Hz, or dc service; breakers qualified under Mil Specs; and breakers in any series which include special internal circuits such as high-inrush capability, relay-trip, auxiliary switches, dual rating, DuCon® construction for both current and voltage sensing, and other optional circuits for sophisticated control functions.

Hydraulic-magnetic actuation (a Heinemann invention) assures that must-hold and must-trip points are unaffected by ambient temperature fluctuations. Very precise control within a narrow current band is thus possible. In addition, a wide selection of time-delay characteristics permits close match of breaker to equipment requirements, allowing high temporary overloads to prevent nuisance tripping or tripping instantaneously according to the particular design need.

Contact your nearby Heinemann representative for complete technical assistance. Individual product-line bulletins listed below.

**E-FRAME:** Smaller than other E-Frame breakers, competitively priced. Approx. 5¾h x 2w x 2⅝d (2-pole). Available in 1 to 6 poles.

**SERIES AM1:** 1 to 4 poles. UL-component-recognized. Special circuits available. Approx. 2.5h x 2.5d, .75w per pole.

**SERIES JA:** Compact OEM breaker. Only 2.5 oz/pole. 1 to 4 poles. Approx. 2h x 1.875d, .75w per pole.

**JA VARIANTS.** Snap-In JB (1 to 4 poles) installs in rectangular panel cutout without screws. JC (1 to 4 poles—single-pole shown) has white or gray rocker handle. JD has round button for push-push operation. JE has moisture-sealed bat-type toggle for marine applications.

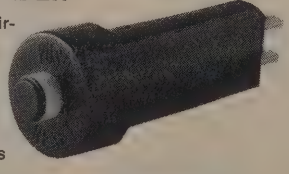
### LOW-COST RESETTABLE PUSHBUTTON PROTECTOR, DIRECT REPLACEMENT FOR FUSE AND CYLINDRICAL FUSEHOLDER



The brand-new Heinemann Re-Cirk-It® circuit protector is resettable with just a light finger touch on the pushbutton, and fits a ⅝" circular panel hole to directly replace a glass fuse and fuseholder. Presently available in a choice of current ratings from 0.25 through 10A at 240V ac or 32V dc. Time delay prevents nuisance tripping.

Protector trips only on overcurrent conditions, cannot be turned off manually. Also cannot be held on against a fault. ¼" quick-on terminals are standard. UL-recognized and CSA-accepted as component—appliance control.

Priced as low as a fuse and fuseholder in OEM quantities. Ready for immediate delivery. Alternate button styles available on special order. Bulletin KD-4001.

### THE HEINEMANN SERIES GH3—a new low-cost fully-magnetic EH-Frame breaker

Now you can afford a completely magnetic three-pole three-phase branch-circuit protector at a price lower than you are accustomed to pay for an ordinary thermal unit.

The new Heinemann GH3 is UL-listed for short-circuit interrupting capacity of 10,000 amp at 480V 60Hz three-phase at 45% to 50%power factor. Wide range of standard off-the-shelf continuous current ratings from 15 to 100 amp. Already proven in such heavy-duty applications as computer main frames, air conditioning, machine tools.

6" high, 4.125" wide, 3.375" deep—fits standard EH-Frame panel cutout. Wgt. 3.3 lb. Ask for Bulletin 3442.

**HEINEMANN ELECTRIC COMPANY** Trenton, N.J. 08650

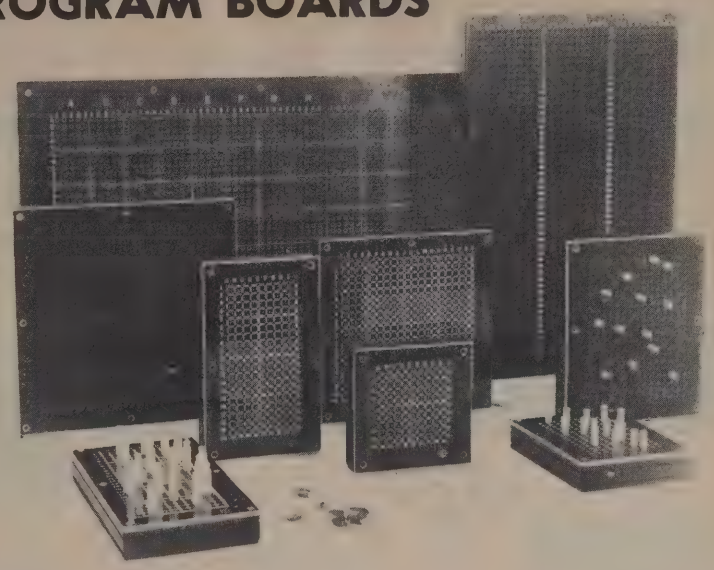
# MATRIX PROGRAM BOARDS

## GENERAL:

As the result of over ten years experience, INFO-LITE has developed a most convenient, compact and economical system for reliable programming and switching • The Matrix Program Board allows a wide variety of switching/programming functions to be performed by simply inserting programming pins (shorting or diode type) into a 2 to10 deck contact matrix • No accessories such as "read" "write" equipment are required • Matrix Board features have lead them to be favored over such devices as patchboards, card readers, toggle and thumbwheel switches, mag/punched tape and electronic memories • The two basic uses for Matrix Program Boards are: (1) Cordless patching (input-output switching), using shorting pins; (2) Programmable diode matrices (logic memories), using diode pins • A two deck (X-Y) contact matrix is comprised of a set of contact busses (inputs) running at 90° to a second set of busses (outputs) • These two contact levels are isolated except at those crosspoints where programming pins are inserted • Terminals (solder/solderless) are provided on the rear surface for each contact buss • INFO-LITE offers two crosspoint grids: the 2000 Series with .250" grid and the 1000 Series with .130" grid • Panels with 5 x 5 to 100 x 100 crosspoints and up to10 contact decks can be supplied to economically meet your requirements, whether for prototype or production quantities.



## FEATURES

- Reliable closed entry contacts
- Rugged programming pins that will not bend
- Rapid & convenient method of programming/switching
- Permits insertion of components into network without soldering
- Replaces costly complex switching hardware
- Attractive and compact package
- Low capacitance for high frequency applications
- Ease of visual program checking

## TYPICAL APPLICATIONS

Numeric Controlled Equipment
Logic Memories
Power Distributors
Circuit/Component Test Programmers
Lighting Systems
Code Generators
Programmable Diode Matrices
Communications Distributors
Status Indicators
Data Logging
Vending Machine Control
Thermo-Couple Selectors
Batching Programmers
Function Generators
Sequence Programmers
Pulse Code Programmers

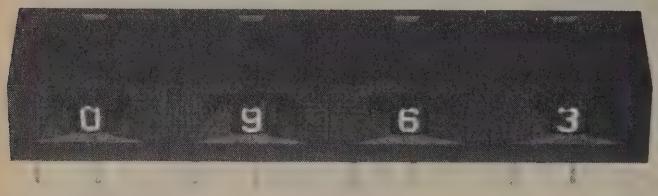
# Switches

INTERSWITCH

ONE OF THE PURDY GROUP OF COMPANIES

770 AIRPORT BOULEVARD, BURLINGAME, CALIFORNIA 94010 • TEL (415) 347-8217 • TWX 910-374-2353

## GWS Thumbwheel Switches



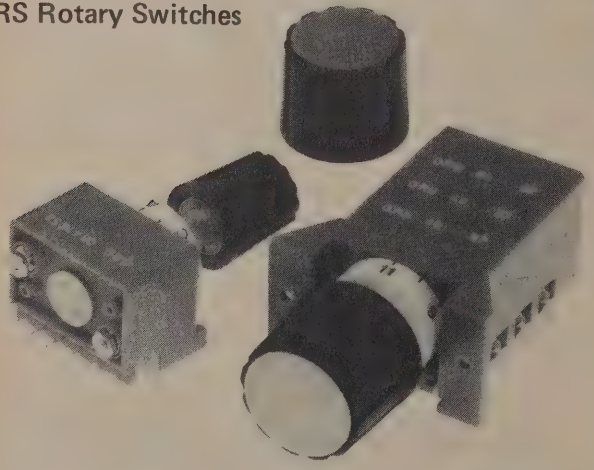
The INTERSWITCH GWS Thumbwheel Switch has been designed for those applications which require adjustment of values or selection of functions other than from the front panel of your instrument or equipment.

These switches are intended for printed circuit board mounting and are available with your choice of four wheel marking orientations along the periphery of the wheel, plus marking on the flat side in any of the four choices. You also have a choice of two standard wheel colors of either ten or sixteen position, and there are several output codes to choose from.

### Specifications

| | |
|---|---|
| **Electrical** | |
| Rated Voltage | 50 V |
| Test Voltage | 1000 V |
| Rated Thermal Current | 3 A |
| Overall Resistance terminal-to-terminal through contacts | <100 milliohms |
| Insulation Resistance | >10 megohms |
| **Mechanical** | |
| Contact Force | >30 gm |
| Actuating Torque | 100 - 150 cm-gm |
| Lifetime | One million detent operations |
| **Environmental** | |
| Temperature Range | -20° C to +60° C |
| Maximum allowable solder temperature: | |
| By Hand | 340° C for five seconds |
| Solder Bath | 250° C for four seconds |
| **Materials** | |
| Au on PCB | 5 microns |
| Sliding Contacts | Ag/Pd 30 |
| Housing Color | Black |

## GRS Rotary Switches



The INTERSWITCH GRS Rotary Switch was designed for PCB mounting. Two models are available for mounting to vertical PCB's and two models for mounting to horizontal PCB's.

These switches are available with either decimal outputs or binary coded outputs and with the following detent angles:

- 15° (24 position)
- 22.5° (16 position)
- 30° (12 position)
- 36° (10 position)

Stops may be ordered to limit the number of positions to something less if desired.

Switches may be ordered with shorting or non-shorting contacts. In addition, special output codes can be designed to fit your particular needs.

The GRS1 and GRS3 Rotary Switches may be ordered with up to four sections. Alternate mounting methods of the GRS2 and GRS4 give you greater freedom for your designs. In addition, some special shaft options are also available.

### Specifications

| | |
|---|---|
| **Electrical** | |
| Rated Voltage | 50 V |
| Test Voltage | 500 V |
| Rated Thermal Current | 1 A |
| Overall Resistance terminal-to-terminal through contacts | <90 milliohms |
| Insulation Resistance | $10^4$ meghoms |
| Capacitance between 2 adjacent contacts | 0.87 pF (approx.) |
| **Mechanical** | |
| Inputs 1 or 2 per plane | 1 or 2 per plane |
| Outputs | Max. 12 per plane |
| Actuating torque | |
| 30° or 36° detent angle | 0.6 cm-kg (approx.) |
| 15° or 22.5° detent angle | 0.9 cm-kg (approx.) |
| Lifetime | 100,000 detent operations |
| **Environmental** | |
| Temperature Range | -25° C to +70° C |
| **Materials** | |
| Au on PCB | 2 microns |

## Type A

10, 11, 12, 16 positions

Rear mounted

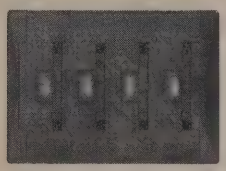
Black or grey housing

11 mm wide x 53 mm high x 54 mm deep

Contact Ratings:
Resistive switching: .25A
Max. non-switching: 2A

Working voltage: 50V

Contact resistance: .070Ω



½ Scale (approx.)

## Type B

10, 11, 12, 16 positions

Front mounted

Black or tan housing

12.5 mm wide x 58 mm high x 57 mm deep

Contact ratings:
Resistive switching: .25A
Max. non-switching: 2A

Working voltage: 50V

Contact resistance: .070Ω

½ Scale (approx.)

## Type G (world's largest)

10 positions only

Front mounted

Black or tan housing

20 mm wide x 76 mm high x 79 mm deep

Contact ratings:
Resistive switching: .5A
Max. non-switching: 4A

Working voltage: 250V

Contact resistance: .060Ω

½ Scale (approx.)

## Type H (std.), Type R (message), Type S (sealed)

Types R, S - 10 position only

Type H - 10, 11, 16 positions

Front mounted

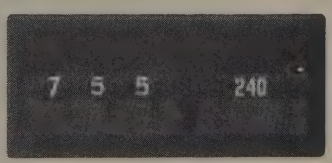
Type R - 20 mm wide x 33 mm high x 38 mm deep (Black housing only)

Type H, S - 10 mm wide x 33 mm high x 38 mm deep (Black or tan housing)

Contact ratings:
Resistive switching: .1A
Max. non-switching: 1A

Working voltage: 50V

Contact resistance: .070Ω



½ Scale (approx.)

## Types E, L, N

10 positions only

Rear mounted

Black or tan housing

Type E - 16 mm wide x 24 mm high x 35 mm deep

Type L - 8 mm wide x 24 mm high x 35 mm deep

Type N - 7 mm wide x 24 mm high x 35 mm deep

Contact ratings:
Resistive switching: .075A
Max. non-switching: 1A

Working voltage: 50V

Contact resistance: .070Ω

Types E & L

Type N

½ Scale (approx.)

## Type M

10, 11, 16 positions

Front mounted

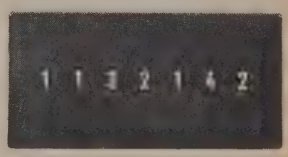
Black or tan housing

8 mm wide x 33 mm high x 38 mm deep

Contact ratings:
Resistive switching: 0.1A
Max. non-switching: 1A

Working voltage: 50V

Contact resistance: .070Ω



½ Scale (approx.)

## Type P

10, 11, 16 positions

Rear mounted

Black or tan housing

10 mm wide x 30.5 mm high x 41 mm deep

Contact ratings:
Resistive switching: 0.1A
Max. non-switching: 1A

Working voltage: 50V

Contact resistance: .070Ω

½ Scale (approx.)

## Type V

10 positions only

Front mounted

Black or tan housing

8 mm wide x 26.5 mm high x 35 mm deep

Contact ratings:
Resistive switching: .075A
Max. non-switching: 1A

Working voltage: 50V

Contact resistance: .070Ω

½ Scale (approx.)

# Matrix Boards

INTERSWITCH
ONE OF THE PURDY GROUP OF COMPANIES

770 AIRPORT BOULEVARD, BURLINGAME, CALIFORNIA 94010 • TEL (415) 347-8217 • TWX 910-374-2353

## The simple straight-forward method of programming.

## There are a number of standard 2-layer matrix boards available, but,

## We specialize in custom 2, 3, 4 & 6 layer matrix boards.

## Features

- ☐ Models rated at 2, 6 and 16 amps.
- ☐ All contact materials gold plated.
- ☐ Silk-screened inscriptions protected by a clear melamine layer.
- ☐ Spacing between rows and between columns .1", 3 and 6 mm.
- ☐ Protected and supported bus bar pairs.
- ☐ Shorting pins, diode pins and cable pins available.

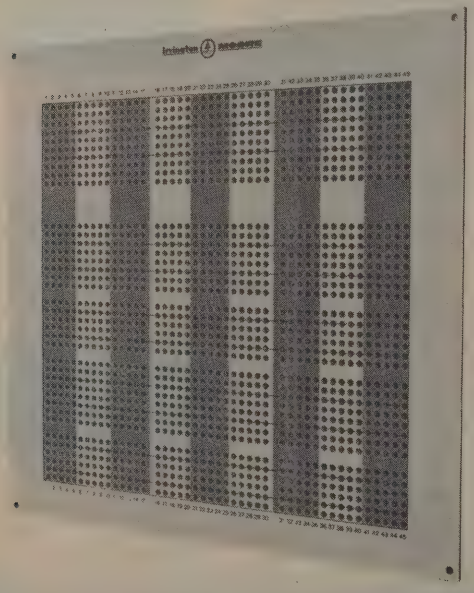
## Applications

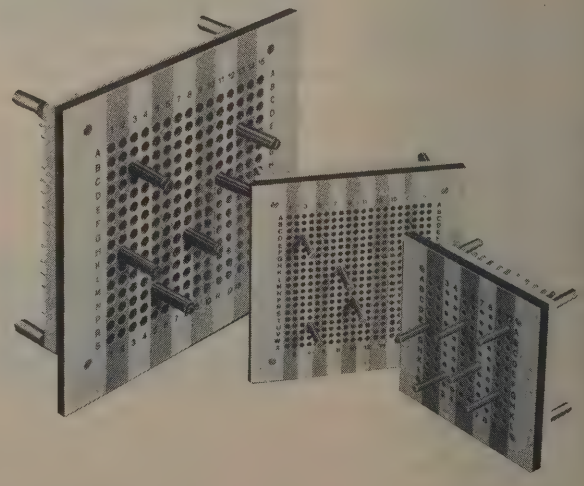
- ☐ Circuit test programmers.
- ☐ Reprogrammable diode matrix memories.
- ☐ Traffic controllers.
- ☐ Program variables for N-C machine tools.
- ☐ Memories for computers.
- ☐ Program variables for process controls.
- ☐ Power distribution systems.
- ☐ Lighting systems.
- ☐ Sound systems.

A matrix board is a manual programming device for electronic equipment. It is designed for situations where flexibility, economy and programming ease must be maximized. The inscribed face provides visual definition of each instruction, simplifying programming. Once programmed, circuits can be left indefinitely or changed as needed. Typical applications include the governing of batch processing, supervising of automatic machines and coordinating test equipment.

A matrix board is mechanically and electrically reliable, and comes in a variety of standard sizes. Custom boards can also be built to customer specifications in varying sizes and hole patterns.

The matrix is built around perpendicular rows of conductors, or bus bars contained in two or more layers. Those running vertically are called columns, those running horizontally are called rows. Where these conductors cross - the X, Y junction - a hole through the face of the matrix board allows a shorting pin to be inserted. A pin placed at that point connects one row to one column and closes the circuit between the two bus bars. Thus the basic function of the matrix board is that of a switch. Its advantage is the combination of switching actions that can be accomplished, and the ability to change, or reprogram the board quickly.





# Data Modules

INTERSWITCH

ONE OF THE PURDY GROUP OF COMPANIES

770 AIRPORT BOULEVARD, BURLINGAME, CALIFORNIA 94010 • TEL (415) 347-8217 • TWX 910-374-2353

## A Unique Way of Programming

## Features

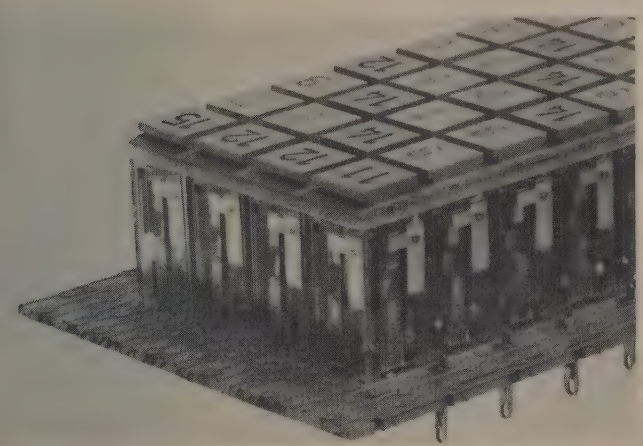
- ☐ 4 switches per module.
- ☐ Compact size.
- ☐ Large visual display.
- ☐ Quick program change.
- ☐ Equal to a 1 x 4 matrix.
- ☐ Available with diodes.
- ☐ Available with right angle mounting.
- ☐ Available with changeover contacts.

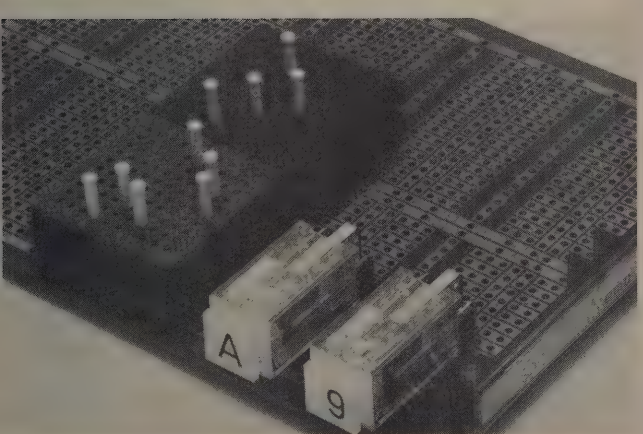
## Applications

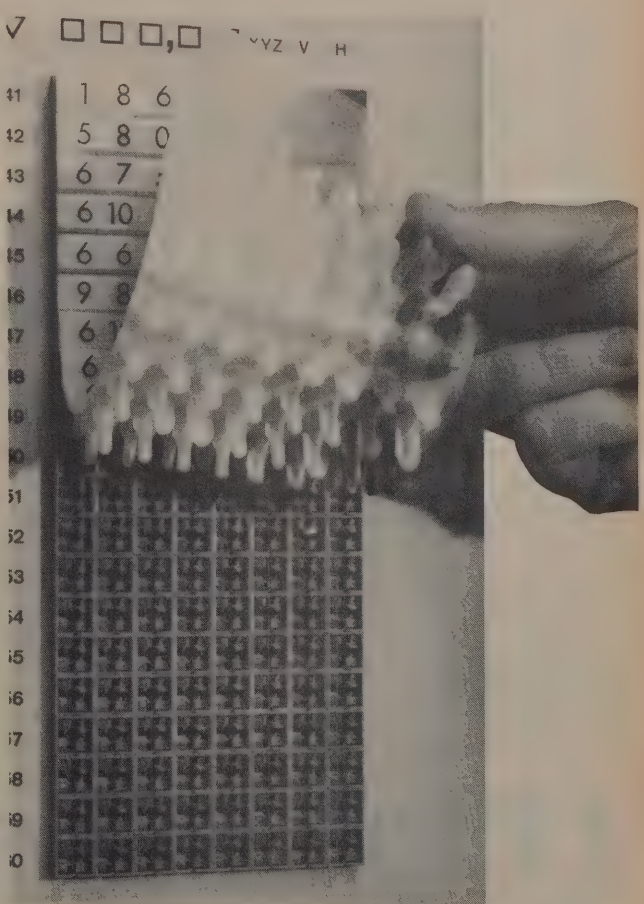
- ☐ Program variables for process controls for:
  - Plastic molding equipment.
  - Chemical formulating.
  - Soap and cosmetic production.
  - Paper products processing.
- ☐ Program variables for N-C machine tools.
- ☐ Program variables for:
  - Computers and peripherals.
  - Automatic typewriters.
  - Automatic sprinklers.

The Series 300 and 400 Data Modules are 5-terminal miniature coding devices with 1-2-4-8 binary outputs. The output code selection is obtained by inserting one of the 16 different plastic programming keys. The keys selectively close from none to all four of the contacts housed within the Data Module. These units are available with or without diodes in series with the outputs.

The Series 200 Data Modules have four changeover contacts (9 terminals) thereby providing both the binary and complementary outputs.







# vacuum contactors

Vacuum Contactors are used to control large amounts of DC power and RF currents with ratings up to 50 kv and currents up to 900 Amperes continuous. These contactors are recommended wherever high voltage capability, small size, and high speed operation with a long and low maintenance life are important. Applications include primary control of power supplies, industrial motors, and induction heating equipment, RF system tap changing, and fault protection of high power transmitters. The 12 page catalog provides complete specifications with a variety of specific applications for 3-pole, high voltage AC and DC, RF contactors and overcurrent relays actuated by solenoid, air or motor drives.

*This 12-page catalog provides complete specifications on 3-pole vacuum contactors, high voltage AC and DC contactors, high voltage overcurrent relays and high voltage RF contactors actuated by solenoid, air or motor drives. Engineering notes are included that relate ratings to a variety of specific applications.*

DIVISION OF INTERNATIONAL TELEPHONE AND TELEGRAPH CORPORATION

# vacuum interrupters

ITT Jennings offers a line of Vacuum Interrupters for use in power generation and distribution systems. Their high dependability compared with other types of interrupters has been proven in over 20 years of in-field service. In fact, the first commercial vacuum interrupter supplied by ITT Jennings, installed as a line-and-load dropping switch on a 138 kv transmission line, is still going strong. Vacuum Interrupters are simple in principle. They require that only two contacts be separated in a vacuum environment. ITT Jennings builds them with heavy metal alloy construction combined with ceramic envelopes. This inherently high dielectric device provides numerous advantages such as:

- Short actuator stroke, which simplifies operation
- High interrupting and operating speed.
- Rapid dielectric recovery, which minimizes restrikes.
- Very high 60 cps and Impulse Withstand Voltages.
- Extremely small and lightweight for their capacity.
- Quiet operation.
- Long, maintenance-free life.
- Using no oil, they are non-flammable, non-toxic, and non-explosive.

ITT Jennings Vacuum Interrupters are found in applications such as line and load dropping switches on 230 kv lines, and for switching large capacitor banks (usually at 15.5 kv, but they have been used in systems up to 345 kv). They are also used to interrupt transformer magnetizing currents up to 230 kv, for fault interruption up to 115 kv, and to control arc furnaces and other mining equipment at supply voltages up to 24.5 kv.

*Twelve-page catalog provides engineering information on the selection and use of vacuum interrupters in various general purpose, utility and industrial applications. Contains complete specifications on vacuum interrupters and special vacuum interrupter switches for RF applications.*

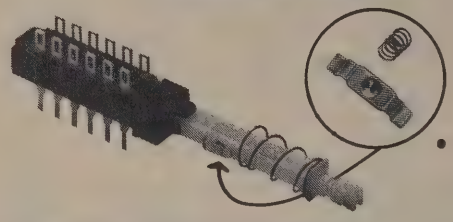
# MODULAR PUSH BUTTON SWITCHES

**"Creative Switchmakers" for Home Entertainment Products and Test Equipment**

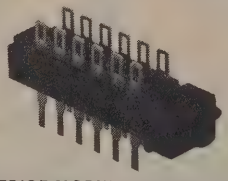
***If it's a better switch you need . . . better switch to Schadow!***

## better switch... here's why...



### HAND WIRING AND FLO-SOLDERING CONNECTIONS ARE STANDARD

- Solder lugs on top for hand wiring
- PC spikes at bottom for flo-soldering



### SUPERIOR MODULAR CONSTRUCTION

- Ease of maintenance . . . switch plunger with sliding contacts is removable from the front without disturbing electrical connections

### INDIVIDUAL COIL SPRING LOADED MOVING CONTACTS

- The coil spring-loaded contoured moving contacts have been designed to provide balanced contact pressure for optimum surface to surface interface with the fixed contacts . . . assuring reliable performance in low voltage (dry circuit) applications
- Long term low contact resistance
- Constant coil spring tension at the contact points provides positive self-cleaning action

### MODULE ADVANTAGES

- Enclosed housing protects inner contact area from dust and foreign intrusions
- Fixed terminals are "staked" in position, providing an extra seal to help prevent wicking of solder or flux
- Molded PC Board Standoffs, front and back, on bottom side, assure parallel mounting

**TECHNICAL DATA**

## MECHANICAL REFLECTING INDICATOR BUTTONS FOR F & G SERIES

- Uses no energy. Needs no lamp, lamp/holder, power supply, switch contact or wiring.
- Works on the principle of reflecting ambient light through a clear plastic lens.
- Generates no heat and eliminates costly lamp replacement.

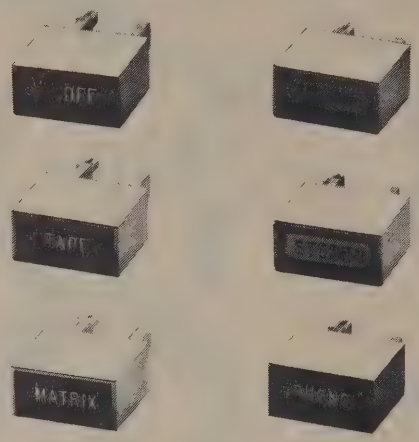
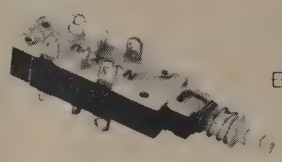
## NEED GRAPHICS?

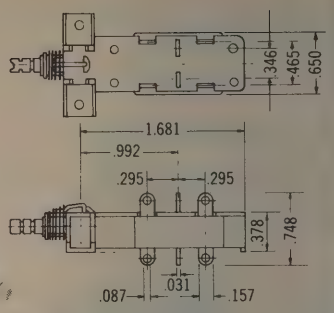
Several examples are shown below. Your specific requirements quoted on request. (Graphics pictured on FA 100 push buttons)



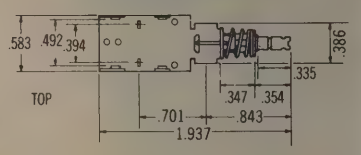
## N30 TV-5 rated power switches

(Also available with 2PDT low voltage auxiliary contacts) UL, CSA, VDE Approved.

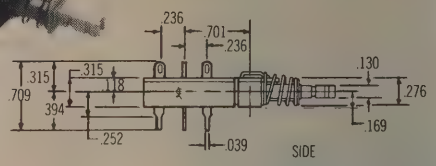




## Series NE 15/F line switches



(Also available with 2PDT low voltage auxiliary contacts) UL, CSA, VDE Approved, 4 AMP 250 VAC.



## CA-110 SERIES

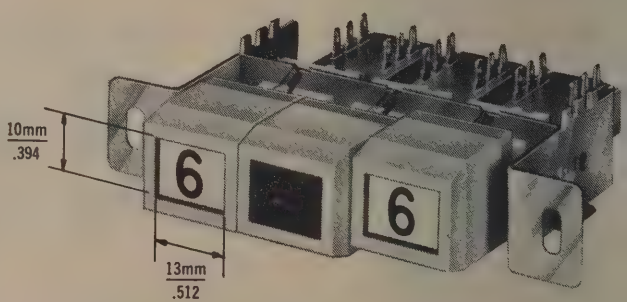
Schadow, the creative switchmaker, has developed a "lampless" push button switch, with bright color indicators — with or without graphics — to mechanically indicate changing functions.

This innovative push-button switch, Series CA 110, is for use in high quality commercial applications. The sophistication of the series in terms of electrical construction (bifurcated contacts — coil spring loaded) and mechanical actions available, will satisfy the most demanding switching requirements.

Tableau or stacked switches are available in Series CA 110, 15 switches wide x 10 high per chassis.

Because a lamp and socket assembly is omitted, economies in manufacture permit a lower pricing schedule, and the elimination of another drain on electrical power sources.

If it's a better switch you need . . . better switch to Schadow.



**CA 110**

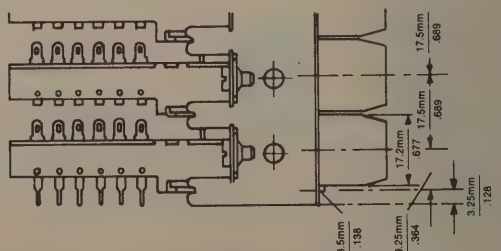
**CA 110 TABLEAU**

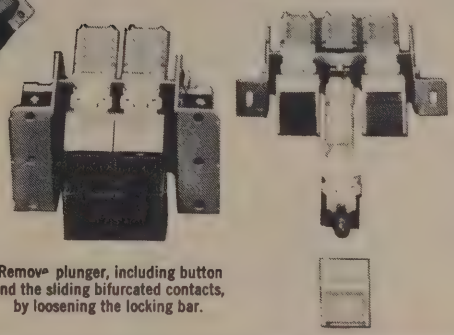


SCHADOW

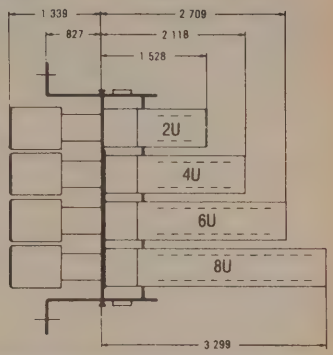
# High quality Series CL illuminated and Series C non-illuminated push button switches

This push-button switch is for use in high quality commercial applications. The sophistication of the Series "CL" & "C" in terms of electrical construction (bifurcated contacts — coil spring loaded) and mechanical actions available will satisfy the most demanding switching requirements.

Tableau or stacked switches available either "CL" or "C" Series, 15 switches wide x 10 high per chassis. With the designation Series "CL" this switch is available with slip-on lamp holder. Use Type 5522 lamp. Button spacing is 17.5mm (.689").



Remove plunger, including button and the sliding bifurcated contacts, by loosening the locking bar.



## SPECIFICATIONS: SERIES CL and C PUSH BUTTON SWITCHES

### MECHANICAL DATA

Key travel = .315" Contact travel = .197"
Life 300,000 cycles depending upon load.
Key pressure — 2 & 4PDT = 35 oz.; 6 & 8PDT = 49 oz.

### MECHANICAL ACTIONS AVAILABLE

[Gr] = Interlocking.

[$Gr_1$, $Gr_2$] = Two independent interlocking groups.

[o.A.] = Momentary.

[A.o.R.] = Momentary release button for interlocking.

[EE] = Push-push.

[Z] = Central release for individual latching.

[Sp] = Blocking action only one key down. Switching is delayed to increase margin of safety.

[Gr + Sp] = Interlocking with blocking. Maximum 15 button (stations) in one row.

[$Gr_1$, + Sp / $Gr_2$, + Sp] = Two groups of interlocking with blocking. (Group 1 can be blocked independent of Group 2.)

[o.A. + VSp] = Momentary action with blocking.

[EE + VSp] = Push to engage, push again to release — with blocking. The depressed button must first be released before another button can be depressed.

[Gr + VSp + A.o.R.] = Interlocking with blocking and locking of button with one central momentary release button. The depressed button must first be released by central release button or solenoid remote release, before another one button can be depressed.

[Gr + RSp + A.o.R.] = Locked — Interlocking with blocking. A central release button must first be depressed before any of one interlocked buttons can be depressed; this button remains latched after release button is allowed to return. The main circuit can be interrupted, if necessary, through the release button contacts. In this way, a 4 amp. circuit can be switched, without current, through standard C-Module switch contacts.

### CHASSIS AND STATION DATA

Model Number ..... 17.5
Center to center spacing ..... 0.689"
Number of stations ..... 1-15
Standard Buttons-Series "C" (Non-illuminated) CSX
Standard Buttons-Series "CL" (Illuminated) CRS, CRV

### CONTACT TYPES

Standard: Non-shorting — Solder Terminals Top, PC Terminals Bottom.

[Shorting: ks] Short PC top, Standard PC bottom: SI
Short PC terminals both sides: SC
Special cut off terminals either side .036" long.

### INSULATION MATERIAL

Contact Plate: Phenolic 20.62.8 Kl.IV
Module: Polycarbonate (Makrolon)
Contact Plunger 2u, 4u: Polycarbonate (Makrolon)
Contact Plunger 6u, 8u: Polyamid
Outer Plunger: Azetalharz

### ELECTRICAL DATA

Voltage Max.: 1000 volts.
Current Max.: 2 amps $\cos_\phi = 1$.
Load Max.: 100 watts ac.
Load Max.: 25 watts dc.
Test Voltages: Contact to ground 300 volts ac.
Terminal to terminal: 2000 volts ac.
Auxiliary terminals to outer-terminals: 1000 volts ac.
Lamp holder contacts to ground: 1500 volts ac.
Insulation Resistance: $10^{12}$ Ω after 96 hours storage in 95-100% humidity.
Contact Resistance: 5 milli Ω.
Contact Resistance: After 25,000 switching cycles — about 15 milli Ω (depends on load).
Dielectric loss, tgδ $4x10^{3}$ (300 kHz).

### POWER SWITCH NC17 (UL, CSA and VDE Approved)

Max. Voltage — 250 ac.
Max. Current — 6A (Cos $\phi$ = 0.75)
Max. Current — 3A (Inductive load)
Max. Voltage — 250 dc.
Max. Current — 2A dc.
Test voltage between terminals & chassis: 3000V ac.
Test voltage between terminals & contacts: 2000V ac.
Contact Resistance: 50 milli Ω (With rated load).

digitast
modular electronic switch input component

**digitast**

SR 12.3mm wide x 17.1mm

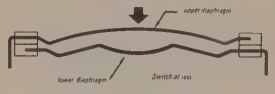
low cost
3 point contact
totally sealed
highest integrity

# disc switch

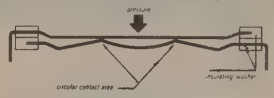
modular electronic components

**TOTAL SEALING**

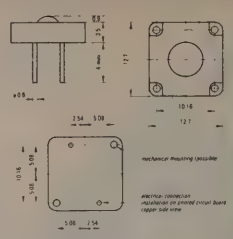
The Disc switch is totally sealed through insert moulding and ultra-sonic welding.

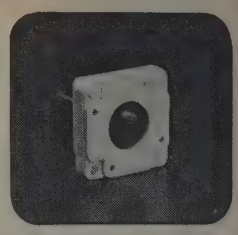


The Disc switch is built around two contact diaphragms separated by an insulating material. The profile of each of these two diaphragms is such that, under the action of applied pressure on the upper dome, it is momentarily collapsed, making instant positive, 3 point contact with the lower diaphragm.

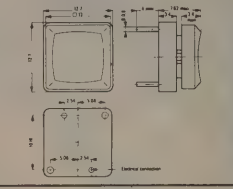


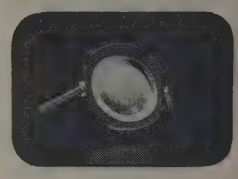
- High Reliability...10 X $10^6$
- Self Cleaning
- Broad Range of Switching Power...from a few milliwatts to 30 watts.
- Low Bounce (less than 100 microseconds)



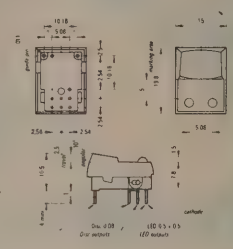


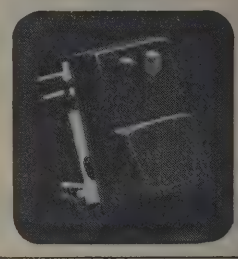
**MD** Disc module: Extra-flat momentary contact module. Shorter stroke configuration installable directly on printed circuit board. Enables you to design your own keyboard adapted to your own specific needs.



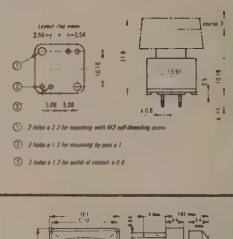


**MDP** Push button switch assembly with a momentary action contact and incorporating the unique design disc switch. The switch is designed for direct insertion into printed circuit boards. Two principal advantages of the MDP switch are the short stroke (only 0.5 mm) and the crisp tactile feel.

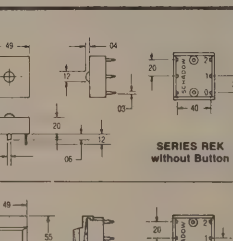


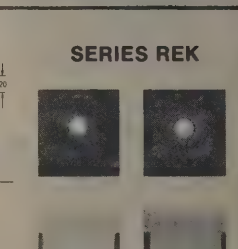


**DMB** Modular Rocker Disc Switch: Momentary contact for use on printed circuit board. Customer design and installation from bread board through production. Can be mounted in line on 15.24 MM/.600" centers or in a matrix (.600" x .800"). Available with one or two L.E.D.'s (red, green or yellow). Engraving or hotstamped graphics available.



**TFD** Alpha-numeric data entry keyboard style switch: Size, stroke and touch approximate industry standard for data entry switches. Low profile.





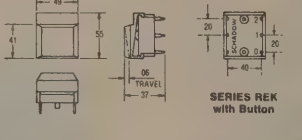
**MDP** Push button switch assembly with a momentary action contact and incorporating the unique design disc switch. The switch is designed for direct insertion into printed circuit boards. Two principal advantages of the MDP switch are the short stroke (only 0.5mm) and the crisp tactile feel. Contact arrangement: single, normally open contact with momentary action. TERMINALS: tinned terminals — 0.8mm dia. x 4mm long. SOLDERING: since the disc switch is completely sealed, it can be flow soldered. PUSH BUTTONS AND KEYS: dimensions (mm) 12.7 x 12.7 x 3.4 (7.62 with key). STANDARD COLORS: red, blue, light grey, dark grey.

unique
versatile

# series "R"

electronic switch input components

Series R is the economical answer for an electronic switch input component to use with standard dual-in-line packages (DIP's), ideally designed for incorporation into a broad variety of electronic devices including advanced microprocessor controlled equipment. Series R is compatible with TTL, CMOS Logic. Redundant contacts insure required reliability.



**SERIES REK**

**SPECIFICATIONS:**

- Available in SPST and SPDT
- Extremely compact design
- Crisp, consistent tactile feel
- Installable on customer-designed printed circuit boards (edge connections or pin connections)
- Graphics available upon request
- Actuating method can be custom designed or use a choice of standard button colors: black, white, red, blue, green, orange, grey and yellow.

| | |
|---|---|
| Wattage Capacity | 250mW (Series REK) |
| Voltage | 25 V. (Series REK) |
| Current | 20mAdc |
| Contacts | Silver or Gold |
| Contact Resistance | ⩽ 100m (Series REK) |

| | |
|---|---|
| Contact Bounce | .1 Millisec. Max. |
| Operating Force | 100 Grams |
| Travel | .03 in. |
| Life | $10^6$ Cycles @ 10mA |

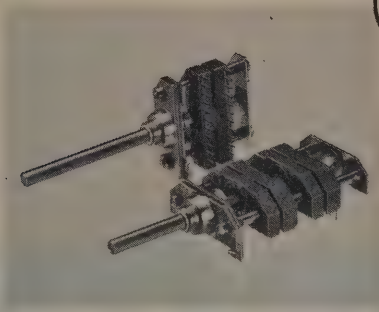
# The Flat Switch SBL11

SCHADOW™



A low profile multiposition switch specially designed for printed circuit applications

Specially constructed to enable direct soldering into printed circuit boards

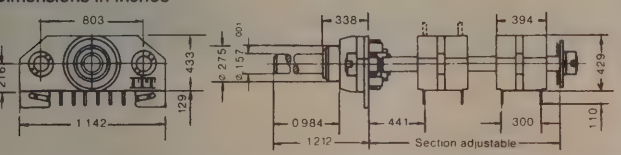
Movable sections allow flexibility in circuit layout and overcome PC-tolerances

Insert moulding provides an effective seal against flux

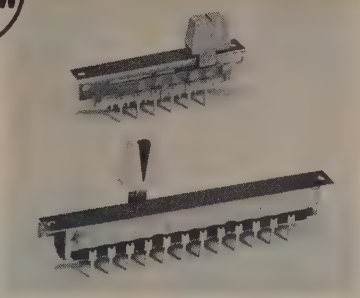
Available from 1-6 poles in combinations up to 5 adjustable sections

- Low profile switch, less than .045" high, especially suitable for plug-in units
- Compatible with IC's in pin configuration
- High quality materials ensure a long mechanical life
- Stable contact resistance with silver (standard) or gold alloy contacts
- Shorting and non-shorting versions available

Dimensions in inches



# Slide Switch CL Series



Multiposition slide switches with 3 frame sizes for maximum of either 6, 12 or 24 contact positions.

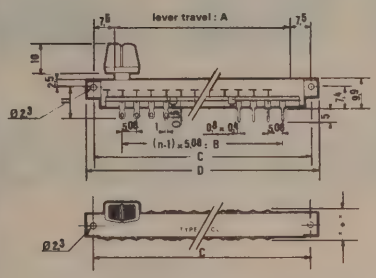
- Terminations for wiring or Printed Circuit Board mounting.
- Semi-Professional Silver Plated Brass Contacts. Life Expectancy: 15,000 operations.
- Professional 3 µ Gold Colbalt Contacts. Life Expectancy: 50,000 operations.

2 to 6 positions:
1 to 3 circuits

2 to 12 positions:
1 to 6 circuits

2 to 24 positions:
1 to 12 circuits (only PCB)

Dimensions in mm's



| | A | B | C | D |

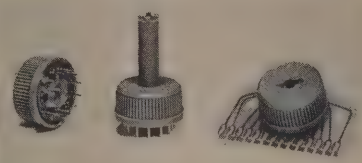
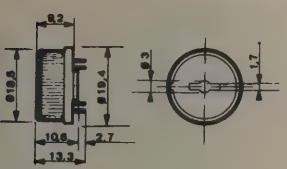
| CL 6 | 30,5 | 25,4 | 45,5 | 50 |
| CL 12 | 61 | 55,88 | 76 | 80,5 |
| CL 24 | 121,9 | 116,84 | 136,9 | 141,5 |

# Rotary Switches RBP 12 Series

A miniature printed circuit board mounting rotary switch with index and contacts contained within a single moulded plastic case.

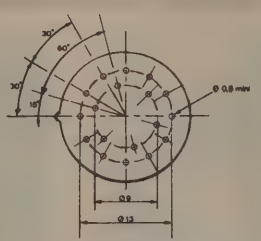
P.C. board is available permitting connection to mother board.



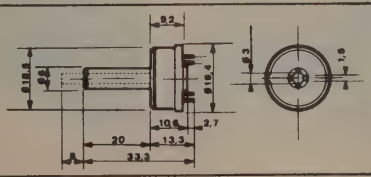


**RBP 12 F**

For manual operation adjusted with screwdriver.



**Pin configuration**



**RBP 12 AD**

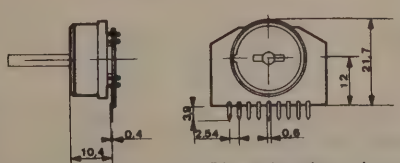
Hollow shaft Ø6 mm to accept Ø3 mm inner shaft.

**RBP 12...P**

P.C. board is available permitting connection to mother board on RBP 12 F, AD.

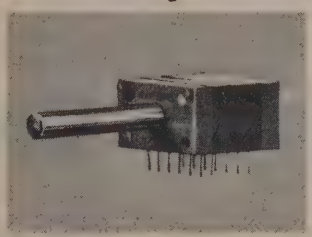
Example: 1 RBP 12 FAP.

Several other variations available.



Dimensions in mm's

# Rotary Switches MIL Series



The MIL is a rotary modular switch designed for printed circuit boards. As easy to connect as any other PCB mounting component.

The placing of your switch can be decided to exactly match the available space on your printed circuit board independent of the position of the control knob.

**Modular**

Through the choice of assembly of basic switch modules:

— either in line,
— or in L formation (5 modules max.),
— or with modules fixed or sliding on the shaft,
— or with spaced out modules linked by the control shaft which passes above other components on the board.

**Miniaturization**

The very reduced dimensions (17,78 x 17,78 x 10,5 mm) enable it to be mounted on closely spaced printed circuits in racks leaving space for other components.

**Sealed construction**

Designed for use on printed circuit boards, the MIL is totally sealed. After mounting it can be subjected to the cleaning of the PCB in a freon bath with ultrasonic vibration, it will withstand 21 days under humidity test and will resist corrosive environments.

**Reliability**

The mobile double contact, together with exceptional sealing, guarantees excellent performance as well as very high reliability.

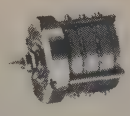
## Series "A" MINIATURE ROTARY SELECTOR SWITCHES

**Series A-15** — 15°

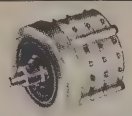


ELECTRICAL RATING:
5 amps 115 v ac Res.
3 amps 28 v dc Res.
2 amps 28 v dc Ind.

Max. Positions: 24
Body Diameter: 2″

6-1900 Series 1 pole/deck
6-1912 Series 2 pole/deck
6-1980 Series 3 pole/deck
6-1914 Series 4 pole/deck
6-1913 Series 6 pole/deck

**Series A-20** — 20°

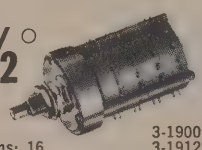


ELECTRICAL RATING:
5 amps 115 v ac Res.
3 amps 28 v dc Res.
2 amps 28 v dc Ind.

Max. Positions: 18
Body Diameter: 2″

Available only in single pole per deck construction.

**Series A-22** — 22½°

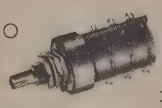


ELECTRICAL RATING:
5 amps 115 v ac Res.
3 amps 28 v dc Res.
2 amps 28 v dc Ind.

Max. Positions: 16
Body Diameter: 1.5″

3-1900 Series 1 pole/deck
3-1912 Series 2 pole/deck
3-1914 Series 4 pole/deck

**Series A-30** — 30°



ELECTRICAL RATING:
2 amps 115 v ac Res.
1 amp 28 v dc Res.
0.5 amp 28 v dc Ind.

Max. Positions: 12
Body Diameter: 1.036″

1905 Series 1 pole/deck
1-1909 Series 2 pole/deck
4-1900 Series 3 pole/deck
67-1940 Series 4 pole/deck
67-1900 Series 6 pole/deck

**Series A-36** — 36°

ELECTRICAL RATING:
5 amps 115 v ac Res.
3 amps 28 v dc Res.
2 amps 28 v dc Ind.

Max. Positions: 10
Body Diameter: 1.036″

1900 Series 1 pole/deck
1960 Series 2 pole/deck

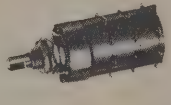
**Series A-45** — 45°

ELECTRICAL RATING:
5 amps 115 v ac Res.
5 amps 28 v dc Res.
2.5 amps 28 v dc Ind.

Max. Positions: 8
Body Diameter: 1.036″

1906 Series 1 pole/deck
1-1910 Series 2 pole/deck

**Series A-60** — 60°

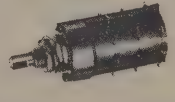


ELECTRICAL RATING:
5 amps 115 v ac Res.
3 amps 28 v dc Res.
2 amps 28 v dc Ind.

Max. Positions: 6
Body Diameter: 1.036″

Available only in single pole per deck construction.

**Series A-90** — 90°



ELECTRICAL RATING:
5 amps 115 v ac Res.
5 amps 28 v dc Res.
2.5 amps 28 v dc Ind.

Max. Positions: 4
Body Diameter: 1.036″

Available only in single pole per deck construction.

## Series "B" MICRO-MINIATURE ROTARY SELECTOR SWITCHES

• TOTALLY ENCLOSED • EXPLOSION PROOF
• UNITIZED CONSTRUCTION

All switches offer maximum protection against radio frequency interference.

Body Diameter: .623″

Electrical Rating Continuous:
8 amps at 28 v dc

Switching Rate:
0 to 0.25 amp resistive
0 to 28 v dc
0 to 0.25 amp resistive
0 to 115 v ac
0 to 0.12 amp inductive
0 to 28 v dc

Torque: 5 to 9″ ounces

Contact Resistance:
.005 ohms average

Insulation Resistance:
100,000 megohms minimum at 100 volts

10,000 megohms minimum at 500 volts

Designed and Built to meet the environmental and functional requirements of MIL-S-3786

**Series B-30** — 30°

7.5 amps Res. 28 v dc
5 amps Ind. 28 v dc

## GENERAL SPECIFICATIONS

**All switches offer maximum protection against radio frequency interference.**

**ELECTRICAL RATING:**
Carry 10 amps continuous.
Make and Break — see individual switch data.

**VOLTAGE DROP:**
0.1 volt or less at rated amperage.
Initial Contact Resistance: .003 ohm.

**LIFE:**
10,000 double cycles make and break rated amperage.

**TORQUE:**
1 to 3 inch lbs.

**SWITCHES DESIGNED AND BUILT IN ACCORDANCE WITH THE FOLLOWING SPECS.:**
MIL-S-6807 (rotary switches enclosed)
MIL-S-3786 (rotary switches)
MIL-E-5272 (environmental testing)

**ON MOST OF THE SWITCHES LISTED, THE FOLLOWING FEATURES ARE AVAILABLE:**

- O-ring Shaft and Panel Seal
- Combination of Decks
- Bridging contacts
- Momentary positions
- Isolated positions
- Adjustable stops
- Solenoid driven
- Keylock
- Gang switches
- Concentric shaft switches

# JANCO CORPORATION

# Series "D" PUSHBUTTON ROTARY SWITCHES

**FEATURES:** • Totally enclosed, explosion proof. • Printed-circuit construction. • Black or white numbers on black or white background indicate switch positions (black numbers on white background for lighted switches). • All standard codes available. Available in 8, 10, 12 or 16 positions. • Plastic covered buttons, available in black, red, green, yellow, white or blue.

### BI-DIRECTIONAL

### PERFORMANCE DATA:

**ELECTRICAL RATING CONTINUOUS:**
3 amps

**MAKE AND BREAK**
.125 amp res. at 28 v dc and 115 v ac
.05 amp ind. at 28 v dc

**PUSH FORCE:**
55 oz. max.

**CONTACT RESISTANCE:**
Initial .100 ohms
After life .160 ohms

**LIFE:**
50,000 cycles
Cycle consists of 720° rotation

**INSULATION RESISTANCE:**
5,000 megohms

**ALTITUDE:**
70,000 ft.

**TEMPERATURE RANGE:**
−65°C to +85°C

**PLUNGER TRAVEL:**
.180 approx.

**DIELECTRIC STRENGTH:**
750 volts RMS

**WEIGHT:**
½ oz. approx.

**Designed to meet the requirements of MIL-S-22710**

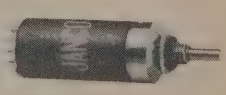
## TYPICAL UNIQUE APPLICATIONS OF JANCO ROTARY SWITCHES

**MINIATURE PIN-TYPE ROTARY SWITCHES**
For printed circuit boards and front panel mounting. Various numbers of positions and poles.

**MINI CODE SWITCHES**
Intended to be used with card racks on ½″ centers, the unit measures ⅜″ high. Can be lighted.

**SINCE 1947 . . . JANCO has solved thousands of switching problems! For a quick solution to your specific problem — call JANCO direct.**

**FOR "DRY" CIRCUIT SWITCHING**
To interface with low level and "dry" logic circuits. Available in a variety of detent angles and output codes.



**MASTER COMMUNICATIONS SELECTOR SWITCH**
Provides standard coded outputs and offers unique switching functions. Only .675″ in diameter.

**JANCO CORPORATION**
Box 3038 • Burbank, CA 91504 • 3111 Winona Avenue • (213) 849-2107 • (213) 845-7473 • TWX 910-498-2701

# LEDEX PUSH BUTTON CONTROLS

When your product demands the best switch the industry has to offer, examine the good looks and fine touch of a long lasting Ledex push button switch.

You can combine logic level switching (10 mA/5VDC) and high current switching (6A/250VAC) on one ganged switch.

You can get more interrelated options than any other similar switch available today—momentary, push/push, reciprocal release, master release, interlock, and emergency "all off" as required.

You can also get the most reliable delivery scheduling in the industry.

Test a pre-production prototype. Ask for our Push-Button catalogs.

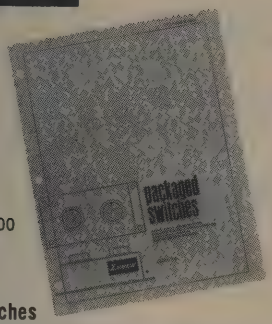
# STEPPING SWITCHES/CIRCUIT SELECTORS

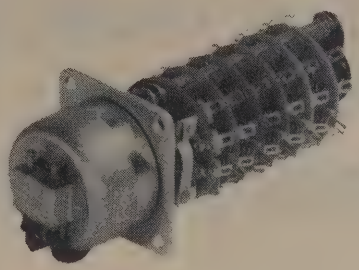


Catalog B-3200

**Packaged Switches**
Catalog B-3200 provides design guidelines for specifying and using hermetically sealed switches where high reliability requirements or harsh environmental conditions are factors that the designer must consider in the application.

Several stock models, including compact 5 pole 2 throw, 49 pole 2 throw, and 39 pole 3 throw switches, are available for immediate delivery. Circuit diagrams and various switch control methods are given for each of the ten stock models shown.

Custom engineered programmers, variable intervalometers, controllers and management systems are provided as examples of how packaged switches can be tailored to meet a wide range of exacting requirements.



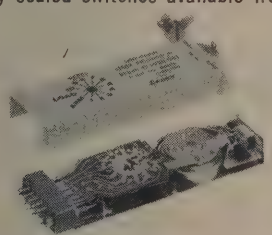
**Ledex Stepping Switches**
Used for relays, transfer switching, remote control of predetermined circuit patterns, remote sequencing of complex switching arrangements, or in programming checkout and sequential operations. They are known best for their ability to perform multiple switching functions reliably, in limited space, and under severe operating and environmental conditions. Available in open construction, prewired modules or as packaged control solutions.

**Ledex Hermetically Sealed Switches**
Engineered to withstand severe shock and vibration, such as encountered in aircraft, missile and military applications, and to provide added switching reliability in adverse environments. Used extensively in aerospace and underwater guidance controls, as mode selectors, in rocket firing devices, and in a variety of military control functions that demand a high degree of reliability. There are 13 models available from the shelf.

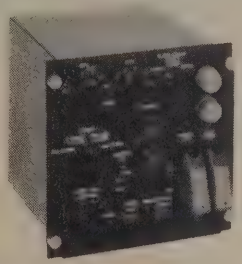
## LEDEX PACKAGED CONTROL SOLUTIONS

Here are examples of Ledex Stepping Switches designed into compact, reliable control packages that combine the best characteristics of solid state and electromechanical technologies.

Whether your problem involves armament controls or commercial control functions, there's a good chance Ledex has already solved a similar problem. Our Packaged Switches Catalog, B-3200, shows several more detailed examples and also includes specifications for 13 hermetically sealed switches available from the shelf.



**Miniaturized Armament Control Intervalometer**
Flat, compact, 12-position stepping switch measures only ½" x 1¼" x 4¼", fires 19 rockets, sequentially in pairs. It includes a Ledex pulser to control time intervals over mil-spec. temperature and voltage ranges.



**Dual Channel Flare/Chaff Dispenser Programmer**
An all electronic dispenser, except for mechanical counters, allows programming of rate and quantity for flare or chaff dispensing by independent or simultaneous channel operation. Output pulses of up to 10 amperes per channel drive the electromechanical distributor switches located elsewhere in the aircraft. This state of the art experience can also be put to use in commercial applications as well as military. Let us interface your requirements with a "black box" solution.

**Universal Stores Dispenser Intervals Variable on Digital Basis**
All solid state and among the most flexible of Ledex intervalometer designs, this one permits the pilot to vary release intervals to any rate ranging from 30 ms to 9.99 seconds in increments of 10 ms. It includes a stepping switch to distribute sequential fire commands. Timing tolerance is ±10% over a voltage range of 22 to 32 volts and temperature to −55°C to +85°C. The package includes built-in suppression to protect solid state circuitry when switching inductive loads.

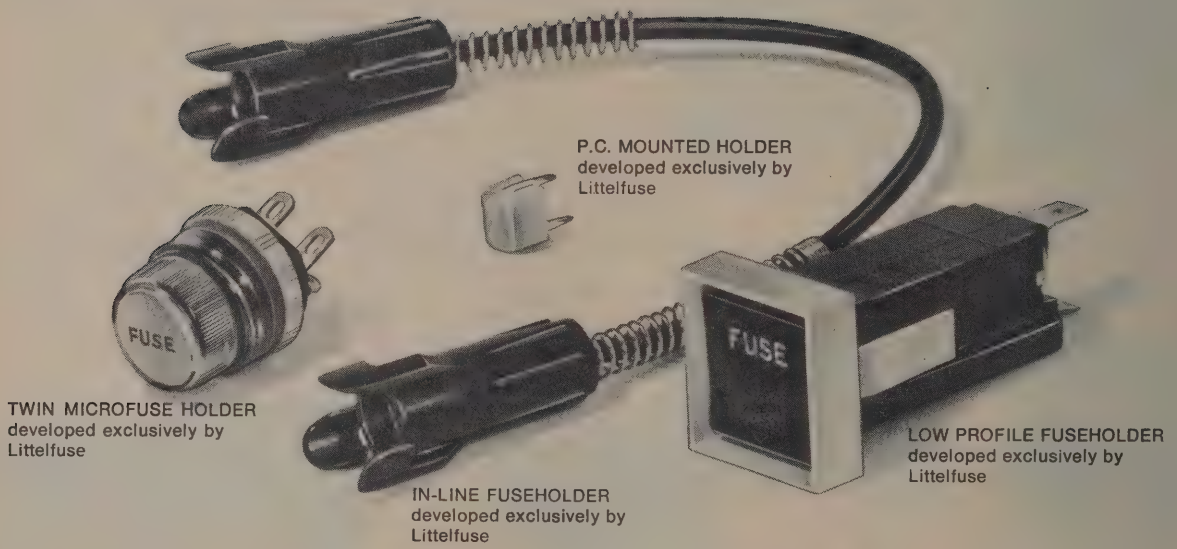
# At Littelfuse we don't just meet your Circuit Protection needs –we anticipate them.



P.C. MOUNTED HOLDER
developed exclusively by Littelfuse

TWIN MICROFUSE HOLDER
developed exclusively by Littelfuse

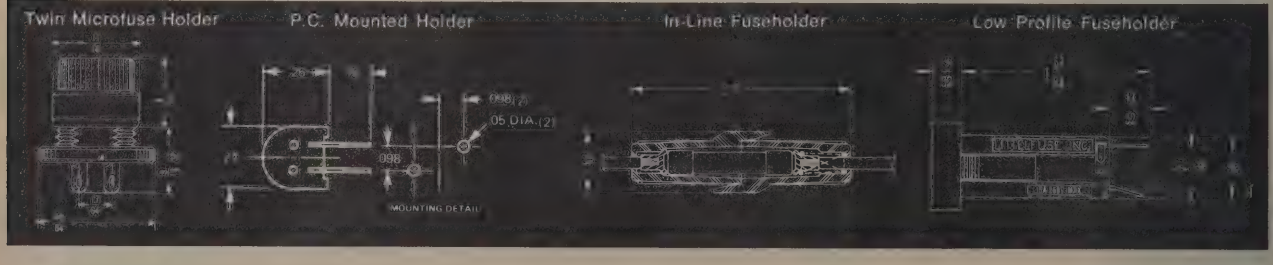
IN-LINE FUSEHOLDER
developed exclusively by Littelfuse

LOW PROFILE FUSEHOLDER
developed exclusively by Littelfuse

But that should come as no surprise. Since 1927, Littelfuse has provided the electronic industry with a complete line of fuses, fuseholders, circuit breakers, switches, and relays. Whatever a customer's need, we have a quality product to satisfy it.

But Littelfuse has to do more than keep up with the industry—we have to stay ahead of it. Our research and development engineers are constantly designing and testing to create tomorrow's products—more advanced, more streamlined, more versatile. Low-Profile Snap Mount fuseholders, P.C. Board fuseholders, Twin Microfuse holders, "Twist-Lock" In-Line fuseholders—these are just a few of the products developed exclusively by Littelfuse.

For detailed information on the complete line of Littelfuse products, write for Catalog #19. Or contact our representative or authorized Littelfuse distributor in your area. He will be glad to help you determine your immediate needs—and to help you plan for tomorrow's.



# Littelfuse– *first in design and innovation*

**P.C. Mounted Holder — 281007**
A low-profile, plug-in fuseholder accommodating Littelfuse picofuses and microfuses. Edge-mounted, the holder permits easy and rapid fuse removal and replacement. Rated at 5 amps to 125 volts.

**Twin Microfuse Holder — 280021**
A versatile twin or single circuit holder for space-tight applications. Accepts two microfuses or a combination of micro and picofuse. Rated at 5 amps to 125 volts.

**In-Line Fuseholder — 155100**
A low-cost holder with "twist lock" allowing easy fuse extraction and replacement. Accepts all ¼" x 1¼" fuses and SFE fuses to 20 amps. Available in black, transparent or six other standard colors.

**Low Profile Fuseholder**
Square cap fuseholder snaps into chassis, eliminating need for mounting hardware. The cap snaps open for quick and easy fuse insertion and removal. Aesthetically styled to complement modern instrument panels, the holder is available in several color combinations.

**HOW TO ORDER LOW PROFILE FUSEHOLDERS**
Six digit number is a coded description of fuseholder

| 348 | 6 | 4 | 5 |
|---|---|---|---|
| A | B | C | D |

A Series Number **348** for 3AG Standard fuses.

B Terminal Style: **6,** 3/16" w. quick-connect and solder type; **8,** ¼" w. quick-connect and solder type.

C Bezel Color: Specify **1,** red; **2,** green; **3,** yellow; **4,** blue; **5,** white; **7,** black; **9,** gray.

D Cap Color: Specify **1,** red; **2,** green; **3,** yellow; **4,** blue; **5,** white; **7,** black; **9,** gray.

**NOTE:** To order a cap assembly **only,** use **348** series number and insert a **0** in the terminal style and bezel color locations (**348 001**). To order a body assembly **only,** use 348 and insert a **0** in the cap color location (**348 850**).

## Littelfuse offers more than 6,000 kinds of fuses, fuseholders, circuit breakers, switches, and relays, including the following:

¼" dia. x 1¼" long 3AG fuses for electronic circuit protection applications.

**311 Series**
Glass tube. Medium-acting for automobiles, radios, amplifiers, etc. 4-30 amps.

**312 Series**
Glass tube. Fast-acting for general fuse protection. 1/100-10 amps.

**313 Series**
Glass tube. Slo-Blo. Designed to withstand momentary high-current surges but to open quickly on sustained overloads. 1/100-30 amps.

**314 Series**
Ceramic tube. High interrupting capacity up to 10,000 amps at 250 volts. 1/8-30 amps.

All fuses shown above can be supplied with pigtail leads for "Soldered In" applications. Similar electrical performance also available in 9/32" x 1-1/4" and 13/32" x 1-1/2" Fuses.

**342 (000) Series**
3AG Miniature, Space-saving Panel Fuseholder. Rated at 20 amperes to 250 volts.

**341 (000) Series**
3AG Panel Fuseholder with screw driver slot knob. Rated at 15 amperes to 250 volts.

**342006**
3AG Watertight Panel Fuseholder. Rated at 20 amperes to 250 volts.

**344 (000) Series**
3AG Indicating Fuseholder for visual display of blown fuse. Two lens styles available. Rated at 20 amperes to 250 volts.

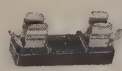
**340251**
3AG Shielded Fuseholder. Eliminates radio frequency interference. Rated at 30 amperes to 250 volts.

**Subminiature Picofuse**
9/32" long x 3/32" dia. Axial leads—275 (000) Series. Radial leads—276 (000) Series. 1/16-15 amps to 125 volts.

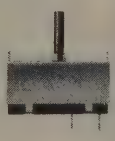
**Subminiature Microfuse**
Plug-in or pigtail types with transparent or metal caps. 10,000 amp short circuit capacity. 1/500-5 amps to 125 volts.

**Subminiature Fuseholder**
For picofuse and microfuse. Available in standard, indicating, or R.F. shielded types.

**Fuse Clips**
Available with solder lugs, with and without fuse stops and for printed circuit board mounting.



**Fuse Blocks**
Open fuse mountings with solder, screw or quick connect terminals. 1-12 poles.



**Circuit Breakers**
Manual reset breakers. Rated currents 4/10-4.1 amps to 250 volts.

**Switches**
Momentary action SPST switches. Rated at 5 amps-125 volts or 2.5 amps-250 volts.

**Relays**
Low voltage power relays for automotive, marine and recreational vehicle applications.

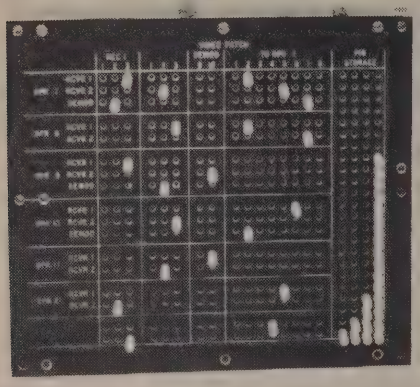
MATRIX BOARDS
SLIDE SWITCHES
LIGHT INDICATORS

# MATRIX PROGRAM BOARDS



CO-ORD Matrix Program Boards are composed of 2 to 10 decks of contacts that are bussed on .250 centers. The contact rows of one deck are usually oriented perpendicular to the rows of adjacent deck(s) so as to obtain switching crosspoints. Electrical connections of the bussed contact rows are effected by inserting shorting pins at the desired crosspoints; "CO-AX", phone plug type pins are available for networks which require component insertion (Diodes, resistors, etc.). Single board matrices of up to 11,000 crosspoints are available in standard or special arrangements. Bussed and isolated contacts can be had alone or in combination. Panels may be screened, engraved, or fitted with pre-punched templates for rapid program changing.

U. S. Patent No. 3,349,361

## APPLICATIONS

- Computer memories
- Cordless patch panels
- Function generators (Analog/Digital)
- Power distributors
- Thermocouple signal selectors
- Circuit/Component test programmers
- Lighting systems (Special effects)
- Variable sequence selectors
- Variable diode matrices
- Code generators
- Traffic control panels
- Decade switches
- Vending machine control
- Numeric controlled machinery
- Data channeling and logging
- Communications distributors

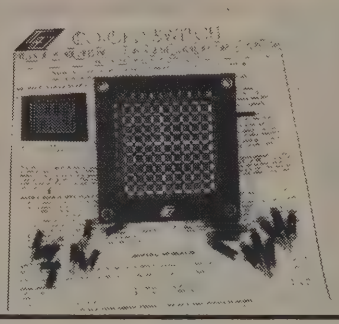
## FEATURES

- Closed entry contacts
- High mechanical environment capacity
- Low interlead capacitance
- Attractive and uncluttered
- Compact package
- Standard sizes available
- Permits insertion of components into network without soldering
- Wide variety of switching combinations

## SPECIFICATIONS

- Contact Resistance
  - a Total Pin Resistance: .004 OHM MAX.
  - b Volume Resistivity of Strip: .003 OHM/IN
- Breakdown Voltage: 1000 VRMS MIN.
- Current Capacity: 5 AMPS Continuous (up to 100 amps on special application)
- Materials:
  - a Plastic Parts: Black Phenolic XXX
  - b Flexible Contacts: Heat Treated Beryllium Copper
  - c Terminals: Brass
  - d Finishes: Gold, Silver or Nickel

## PROGRAM BOARD KITS



KIT BPS-1 consists of a 10 x 10 matrix board similar to #63014-1, below. 10 shorting pins and 10 "CO-AX" diode pins with 1N4148's installed ..... **$30.00**

KIT BPS-2 is the same as BPS-1 but without diodes ..... **$25.25**

10 x 10 matrix board ..... **$20.00 ea.**

Shorting pin ..... .22 ea.

Diode pin w/1N4148 ..... 1.10 ea.

Diode pin w/o diode ..... .56 ea.

TENTH INCH MATRIX
AT $.08 PER POINT

These Matrix Program Boards are designed to meet the increased technological requirements for miniaturization in electronic systems and equipment. They have all the same features of the larger matrices and can be supplied in from 2 to 4 decks of bussed contacts. Single matrix boards of up to 2500 crosspoints can be furnished in one solid unit, with rugged Shorting and CO-AX (diode) pins available for programming functions. A standard 2 deck matrix measures .315 inches thick from the front to rear panel; program pins are .280 inches long by .063 inches in diameter. Termination of the bussed contacts are to .040 diameter pin terminals, which allow the matrix to be plugged into mating female receptacles or connected to directly by wave, dip, or hard soldering. Contact resistance is only .005 ohms per crosspoint; breakdown voltage 600 VRMS; current capacity 3 amps continuous.

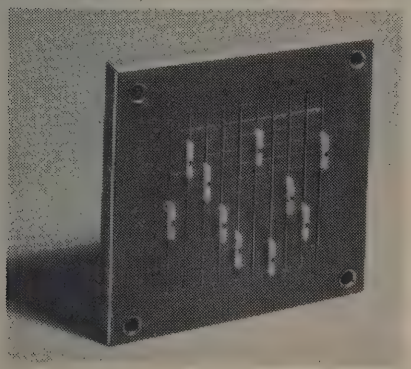
## MATRIX SLIDE SWITCHES



CO-ORD Matrix Slide Switches are designed to provide reliable, low cost matrix switching for applications requiring manual data entry operations. These simplified, versatile switches are available in various ranges of standard sizes, with capacities including up to 25 outputs per switching line. Each output is controlled by a separate contact slider which in turn can provide as many as 25 positions (variations). Special designed Matrix Slide Switches can be supplied with as many as 5000 switching positions.

Switching quality and reliability is achieved through such advanced designed features as; positive detent positioning resulting from the unique individual GSD (Guide-Slide-Detent) Housing, panoramic viewing of the switching functions facilitating rapid circuit selection and minimizing data entry error, rugged solid block closed construction containing each contact and slider in a basic unitized assembly, electrical and mechanical integrity assured through the use of only the highest quality materials.

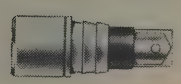
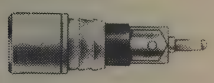
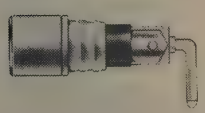
# MINI-BRITE "simplicity" in subminiature indicator lights



MINI-BRITE 75001 Panel Mount



MINI-BRITE 75002 Panel/Printed Circuit Mount



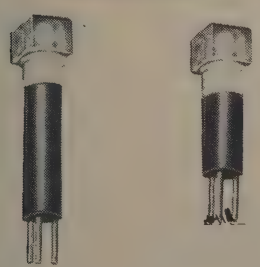
MINI-BRITE 75003 Printed Corcuit Mount

**MINI-BRITE** subminiature indicators have been engineered and are manufactured with the idea of achieving the ultimate in simplicity, standardization, reliability and cost reduction . . . this has been accomplished by the design of a unique housing and contact arrangement centered on the use of standard, wire terminal lamps . . . which provides light intensity comparable to units five times their size.
Conforms to MS90308. U. S. Patent #3,559,153

Write for Bulletin 1470

- **FRONT RELAMPABLE** just remove the snap on cap
- **STANDARD LAMPS** any T-1 lamp, wire lead type
- **EASY INSTALLATION** press housing into hole
- **WIRING OPTIONS** combination solder/female terminal
- **MOUNTING OPTIONS** panel mounted, panel/printed circuit
- **HIGH DENSITY PACKAGING** mount on .250 centers.

STANDARD OR SPECIAL CONFIGURATIONS



## MINI-TRANS subminiature Transistorized indicator lights

The MINI-TRANS series incorporates a silicon planar transistor, either NPN or PNP, which will turn on the indicator and provide an extremely bright indication from signal levels as low as 0.30 mA. In addition to standard circuits, specially designed physical and electrical configurations can be furnished to customer specifications. Units can be supplied with a built-in resistor of any standard value. This unique transistorized design capability is ideally suited when extremely low level signals are used for front panel indications, assuring long life and maximum brightness. A wide range of standard incandescent lamps are available to meet your requirements. Except for the increased length of the housing, these indicators are compatible and have all the features of the MINI-BRITE series.

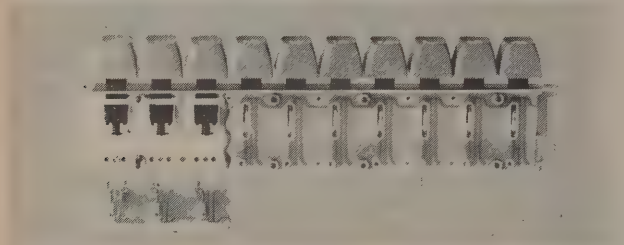
# Maxi-SWITCH KEYSTRIPS AND KEYBOARDS

The Maxi-Switch Company is a leading producer of pushbutton switch components and switch assemblies for the computer, photo-copy, business machine, automation and peripheral equipment industries.

The Maxi-Switch Keystrip construction technique facilitates the design and production of custom keyboards. Individual pushbutton stations may be purchased singly, in Keystrips, numeric blocks, or as completed Keyboards, with or without encoding circuitry. The wide range of features, options and accessories complement Keyboard adaptability.

## 1600 & 1800 KEYSTRIPS



**1600 KEYSTRIP**

Maxi-Switch Keystrips present a unique approach to switch construction. These modular units offer long mechanical life and high quality in readily available, off-the-shelf assemblies. Combinations of different contact types, contact forms and plunger actions may be used within a single Keystrip. Up to 20 or more stations may be accommodated per Keystrip with standard spacing of ⅝″ or ¾″ between stations. Other spacings are optionally available.

Standard Series 1600 and Series 1800 switches are equipped with glass reed contacts, and differ only in frame height and available options (1600—1.5″ high, 1800—1.1″ high). Contact options (1600 only) include cross-bar palladium leaf contacts and 15 ampere snap-action power contacts. Reset and lockout solenoids may also be used with Series 1600 Keystrips.

Individual reeds may be tied to a common bus on one side, or brought out to separate terminals, depending on the requirements of the application. The common bus feature saves component and mother-board space, and requires fewer solder connections.

## SPECIFICATIONS

### BUTTONS:

A variety of lighted and unlighted buttons available in several colors. Ask for Maxi-Switch Bulletin MS 2500 for information on buttons and Keystrip/Keyboard illumination.

### TERMINALS:

Printed circuit, pierced solder lug, plug-in male/female contacts, wire-wrap, .110 quick connect.

### CONTACTS:

Glass Reed, Form A or B, 28 VDC @ 250 Ma.

Cross-Bar Palladium leaf contacts, Form A, B or C (1600 only). 3 Ampere @ 28 VDC, 3 Ampere @ 115 VAC.

Snap Action Power Contacts (1600 only). 10 Ampere @ 250 VAC, ½ Ampere @ 125 VDC; or 15 Ampere @ 250 VAC, ½ Ampere @ 125 VDC.

### PLUNGER ACTIONS:

Momentary Contact (standard)
Interlatch and Lockout
Alternate Action (push-push)
Lockout Only
Key Motion Sensing
Cross-Bank Interlatch and Lockout

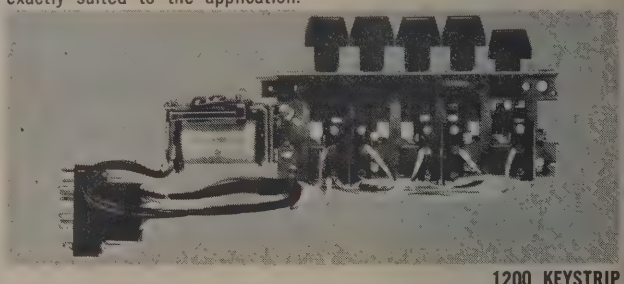
## 1200 & 1400 KEYSTRIPS

Series 1200 and 1400 Keystrips feature two-piece steel frames as the basic structure, with pushbutton components mounted between two frame halves.

Series 1200 and 1400 Keystrips may be lighted with one or two lamps per switch station (Form A lamp contact not available on 1400 switches with more than 3 bits). Midget groove T-1¾ bulbs are used. Lamp sockets may be furnished with solder lugs, AMP 78 Series taper tabs, 3″ pigtail lead wires, or with common bussing.

Series 1200 Keystrips provide circuit switching of up to 20 positions per keystrip. Many action options are available, and variations of standard design may be quickly accomplished using basic shelf stock for fast prototype and production service.

The range of available contact forms (A, AA, B, C or F), plunger actions, terminals and buttons allow the designer to specify switches which are exactly suited to the application.



**1200 KEYSTRIP**

Maxi-Switch offers the newest concept in binary coded decimal switching. Series 1400 switches represent a significant advancement in the development of simplified mechanical encoding techniques, eliminating the maze of contacts, diodes, and interconnections normally associated with switch encoding.

The Maxi Binary Switch will provide 3, 4, 5 or 6-bit binary output through snap-action contacts rated at 3 amperes, 300 watts, Form "A" (SPST/NO) or Form "C" (SPDT).

## KEYBOARDS

Maxi-Switch is one of the major suppliers of encoded keyboards for data terminals and other alpha/numeric data entry applications. Users may choose from a wide range of standard off-the-shelf versions such as ASR-33, ASR-37, APL 3270 and ANSI Standard. Smaller styles such as the popular 16-key encoded hex pad or 12-key, wired-only pad are also available at attractive prices.

Chances are Maxi-Switch can supply your keyboard need with a standard product, and that means a savings of both time and money. For specific information, ask your local Maxi-Switch representative for a standard keyboard catalog, or contact the factory directly. Maxi-Switch invests as much in good customer service as in innovative keyboard design. We try hard to do business on your schedule. If that sounds like a refreshing change, give Maxi-Switch a try.

The Maxi **standard** keyboard line includes several series, with many variations available within each.
Keyboard encoding may be standard USASCII or EBCDIC, or special codes as required. Standard data levels are provided. Keytops are available in a variety of sizes, styles, colors and languages. Custom legends supplied on request.

- **2900 Series:** Modular reed switch keyboards. Reeds are replaceable from the back of the circuit board should it ever be necessary. Modules in 1 through 6 stations. Proven to 100,000,000 operations.
- **4000 Series:** Low cost/high reliability solid-state keyboards with capacitive coupled switches. Latest breakthrough in keyboard technology. Long life, environmental resistance, and large capacitance change during switching to produce reliable switching.
- **6000 Series:** Low-cost mechanical switches with gold contacts. Cruciform keytop mounting. Low profile design.

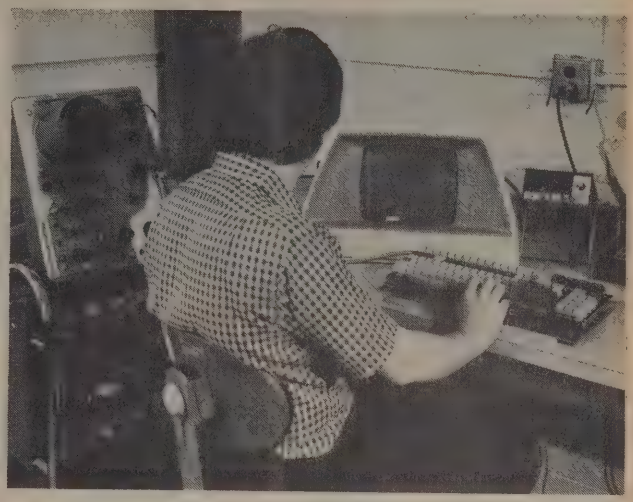
Maxi provides a **custom** keyboard design service. Using keyboard design kits available from local representatives (see index, back of this catalog for addresses) or direct from the factory, users may specify all keyboard parameters, including types and location of key switches, operating force, type of logic, code, button styles, colors and legends.

# SPECIFICATIONS

- **2900 Series** (sold only as part of a keyboard assembly)
  Ht. — 1.54″, including keytop
  Total Travel — .175″, ±.010″
  Operating Life — 100 million (typical load)
- **4000 Series** (sold as complete keyboard only)
  Ht. — 1.45″, including keytop
  Total Travel — .165″, ±.010″
- **6000 Series**
  Ht. — 1.220″ including keytop
  Total Travel — .120″, ±.027″
  Operating Life — 10 million (typical load)

# PRODUCT DEVELOPMENT

Maxi engineers are devoted to an on-going program of innovation in keyboard design. For example, Maxi is currently the only major keyboard manufacturer to offer mechanical, reed and solid-state keyboards. New products are continuously introduced to help the company stay abreast of rapidly expanding needs in the information processing industry. Watch for regular product announcements resulting from this developmental commitment.



# ENGINEERING/QC

Maxi-Switch engineers have extensive experience in the design and development of custom keyboards for special applications. Their logic and keyswitch designs are subject to rugged life tests, and finished keyboards must pass rigid quality control procedures at several stages of production. Final keyboard checkout insures that each unit performs under load and is thoroughly tested to meet customer specifications.

# MANUFACTURING

All Maxi-Switch keyboard and keystrip products are manufactured in a new and modern facility in suburban Minneapolis. In-house capabilities include keyboard design and layout, automatic soldering, keyswitch molding, metal stamping and automated assembly. Skilled technicians man the production assembly lines, using only the best in components and materials.

# CIRCUIT PROTECTION

**LIGHTNING / TRANSIENT SURGE / PROTECTION**

## AC POWER LINE PROTECTION: EQUIPMENT AND FACILITY PROTECTION

CATALOG 700

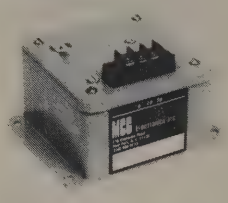
### AC POWER LINE PROTECTION

**for 120, 240, 277, 380 & 480VAC line 1φ, 3φ Delta, wye 50/60/400Hz service**

**PROTECTION FOR**

- **Computers**
- **Instrumentation & Control**
- **Communications Equipment**
- **Switching & Signalling**

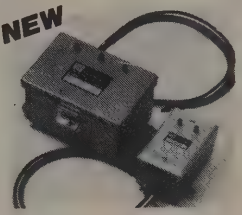
### SERIES P



The Series P operates rapidly to prevent damage to equipment operating on the AC power lines, by switching rapidly to a clamping state whenever a transient exceed the clamping threshold. The units operate on overvoltages of either polarity, on 1φ and 3φ lines and recover automatically when the transient expires. Severe transient conditions cause the protector to switch to a crowbar mode and cause an external fuse or circuit breaker to operate. Available for 120, 240, 380 & 440VAC lines. 1φ and 3φ service.

### MCG SERIES

NEW



MCG series of AC line Protectors is designed to rapidly clamp (in nanoseconds) substantial transients of either polarity to safe levels. Energy handling capabilities range from 160 joules to 480 joules and is available for use on 120, 240, 277, 380 & 480VAC RMS lines in 1φ and 3φ service. LED's indicate line status and integrity of internal fusing.

### FACILITY PROTECTION

NEW

The 2000 series of AC Power Line Protectors are designed to protect 120/240/380/480VAC, 1φ and 3φ power systems from electrical transients caused by lightning, induction and switching surges. Operating in nanoseconds, the protectors will clamp vigorously whenever the threshold level is exceeded and recover automatically when the transient expires. Provides protection for computer systems, traffic and railroad signal systems, automatic controls, broadcasting and communication areas, etc.

### AC LINE MONITOR

NEW

The P1213 unit is designed monitor the normal 120VAC 60/400Hz and to disconnect load from the line when the put AC voltage level (RMS) ri to 130VAC and above. When AC line drops below the 130 threshold, the P1213 immedia and automatically reapplies power to the load. The P121 rugged constructed to switch to 25 amps and yet use milliwatts of power in the st by mode.

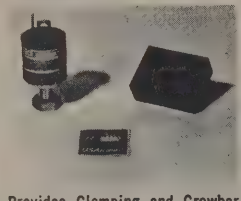
## PROTECTION COMPONENTS: AC/DC CIRCUIT LEVEL PROTECTION

CATALOG 830

### LVC-1

The LVC-1's are overvoltage protectors that sense when a DC overvoltage is occuring and switch rapidly from an "open" to a virtual "short" circuit within microseconds. Any potentially destructive energy from transients, maladjustments, series regulator faults, etc. is now provided with a very low resistance path around sensitive components, such as IC's, transistors, etc. TRIP voltages from 5.2V-600V @ 3A to 470A current levels are available.

### LVC-10

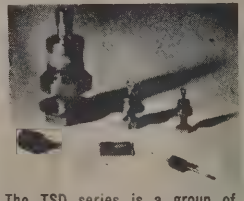


Provides Clamping and Crowbar Protection in a single package. The initial transient is zener clamped for a fixed interval (adjustable) and then the LVC-10 switches to a "brute force" crowbar (short circuit) mode, if the transient persists. Avoids NUISANCE tripping in electrically "noisy" areas. The LVC-10's are available with clamping voltages ranging from 4.7 to 100V at currents from 3A to 235A.

### CCB-10

Series CCB Clamping Crowbars determine automatically on an energy basis whether a clamping or a crowbar type of protection is required. For low energy transients, the CCB merely clamps the transient to safe levels. For large energy transients, the CCB will switch to a crowbar (shorting) mode to provide brute force protection. Clamping voltages, from 5.3V to 200V at current levels of 3A to 235A are available.

### TSD

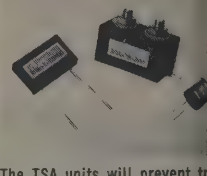


The TSD series is a group of easy-to-use transient suppressors that are well suited to protect a wide variety of electronic equipments from failure due to high voltage transients.

These units will rapidly clamp, by zener action, an incoming voltage transient to a selected voltage level by diverting the transient energy through itself for the duration of the overvoltage. Recovery is automatic when the transient expires.

Clamping voltages from 4.7V to 800V are available with energy levels from .1 to 30 joules.

### TSA



The TSA units will prevent t sient damage by rapidly swit ing from an open circuit t clamping state whenever a t sient voltage exceeds the cla ing threshold. These units o ate on overvoltages of eit polarity and recover autom cally when the transient dis pears. The TSA-1.7's and TS units are especially suited connection across the AC l Voltage clamping from 4.7V 400V peak.

## SIGNAL/DATA/TELEPHONE LINE PROTECTION: INSTRUMENTATION AND SYSTEMS

CATALOG 310

### INTERFACE PROTECTION

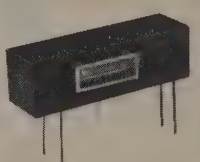
"Interface Protection" is a comprehensive 10 page brochure on the use of signal line protectors to protect signal/data/telephone lines from transient overvoltages caused by lightning, heavy machinery etc.

Standard transient test waveforms are reviewed and MCG units to meet these specifications are recommended. Detailed model descriptions and a selection guide are included to assist the engineer in protecting his sensitive semiconductor devices.

### SLP-2, 3

The SLP-2 and -3 protectors were expressly designed to protect signal/data/telephone lines from transient overvoltages (ANSI C37.90A) caused by lightning, heavy machinery, elevator motors, generators, etc. The SLP interfaces between the signal line and the sensitive circuit to provide a sophisticated blend of high speed (nanoseconds) voltage limiting and brute force protection. The SLP's recover automatically to standby when the need for protection has passed. Protection levels range from ±6 to ±200V.

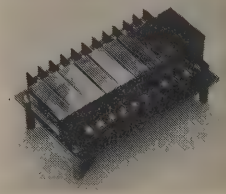
### SLP-4, 6



The SLP-4, -6 protectors are dual versions of the SLP-3 protectors and are designed to protect both the input and return circuit lines of a single circuit from the effects of transient overvoltages. (ANSI C37.90A) Protection levels range from ±6V to ±200V.

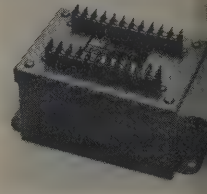
The new SLP units interface between the signal lines and the sensitive circuit to provide low cost, high speed protection.

### MULTIPLE SLP



Up to 10 SLP-2, -3, -5 or 4 SLP-4, -6 modules can be mounted on a heavy duty printed circuit board. Fitted with input and output terminal strips to facilitate ease of installing or retrofitting. The assembly can be mounted flush with a chassis or supported ¼" or more above the chassis. With a full complement of SLP's, the board and components will fit in a 5¼" x 3" x 1½" (L x W x H) area.

### ENCLOSED SLP



SLP units are incorporated i heavy duty steel enclosure provide an easy method of ins lation in the field. Up to 20 units can be accommodated input and output terminal connections provided at the of the box. Installation is e Bolt down the box and then sert signal inputs and outp under the appropriate term strip screw and tighten.

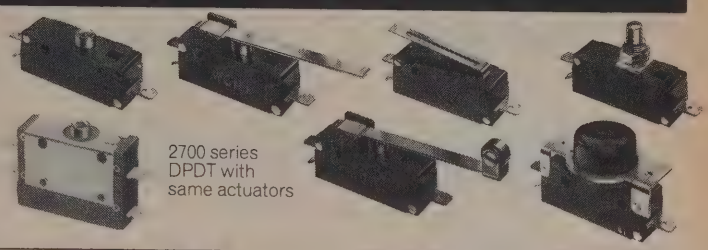
## snap-action

High reliability through design simplicity. Fewer parts to wear—minimum spring flexing increases life. No coil springs. Less than .005" differential travel. SPDT, SPST. **2600 Series**—20 A, 125-250 V AC; 1 HP 125 V AC; 2 HP 250 V AC; 50/60 Hz. **2650 Series**—25 A 125-250 V AC; 1½ HP 125 V AC; 2 HP 250 V AC. Operating force: 20 oz. max. **1600 Series**—Light operating force—10 oz. max. 15 A 125-250 V AC; ¾ HP 125 V AC; 1½ HP 250 V AC. Also available as **2700 Series** in DPDT models with same actuators and rated: 20 A, 125-250 V AC, 2 HP 250 V AC, 50/60 Hz. U.L. Listed. C.S.A. Approved.



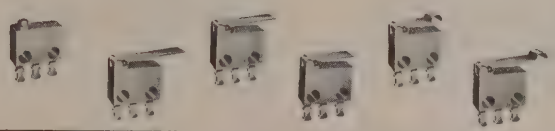
2700 series DPDT with same actuators

## miniature snap-action

1 3/32" x 5/8" x 13/32" case. Oversize silver contacts. Excellent wiping action and low contact bounce. SPDT, SPST. **4600 Series**—6—14 oz. max. operating force. 15A, ½ HP 125-250 V AC; ½ A 125 V DC; ¼ A 250 V DC; 4 A "L" 125 V AC. **4700 Series**—Light operating force—8 oz. and 75 gram max. 10 A, ⅓ HP, 125-250 V AC; 4 A "L" 125 V AC. U.L. Listed. C.S.A. Approved. **4613 Series** meets requirements for TV fire protection.

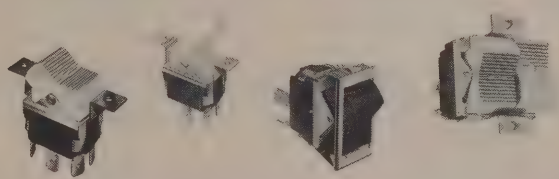
## sub-miniature snap-action

**4900 Series**—smallest precision snap-action switches available. Case dimensions less than .250" x .300" x .100". Choice of contacts, terminals and actuators. SPDT. 2 A 125-250 V AC; 2 A (Res.) 30 V DC; 1 A (Ind.) 30 V DC. Meet MIL-S-8805 specifications. Temp. range —100° F to +185° F. Up to 250° F continuous duty temp. ratings available.



## rocker and paddle

Your choice of actuator color, style. Proven reliable detent mechanism. Snap-in mounting optional. Variety of SP and DP, 3-pole, 4-pole and 2-circuit models. **0801 SP and 0811 DP Series** — 20 A 277 V AC; 1½ HP 125-250 V AC. **1801 SP and 1811 DP Series**—6 A 125 V AC; 3 A 250 V AC; ¼ HP 125-250 V AC. **0840 3-pole and 4-pole series** — 17 A 277 V AC; 6 A 600 V AC; 1 HP 125 V AC; 2 HP 250-480-600 V AC; 1, 2 or 3 phase. U.L. Listed. C.S.A. Approved.



## miniature rocker and paddle

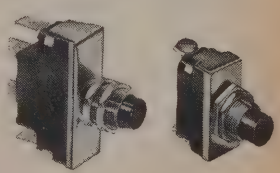
High rating reliability. Choice of standard or specially styled actuators terminals, circuitry to meet your needs. Optional snap-in mounting. **0805 Series**—12 A 125 V AC; 6 A 250 V AC; ½ HP 125-250 V AC and 15 A 125-277 V AC, ¾ HP 125-250 V AC. **1805 Series** 8 A 128 V AC; 4 A 250 V AC; ⅓ HP 125-250 V AC. Also available with 6 A "L" 125-250 V AC rating. **0806 Series**—features neon indicator light. Same ratings as 12 A 0805 series switches. U.L. Listed. C.S.A. Approved.

## toggle

Reliable proven positive detent mechanisms. Wide variety of circuitry in 6 A to 20 A ratings. SP, DP, 3-pole and 4-pole models. Choice of spade, screw or solder terminals. U.L. Listed.

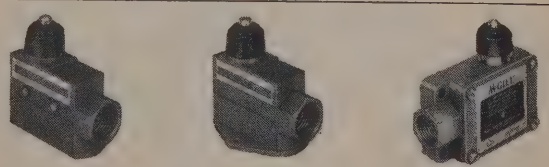
## push button

Momentary and maintained contact push-button switches up to 30 A. Variety of mechanisms, including snap-action, SPST, SPDT, 2-circuit. U.L. Listed.



## precision metal-cased

Applicable for limit, safety and automatic control uses. In die-cast housings with variety of direct action and adjustable level actuators. **1502 Series** 20 A, 125-250, 480 V AC, ½ A 125 V DC, ¼ A 250 V DC. **1503 Series** same rating with added 10 A, 125 V AC Lamp Load and 1 HP 125 V AC, 2 HP 250 V AC. U.L. Listed.



## specially-engineered

Modifications of basic switches to meet application requirements. Special actuator designs and colors, mounting hardware and attachments to provide more design latitude, style-appeal and functional reliability. Complete application engineering abilities and facilities to develop the best answer to your special switch problems.

### MANUALLY OPERATED SWITCHES

#### PUSHBUTTONS

**AML p. 2**
Wide choice of visual display with power, electronic or solid state switching. Single level termination with all common types. Choice of snap in front mount or strip and matrix mount.

**Series 2 p. 14**
Individual or strip, snap in mount. 1 to 4 section buttons for many display possibilities. Widest choice of switch modules, plus coil operation.

**Series 3 p. 18**
Matrix, individual or strip mount. 1 or 2 section. 5 amp rating. Various button styles and visual display.

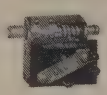
**Series 4 p. 21**
Snap in front mount with easy wiring for low installed cost. Single section. Electrical ratings from 10 amps to gold contacts to solid state switching.

**Unlighted Pushbuttons p. 24**
Bushing mounted. Wide choice of circuitry or ratings.

**SN/SD p. 25**
Hall effect, solid state switching. Wide selection of buttons and legends. Snap in or P.C. board mount in standard or low profile modules.

### SPECIAL PURPOSE

**Type AC p. 26**
Door interlock switches for use in hazardous electronic equipment. Variety of precision snap-acting switches.



### TOGGLE SWITCHES

**Series 8 p. 27**
Complete miniature manual line. 6 amp rating. 1 to 4 poles. Variety of actuators, contacts and termination. Use where low cost and small size are critical requirements.

**Type TS p. 29**
Standard size toggles, 1 or 2 pole. Various actions, circuitry and termination. Use where a lower cost standard size toggle is required.

**Type TL-TP p. 30**
Sealed toggle and rocker toggle series. Standard size. 1, 2 and 4 poles. Various actuators, termination, and circuitry. Has both mil. listings and UL listings.

**Type AT p. 32**
Toggle switch assemblies using basic switches. Wide variety of ratings, contacts, actuators, terminals, and sealing. Mil. listings available.

### POSITION SENSING SWITCHES

#### BASIC SWITCHES

**Type SX p. 35**
Smallest snap-action switches from MICRO SWITCH. Rated to 7 amperes. Choice of actuators and terminal styles. Use where the smallest and least weight, snap acting switch is essential.

**Type SM p. 36**
Slightly larger than SX switches. Rated to 11 amperes. Choice of contacts, actuators and terminal styles. Use for communications/office equipment and other smaller application needs.

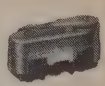
**Type V3 p. 37**
**Type XL p. 38**
Standard or low operating forces. Rated to 15 amperes. Use for appliance-vending machine and similar applications. XL Solid state Hall effect integrated circuit in a V3 package.

**Type Z & A p. 39**
Standard size switches. Ratings to 25 amps. High precision — long life. Wide choice of actuators and terminals. Use for general purpose applications.

**Type SE/XE p. 42**
Sealed, environment-proof switches. Rated to 7 amperes. Choice of auxiliary actuators and terminal styles. Use where a sealed SM or a sealed SX is needed. Mil. listings.

**Type HM p. 43**
Hermetically-sealed switches. Rated 5 amperes, 28 VDC and 125 VAC, 400 hertz. High temperature version to 500°F (260°C). The ultimate in sealing, plus small size. Mil. listings.

**Type HS p. 44**
Hermetically sealed switch. Rated to 25 amperes, 28 VDC. High temperature version to 300°F (149°C). Choice of integral levers and terminals. Standard size switch with the best seal. Mil. listings.

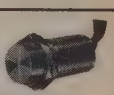


**Type HT p. 44**
High temperature switch (up to +1000°F 538°C). Side and panel mount. Rated 3 amperes 125 VAC. Use for oven/furnace applications.

**Mercury Switch p. 45**
Low cost hermetically-sealed switches. Easy installation and low force operation. Tilt (position-sensitive) switches are actuated by the normal movements of machine parts.

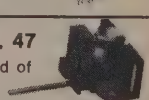
### SOLID STATE NO TOUCH SENSORS

**103SR/400SR p. 46**
Magnetically operated Hall effect sensors. May be directly interfaced with most electronic circuits.



**XK p. 46**
Eddy current, ferromagnetic operated sensor. Rugged plastic package and direct interface with logic devices.

**AV p. 47**
Vane operated Hall effect sensor. 0 to 100 KHz, speed of operation.



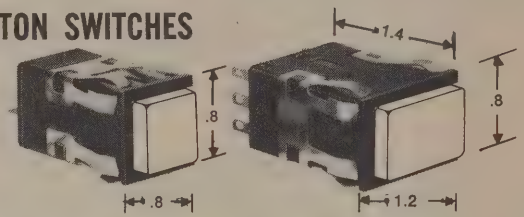
**FW p. 47**
Choice of ferromagnetic or all metals sensing proximity switches. Protected from RFI effects. Environment sealed. Direct interface with logic devices.

**MICRO SWITCH** A DIVISION OF HONEYWELL
FREEPORT, ILLINOIS 61032 / PHONE (815) 235-6600

# AML ADVANCED MANUAL LINE

- **Wide selection of pushbutton, rocker, and paddle (toggle type) switches accommodates different functions and promotes operator efficiency.**
- **Solid state, electronic, and power duty control.**
- **Full or split screen incandescent display of vivid transmitted color, projected color (for neutral display when unlit), and dead front (hidden color).**
- **Wide-angle visibility LED's and line voltage neon display (for power switches).**
- **Switches and indicators terminate at the same shallow depth (1.4 inches) for convenient wiring.**
- **Snap-in surface mount or sub-panel (hidden bezel) mount with mounting bracket assemblies.**
- **Designed to meet UL, CSA, CEE24 and IEC standards.**
- **Choice of 7/64, 9/64, 13/64 and 5/16-inch hot stamped legend.**

## PUSHBUTTON SWITCHES



AML pushbutton switches are available in square and rectangular housings for solid state or electronic control, and in rectangular housings for power duty applications.

**BUTTONS (pages 5, 6) AND INCANDESCENT LAMPS (page 13) ARE ORDERED SEPARATELY**

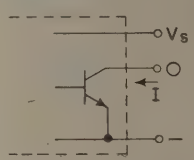
## AML11 SOLID STATE PUSHBUTTON SWITCHES . . . INCANDESCENT DISPLAY

AML11 switches provide low voltage signals that interface with nearly all DC logic level loads. The contactless switching mechanism combines the performance-proven MICRO SWITCH Hall effect generator, a trigger circuit and amplifier on a silicon chip. The TTL compatible output "snaps" from high to low (low to high) as the permanent magnet plunger moves adjacent to it.

### ELECTRICAL SPECIFICATIONS — SOLID STATE SWITCHES

| Electrical Characteristics | | | | | | Absolute Maximum Rating | | | |
|---|---|---|---|---|---|---|---|---|---|
| Integrated Circuit Function | Supply Current (Max.) | Output Voltage (Operated) | Output Leakage Current Max. (Released) | Switching Time Max. Rise 10% to 90% | Switching Time Max. Fall 90% to 10% | Supply Voltage (Vs) | Voltage Externally Applied to Output | Loads to Output | Storage Temperature |
| 5 VDC Sinking[1] | 3.5 mA (Released) 6.5 mA (Operated —no load) | +.4 Volt (Sinking 8 mA) | 2.0 μA | 1.0 μsec (Sinking 8 mA) | 1.0 μsec (Sinking 8 mA) | −.5 to +7.0 VDC 0° to +65°C (+32° to +149°F) | −.5 Volt min. +15 Volts max. (Off condition) | 20 mA (Sinking) | −40° to +65°C (−40° to +149°F) |
| 6-16 VDC Sinking[2] | 6.5 mA @ 6 VDC 10.0 mA @ 16 VDC (Plus load current)[3] | +.4 Volt (Sinking 20 mA max.) | 20 μA | 1.5 μsec (Sinking 20 mA) | 0.5 μsec (Sinking 20 mA) | −1.2 to +20 VDC | +20 VDC max. in Off condition only −.5 VDC min. in Off or On condition | 40 mA | −40° to +65°C (−40° to +149°F) |

CURRENT SINKING OUTPUT



1 Over temperature range of °C to +55°C (+32° to +131°F) and supply voltage of 4.5 to 5.5 VDC.
2 Over temperature range of 0°C to +55°C (+32° to +131°F) and supply voltage of 6 to 16 VDC.
3 At 24°C (+75°F)

### ORDER GUIDE — Solid State Pushbutton Switches/Incandescent Display

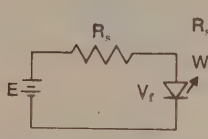
ADDITIONAL AML11 OPTIONS: raised bezel housings, two-level alternate-action, non-lighted versions, and rectangular housings with two lamp circuits. Refer to Product Brochure AML.

## AML12 SOLID STATE PUSHBUTTON SWITCHES . . . LED DISPLAY

AML12 switches combine Hall effect switching reliability with LED display to provide a completely solid state device. Electrical specifications are the same as shown on the facing page.

### LED APPLICATION INFORMATION

Internal resistors control the LED current to a nominal 20 mA on 5 VDC devices. For those devices without internal current limiting resistors, suitable external control of the LED current must be provided. It is recommended that a minimum of 5 VDC open circuit voltage with an appropriate series resistance be used to drive LED devices. This minimizes the effect of temperature (current variation) on forward voltage of the LED. Refer to equations.



$$R_s = \frac{E - V_f}{I_f}$$

WHERE: $R_s$ = Series Resistance
E = Supply Voltage
$V_f$ = Forward Voltage of LED
$I_f$ = Circuit Current

If a diode is added in series for reverse polarity protection then:

$$R_s = \frac{E - V_f - V_{PD}}{I_f}$$

WHERE: $V_{PD}$ = Forward Voltage of Protection Diode

### ORDER GUIDE — Solid State Pushbutton Switches/LED Display

**AML12 C B B 2 AA**

| HOUSING TYPE | BEZEL COLOR | LED COLOR/ VOLTAGE | TERMINAL TYPE DIODE PROTECTION | CIRCUITRY CODES |

TRANSMITTED COLOR: Display color can be distinguished whether lighted or unlighted.

PROJECTED COLOR: Display is white when unlighted and colored when lighted.

DEAD FRONT: Display appears black when unlighted. Hidden legend/ color appear when lighted.

* Amber and light green are not available with Display/Legend Types 50 and 60.

Split colors for Display/Legend Types 10, 11, 20, and 21 are visible whether lighted or unlighted. On all other types, split colors are only visible when lighted.

ADDITIONAL AML51 OPTIONS: other extended height buttons, and black and gray button colors for non-lighted applications. Refer to Product Brochure AML.

**MICRO SWITCH** A DIVISION OF HONEYWELL
FREEPORT, ILLINOIS 61032 / PHONE (815) 235-6600

## AML52 BUTTONS FOR LED/NEON DISPLAY

### ORDER GUIDE

**AML52 N 10 R**

| BUTTON TYPE | DISPLAY/ LEGEND TYPE | BUTTON COLOR |
|---|---|---|
| C — .19 — For LED Devices | Transmitted Color | R Red |
| N — .19 — For Neon Devices | 10 No Legend | Y Yellow |
| | 20 With Legend | G Green |
| | | B Blue |
| | | W White |
| | | K Black |

Note: Dimensions include the .060 in. bezel.

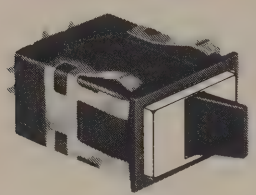
ADDITIONAL AML52 OPTIONS: amber, gray and light green buttons. Refer to Product Brochure AML.

AML52 buttons have a window which allows an LED or neon bulb lens to extend flush with the top of the button surface.

### BUTTON LEGENDING

To specify hot stamp legends, request the following legend order sheets: AML51 pushbuttons, FO-63394; AML51 lens, FO-63395; AML52 pushbuttons, FO-63504.

## PADDLE SWITCHES



**SWITCH COVERS (page 9) AND INCANDESCENT LAMPS (page 13) ARE ORDERED SEPARATELY.**

Paddle switch operators are permanently installed in rectangular housings. Colored covers (ordered separately) snap into the top of the housings to provide an attractive, uniform color display. Solid state, electronic control, and power duty switching.

### OPERATING ACTION OPTIONS

| 2-POSITION | | 3-POSITION | | |

# PADDLE SWITCH COVERS

## AML53/55 COVERS FOR PADDLE SWITCHES

Paddle switch covers are furnished in the same attractive colors as the buttons used in AML push-button switches and indicators. They provide an attractive, uniform color display, whether lighted or non-lighted.

AML53 covers are for non-lighted or incandescent display.

AML55 covers are used with LED and neon display paddle switches. The LED version has a "window" which allows the LED to be flush with the top surface of the cover. The neon type has a colored lens which extends over the neon bulb.

### ORDER GUIDE — Covers/Incandescent Display

(for AML13, 23, and 33 paddle switches)

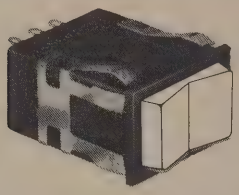
# ROCKER SWITCHES



ROCKERS (page 12, 13) AND INCANDESCENT LAMPS (page 13) **ARE ORDERED SEPARATELY.**

Rocker switches combine the low-profile appearance of pushbutton switches with toggle-action operation. Solid state, electronic control, and power duty versions are offered.

## OPERATING ACTION OPTIONS

| 2-POSITION | | 3-POSITION | | |
|---|---|---|---|---|
| Maint. | Maint. | Maint. | Maint. | Maint. |
| Mom. | Maint. | Mom. | Maint. | Mom. |
| Maint. | Mom. | Maint. | Maint. | Mom. |
| | | Mom. | Maint. | Maint. |

Note: Power duty switches have 2-position, maintained action only.

# AML14 SOLID STATE ROCKER SWITCHES... INCANDESCENT DISPLAY

AML14 switches provide low voltage signals that interface with nearly all DC logic level loads. As a permanent magnet plunger moves adjacent to the MICRO SWITCH Hall effect integrated circuit, the TTL compatible output snaps from high to low (low to high).

## ELECTRICAL SPECIFICATIONS

Refer to page 2.

ADDITIONAL AML14 OPTIONS: two lamp circuits; other two-position and three-position operating actions; .025 x .025 printed circuit, wire-wrap, or push-on terminals; and two 6-16 V sinking IC's. Refer to Product Brochure AML.

## ORDER GUIDE — Solid State Rocker Switches/Incandescent Display

**AML14 E B A 2 AA 01**

⚠1 The "MICRO SWITCH" identification is shown on this side of the switch housing.

# AML54/56 ROCKER OPERATORS

Rocker operators are furnished in the same attractive colors as the buttons used in AML pushbutton switches and indicators. They provide an attractive, uniform color display, whether lighted or unlighted.

AML54 rockers are for non-lighted or incandescent display.

AML56 rockers are used with LED and neon display rocker switches. The LED version has a "window" which allows the LED to be flush with the top surface of the rocker. The neon type has a colored lens which extends over the neon bulb.

## ORDER GUIDE — Rockers/Neon Display

(for AML36 switches)

**AML56 N 10 R K**

**ROCKER OPERATOR TYPE**
- **N**

Full Rocker with Colored Lens

**DISPLAY/LEGEND TYPE**

| | | **W** White |
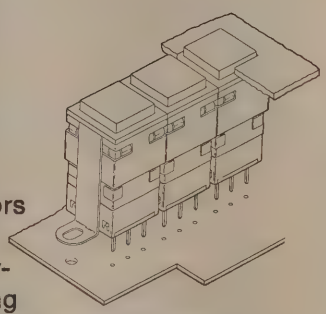
| | | **K** Black |

* NOTE: To order a ½-rocker without the LED "window," specify an AML54-E listing.

ADDITIONAL AML56 OPTIONS: gray, amber and light green rockers. Refer to Product Brochure AML.

## AML61 MOUNTING BRACKET ASSEMBLIES

This strip utilizes type F mounting brackets for printed circuit board mounting. Matrix mount also available.



AML switches and indicators can be subpanel mounted (hidden bezel) with factory-assembled AML61 mounting bracket assemblies and extended buttons, in a single panel cutout. Both square and rectangular housings can be accommodated. Refer to Product Brochure AML for more information.

### ORDER GUIDE — Strip Mounting Assembly

**AML61 B A 5 A**

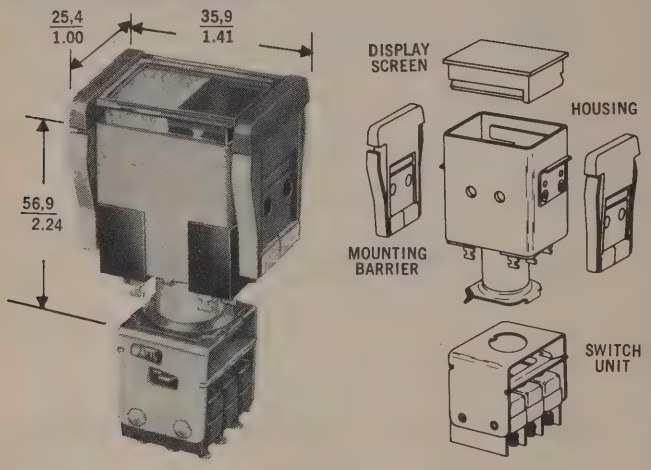
# SERIES 2 RECTANGULAR DISPLAY MODULAR LIGHTED PUSHBUTTON SWITCHES
## BARRIER MOUNT MODULES

### Operator-Indicator Housing Modules

### SHORT BARRIER MOUNT



**Catalog Listings**

| Short Barrier Operator-Indicator Housing Type | No. of Sockets | Type 2C | Hand Relampable Type 2C200 |
|---|---|---|---|
| No Coil | 2 (A & C) | 2C1† | 2C201† |
| | 4 (A, B, C, & D) | 2C3† | 2C203† |
| 6 vdc Hold-in Coil | 2 (A & C) | 2C13 | 2C213 |
| | 4 (A, B, C, & D) | 2C15 | 2C215 |
| 28 vdc Hold-in Coil | 2 (A & C) | 2C25 | 2C225 |
| | 4 (A, B, C, & D) | 2C27 | 2C227 |
| 48 vdc Hold-in Coil | 2 (A & C) | 2C37 | 2C237 |
| | 4 (A, B, C, & D) | 2C39 | 2C239 |

### INDICATOR HOUSING MODULES

Indicators match their respective operator-indicator counterparts in panel appearance, but have no provision for attaching switch units. They utilize the same barriers for panel mounting.

### MOUNTING BARRIERS

Molded color barriers are available in two panel thickness ranges (.19″ panels require the .06″ to .19″ type). For strip-mounted units, specify one more barrier than the number of units in the group.

### HOLD-IN COIL ELECTRICAL DATA

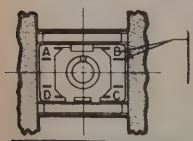
(also available in Flange mount)

Hold-in coil equipped operator-indicator housings enable electromagnetic maintained and released contact. When energized, the coil holds the device in the operated condition, after the screen has been manually depressed.

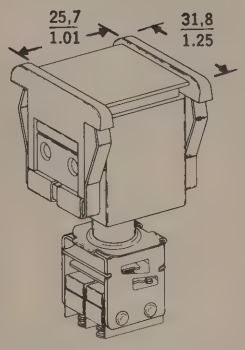
Approximate coil power ratings are 1.3 watts, 6 vdc coil and 1.7 watts, 28 or 48 vdc coil.

### ELECTRICAL BAIL

The circuit at right shows a means of operating any number of hold-in coil units, one-by-one, in situations that require only one switch to be operated at a time. A cancel switch can be installed at either or both points "A" and "B" to perform clearing of all switches.



LAMP TERMINAL DESIGNATION, 2 TERMINALS FOR EACH LAMP, PLATED FOR SOLDERING



### LONG BARRIER MOUNT

These housings are assembled to panels with mounting barriers attached to the longer sides.*

| | 4 (A, B, C, & D) | 2F12 | 2F212 |

## SPACING BARRIERS

Spacing barriers, not necessary for mounting, can be used to color code groupings and prevent accidental actuation of two screens with one push.

**Catalog Listings**

| Spacing Barriers | Gray | Black | White | Red |
|---|---|---|---|---|
| For Long Flange Housing | 2B9 | 2B18 | 2B19 | 2B46 |
| For Short Flange Housing | 2B23 | 2B24 | 2B25 | 2B26 |

## PULL-IN COIL ELECTRICAL DATA

(available in Flange mount only)

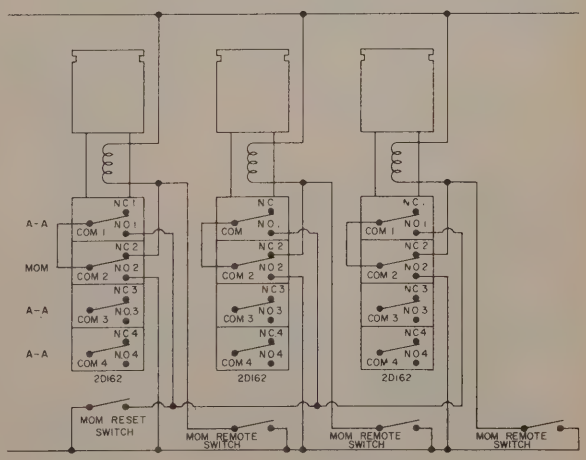
Pull-in coil equipped operator-indicators enable electromagnetic actuated, maintained and released contacts. Energizing the coil pulls in the operating plunger, causing circuit transfer in the switching unit. A 28 vdc, 2.2 amps. (approx.) is required during actuation (for about 20 ms. or less) and only .11 amp. (approx.) during hold-in. (Recommended for operation at 85 to 100% of rated voltage.)

Switch units that can be used are "TB", "PL" and all "SM" types except low force and 4-pole alternate-action designs. Maximum ambient temperature limits are 120°F (48.9°C) (1 or 2 pole momentary-action), 110°F (48.9°C) (3-pole momentary-action), 100°F (37.8°C) (4-pole momentary-action) and 90°F (32.2°C) (all alternate-action or momentary/alternate-action) switch units.

Note: A 4-pole momentary switch such as a 2D9 requires 28 volts for proper actuation.

## ELECTRICAL BAIL

The circuit at right shows how any number of Catalog Listings 2D162 can be operated in one-by-one sequence. Each actuation releases previously actuated switch. Power is required only during the reset pulse. (Reset can also be accomplished by depressing previously actuated screen.)



‡ Switch modules shown on page 17.

| Color of Rim Cap | | |
|---|---|---|
| Red | Green | Blue |
| 2A106 | 2A108 | 2A107 |

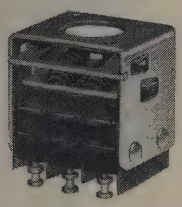
With these screens, a change in control status can be indicated by both color and shape. They have colored transparent rim caps, colorless transparent inserts and white translucent bases. Filters of the same color as the caps are put on two of the four lamps. When the filtered lamps are lighted, a solid color appears (Fig. 1), while the unfiltered lamps, when lighted, result in a white display with a colored frame (Fig. 2).

Since the insert is exposed, legending should be done on the base or reverse side of the insert.

# SERIES 2 SWITCH MODULES

Interchangeable type 2D switch modules attach to spring clips on the bottom of operator-indicator housings. Dependable performance at power or low energy loads is assured by MICRO SWITCH time-proven snap-action basic switches. Options include momentary action (push-on release-off), alternate-action (push-on push-off); 1, 2, or 4-pole double-throw and twin-break circuitry; and solder, screw or quick-connect terminals.

## "SM" SUBMINIATURE (MULTI-SPDT) SWITCH MODULES



MOMENTARY ACTION

"SM" switch modules are available with momentary-action in a choice of two styles, one having a pronounced touch-feedback, while the other has a low force for rapid operation; alternate-action; and a combination momentary/alternate-action. Extra length turret type terminals are solder plated.

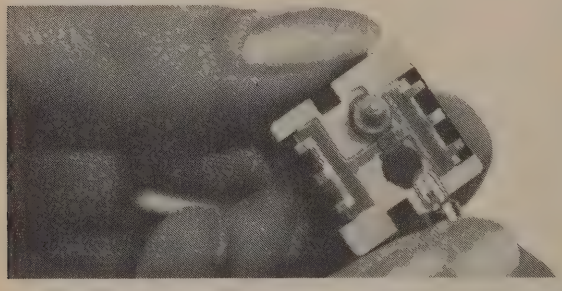
Series 3 has multiple options in the same size package. By standardizing on Series 3 as building blocks for your control panels, you can specify either matrix, individual, or strip mounting, momentary and two-level alternate-action, power or reed switches (with audible "click click" feedback), and matching lighted indicators.

Matrix mounted switches are provided with termination suitable for direct wiring, printed circuit board mounting or plug-in termination to customer pre-wired connector blocks. They can be replaced from the panel front by simply using a screw driver to disengage the switch mounting lugs from the mounting rails.

Individual mount switches have spring clips on two sides for front of panel snap-in mounting.

## BUTTONS



Lamps and legends can be changed from the panel front. The button is removed by pulling it forward out of the switch housing. Lamps are retained in the button for ease of replacement.

Relegendable buttons have a transparent colorless insert which fits over a colored diffuser plate and snaps into the button's shell. Legending may be applied to the diffuser plate. The diffuser plate can be easily removed and replaced if a change of legend information is desired. To ensure proper orientation during assembly, the button is keyed to the switch housing. Lighted display is provided by one or two 5, 12, 14 or 28 volt T-1 lamps.

## LEGENDING

MICRO SWITCH will furnish hot stamp legending in standard modified Gothic. Contact our local branch office for Series 3 legend order sheets that provide data on type size and possible number of characters per line.

## INDICATORS

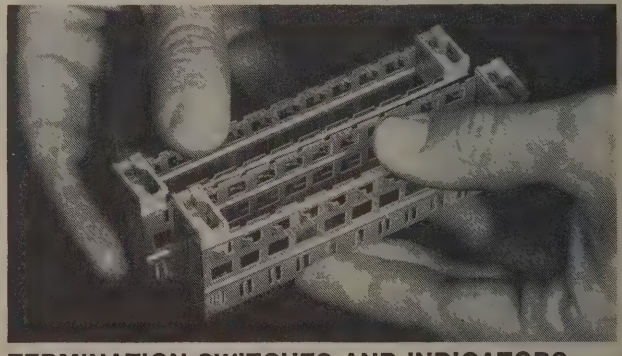
Lighted indicators are identical in size and appearance to the switches, but without provision for switching. See Catalog 200 for ordering.

## MOUNTING

Mounting options for Series 3 switches and indicators are:

1. Individual mount units have integral clips on two sides of the housing for front of panel snap-in mounting. They can be mounted in separate cutouts or strip mounted in a single cutout.

2. Units that require Type 3M mounting hardware are mounted in a single cutout. Two or more rows can be attached together to form a matrix or a single row can be strip mounted.



## TERMINATION-SWITCHES AND INDICATORS

Direct wiring to switch, plug-in to connector blocks, or printed circuit board termination. Available on either switch or connector.

NOTE: Caution should be exercised when soldering to direct wire terminations to prevent overheating and flux contamination of the switch contacts.

## THREE-PIECE RELEGENDABLE BUTTONS

(Cap, Diffuser/Legend Plate, and Lampholder), Flat Style Single-Section or Two Section Display

Note: If lamps are not desired, omit the Lamp Code number from the catalog listing.

**3D11WW1L-1** is a relegendable flat button, has a single section display, black button shell, white display color, transparent colorless cap, legend, and one 5-volt lamp. For use with switches only.

Example:

| 3D1 | 1 | WW | 1 | L | 1 |

# SERIES 3 LIGHTED PUSHBUTTON SWITCHES
## POWER SWITCH ORDERING GUIDE

**Ordering Example**
3A10-A is a power switch for matrix or strip mounting, has direct wire termination, 1-pole Form Z circuitry, momentary action, two lamp circuits, and black housing.

**THRU-PLUNGER SWITCHES**
Switches with Electrical Codes 16, 17, 66, and 67, have thru-plungers which attach to mechanical interlock devices to provide bailing and lockout functions.

**Example:** 3A 10 A

**POWER SWITCH MOUNTING TYPE**

3A
For matrix or strip mounting. Requires use of 3M type mounting hardware.

3G
For individual or strip mounting. No additional mounting hardware required.

| Color Code | DESCRIPTION | |
|---|---|---|
| | Housing (bezel*) | Barrier |
| A | Black | None |
| F | Black | Black |

* Bezel provided with 3G and 3F only.

**Circuitry:**

X=SPST—N.O. Double Make

Y=SPST—N.C. Double Break

Z=SPDT—Double-make Double-Break Break-before-Make

ADD—1 to listing if connector block is required (3A modules only).

(Connector blocks have direct wire terminations only.)

Reed switch units are also available. See Catalog 200.

## MOUNTING HARDWARE

Mounting hardware for 3A units is provided by a box girder structure. Interlocking tabs enable them to be assembled into a multi-row matrix. To specify the row length in the catalog listing, add the number of switches and/or indicators, then convert the total to the proper suffix number, i.e. "09" for a 5-unit row. proper suffix number, i.e. "09" for a 5-unit row.

Each 3M Type listing consists of two mounting bars and two mounting blocks in packet form.

COMPLETELY ASSEMBLED STRIPS OR MATRICES USING TYPE 3M MOUNTING HARDWARE

MICRO SWITCH will provide completely assembled strips or matrices at an additional charge per station of first level devices (switches) with no set-up charge. Contact your MICRO SWITCH Branch Office for pricing of assembled strips or matrices.

**Example:** 3M1 — 09

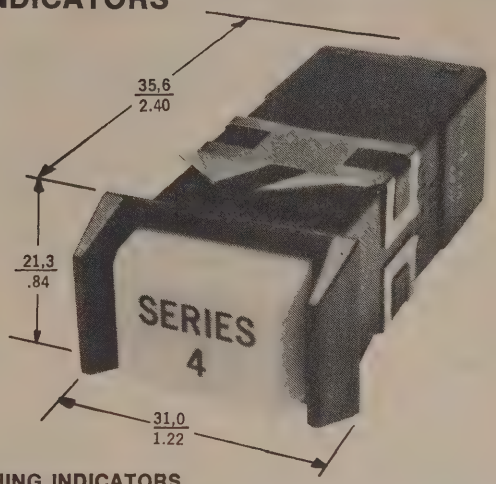
# SERIES 4 LIGHTED PUSHBUTTON SWITCHES/INDICATORS

- Choice of Solid State or Precision Snap-Action Switching
- Low Installed Cost
- Front of Panel Mounting and Relamping — Without Tools
- Distinctive Lighted Display Colors
- Attractive Housings with Barriers or Full Bezels

Series 4 provides an attractive panel display and switching versatility at a low installed cost to help you stretch your panel budget. Units can be furnished assembled, with lamp, ready to snap-in the panel. There is a choice of solder/quick-connect terminals or printed circuit board terminals.

See Catalog 200 for additional information and listings.



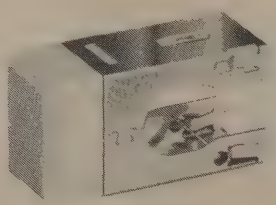
**BUTTONS**
Vivid color buttons provide attractive, clearly visible lighted display with: (1) transmitted color — display color can be distinguished whether the lamp is ON or OFF; (2) projected color — button is white with the lamp OFF and colored when illuminated; and (3) hidden legend/hidden color — button appears black with the lamp off, and legend and color appear when illuminated.

**LAMPS**
The Series 4 lamp remains stationary during button operation, minimizing filament breakage due to a moving lamp. There is a choice of T-3¼ wedge-base lamps (6, 12 and 28 V) or T-2 telephone slide-base lamps (120 V).

**HOUSINGS**
Housings for switches and indicators are identical in appearance, but the indicator housings have no provision for switching. They may be snap-in mounted on panels up to .20" (10,2mm) thick. Housings are available in full bezel or barrier styles, momentary or alternate action switching, and contain the lamp socket and termination means.

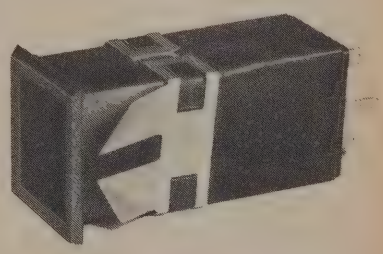
**MATCHING INDICATORS**
The indicators are identical externally to the Series 4 lighted switches for a harmonious panel appearance. See Catalog 200 for ordering.

**LOCKED BUTTON OPTION**
Series 4 can be furnished with a locked button option for use in areas accessible to the public, where tampering and vandalism are problems. The housing has a special mounting clip with built-in button retainer. This mounting clip must be removed from behind panel to allow button removal. Button movement during switch operation is unaffected by the locked button feature. (These units cannot be relamped from front of panel.)



BUTTON

LAMP

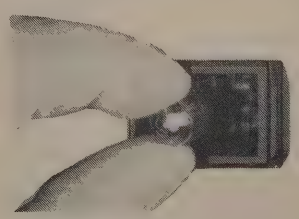


HOUSING

## CONVENIENT PANEL FRONT MOUNTING AND RELAMPING

1. Snap-in mounting. Switch or indicator is easily inserted into the cutout. Mounting clips grip the panel. No tools are needed.

2. Lamps and legends can be changed from panel front. When button is removed, lamp is extracted from its socket and retained in button.



3. Ease of lamp replacement. After the inoperative lamp is automatically removed with the button, the new lamp is inserted without the use of tools.

DIMENSIONS SHOWN ARE FOR REFERENCE ONLY

No lamp, has lamp socket for T-3¼ wedge base lamps

**41***
No lamp, has lamp socket for T-2 telephone slide-base No. 5 lamps

**91**
Unlighted, no lamp socket

* If the locked button option is specified in the Housing Style code, the unit will have a UL Listing of 120 volts max., lamp.

**Mounting clips on the long sides** of the housing are specified when individually mounted or when the long sides of strip mounted housings parallel the long sides of the panel cutout slot. The most secure mounting is achieved when the mounting clips are on the long sides.

**Mounting clips on the short sides** of the housing are specified when short sides of strip mounted housings parallel the long sides of the panel cutout slot.

## SERIES 4 BUTTON ORDERING GUIDE

Buttons may be furnished with or without the metal shell, assembled or unassembled. When type B, C, D, E, or F buttons are ordered unassembled, the insert is also unassembled.

Catalog listings for Series 4 buttons are derived from the ordering guide, as shown in the example, below.

4B1AGN is a catalog listing for a green (transmitted color) unlegended button. (If the button shell is also desired, substitute 4B2 for 4B1 in the listing.)

**Example:**

**4B1**

BUTTON WITHOUT METAL SHELL
- 4B1 — Button only (without metal shell)

BUTTON WITH METAL SHELL
- 4B2 — Both button and metal shell provided

BUTTON WITH METAL SHELL, WITH PROVISION FOR LOCKED BUTTON
- 4B3 — Both button and metal shell provided

**A**

BUTTON TYPE

- A — Transmitted color, 5 sides lighted. 1-piece translucent button.
- B — Projected color, 5 sides lighted. Translucent white button & color insert.
- C — Hidden color/hidden legend, 5 sides lighted. Transparent black button & translucent color insert.
- D — Hidden color/hidden legend, only face lighted. Transparent black button & translucent color insert.
- E — Transmitted color, 5 sides lighted. Transparent colorless button & translucent color insert.
- F — Transmitted color, only face lighted. Transparent colorless button & color insert.
- G — Same as type "A" except .250" higher.

**G**

DISPLAY COLOR

- B — Std. Blue
- G — Std. Green
- R — Std. Red
- S — Transparent Black (Unlighted applications only)
- Y — Std. Yellow
- W — Std. White (Do not use with Type B button)
- A — Std. Amber (For use with Type A or G button only)

**N**

LEGEND (Legend Order Sheet must accompany all orders for legended buttons)

- U — No legend, button unassembled. (For customer who does his own legending.) Use with any button except 4B1A.
- N — No legend, button assembled. (For applications not requiring legends.) Use with any button except E & F.
- L — Legend on button only, button assembled. (For customer who prefers to have MICRO SWITCH provide legending.) Use with any button.
- K — Legend on insert only, button assembled. (For C, D, E and F button types.)
- J — Legends on both button and insert, button assembled. Use with C & D button types.

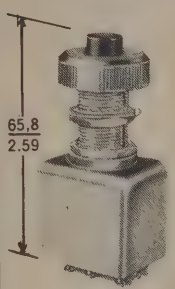
| | 2 | 3 |
| Black | **2PB7** | **3PB7** |
| Red | **2PB8** | **3PB8** |



MOMENTARY-ACTION

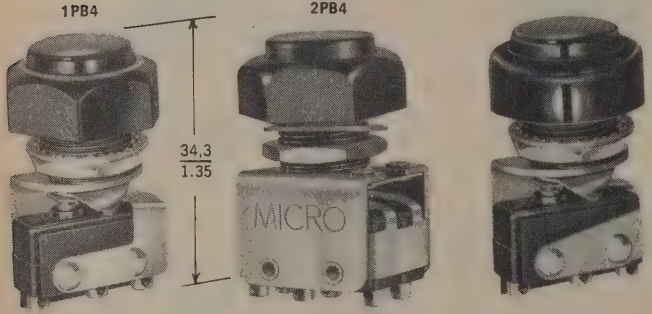
## SEALED AT BUSHING, BUTTON, PANEL AND SWITCH UNITS

Catalog Listing **2PB901-T2** meets the submergence requirements of MIL-STD-108D (up to 10 p.s.i. water pressure for one hour). It is sealed facenut-to-panel, button-to-facenut, and bushing-to-facenut (prevents entry of water from back of panel, up and over bushing wall). The two SPDT switch units are potted in a corrosion-resistant metal enclosure.

The knurled facenut is chrome finished to provide an attractive panel appearance with the black button.

## WITH BUTTON AND PANEL SEALS

This two-piece design assembly enables the pushbutton to be separated from the switch unit and mounted in the panel. The switch unit is then easily wired and snapped into place from behind the panel. There is an elastomer seal bonded between the plunger and button collar and an "O" ring seals the button assembly to the panel front.



MOMENTARY-ACTION
BOTH HAVE BLACK BUTTONS
OPERATING FORCE
1,36 Kg/3 LBS. APPROX.

**1PB42** (Black Button)

30 VDC-5 amps res. sea level or 50,000 ft., 3 amps ind. sea level, 2.5 amp ind. 50,000 ft., 24 amps max. inrush.

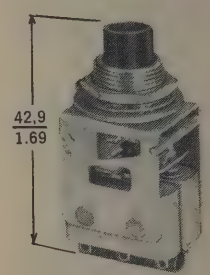
UL and CSA rating for basic switch: 125 or 250 VAC—5 amps
UL Code L-4

DIMENSIONS SHOWN ARE FOR REFERENCE ONLY

Key: 0,0 — mm / 0.00 — inches

## HERMETICALLY SEALED SWITCH UNITS

2-POLE MOMENTARY-ACTION



**Hermetic Seal**

Sealing consists of metal-to-metal fusion around the cover, actuator, base and mounting holes of each switching unit. The terminals are joined to the housing by glass-to-metal seals. The vapor-proof container permits use in damp locations without danger of condensation on the contacts, as well as providing protection from external contaminants. All external parts are corrosion resistant and meet MIL-S-6743 specifications. This design also meets explosion-proof requirements of MIL-E-5272.

**Electrical Rating:** 3 amps, ind., 5 amps res., 28 VDC and 115 VAC 400 cps.

**Catalog Listings**

| Button Color | No. of SPDT Circuits | | |
|---|---|---|---|

These pushbuttons are equipped with MICRO SWITCH "HM" hermetically sealed switch units which provide electrical stability under abrupt changes in atmosphere and environmental conditions. Good feel of the switching action is provided by a touch-feedback which is transmitted through the button when it is operated.

See Catalog 200 for additional information and listings.

# SN SOLID STATE PUSHBUTTON SWITCHES

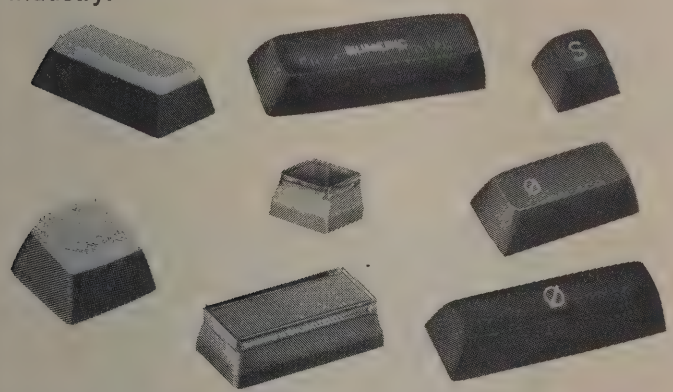
## SWITCHING CONCEPT

The Hall effect solid state concept is one of the most reliable switching elements ever designed. An integrated circuit, actuated by magnets, produces an analog control voltage. This voltage is converted into a digital output with a trigger circuit. Two isolated outputs are available from each switch module which may be used individually or wired in parallel. Level and pulsed outputs are available.

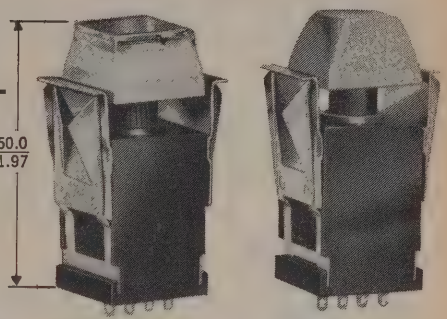
The 11SN Series switches are made for direct panel mounting with snap-in hardware and the 101SN Series, 201SN Series and 301SN Series mount direct to printed circuit boards without additional mounting or support hardware. Lighted modules are available in both the 11SN Series and the 201SN Series.

## SN BUTTONS

The SN Series is ideal for building custom arrays. There are thousands of legends tooled and we have the in-house capability to tool any special legend you may require. Multiple-unit buttons and space bars with complete mounting hardware are available. In fact, MICRO SWITCH has the largest selection of button shapes, sizes, and colors in the industry.

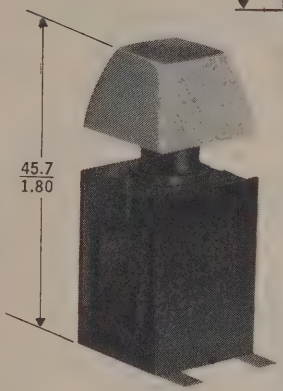


**11SN PANEL MOUNTED MODULES**



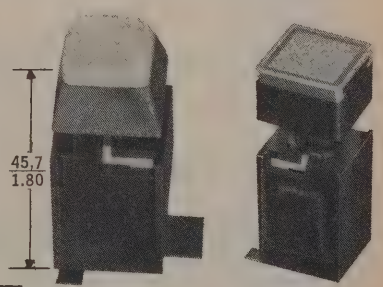
MODULE WITH NON-LIGHTED RELEGENDABLE BUTTON

MODULE WITH NON-LIGHTED TRUNCATED BUTTON



**101SN MODULES non-lighted and 301SN TWO-LEVEL MODULES**

**201SN LIGHTED MODULES**



MODULE WITH TRUNCATED LIGHTED BUTTON

MODULE WITH RELEGENDABLE LIGHTED BUTTON

Additional information for SN and SD is included in Catalog 200.

# SD SOLID STATE MODULES

## BUILD YOUR OWN LOW PROFILE KEYBOARD

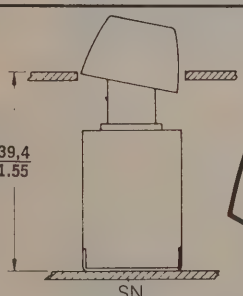
The MICRO SWITCH Series SD module is a low profile solid state keyboard module. The heart of the SD module is the proven MICRO SWITCH Hall Effect integrated circuit.

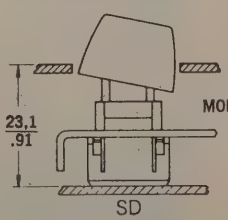
The SD module is directly compatible with all common logic families with no special buffering or electronic circuitry needed.

Buttons are available in a wide variety of sizes, shapes, and colors.

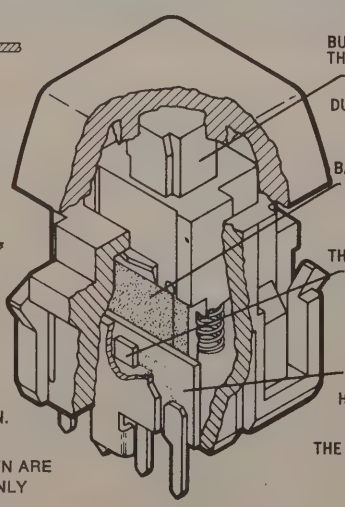
SD modules are available with:

- Level or pulsed outputs
- Sourcing or sinking outputs
- Momentary or alternate action
- Scanning interface
- LED Lighting
- Stepped or sloped buttons





MODERN LOW-PROFILE DESIGN.



BUTTON PLUNGER, THE ONLY MOVING PART IS MADE OF EXTREMELY DURABLE PLASTIC
A VERY STABLE BARIUM FERRITE FILLED MAGNET OPERATES THE CHIP
THE PROVEN HALL EFFECT CHIP IS THE HEART OF EVERY SWITCH MODULE
A CERAMIC SUBSTRATE HOLDS THE CHIP AND PROVIDES A PATH FOR THE CHIP'S OUTPUT

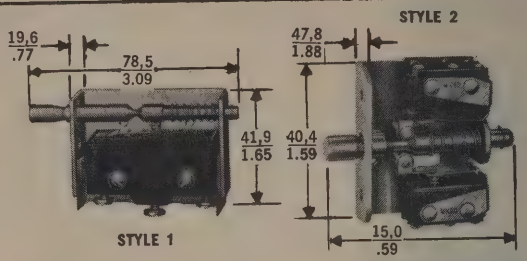
## AC DOOR INTERLOCK SWITCHES

For use on hazardous electronic equipment. They automatically cut power when service door or drawer is opened helping to protect personnel and equipment.

To test circuits with the power "on" the actuating rod can be manually set (pulled) to a maintained-on position. The actuating rod automatically returns to the normal or reset position as door closes.



CHARACTERISTICS:
F.P. — Free Position
O.P. — Operating Position
D.P. — Depressed Position

### ORDER GUIDE — DOOR INTERLOCK SWITCHES

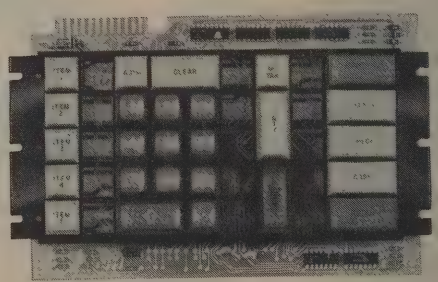
## KEYBOARDS



MICRO SWITCH now offers a line of truly effective, Sealed Solid State Keyboards for applications in industrial, aerospace, marine, military and other severe environments. These ruggedly constructed, sealed keyboards are especially designed to provide protection against accidental spills of coffee or sodas, splash-over or drip through of oil and moisture, and accumulation of sand, dust, chips or other contaminants which can damage or cause failure of non-sealed units. In addition, this custom designed sealing capability protects the expensive electronics usually located behind or underneath the keyboard. Sealed keyboards meet the requirements of NEMA 2, 3, 3R, 12 and 13, and military specifications (MIL-STD-202) for sealing, vibration and shock.

### KEYBOARDS TO FIT EVERY NEED

At MICRO SWITCH, we have the world's most complete line of solid state keyboards . . . which means unmatched design flexibility for you. Our application engineers will custom tailor a keyboard to your exact specifications, whether from our time-proven SW series or our new low-profile SD series.

Choose from keys offering over 10,000 legends, 30 colors, and 60 shapes, including standards, sculptured or re-legendable keys — or create new keys to fit your needs. Even lighted and two-level keys are available.

MICRO SWITCH keyboards are available with features like MOS, TTL and DTL encoding, and with two-key or N-key rollover. Your choice of alpha and numeric arrays.

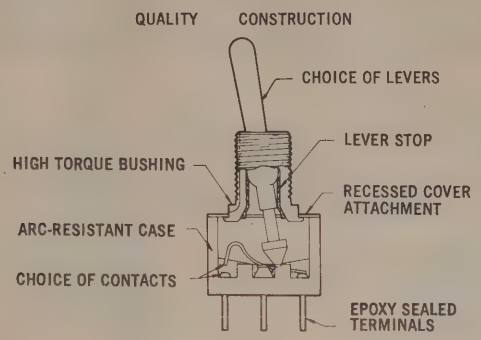
So whatever your needs, and whatever your budget, we'd like to supply a keyboard to fit. Contact a MICRO SWITCH Branch Office for complete information.

## SERIES 8 MINIATURE MANUAL SWITCHES

The MICRO SWITCH Series 8 line of miniature manual switches is ideally suited for commercial applications which have limited space requirements and demand high quality and performance standards.

All switches have silver contacts and solder terminals unless otherwise noted. Many additional circuitry combinations, actuators, terminals variations and contact materials are available. See Catalog 200.

Complete dimension drawings and specifications are shown in Catalog 200.



**Electrical Data**

Fine Silver Contacts: 6 amps, res.; 2 amps, ind., 125 VAC (60Hz) and 28 VDC. UL Listed*(most models): 6 amps, 125 VAC. Gold/Nickel Plated Brass or Fine Silver Contacts: 0.5 VA max. at 20 volts max.

*For UL stamped switches see Catalog 200.

# 11TS AND 12TS TOGGLE SWITCHES

Series 11TS and 12TS toggle switches are ruggedly constructed for contact protection from dust and moisture. Available with either solder, screw or .250″ width quick connect terminals, this series offers a choice of single-pole, double-throw or double-pole double-throw circuitries. The series is UL and CSA listed.

## TL TOGGLE SWITCHES

Type TL toggle switches have environment-proof sealing meeting military specification MIL-S-3950 (Immersion). Operating temperature range from −65° to 71°C (−85° to 160°F). 1, 2 and 4-pole circuitry. Standard and Pull-to-Unlock toggle levers. 2- and 3-position, maintained and momentary toggle action.

For additional information, circuitry and terminal options refer to Catalog 200. For UL Listed versions see Catalog 100 or convert the listings below. Substitute a 5 in place of the 1 before the dash. Example: 1TL1-2 becomes 1TL5-2.

△ Circuitry diagrams are shown under Series TP.
* These positions only are momentary. All others are maintained.
** Toggle lever is blocked from these positions. Toggle becomes two position, with center being one extreme position.
† Also add appropriate suffix letter to the Military Approval number.
‡ See Pull-to-Unlock configurations on the preceding page.

## TP ROCKER BUTTON SWITCHES

"TP" rocker button actuated switches combine the advantages of toggle switch circuitry and current carrying capacity with versatile pushbutton manual control and styling. They also offer similar versatility with two button styles, two- and three-position, maintained and momentary operation and 1-, 2- and 4-pole circuitry. "TP" rocker button switches have a temperature range of from -65° to 160°F (-54° to 71°C). Flush panel or above panel mounting. Series TP is UL listed. Catalog 200 supplies additional information, circuitry and button options, and listings.

### SPECIAL CIRCUITRIES

Catalog Listings with —10, —50, and —70 suffix numbers shown in the TL, TP, and TS Ordering Charts have special "on-on-on" circuits, as illustrated. TL's with —12 suffix are same as —50, except keyway position is maintained; while —72 is same as —50, except that opposite keyway position is momentary.

# MICRO SWITCH

A DIVISION OF HONEYWELL
FREEPORT, ILLINOIS 61032 / PHONE (815) 235-6600

## AT TOGGLE SWITCH ASSEMBLIES

AT Toggle Switch Assemblies couple a toggle switch operator with one or more precision SM, SX, or V3 type basic switches. Momentary and maintained two position and three position devices are available. Schematic at right shows actuation by positions. AT switches offer minimum depth behind panel. Basic switches are UL and CSA listed.

TWO POSITION- 1 POLE

THREE POSITION- 2 POLE

| | 3 | Silver | 6AT10 | 6AT10-T | 6AT10-T2 |

* Extra Long Toggle Lever — 1.70mm/.67"
† Momentary position opposite keyway. Key washer in place of key tab.

## 22AT

Series 22AT Toggle Switch Assemblies contain 8 SPDT silver contact SM basic switches. Basic switches are mounted in two banks controlled by a single lever. Movement of lever from the center position actuates one bank of 4 switches in each extreme position providing a variety of wiring combinations. Splash type bushing and lever seals prevent the entrance of moisture and dust behind the panel, or into the contact area.

# AT TOGGLE SWITCH ASSEMBLIES (Cont.)

## 13AT AND 23AT

Series 13AT and 23AT contain two, three, or four SPDT subminiature type SM basic switches. Silver contacts. Standard toggle, tab, or pull-to-unlock levers. Gold contact versions are listed in Catalog 200.

### PULL-TO-UNLOCK LEVER OPTIONS

As a guard against accidental operation, pull-to-unlock toggle levers must be pulled .090 inch (approx.) to change positions.

DIMENSIONS SHOWN ARE FOR REFERENCE ONLY
Key: 0,0 — mm or Newtons
0.00 — inches or pounds

* A chart showing the 13 locking configurations and their catalog listing is shown beneath 11TS and 12TS listings. See page 21.

**MICRO SWITCH** A DIVISION OF HONEYWELL
FREEPORT, ILLINOIS 61032

# DEFINITIONS

**Alternate Action** — Push "ON" — Push "OFF", maintained contact operation. In some cases a two level operator is provided.

**Basic Switch** — A self-contained switching unit. It can be used alone, gang-mounted, built into assemblies or enclosed in metal housings.

**Double Break Contacts** — (Twin break). This breaks the circuit in two places. Referred to as form Z circuitry also.

**Double-Pole Double-Throw (DPDT)** — Switches which make and break two separate circuits. This circuit provides a normally open and normally closed contact for each pole.

**Dust-Tight** — This seal guards against dust and dirt, but does not seal against moisture and vapors. Premolded elastomer boots and non-hardening cement are often used to accomplish this seal.

**Environment-Proof Switch** — A switch which is completely sealed to ensure constant operating characteristics. Sealing normally includes an "O" ring on actuator shaft and fused glass-to-metal terminal seals or complete potting and an elastomer plunger-case seal.

**Explosion-Proof Switch** — A UL listed switch capable of withstanding an internal explosion of a specified gas without igniting surrounding gases.

Military explosion proof requirements specify that the switch will not cause an explosion. This can be done by sealing the switch contacts from the atmosphere.

**Hermetically Sealed Switch** — A switch completely sealed to provide constant operating characteristics. All junctures made with metal-to-metal or glass-to-metal fusion.

**Momentary Switch** — A switch with contacts that return from operated condition to normal condition when actuating force is removed. Unless otherwise stated, all switches in this catalog are momentary.

**Normally Closed Contacts (N.C.)** — Provide a normally closed circuit when actuator is in free position.

**Normally Open Contacts (N.O.)** — Provide a normally open circuit when actuator is in free position.

**Precision Snap-Acting Switch** — An electromechanical switch having predetermined and accurately controlled characteristics, and having a spring loaded quick make and break contact action.

**Single-Pole Double-Throw (SPDT)** — Switch which may either make or break a circuit, depending on how it is wired.

# OPERATING CHARACTERISTICS

Definitions below explain the meaning of operating characteristics. Characteristics shown in tables throughout catalog were chosen as most significant.

Linear dimensions for in-line actuation are from top of plunger to a reference line, usually the center of the mounting holes, or the top of the switch housing.

**Differential Travel (D.T.)** — Plunger or actuator travel from point where contacts "snap-over" to point where they "snap-back."

**Free Position (F.P.)** — Position of switch plunger or actuator when no external force is applied (other than gravity).

**Full Overtravel Force** — Force required to attain full overtravel of actuator.

**Operating Position (O.P.)** — Position of switch plunger or actuator at which point contacts snap from normal to operated position. Note that in the case of flexible or adjustable actuators, the operating position is measured from the end of the lever or its maximum length. Location of operating position measurement shown on mounting dimension drawings.

**Operating Force (O.F.)** — Amount of force applied to switch plunger or actuator to cause contact "snap-over." Note in the case of adjustable actuators, the force is measured from the maximum length position of the lever.

**Overtravel (O.T.)** — Plunger or actuator travel safely available beyond operating position.

**Pretravel (P.T.)** — Distance or angle traveled in moving plunger or actuator from free position to operating position.

**Release Force (R.F.)** — Amount of force still applied to switch plunger or actuator at moment contacts snap from operated position to unoperated position.

**Total Travel (T.T.)** — Distance from actuator free position to overtravel limit position.

# REFERENCE STANDARDS

The UL and CSA references in this catalog do not imply specific approval of our products but rather that our products are designed to meet the safety and performance standards recommended by such agencies. Evaluation of our products by these agencies is limited to procedures established to examine switch performance within areas of their interest. Actual application requirements may exceed performance levels investigated by these agencies. We recommend that switches be tested to your exact application requirements.

**UL (Underwriter's Laboratories, Inc.)** is chartered as a non-profit organization without capital stock under the laws of the state of Delaware, to establish, maintain, and operate laboratories for the examination and testing of devices, systems and materials. Founded in 1894, the enterprise is operated for service, not for profit.

**CSA (Canadian Standards Association)** is a non-profit, nongovernmental association established as a national standardization body for Canada. Included in its scope of activities is the responsibility of investigating and approving products and materials in the interest of safety.

MILITARY QUALIFICATIONS

To increase your effectiveness in using MIL-S-numbers, minimize your cost, and reduce your delivery time, MICRO SWITCH publishes **Data** Sheet 204. It provides current information on the specification, and is revised and reissued as changes and additions occur. Please contact MICRO SWITCH for the most up-to-date issue.

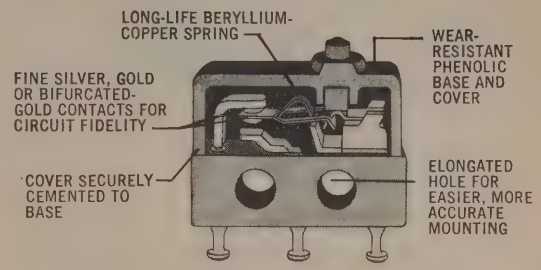
**Mounting Dimensions** — All dimensions on the mounting dimension drawings in this catalog are subject to change without notice and are for reference only. Request current drawings from the nearest MICRO SWITCH Branch Office or write to Freeport.

# TYPE SX SUBMINIATURE BASIC SWITCHES

The SX series basic switches are the smallest snap-action switches from MICRO SWITCH. These switches are ideal where savings in space and weight are important. Unless otherwise noted, all listings have silver contacts. Variations include high temperature designs for up to 400°F (204°C), gold contacts for low energy applications, and bifurcated gold contacts for maximum reliability.

The SX switches are available with several types of terminations. The T and T2 terminals provide easy lead wire attachment.

Additional terminal types and switch/actuator variations are available in Catalog 200.



LONG-LIFE BERYLLIUM-COPPER SPRING
WEAR-RESISTANT PHENOLIC BASE AND COVER
FINE SILVER, GOLD OR BIFURCATED-GOLD CONTACTS FOR CIRCUIT FIDELITY
COVER SECURELY CEMENTED TO BASE
ELONGATED HOLE FOR EASIER, MORE ACCURATE MOUNTING

## TYPE SM SUBMINIATURE BASIC SWITCHES

The SM series switches are slightly larger than the SX switches. They feature precision operation, long life, and power load switching to 11 amps (VAC). High temperature construction available for up to 400°F (204°C). Gold contacts for low energy applications, bifurcated contacts for maximum reliability. Unless otherwise noted, all listings have silver contacts.

Additional terminal types and switch/actuator variations are available in Catalog 200.

# BASIC SWITCHES

## TYPE V3 MINIATURE BASIC SWITCHES

V3 switches combine small size with high electrical capacity up to 15 amps, ½ hp. Operating force goes as low as 7 grams maximum with actuator. Long mechanical life of 10,000,000 cycles with 95% survival. Standard temperature tolerances up to 180°F (82°C). Catalog 200 offers additional terminations, integral actuators, and switch variations, plus auxiliary actuators.

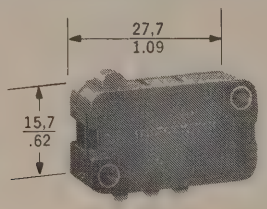
# XL MECHANICALLY OPERATED SOLID STATE SWITCHES

Series XL combines precision mechanical switch operating and mounting convenience with solid state reliability. It uses the Hall sensor developed by MICRO SWITCH. An integrated circuit, actuated by a magnet located in the operating plunger, produces a digital output.



Mounting dimensions and mechanical characteristics are similar to the popular V3 type snap-action switch. Over 500 actuators are available, including pin plunger, straight levers, simulated roller levers, and roller levers.

XL switches can be used directly with electronic circuits, such as discrete transistors, integrated logic or SCR's. The digital logic level output eliminates the need for conditioning circuitry to obtain a square wave output.

Terminals are combination solder/quick-connect. A terminal housing can be provided for use with AMP .110" push-on terminals.

For more information, see Product Sheet XL.

## ELECTRICAL CHARACTERISTICS, 5 VDC CIRCUIT

| | Typ. | Max. | Remarks |
|---|---|---|---|
| Supply Current* At 24° ±2°C, supply voltage of 5 ±0.5% VDC | 2.5mA | 4.0mA | Output transistor OFF |

△ Lever may not be self returning.

‡ Typical values. Contact Branch Office for information on tolerance.

** Other lever styles are available. Contact Branch Office.

NOTE:
The output transistors of the listings shown are "normally open", i.e., they are not conducting with plunger in free position. To order devices which are "normally closed" (conducting with plunger in free position), substitute 12 for 11 immediately after the XL in the catalog listing. Example: 37XL12XA-11.

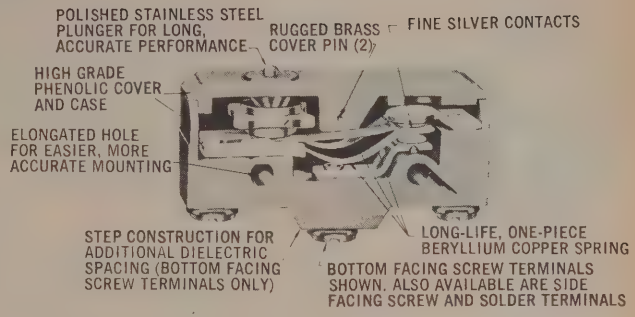
# TYPES Z AND A STANDARD BASIC SWITCHES

The type Z switch design meets most applications needs. Modifications of the standard silver contact design and material, spring configuration, and plunger locations give the type A switches greater electrical load handling capacity. Other changes in materials and switch design provide operating characteristics, temperature tolerances, and sealing to cover a wide range of special requirements. See Catalog 100.

Terminal variations include solder, quick-connect, and side facing screws.

Features include operating force down to 1 oz (28,4 gms.) Differential travel down to .0002 to .0003 inch (0,005 to 0,008mm). Power load switching capacity to 25 amps and motor handling capacity of 2HP at 250 VAC.

Catalog 100 provides additional listings for all variations and accessories shown in this section.



POLISHED STAINLESS STEEL PLUNGER FOR LONG, ACCURATE PERFORMANCE
RUGGED BRASS COVER PIN (2)
FINE SILVER CONTACTS
HIGH GRADE PHENOLIC COVER AND CASE
ELONGATED HOLE FOR EASIER, MORE ACCURATE MOUNTING
STEP CONSTRUCTION FOR ADDITIONAL DIELECTRIC SPACING (BOTTOM FACING SCREW TERMINALS ONLY)
LONG-LIFE, ONE-PIECE BERYLLIUM COPPER SPRING
BOTTOM FACING SCREW TERMINALS SHOWN. ALSO AVAILABLE ARE SIDE FACING SCREW AND SOLDER TERMINALS

# TYPE SE AND XE ENVIRONMENT-PROOF SWITCHES

Type SE and XE switches are the smallest environment-proof switches offered by MICRO SWITCH. Both types enclose basic switches within a corrosion resistant aluminum housing. Type SE switches enclose a type SM basic switch and XE switches enclose the smaller SX basic switch.

Type SE and XE offer power load switching capability to 7 amps and temperature tolerance to 230°F (110°C) with high temperature versions to 300°F (149°C). Catalog 200 gives additional information and listings for SE and XE switches, actuators, and terminations.

# TYPE HM MINIATURE HERMETICALLY SEALED SWITCHES

Type HM miniature basic switches are the smallest hermetically sealed switches offered by MICRO SWITCH. Features include single-pole double-throw circuitry — power load switching capability to 5 amps, 28 VDC and 125 VAC, 400 Hertz — temperature tolerance from −85° to 250°F (−65° to 121°C) — high temperature version for use from −85° to 500°F (−65° to 260°C) — military approved versions.

Silver, gold, or bifurcated gold contacts are available. Additional information and listings are offered in Catalog 200.

## MERCURY SWITCHES

MICRO SWITCH mercury switches are glass tubes into which stationary electrodes and a pool of mercury are hermetically sealed. Tilting the tubes moves the mercury pool which makes or breaks contact between the electrodes.

There is a wide range of sizes, electrical capacities, and operating characteristics. Maintenance costs are minimized since there are no moving parts to wear out.

### • SINGLE POLE SINGLE THROW LIGHT DUTY

| Catalog Listing | Differential Angle | Electrical Data | Comments |
|---|---|---|---|
|  AS408V0 | 60° ±15° Break from vertical<br>(one plane only) | Resistive:<br>AC: 2 amps @ 30V<br>1 amp @ 115V<br>.5 amp @ 230V<br>DC: 1.2 amps @ 30V<br>.6 amp @ 115V<br>.3 amp @ 230V<br>Inductive: Inrush current should not exceed above values.<br>50,000 operations at full load | "Tipover" Series. Use as safety switch on portable or mobile equipment. Circuit opens if equipment accidentally tips over. When switch is in vertical position circuit will break within 60° ±15° from vertical in one plane only as shown. Platinum wetted electrodes provide low and stable contact resistance from low energy loads to maximum rated loads. (Mercury to wetted electrode contacts.)<br>No lead wires attached.<br>Mtg. clip 1MR14-A |

### • SINGLE POLE SINGLE THROW MEDIUM DUTY

# SERIES SR MAGNETICALLY OPERATED SOLID STATE PROXIMITY SENSORS

Series SR solid state Hall effect sensors are versatile, reliable devices operated by the magnetic field of a magnet or electromagnet. They can be used directly with electronic circuits, such as discrete transistors, integrated logic, or SCR's. The digital level output eliminates the need for conditioning circuitry to obtain a square wave output.

## 400SR SENSORS

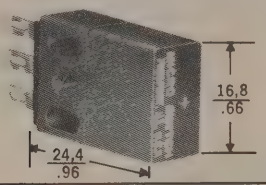
The rugged 400SR plastic package has elongated mounting holes which simplify mounting and adjustment. Solder quick-connect (3-pin) terminals accept standard .110 x .020 push-on connectors.

A locating boss aids in sensor orientation and gang mounting. The boss corresponds to an indentation on the other side of the housing to facilitate positioning. A silver cross mark on the sensor face identifies the sensitive area for accuracy in magnet location.

## 103SR SENSORS

Solid state circuitry for the 103SR is sealed in a threaded aluminum bushing providing environmental protection, plus ease of mounting and adjustment. Six-inch 20-gage stranded leadwires are color coded (other types and lengths are available). The output can be either digital current sourcing, sinking, or analog (linear).

These sensors meet the applicable portions of NEMA Type 3, 3R, 3S, 4, 4X, 6, 12 and 13 classifications.



For more information, see Product Sheets SR and 400SR. Data is included on magnetic field sensor, interfacing, magnets and Calibrated Hall Element.

* Operating characteristics apply at 24° ±2°C and 5 VDC ±.5% supply.
† Operating characteristics apply over the full temperature range and 6-16 VDC supply.

# SERIES XK FERROUS METALS SENSITIVE PROXIMITY SENSORS

Series XK Proximity Sensors are ferromagnetic metals sensitive and will detect stationary or moving targets. They are actuated without physical contact or attraction between the sensor target. Ordinary ferrous metal of any thickness or thin nonferrous metal foil targets will operate the device.

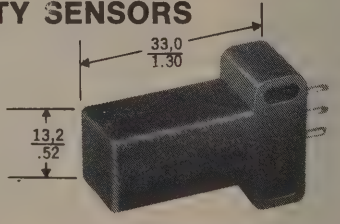
Completely self-contained, XK sensors utilize the Eddy current principle.

These sensors meet the applicable portions of NEMA Type 3, 3R, 3S, and 13 classifications. They are capable of being gang mounted for use in cam sequencing applications.

## ORDERING INFORMATION

| Catalog Listing | Termination |
|---|---|
| **101XK11-1** | One foot of 22 Gage stranded, irradiated PVC insulation |
| **101XK11-Q** | Accepts AMP "110" faston or other .110 x .020" push-on terminals |

For more information, see Product Sheet XK.



LEADWIRE TERMINATION AVAILABLE

## OPERATING CHARACTERISTICS

| | Min. | Max. | Remarks |
|---|---|---|---|
| Supply Voltage ($V_S$) | 6 VDC | 16 VDC | |
| Load Voltage ($V_L$) | | 25 VDC | |
| Supply Current | | 18mA | @ 25°C, No load |
| Output Voltage Operated (Target Present) | | 0.4 VDC | @ 10mA Sinking |
| Output Leakage Current Released (No Target Present) | | 5μA | |
| Output Switching Time (Sinking 20mA) Rise Time | | 1.0μsec. | 10% to 90% |
| Fall Time | | 1.0μsec. | 90% to 10% |

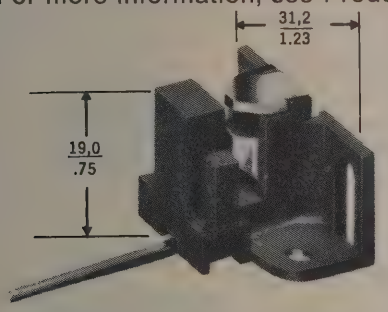
# AV SERIES VANE OPERATED SOLID STATE POSITION SENSORS

Series AV incorporates a Hall effect sensor and magnet in a rugged easy-to-apply package. It is operated by passing a ferrous vane through the gap between the magnet and Hall sensor. The vane shunts the magnetic flux from the Hall sensor, causing a digital output to be produced.

Unlike magnetic pick-ups, there is no minimum speed of operation. The AV may be operated at any speed from 0 to 100 kHz. As long as the vane is in the gap, the output remains in the operated condition. The On and Off time can be programmed by the dimension of the vane, enabling the sensor to be used in many application situations.

The AV may be used as a limit switch by operating with one large vane; as a tachometer sensor by using a toothed wheel; or as a machinery synchronizing element by using a cam or sector. Leadwires or 3 pin solder/quick-connect termination is available. The housing material and leadwires are UL recognized.

For more information, see Product Sheet AV.



## ELECTRICAL CHARACTERISTICS

| | Min. | Typ. | Max. | Remarks |

| **1AV3B** | Sourcing | Solder/quick-connect |

# SERIES FW MINIATURE SELF CONTAINED PROXIMITY CONTROLS

## 100FW SERIES

Series 100FW proximity switches utilize the eddy current principle. They are actuated by metal objects without physical contact.

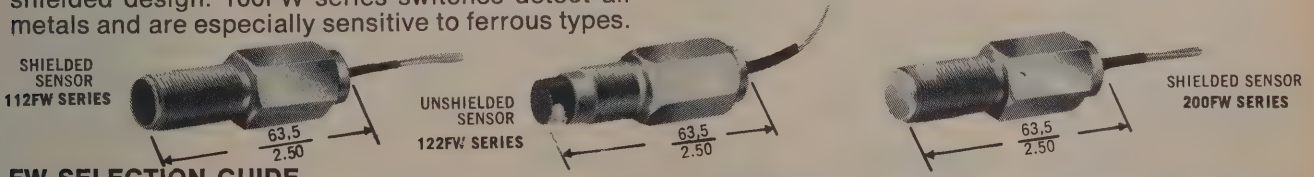
**Shielded Sensor.** Switches with a shielded sensor have the housing extended flush to the sensing face, thus shielding the sensor from the effect of metallic material that might be located near the sides of the switch.

**Unshielded Sensor.** Switches with an unshielded sensor have a longer operating point than the shielded design. 100FW series switches detect all metals and are especially sensitive to ferrous types.

## 200FW SERIES

Series 200FW proximity switches are operated by the magnetic field of a permanent magnet or electromagnet. The switching element is a Hall sensor with a digital output.

**Sensor Design.** The sensor is completely shielded with an all-metal face which provides physical and environmental protection to the switch. Since the 200FW is not affected by surrounding non-ferrous metals, the sensor can be used in applications that require detection of movement through a non-ferrous wall.



## FW SELECTION GUIDE

| Input Voltage | Input Current | Type | Output Current | Output Voltage | Sensing Range Shielded | Sensing Range Unshielded | Catalog Listing | Termination | Circuitry | Temperature Range |
|---|---|---|---|---|---|---|---|---|---|---|
| 18 to 32 VDC | 20mA max. | Sinking | 120mA max. Res. or Ind. | 1.0 VDC max. Actuated | 2,41mm* .095 in. | | **112FW12-R1** | Conn. | SPNO | −65°F −54°C to +257°F +125°C |

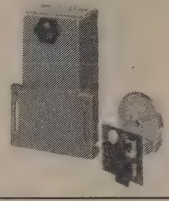
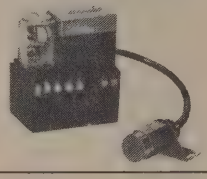
# OTHER PRODUCTS

## NO-TOUCH POSITION SENSING SWITCHES
**REQUEST CATALOG 100.**

### PHOTOELECTRIC CONTROLS
Photoelectric controls detect opaque or translucent materials at short or long range. The many types provide you with the broadest selection available.

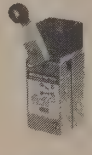


### PROXIMITY CONTROLS
Proximity controls respond to the nearness of metal. MICRO SWITCH offers the most complete line in the industry.

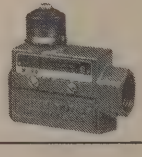


## ELECTRO MECHANICAL POSITION SENSING SWITCHES
**REQUEST CATALOG 100.**

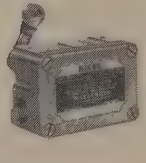
### OILTIGHT LIMIT SWITCHES
Various limit switches provide years of application proven reliability even in the most demanding environmental conditions.



### ENCLOSED SWITCHES
Enclosed switches provide a wide selection of sizes, sealing, actuation, circuitries and electrical ratings.



### EXPLOSION-PROOF SWITCHES
Some explosion-proof switches are fully interchangeable with non-explosion proof types. Others are both explosion-proof and sealed for use in outdoor hazardous applications.



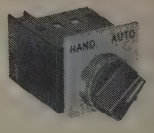
### MINIATURE OILTIGHT LIMIT SWITCHES
The "914CE" are miniature enclosed switches. They are environmentally sealed and have a pre-wired cable.

## SMALL SEALED LIMIT SWITCHES
**REQUEST CATALOG 200.**

"EN" limit switches offer environment-proof versatility. Many combinations of actuators, circuitries, terminals and electrical ratings are offered for military aerospace and commercial aircraft applications.
The "HE" is a hermetically sealed version of the EN switch. Applications will be similar except the HE meets maximum sealing requirements.
"HR" switches combine hermetic sealing with high temperature capabilities.

## MANUALLY OPERATED CONTROLS
**REQUEST CATALOG 100.**

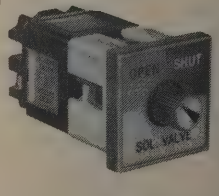
### PW MINIATURE OILTIGHT
Square format PW Miniature oiltight manual controls save panel space yet provide much of the same operating choices as heavy duty oiltight devices.



### PT HEAVY DUTY OILTIGHT
Heavy duty oiltight controls use tandem mounted contact blocks for multiple circuitry choices. Large square legend plates communicate even under the worst conditions.

### PM COMPACT OILTIGHT
Modern square shape PM compact pushbuttons/indicators are the smallest oiltight controls.

### CMC MULTILIGHT OILTIGHT
MICRO SWITCH CMC combines switching, indicator and legend into a single unit with up to 16 heavy duty or 32 electronic duty circuits in an almost unlimited sequence of actuation.



### ES CURRENT SENSOR
The ES package contains a solid state Hall sensor operated by a very low resistance coil. A digital output is provided as long as the current exceeds the specified level. They are used in circuits to protect against damage due to short circuits or other overcurrent conditions. 100 MICROSECOND RESPONSE TIME. Request Product Sheet ES for more details.

### DC CONTROL MOTORS
If you'd like to give your products a faster start, ask us about our complete line of low inertia motors with fast acceleration and deceleration. Sizes from 1 to 6 inches diameter, with integral tachometer options. Request product sheets for more details.

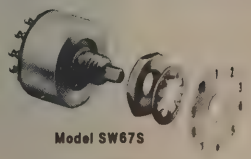
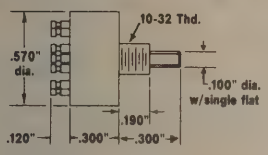
# MINELCO ROTARY SELECTOR SWITCHES

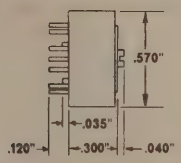
a **TALLEY INDUSTRIES** Company

135 South Main Street, Thomaston, CT 06787
Phone 203-283-8261

## Minelco Miniature Rotary Selector Switches







**Model SW62S** (PC board mounting)
**Model SW67S** (Panel mounting)

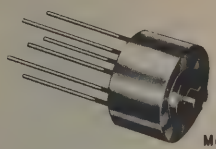
Low-cost, low profile reliable rotary switches, with up to 10 factory-set stops, featuring patented "poker chip" detent action for fast, positive positioning. Detent index is 36 degrees. Both models measure .570" dia. and .300" high. They have molded-in terminals and a slotted shaft for screwdriver adjustment.

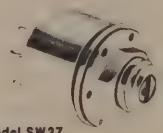
Model SW62S has molded-in spacers for PC board standoff.

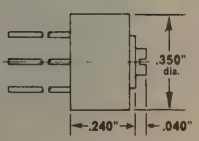
Model SW67S is O-Ring sealed, both shaft-to-bushing and bushing-to-panel.

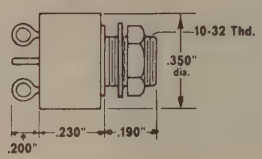
*See Bulletin S-67 for detailed specifications.*

Patent No. 3,596,013









**Model SW32** (PC board mounting)
**Model SW37** (Panel mounting)

Lowest profile switches available. These O-Ring sealed rotary selector switches provide control of several circuits in an absolute minimum of space. Detent action is at 60 degree intervals. Both switches measure .350" in diameter. They are ideally suited for miniaturized electronic and communications equipment and testing circuitry.

Model SW32 has ½ inch tinned terminal leads.

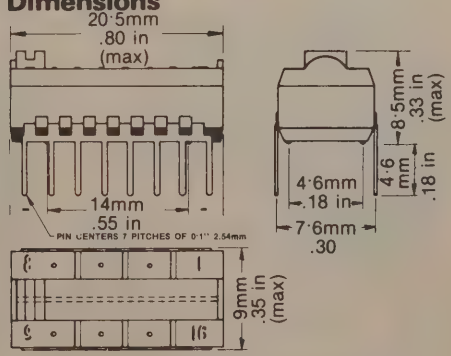
Model SW37 has solder-lug terminals.

*See Bulletin S-66 for detailed specifications.*

Patent No. 3,260,805

## Miniature DIP Slide Switches

**Dimensions**

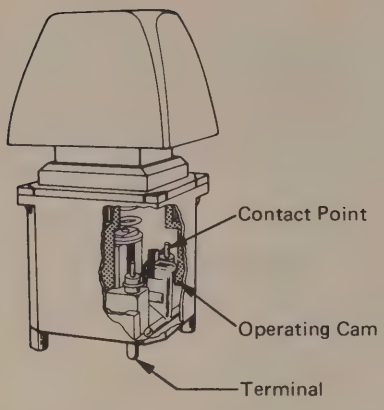


### Model SW40

Minelco Miniature DIP Slide Switches are available in the widest variety of switching combinations in the industry. They feature true "make-before-break" action and have spring loaded, double ball bearing detent action for smooth and positive location of each switching position.

Each switch can perform many functions. They are designed for a wide variety of applications. Clear plastic cover optional.

*See Bulletin S-69 for detailed specifications*



## Mechanical Enterprises, Inc.

# keyboard switches

## series T-5 Mechanical Contact

The T-5 Keyboard Switch has medium life, low-bounce mechanical contacts with all the advantages found in more expensive full-featured keyboard switches. The T-5 is suggested for applications in relatively protected environments where open contacts may be employed and where low cost is a prime requisite in the keyboard design.

Switching action is accomplished by movement of one gold plated bar against another at right angles (classic cross bar switching). The bars strike with a velocity determined only by spring forces and not subject to the speed at which the switch plunger is struck. This type of design provides a much more constant and lower contact bounce than is found in mechanical contact switches of more conventional design. The effects of operator differences are substantially eliminated.

Mechanically, the T-5 switch incorporates precision tracking surfaces between plunger and body which prevent binding even when double-width keytops are installed. The base contains mounting studs in the extreme corners which provide precision alignment. Heavy terminals, when soldered to a 1/16 PC board, produce a rugged assembly without a costly metal mounting frame.

Electrical configurations include both single and double pole versions, with normally open or normally closed contacts. (Form C contact is not available.) All switches are also available with alternate switching action: push on/push off. Lighted versions use a T-1 bi-pin incandescent lamp which is easily changed from the front panel.

## specifications

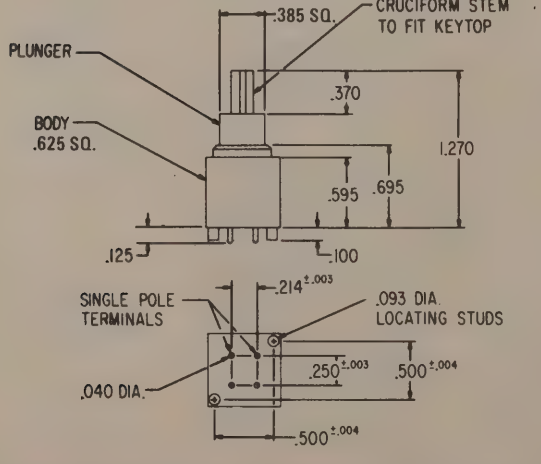
**Contact Rating, DC Resistive:**
3W max.
**Voltage:**
24V max.
**Initial Contact Resistance:**
100 m Ω max.
**Plunger Travel:**
.170 ±.010 in.
**Pre-Travel:**
.080 ±.030 in.

**OPERATING FORCE**
**Single Pole, Momentary:**
2.5 ±0.5 oz.
**Double Pole and/or Alt. Action:**
5.0 ±0.5 oz.

**TEMPERATURE**
**Operating:**
$-25^{0}$C to $+65^{0}$C
**Storage:**
$-40^{0}$C to $+70^{0}$C
**Contact Bounce:**
4 ms max.
**Min. Actuations, @ 5V, 100μ Amps:**
$20 \times 10^{6}$

## Typical Dimensions

(SWITCH ONLY)



## PCB Layout and Mounting

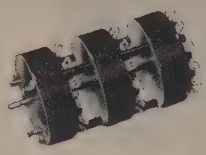
# OHMITE® power tap switches, high current, non-shorting type



**INTRODUCING**

**MODEL 711**

**Smallest Switch for Its Rating**
**7 Amps, 125 Volts**

All Ohmite switches feature the slow-break, quick-make action deemed so desirable for switching of AC current.

All models except 711 feature all ceramic, arc-proof bodies and solid silver alloy, fixed and movable contacts. The large, thick, silver-alloy fixed contact disks are permanently welded to copper studs. These, in turn, are riveted and soldered to sturdy terminal lugs, assuring a permanent mechanical and electrical joint. The rotor (moving) contact, also of solid silver-alloy, is riveted and soldered to the contact arm. Face of the rotor contact is slightly rounded assuring a perfect seating of the contacts with a slight rubbing, self-cleaning motion on every operation. Models 111, 212, 312 and 412 are UL listed.

The new Model 711 tap switch was designed to achieve high current capability with small size. It is actually smaller than many low current instrument switches. It interrupts 7 amperes at 125 VAC and can carry 15 amperes AC or DC. The Model 711 features a melamine phenolic body with solid silver-alloy fixed and movable contacts.

| Model | Alternate Current Rating | | Diameter | Shaft Diameter | Max. Panel Thickness | Weight | No. of Taps |
|---|---|---|---|---|---|---|---|
| | Amps. | Volts | | | | | |
| 711 | 7 | 125 | 1⅛″ | ¼″ | ⅛″ | .047 lb. | 3-11 |
| 111 | 15 | 125 | 1¾″ | ¼″ | ¼″ | .16 lb. | 3-11 |
| 212 | 20 | 150 | 2¼″ | ¼″ | ¼″ | .4 lb. | 3-12 |
| 312 | 30 | 300 | 3⅝″ | ¼″ | ¼″ | .75 lb. | 3-12 |
| 412 | 50 | 300 | 4⅜″ | ¼″ | ¼″ | 1.4 lb. | 3-12 |
| 608 | 100 | 300 | 6″ | ⅜″ | 1″ | 5 lb. | 3-8 |

## ALL CERAMIC OPEN TYPE TAP SWITCHES

Shorting Type

Non-Shorting Type

Designed to transfer currents of several amperes in circuits requiring high voltage insulation. Ceramic body construction. Monel metal taps; silver-graphite brush.

Switches up to 8 taps are approximately 3¼″ diameter including lugs; 9 to 12 tap switches are approximately 4¼″ diameter. Switches can be ordered assembled 2 to 3 in tandem. Single hole mounting by means of ⅜″ diameter bushing and hexagon nut accommodates panels up to ¼″ thick (maximum).

Maximum current capacity is 7 amperes but only 3 amperes at 120 V.A.C. should be interrupted. Current ratings are less for all direct current circuits above 20 volts, for inductive circuits and high voltages.

# OHMITE® OHMITROL solid state power and motor speed controls

## FEATURES:

- Conserves space & power
- Smallest 1 & 2 KW control
- AC & DC output types
- Built-in on-off switch
- Adjustable control range
- Choice of component & portable styles
- Long life

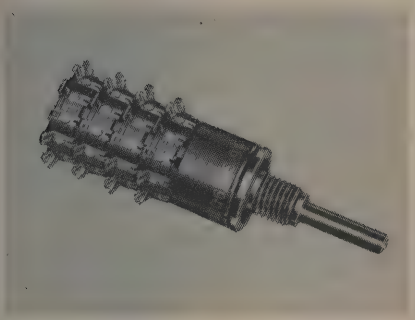
# HALF INCH SUBMINIATURE ROTARY SWITCH

**For applications where extremely small size is essential**



## SPECIFICATIONS

**SIZE:** ½" diameter (1⅛" over terminals) with up to four sections. Maximum depth behind panel, 1⅜".
**MOUNTING:** Single D-hole, with ¼-32 bushing, ¼" long.
**SHAFT:** ⅛" dia. x ¾" long from front mounting surface.
**INDEXING:** 30° with up to 12 positions.
**STATOR MATERIAL:** Stators and spacers are diallyl phthalate; unaffected by moisture, non-corrodible.
**ROTOR MATERIAL:** Thermoplastic.
**CONTACT MATERIAL:** Gold-plated silver alloy.
**CONTACT RESISTANCE:** Initially under 10 milliohms; after rated life, under 20 milliohms.
**INSULATION RESISTANCE:** 10 megohms minimum.
**ELECTRICAL RATING:** 0.25 amp at 110 volts AC resistive; 0.50 amp at 30 volts DC resistive.
**LIFE:** 10,000 cycles minimum, room temperature, rated load.
**AMBIENT TEMPERATURE:** −65°C to +85°C.
**HARDWARE:** Includes ¼" x 32 hex nut, internal tooth lockwasher and adjustable stop washer.
**FINISH:** Suitable to withstand 50-hour salt spray test per MIL-S-3786.

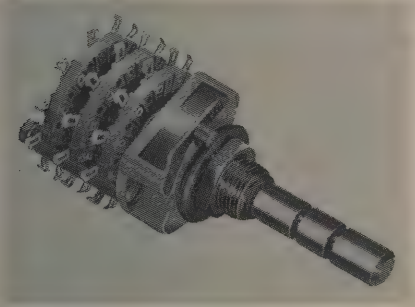
# TYPE AM ROTARY SWITCH

**Rugged miniature switches with diallyl phthalate stators insulation and acetal copolymer rotors**



## SPECIFICATIONS

**SIZE:** 1" dia. nominal, with 1 to 3 sections. Max. depth, 1⅝".
**MOUNTING:** Single hole, with ⅜-32 bushing, ⅜" long. Locating lug on ⅜" radius.
**SHAFT:** .250+.000/−.003; 1½" long; grooved for break-off at ¾", 1⅛".
**INDEXING:** Unidex™ 30°.
**STOP STRENGTH:** One fixed stop, 15 in./lbs.; one adjustable stop, 10 in./lbs.
**STATOR INSULATION:** Diallyl Phthalate per MIL-M-14.
**ROTOR INSULATION:** Celcon (Acetal Copolymer).
**FINISH:** Suitable to withstand 50-hour salt spray per MIL-S-3786.
**CONTACTS STANDARD:** Silver plated brass, with additional gold plating of 15 millionths.
**CONTACT RESISTANCE:** 0.003 to .015 ohms.
**ELECTRICAL RATING:** Break .5 amp at 28 volts DC, 0.25 amp at 110 volts AC, resistive. Carry 5 amps.
**HARDWARE:** Includes ⅜-32 mounting nut and lockwasher.
**PACKAGING:** Oakote protective packaging protects switches from tarnish and corrosion.

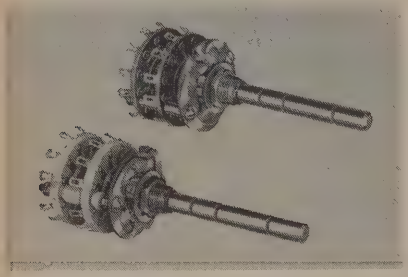
# TYPE F AND FC SWITCHES

**Only 1 5/16" diameter, with either phenolic or ceramic insulation . . . choice of contact material**



## SPECIFICATIONS

**SIZE:** 1 5/32" wide x 1 5/16" high (Type FC, 1 1/4" wide).
**MOUNTING:** Single hole, with 3/8-32 bushing, 3/8" long. Locating lug on 17/32" radius.
**SHAFT:** .250 +.000/−.003; 2 3/8" long; grooved at 3/4", 1 1/8" and 1 7/8".
**INDEXING:** Ball-type 30°.
**STOP STRENGTH:** One fixed stop, 15 in./lbs.; one adjustable stop, 10 in./lbs.
**SECTION SPACING:** 3/8" spacers between sections; 5/16" spacer with washer between front plate and first section. Type FC has epoxy glass shock washers.
**INSULATION:** Type F, phenolic PBE-P per LP-513; Type FC, ceramic.
**SECTION THICKNESS:** Type F, .062"; Type FC, .120".
**FINISH:** Withstands 50-hour salt spray per MIL-S-3786.
**CONTACTS STANDARD:** Silver plated brass, with additional 15 millionths gold plating.
**CONTACT RESISTANCE:** 0.003 to .015 ohms.
**ELECTRICAL RATING:** Break 1 amp at 28 volts DC, 0.5 amp at 110 volts AC, resistive. Carry 5 amps.
**HARDWARE:** Includes 3/8-32 mounting nut and lockwasher.

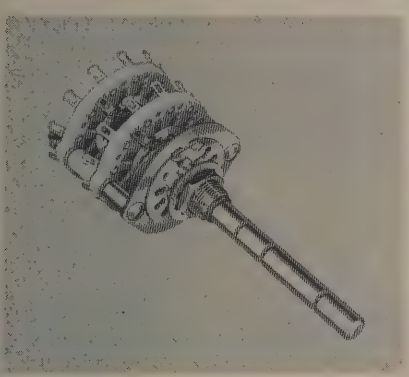
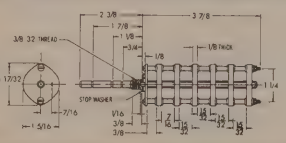
## TYPE JC MULTI-SECTION ROTARY SWITCH

**Standard 1 17/32" switches with ceramic insulation . . . up to 6 sections . . . up to 18 poles**





### SPECIFICATIONS

**SIZE:** 1 3/8" wide x 1 17/32" high.
**MOUNTING:** Single hole, with 3/8-32 bushing, 3/8" long. Locating hole on 7/16" radius.
**SHAFT:** .250 +.000/−.003; 2 3/8" long; grooved at 3/4", 1 1/8" and 1 7/8".
**INDEXING:** Ball-type 30°; one fixed, one adjustable stop.
**SECTION SPACING:** 1/32" spacers between sections; 3/8" spacer between front plate and first section; 7/16" between first and second sections. Sections are .120" thick.
**INSULATION:** Ceramic.
**FINISH:** Withstands 50-hour salt spray per MIL-S-3786.
**CONTACTS STANDARD:** Silver plated brass, with additional 15 millionths gold plating.
**CONTACT RESISTANCE:** 0.003 to .015 ohms.
**ELECTRICAL RATING:** Break 1 amp at 28 volts DC, 0.5 amp at 110 volts AC, resistive. Carry 5 amps.
**HARDWARE:** Includes 3/8-32 mounting nut and lockwasher.

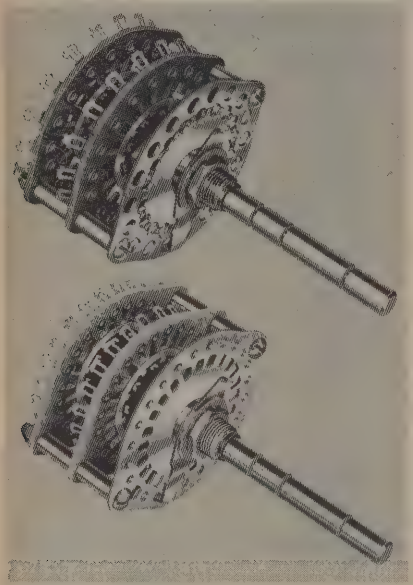
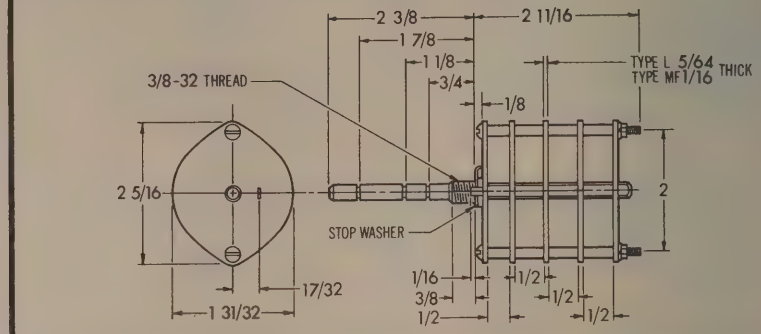
# TYPE L, MF MULTI-PURPOSE ROTARY SWITCHES

**Rugged 2⁵⁄₁₆″ switches with phenolic insulation . . . 18 or 24 positions**





## SPECIFICATIONS

**SIZE:** 1³¹⁄₃₂″ wide x 2⅝″ high (Type MF, 1¾″ wide).

**MOUNTING:** Single hole, with ⅜-32 bushing, ⅜″ long. Locating key on adjustable stop washer.

**SHAFT:** .250 +.000/−.003; 2⅜″ long; grooved at ¾″, 1⅛″ and 1⅞″.

**INDEXING:** Type L, 20°; Type MF, 15°. Ball-type. One fixed and one adjustable stop.

**SECTION SPACING:** ½″ spacer between front plate and first section; ½″ between sections.

**INSULATION:** Phenolic PBE-P per LP-513.

**SECTION THICKNESS:** Type L, .078″; Type MF, .062″.

**FINISH:** Withstands 50-hour salt spray per MIL-S-3786.

**CONTACTS:** Silver plated brass, with additional 15 millionths gold plating.

**CONTACT RESISTANCE:** 0.003 to .015 ohms.

**ELECTRICAL RATING:** Break 1 amp at 28 volts DC, 0.5 amp at 110 volts AC, resistive. Carry 5 amps.

**HARDWARE:** Includes ⅜-32 mounting nut and lockwasher.

**PACKAGING:** Oakote protective packaging resists tarnish and corrosion.

**STANDARD PRINTED CIRCUIT BOARD HOLE PATTERNS ARE AVAILABLE FROM YOUR LOCAL DISTRIBUTOR**

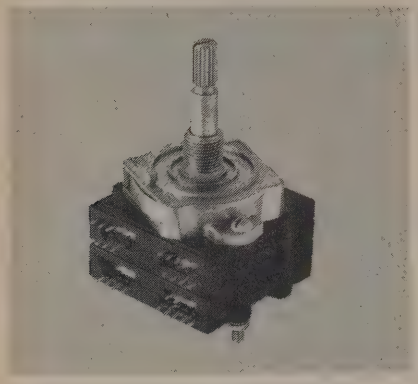
# ENCODER SERIES ROTARY SWITCH WITH UNIDEX® DETENT

## PROGRAMMABLE ROTARY SWITCH FOR:

- Communication Systems
- Data Systems
- Microprocessor Interface
- A-D Converter (Shaft Encoder)
- Mechanical "Read Only Memory" (ROM)



## FULLY PROGRAMMABLE DESIGN

Up to 60 detent positions are available. Oak will design artwork for the double-sided PC board to match your truth table and provide the desired outputs. The number of switch positions is programmed by changing the number of index notches cut into the board edge.

## GUARANTEED SWITCHING ACCURACY

Because of the unique design of this switch, Oak can guarantee switching accuracy. Not only have internal shorts and opens been eliminated, but functional backlash from loose rotors cannot occur since precise detenting is achieved by placing the index notches on the periphery of the rotor.

The Encoder Series rotary switches from Oak mark a breakthrough in rotary switch design. Functional design innovations offer unparalleled long-term contact registry and switch integrity. For the first time ever, a switch capable of up to sixty positions can be offered with guaranteed switch position accuracy for the life of the switch.

All plastic materials used have a 94-VO Underwriters Laboratories flammability listing.

## SPECIFICATIONS:

**MATERIALS**

**HOUSING:** Molded phenolic thermoset

**CONTACTS:** Silver-plated copper-alloy

**CIRCUIT BOARD:** Paper base phenolic, copper clad, silver plated

**METAL PARTS:** Suitably finished for 50 hour salt spray (ref. MIL-S-3786)

**ELECTRICAL/MECHANICAL**

**RATED VOLTAGE AND CURRENT:** (Resistive load at room ambient.) 12 MA @ 28 VDC

**CONTACT RESISTANCE:** 100 milliohms max.

**VOLTAGE BREAKDOWN:** Between common and open contact, 50 VAC, Contact to frame, 500 VAC

**OPERATING TEMPERATURE RANGE:** −30°C to +85°C

**VIBRATION:** 5 to 2000 cycles (ref. MIL-S-3786)

**DETENT TORQUE:** 10 ounce inch approx.

**LIFE:** Over 25,000 cycles min.

# ROTARY SWITCHES

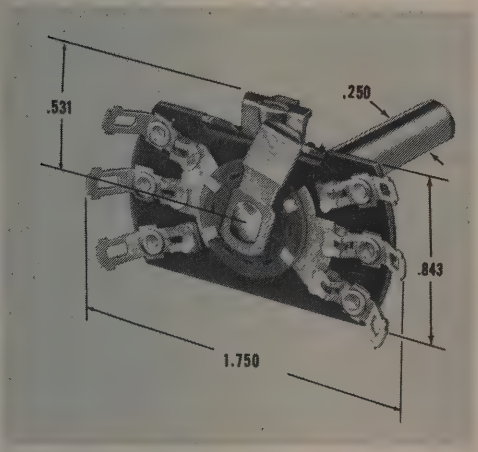
## SERIES 20 LIGHT DUTY ROTARY SWITCHES



Economy rotary switches are ideal for all light duty requirements, in radio-phonos, meters, speakers, for stereo channel reversing, etc. Phenolic insulation per LP-513 Grade PBE-P for stator and rotor. Silver plated brass contacts with additional gold plating of 15 millionths, double-wiping and self-cleaning. Rated 1 amp at 28 volts or 0.5 amp at 110 volts AC; carry 5 amps. Size: 1.750″ wide x .843″ high. Shaft is 2⅜″ long, grooved for break-off at ¾″, 1⅛″ and 1⅞″. Positive or spring return indexing.

| Total Poles | Active Positions | No. of Sections | Indexing-Note | Insulation | Catalog Number | |
|---|---|---|---|---|---|---|
| | | | | | Shorting | Non-Shorting |

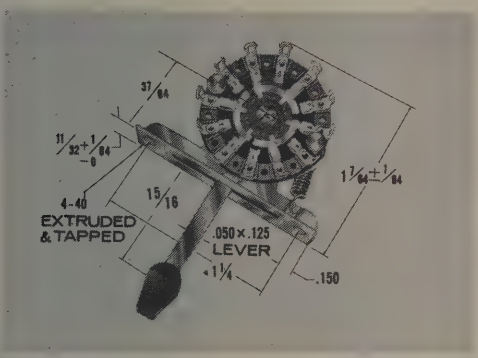
* Positive 2 to 1 † To Center

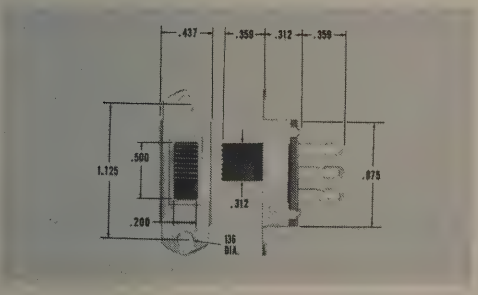
## TYPE 184 LEVER SWITCHES



Rugged switch with molded stator for extra strength. Easily adaptable to miniaturized circuitry. Long-life construction with double-wiping contacts of silver plated brass, with additional 15 millionths gold plating. Rated .5 amp at 28 volts DC or 0.25 amp at 110 volts AC, resistive; carries 5 amps. Stator insulation is diallyl phthalate per MIL-M-14. Positive indexing. Rotor is Celcon, (acetal copolymer). Size: 1⅞₄″ deep behind panel; 1¼″ mounting centers. Supplied with knob.

| Total Poles | Active Positions | Insulation | Catalog Number | |
|---|---|---|---|---|
| | | | Shorting | Non-Shorting |
| 5 | 3 | Diallyl Phthalate | 399162-184 | 399163-184 |
| 6 | 2 | Diallyl Phthalate | 399164-184 | 399165-184 |

## SERIES 200 SLIDE SWITCHES



Compact design, 30% narrower than ordinary slide switches. Gold plated, double-wiping contacts are self-cleaning. Recommended limit of operation, 3 amps at 125 volts AC. Phenolic insulation per LP-513 Grade PBE-P. Size: .671″ deep behind panel; 1.125″ mounting centers. Non-shorting.

| Contact Arrangement | Poles | No. of Contacts | Insulation | Catalog No. Non-Shorting |

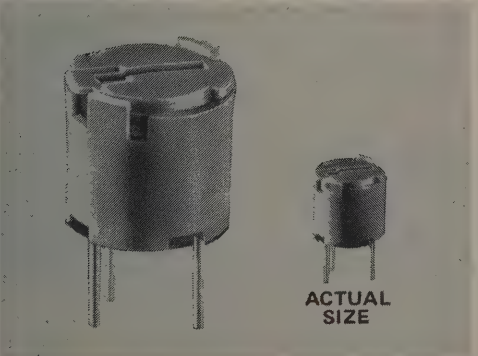
## 399799-TS TRIM SWITCH



The miniature Trim Switch provides needed electrical switching capability in an equipment area that is physically inaccessible to operators' fingers. For such applications, Oak's TRIM SWITCH is simply inserted and soldered into the PC board and is actuated by a 90° turn of a screwdriver.

**SPECIFICATIONS:** Measures .359″ high by .375″ in diameter. Rated 100 volts DC, 100 milliamps resistive load. Contacts are formed of copper base, gold-plated alloy and have make-before-break action with minimum applied throw pressure. Switch body and rotor are glass-filled polyamide. Switch leads are .025″ diameter and 1⅞₄″ long. Single pole, double throw (SPDT).

**LIFE:** Rated for 25,000 operations or 12,500 cycles.

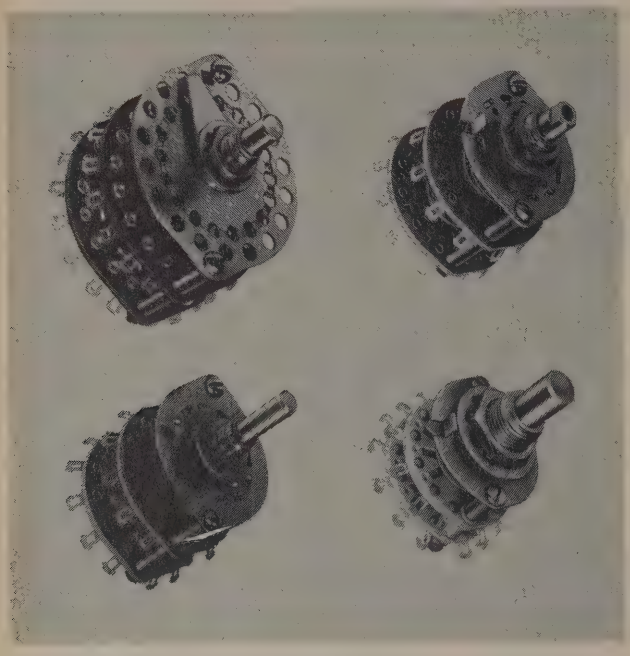
# MODULINE™ ROTARY SWITCHES



This basic table gives a general description of MODULINE Distributor Switches. They total more than 2 million choices! You'll find the selection far more comprehensive than offered by any stock-switch system. So, if you frequently require circuits of new configuration . . . if you would benefit from greater flexibility of selection . . . or if delivery time is vital . . . your situation is **ideal** for profiting from our MODULINE Distributor Switches.

| SIZE | Maximum Number of Positions and "Throw" in Degrees | | | | | Stator Insulation | | | Oak Basic Style Designation |
|---|---|---|---|---|---|---|---|---|---|
| Diameter Over Terminals | 8 45° | 10 36° | 12 30° | 18 20° | 24 15° | Phenolic | Ceramic | Silicone Glass | |
| | | | X | | | | | X | A 01 |
| 1 1/16 | | X | | | | | | X | BA 02 |
| | X | | | | | | | X | AA 03 |
| 1 3/8 | | | X | | | X | | | F 04 |
| | | | X | | | | X | | FC 04 |
| 1 1/16 | | | X | | | | X | | JC 05 |
| | | | X | | | X | | | K 05 |
| 1 7/8 | | | X | | | X | | | H 06 |
| | | | X | | | | X | | HC 06 |
| 2 5/16 | | | | X | | X | | | L 07 |
| 2 5/16 | | | | | X | X | | | MF 08 |

**IN CERTAIN CRITICAL AUDIO AND INSTRUMENT APPLICATIONS . . .**
A requirement for make before break is imperative. Oak switches as well as other brands may not provide positive shorting across the clips adjacent to the strut screws. In these instances, use of these stock switches is not recommended. A specially designed switch should be used.

## FAST, EASY SWITCH SPECIFYING

NO DRAWINGS NECESSARY . . .
YOU ORDER/DESIGN SWITCHES BY NUMBER

Years in realization, this revolutionary ordering system now makes it possible for you to specify rotary switches of superior quality, and have your order for lots of 1 to 99 shipped within 3 days. You'll find sizes to suit every purpose — construction and insulating material for every kind of environment.

Deliveries are faster because MODULINE eliminates time-consuming drafting, and makes possible automatic processing of orders. Drawings are unnecessary. The part numbering system below is all the factory formprint it takes.

Every model of MODULINE switches has already been shock, vibration, torque and life-tested to meet military requirements; quality control levels are equal in every way to custom-made switches. In fact MODULINE switches are indistinguishable in appearance and performance from custom-fabricated types. You get what you want, exactly the way you want it — with record speed.

All you need do is begin encoding the switch you want, following the simple steps.

## GENERAL SPECIFICATIONS

**MILITARY SPECIFICATIONS** — All MODULINE switches are designed in accordance with military specifications. We maintain continuous testing, in approved laboratories, for shock, vibration, torque, life, humidity, altitude, salt spray and numerous other parameters. Highest quality is maintained.

**FINISHES** — 50-hour salt spray: steel and brass parts are cadmium-plated and chromate-dipped.

**INSULATING MATERIALS**

Phenolic — The finest grade paper-base phenolic, per MIL-P-3115, type PBE-P.

Ceramic — Steatite, per MIL-I-10A, Grade L422 or better; impregnated with Dow Corning DC-200.

Silicone glass — per MIL-P-997, type GSG. Rotor insulators are Kel-F.

**CONTACTS** — Make before break (Shorting) or break before make (Non-shorting) as specified.

Type 1 — Silver-plated brass — .0001" minimum plating assures silver-to-silver contact for a minimum of 15,000 operations. Gold-plated 30 millionths inch for tarnish retardation per military specifications.

Type 2 — Silver alloy — Assures silver-to-silver contact in excess of 200,000 operations. Gold-plated 30 millionths inch for tarnish retardation per military specifications. Usable up to 100°C.

Clips — High-pressure, double-wiping, self-cleaning, long-life design.

Contact resistance — Essentially constant; in the order of .003 to .015 ohms, depending on switch type and clip/blade configuration. This measurement includes the resistance of the two contacts and the metal parts. In Oak switches, contact resistance is essentially uniform throughout the life of the switch.

**ELECTRICAL** — Break 1 amp at 28 volts DC, 0.5 amp at 110 volts AC. Carry 5 amps. These are conservative ratings. MODULINE switches are superior or equivalent to all existing switches of comparable published ratings.

**TEMPERATURE RANGE** — from −65°C to +85°C (normal Military).

**DETENTS** — Ball type; hill-and-valley.

**STOPS** — Detents may be had with a fixed counter-clockwise stop and an adjustable clockwise stop; or for continuous rotation with no stops. Adjustable stops are set by Oak at positions designated on order.

**HARDWARE** — Mounting nuts and lockwashers are supplied. Knobs not included.

**PACKAGING** — Individually packaged, unless Bulk Commercial is specified.

**PART NUMBER STAMPING** — In instances where part number identification is required, an imprinted metal tag (consistent with military specifications governing environment tests) will be permanently secured to upper strut screw at front plate. Any combination of letters, digits and blank spaces totaling 17 can be supplied.

## MODULINE™ SERIES/PART NUMBERING SYSTEM CONTINUED

### STEP 1 / BASIC SIZE AND DETENT ANGLE

STEP 1

| 0 | 4 |
|---|---|

From NUMBER column below, select numerical code for the basic switch you want. (Refer to part numbering system for interpretation of style letters.)

| Number | | |
|---|---|---|
| 01 | * | 30° detent — 12 positions (Style A; silicone glass). Select contacts and switching configurations from Step 2 for this switch 065 to 084; 501 & 502; 803 |
| 02 | ■ | 36° detent — 10 positions (Style BA; silicone glass). Select contacts and switching configurations from Step 2 for this switch 049 to 056; 802 |
| 03 | • | 45° detent — 8 positions (Style AA; silicone glass). Select contacts and switching configurations from Step 2 for this switch 041 to 048; 801 |
| 04 | † | 30° detent — 12 positions (Style F; phenolic) (Style FC; ceramic). Select contacts and switching configurations from Step 2 for this switch 001 to 040; 503 to 506; 804 & 805 |
| 05 | † | 30° detent — 12 positions (Style K; phenolic) (Style JC; ceramic). Select contacts and switching configurations from Step 2 for this switch 001 to 040; 503 to 506; 804 & 805 |
| 06 | † | 30° detent — 12 positions (Style H; phenolic) (Style HC; ceramic). Select contacts and switching configurations from Step 2 for this switch 001 to 040; 503 to 506; 804 & 805 |
| 07 | ♦ | 20° detent — 18 positions (Style L; phenolic). Select contacts and switching configurations from Step 2 for this switch 057 to 060; 507 & 508; 806 |
| 08 | ‡ | 15° detent — 24 positions (Style MF; phenolic). Select contacts and switching configurations from Step 2 for this switch 061 to 064; 509 & 510; 807 |

### STEP 2 / SECTIONS, CONTACTS AND SWITCHING CONFIGURATIONS

STEP 2

| 0 | 0 | 7 |
|---|---|---|

**Refer to Column No. 1 for Section Material used for the type of Switch you want. Matching symbols in Columns I and II will assist you in making your number selection quickly and accurately.**

From NUMBER column below, select numerical code for the combination of section material, contacts, and the switching configuration you want.

| | Number | Section | Contacts | Shorting or Non-Shorting | No. of Poles and Positions |
|---|---|---|---|---|---|
| | 000 | no stator | — | — | — |
| † | 001 | phenolic | brass | Sh | 1P12P |
| † | 002 | phenolic | brass | Sh | 1P11P |
| † | 003 | phenolic | brass | Sh | 2P6P |
| † | 004 | phenolic | brass | Sh | 4P2P |
| † | 005 | phenolic | brass | Sh | 3P3P |

| † | 805 | phenolic | brass | — | 12 dummy lugs |
| ♦ | 806 | phenolic | brass | — | 18 dummy lugs |
| ‡ | 807 | phenolic | brass | — | 24 dummy lugs |
| | 999 | each stator different in circuitry | | | |

**NOTE: Sh** = Make before break. **NS** = break before make.

### STEP 3 / ROTATIONAL STOPS

STEP 3

| 0 | 9 |
|---|---|

From NUMBER column below, select numerical code for desired total switch positions (not to exceed allowable maximum for each particular model). Stops will be set accordingly by Oak: clockwise stop is rotatable for repositioning by user any time. Continuous rotation switches **cannot** have stops added later. Unused contacts remaining on stators can be ignored; or used as handy tie points.

The number of positions selected in Step 3 must agree with the positions selected in Step 2. Example: 1P12P from Step 2, requires that you select no more than 12 positions (number 12 from Step 3.) You can select fewer positions, but **not** more positions.

| Number | Total Positions Requested |
|---|---|
| 00 | continuous rotation |
| 02 | 2 positions |
| 03 | 3 positions |
| 04 | 4 positions |
| 05 | 5 positions |
| 06 | 6 positions |
| 07 | 7 positions |
| 08 | 8 positions |
| 09 | 9 positions |
| 10 | 10 positions |
| 11 | 11 positions |
| 12 | 12 positions |
| 13 | 13 positions |
| 14 | 14 positions |
| 15 | 15 positions |
| 16 | 16 positions |
| 17 | 17 positions |
| 18 | 18 positions |
| 19 | 19 positions |
| 20 | 20 positions |
| 21 | 21 positions |
| 22 | 22 positions |
| 23 | 23 positions |
| 24 | 24 positions |

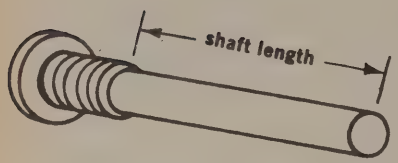
## STEP 4 / FRONT SHAFT LENGTH

STEP 4

1 | 2



For NUMBER column at right, select numerical code for the desired front shaft length. (Shafts are measured from free end to threaded bushing, as shown.

| Inches 1/4" dia. Shaft | | |
|---|---|---|
| Number | Front Shaft Length | Flat Length (A, Step 5) If Used |
| 00 | NO SHAFT * | — |
| 01 | 3/16"† | — |
| 02 | 1/32"† | — |
| 03 | 5/16" | 3/16" |
| 04 | 1 1/32" | 3/16" |
| 05 | 3/8" | 1/4" |
| 06 | 1 3/32" | 1/4" |
| 07 | 7/16" | 5/16" |
| 08 | 1 5/32" | 5/16" |
| 09 | 1/2" | 3/8" |
| 10 | 1 7/32" | 3/8" |
| 11 | 9/16" | 7/16" |
| 12 | 1 9/32" | 7/16" |

| Inches 1/4" dia. Shaft | | |
|---|---|---|
| Number | Front Shaft Length | Flat Length (A, Step 5) If Used |
| 13 | 5/8" | 1/2" |
| 14 | 2 1/32" | 1/2" |
| 15 | 1 1/16" | 1/2" |
| 16 | 2 3/32" | 1/2" |
| 17 | 3/4" | 1/2" |
| 18 | 25/32" | 1/2" |
| 19 | 1" | 1/2" |
| 20 | 1 1/32" | 1/2" |
| 21 | 1 1/2" | 1/2" |
| 22 | 1 17/32" | 1/2" |
| 23 | 2" | 1/2" |
| 24 | 2 1/32" | 1/2" |

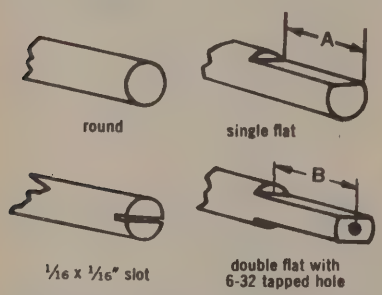
* Omission of front shaft on item No. 00 will leave only 3/32" extension in front of the bushing — sufficient for the retaining ring. A broached hole is left exposed in the detent assembly shaft to permit switch operation only by authorized personnel.

† Slotted shaft only.

## STEP 5 / FRONT SHAFT DETAIL

STEP 5

3



From NUMBER column, select coded designation for desired shaft-end detail.

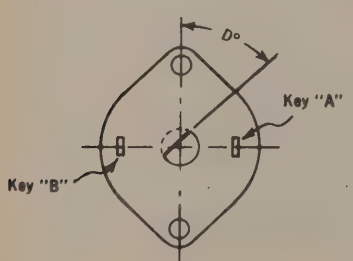
| Number | Shaft End |
|---|---|
| 0 | No Shaft |
| 1 | round<br>Round shaft is not available in 3/16" & 1/32" lengths |
| 2 | Screwdriver Slot .062" x .062"<br>Available only on 3/16" & 1/32" lengths |
| 3 | .218" Single Flat |
| 4 | .187" Single Flat |
| 5 | .156" Single Flat<br>Dim. A — see flat column in Step 4. |
| 6 | .187" Military Double Flat<br>Available only on following shaft lengths |

| Length | Dim. B |
|---|---|
| 5/16" | .187" |
| 3/8" | .250" |
| 7/16" | .312" |

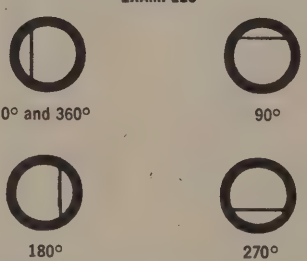
## STEP 6 / FRONT SHAFT ANGLE

STEP 6

1 | 3



EXAMPLES



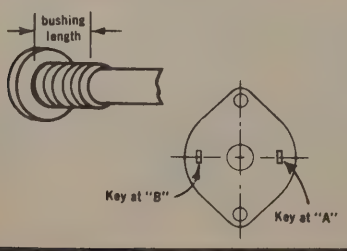
From NUMBER column, select coded designation for front shaft angle. (Switch is always viewed from front with strut screws aligned vertically.)

| Number | Angle "D" | Number | Angle "D" |
|---|---|---|---|
| 00 | No Flat | 13 | 180° |
| 01 | 0° (and 360°) | 14 | 195° |
| 02 | 15° | 15 | 210° |
| 03 | 30° | 16 | 225° |
| 04 | 45° | 17 | 240° |
| 05 | 60° | 18 | 255° |
| 06 | 75° | 19 | 270° |
| 07 | 90° | 20 | 285° |
| 08 | 105° | 21 | 300° |
| 09 | 120° | 22 | 315° |
| 10 | 135° | 23 | 330° |
| 11 | 150° | 24 | 345° |
| 12 | 165° | | |

## STEP 7 / BUSHING AND KEYS

STEP 7

1



From NUMBER column, select designation that encodes the desired bushing size and key location.

| Number | Bushing Size & Key Location |
|---|---|
| 0 | No bushing; no key |

| 5 | 1/4" bushing; key at B |
| 6 | 1/4" bushing; no key |

All switches supplied with mounting nut and washer.

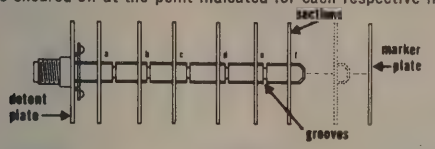
# MODULINE™ SERIES/PART NUMBERING SYSTEM CONTINUED

## STEP 8 / LOCATIONS OF SECTIONS, SHIELDS, MARKER PLATE; AND REAR-SHAFT LENGTH

From NUMBER columns, select the designation that correctly encodes desired assembly of switch parts: that is, the location of each section . . . position of shields (if any) between stators . . . terminus of rear shaft . . . and whether to include marker plate at back of switch.
**Letters a, b, c, d, e and f** convey the position of each section, relative to the diagram below.
**Letter "S" combined with small letter** (Sb, for example) indicates presence of a shield (normally situated only **between** sections) and its location relative to diagram below.
**Letters MP** signify presence of a marker plate.
**Shafts will be sheared off** at rear of switch, at groove immediately following the last-in-order of switch sections — except for those in the 900 series, which will be sheared off at the point indicated for each respective listing.

STEP 8

| 5 | 1 | 1 |
|---|---|---|



| Basic Switch Style | Dimension (inches) From Detent Plate to Grooves | | | | | |
|---|---|---|---|---|---|---|
| | a | b | c | d | e | f |

## STEP 9 / FOR SCREW THREADS AND DIMENSIONS TO AMERICAN STANDARDS

STEP 9

| A |
|---|

**MODULINE switches are marketed world-wide. Therefore an "A" is shown in the last box of the part numbering system to signify that the order originates in the United States, Canada or other countries on this continent. It also indicates that screw threads and other dimensional details are manufactured to American standards.**

**EACH SECTION DIFFERENT IN CIRCUITRY**
**Where a switch having multiple sections of different circuitry is required you can write your order thusly—**
**Example:** 04-999-09-12-3-13-1-519-A

Note: When 999 is shown in **STEP 2**, specify separately code number of section desired at each location.

* "C" dimension is a combination of spacer length and stator thickness, which is then added to "A" spacer when doubled spacing is required from detent plate to first stator; or added to the "B" spacer when doubled spacing is required between sections. Multiples of "C" dimension are used for each additional spacing length required.

**NOTE:** To determine depth behind mounting panel add 1/8" to "P" dimension and add "K" or adjusted "K" dimension.

† Maximum length excludes marker plate. Add "C" to arrive at "K" dimension including marker plates.
‡ 1/8" with continuous rotation.

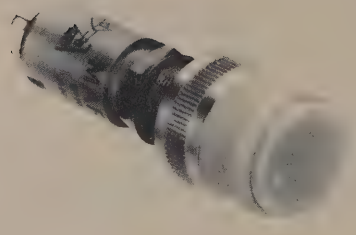
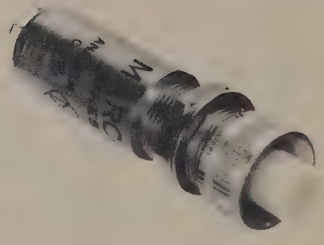
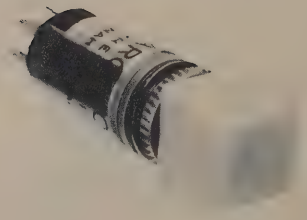
# Presslite Switches







Oak Switch Divisions' versatile and expanding line of modular Presslite switch and matching indicator assemblies is the end product of years of continuing design improvement to meet the increasing demands of the control/display markets. The incorporation of modern materials, combined with rigid quality control procedures and continuous testing of production samples, assures high reliability and extremely long life.

A wide range of electrical ratings and contact configurations are available in both alternate (push-on-push-off) and momentary operation. Where the switch is operated within its rating, the following life expectancies apply:

| Rating | Type | Expected Life at Rated Load |
|---|---|---|
| ½ Amp | 590, 591 | 1 to 3 million cycles |
| ½ Amp | 830, 860 (dry reed) | 2 to 10 million cycles |
| 3 Amps | 542, 543, 545, 546, 562, 563, 565, 567, 568, 643 | 1 to 2 million cycles |
| 5 Amps | 316, 318, 320, 321, 416, 418, 516, 518, 520, 521, 616, 618 | 500,000 to 1 million cycles |
| 10.5 Amps | 571, 572, 575, 576, 581, 582, 585, 586, 671, 672, 675, 676, 681, 682, 685, 686, 700 series, 800 series, and all Rainbow™ switches | 100,000 cycles @ 10.5 Amps to 1 million cycles @ 5 Amps |
| 15 Amps | 317, 319, 517, 519 | 50,000 to 100,000 cycles |

Unless otherwise specified in the following pages, Presslite materials are as follows:

Contacts: Coin silver

Solder Terminals: Coin silver or plated brass

Terminal Insulation: Molded thermoset plastic

Housing: Anodized aluminum, except 10.5 amps Presslite bases on Pages 10, and 11, 19 and 22 which have thermoplastic housing and nickel plated brass mounting bushing.

Marcoflex switches on Pages 28 and 29 have one piece thermoplastic housing and terminal insulation.

Where the Presslite or Matching Indicator is to be used with a neon lamp, the A1H high brightness type is recommended. Best illumination is achieved with lunar or other light color pushbuttons. Green or blue should be avoided. A 27K ohm dropping resistor is recommended for the A1H neon lamp. On most types, this resistor can be provided as an integral part of the switch or indicator base.

# Presslites, Friction Cap

## Ordering Information

The Friction Cap Presslite series provides the broadest possible flexibility in terms of electrical characteristics, appearance and mounting procedure, allowing the user to "engineer" a switch assembly to meet his specific requirements.

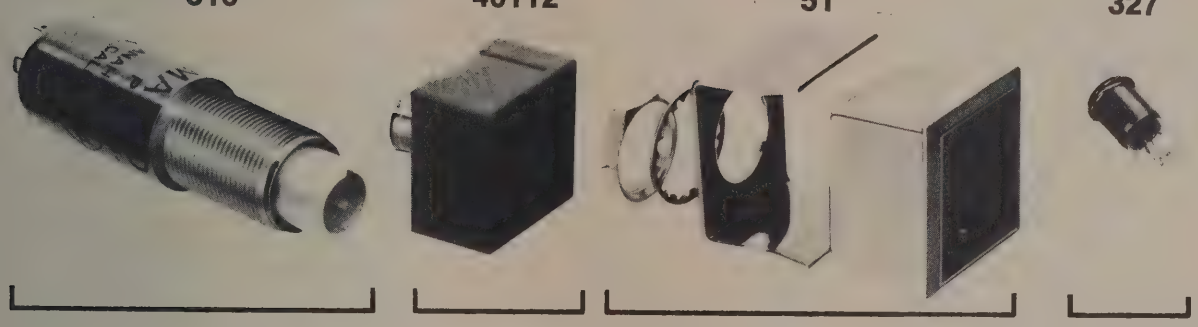
Many pushbutton sizes and configurations are offered, with sufficient space for engraved legends or symbols.

A wide range of mounting hardware is available to meet virtually every panel appearance or mounting requirement.

Many Presslite illuminated switch bases and pushbuttons meet applicable specifications MIL-S-22885. Consult factory for details of military construction.

**A complete part number for a Friction Cap Presslite assembly consists of four blocks of digits, such as the following:**

**516** **40112** **51** **327**



**Switch or Indicator**

**Base Type** — select from those described on Pages 7 thru 11.

**Lamps** — T-1 ¾ midget flange base. Select from Group A, page 64.

**Pushbutton** — select assembly as described on Pages 12 and 13.

**Mounting Hardware** — select assembly as described on Pages 14 thru 17.

**PUSHBUTTON CODE**

4 0 1 12

# Presslites, Friction Cap

## indicator base

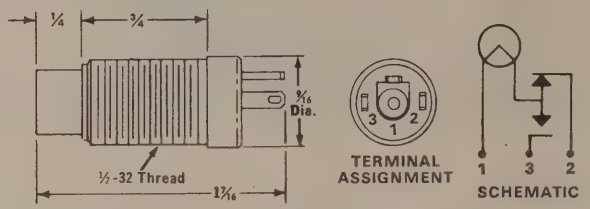
### TYPE 532
U.L. RECOGNIZED

- Provides same pushbutton projection as Presslite switch bases in all styles of mounting hardware.

### TYPE 332
U.L. RECOGNIZED
INTERNAL RESISTOR

- An internal 27K OHM resistor, connected to terminal No. 1 provides for A1H neon lamp operation.

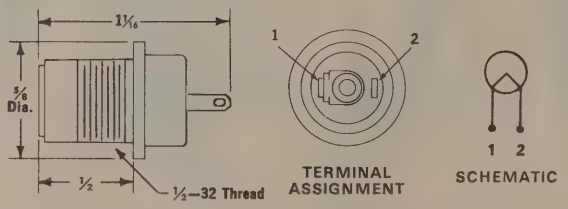
## press-to-test indicator base



### TYPE 533
U.L. RECOGNIZED

- Provides same pushbutton projection as Presslite switch bases in all styles of mounting hardware.
- Nominal operating force: 16 oz.
- Nominal pushbutton travel: 1/32 in.

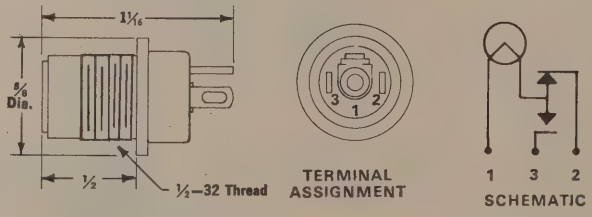
## indicator base



### TYPE 534

- Intended for use with Friction Cap mounting hardware styles 7 and 8 only.
- Provides same pushbutton projection as Presslite switch bases.

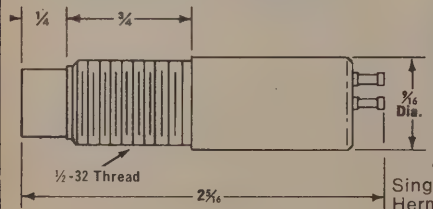
## press-to-test indicator base



### TYPE 535

- Intended for use with Friction Cap mounting hardware styles 7 and 8 only.
- Provides same pushbutton projection as presslite switch bases.
- Nominal operating force: 16 oz.
- Nominal pushbutton travel: 1/32 in.

## ½ amp switch base



Single pole, single throw, normally open (Form A)
Hermetically sealed (reed switch) contacts
Contact rating: ½ amp max., 200 volts max.
10 watts resistive max.
Nominal pushbutton travel: 3/16 in.

### MOMENTARY ACTION TYPE 830

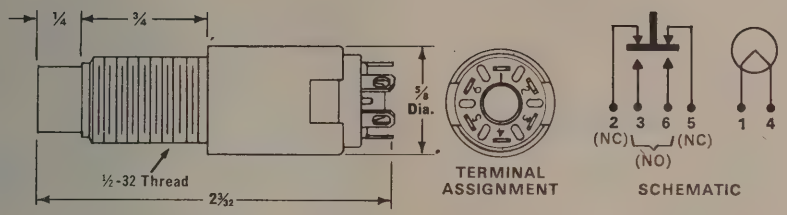
- Nominal operating force: 5 oz.

### MOMENTARY ACTION TYPE 860

- Nominal operating force: 10 oz.

## Presslites, Friction Cap

### 3 amp switch base



Single pole, 2 circuit, double break (Form Z).
Contact rating: 3 amps resistive at 115 VAC or 30 VDC.
Nominal pushbutton travel: ⅛ in. including 1/32 in. pretravel and 1/32 in. overtravel.

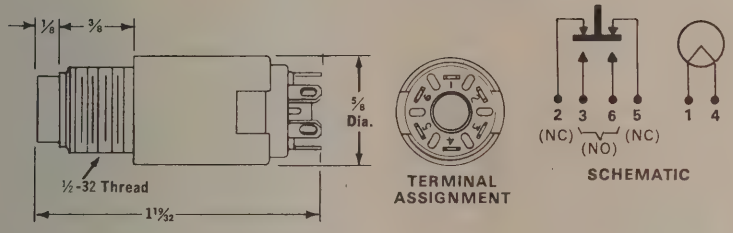
**MOMENTARY ACTION**
**TYPE 542**
U.L. RECOGNIZED

- Nominal operating force: 14 oz. to close normally open contacts.

**MOMENTARY ACTION**
**TYPE 545**
LOW LEVEL

- Contacts: Gold plated for low level switching.
- Nominal operating force: 7 oz. to close normally open contacts.
- For 14 oz. operating force specify type 547.

### 3 amp switch base



Single pole, 2 circuit, double break (Form Z)
Contact rating: 3 amps resistive at 115 VAC or 30 VDC.
Nominal pushbutton travel: ⅛ in. including 1/32 in. pretravel and 1/32 in. overtravel.
Mounting hardware: intended for use with style 1 (knurled nut) or styles 7 and 8 (snap-in mounting adaptors).

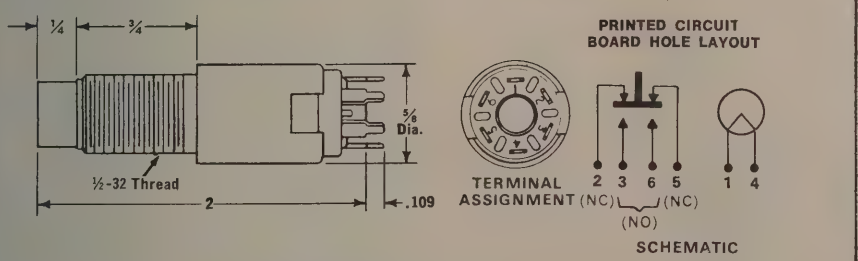
**MOMENTARY ACTION**
**TYPE 543**
U.L. RECOGNIZED

- Nominal operating force: 14 oz. to close normally open contacts.

**MOMENTARY ACTION**
**TYPE 546**
LOW LEVEL

- Contacts: Gold plated for low level switching.
- Nominal operating force: 7 oz. to close normally open contacts.

### 3 amp switch base



Single pole, 2 circuit, double break (Form Z)
Contact rating: 3 amps resistive at 115 VAC or 30 VDC.
Nominal pushbutton travel: ⅛ in. including 1/32 in. pretravel and 1/32 in. overtravel.
Terminals: Designed for soldering to P.C. Board.

**MOMENTARY ACTION**
**TYPE 562**

- Nominal operating force: 14 oz. to close normally open contacts.

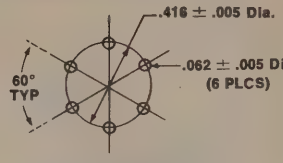
**MOMENTARY ACTION**
**TYPE 567**
LOW LEVEL

- Contacts: Gold plated for low level switching.
- Nominal operating force: 7 oz. to close normally open contacts.

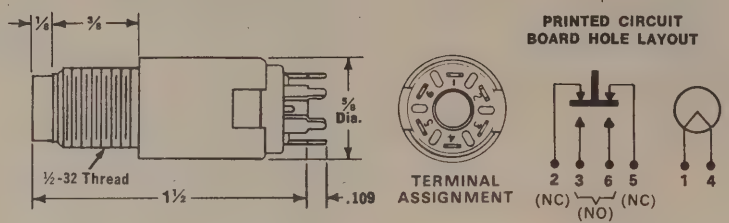
**OAK Industries Inc.**
SWITCH DIVISION/ CRYSTAL LAKE, ILLINOIS 60014
TELEPHONE: (815) 459-5000/TWX: 910-634-3353/TELEX: 72-2447

# Presslites, Friction Cap

## 3 amp switch base



PRINTED CIRCUIT BOARD HOLE LAYOUT



Single pole, 2 circuit, double break (Form Z)
Contact rating: 3 amps resistive at 115 VAC or 30 VDC.
Nominal pushbutton travel: ⅛ in. including 1/32 in. pretravel and 1/32 in. overtravel.
Mounting hardware: intended for use with style 1 (knurled nut) or styles 7 and 8 (snap-in mounting adaptors).

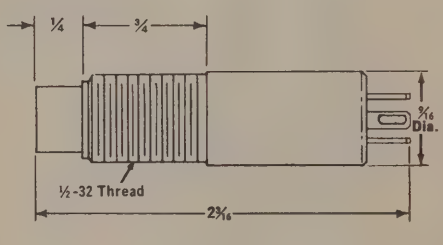
### MOMENTARY ACTION TYPE 563

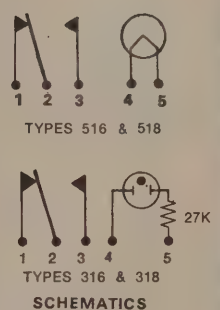
- Nominal operating force: 14 oz. to close normally open contacts.

### MOMENTARY ACTION, TYPE 568
LOW LEVEL

- Contacts: Gold plated for low level switching.
- Nominal operating force: 7 oz. to close normally open contacts.

## 5 amp switch base





Single pole, double throw (Form C) snap action contacts.
Contact rating: 5 amps resistive at 115 VAC or 28 VDC

### ALTERNATE ACTION TYPE 516
U.L. RECOGNIZED

- Nominal operating force: 24 oz.
- Nominal pushbutton travel: 3/32 in.

### TYPE 316
INTERNAL RESISTOR

- An internal 27K OHM resistor, connected to terminal No. 5, provides for A1H neon lamp operation.

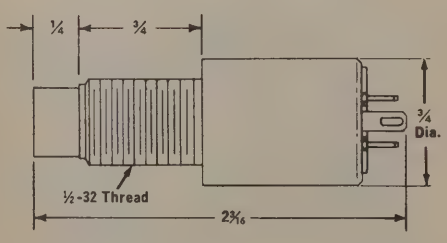
### MOMENTARY ACTION TYPE 518
U.L. RECOGNIZED

- Nominal operating force: 32 oz.
- Nominal pushbutton travel: 3/32 in.

### TYPE 318
INTERNAL RESISTOR

- An internal 27K OHM resistor, connected to terminal No. 5, provides for A1H neon lamp operation.

## 5 amp switch base



Double pole, double throw (Form C) snap action contacts.
Contact rating: 5 amps resistive at 115 VAC or 28 VDC.

### ALTERNATE ACTION TYPE 520
U.L. RECOGNIZED

- Nominal operating force: 32 oz.
- Nominal pushbutton travel: 3/32 in.

### TYPE 320
INTERNAL RESISTOR

- An internal 27K OHM resistor, connected to terminal No. 7, provides for A1H neon lamp operation.

### MOMENTARY ACTION TYPE 521
U.L. RECOGNIZED

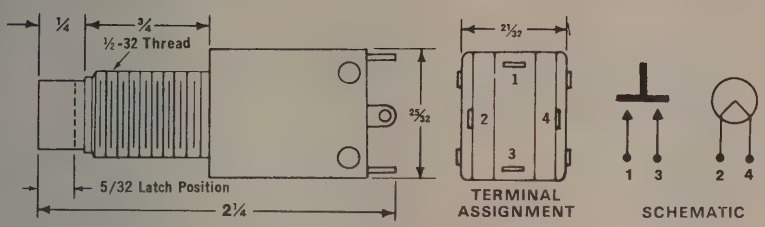
- Nominal operating force: 40 oz.
- Nominal pushbutton travel: 3/32 in.

### TYPE 321
INTERNAL RESISTOR

- An internal 27K OHM resistor, connected to terminal No. 7, provides for A1H neon lamp operation.

## Presslites, Friction Cap

### 10.5 amp switch base



Single pole, single throw, double make (Form X) snap action contacts.
Contact rating: 10.5 amps resistive, 125/250 VAC
10.5 amps resistive, 28 VDC
¼ H.P., 125/250 VAC

#### ALTERNATE LATCHING ACTION TYPE 575

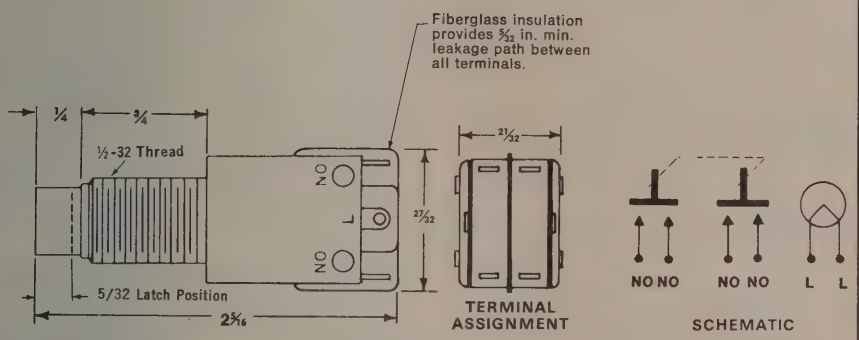
- Nominal operating force: 12 oz.
- Nominal pushbutton travel: 7/32 in.
- Latching action: Pushing plunger closes N.O. contacts and latches plunger, pushing plunger again releases contacts and plunger returns to "out" position. Plunger latch point is 5/32 from "out" position. Switch and latch interlocked to prevent teasing.

#### MOMENTARY ACTION TYPE 585

- Nominal operating force: 10 oz.
- Nominal pushbutton travel: 3/32 in.

Both U.L. recognized

### 10.5 amp switch base



Double pole, single throw, double make (Form X) snap action contacts.
Contact rating: 10.5 amps resistive, 125/250 VAC
10.5 amps resistive, 28 VDC
¼ H.P., 125/250 VAC

#### ALTERNATE LATCHING ACTION TYPE 576

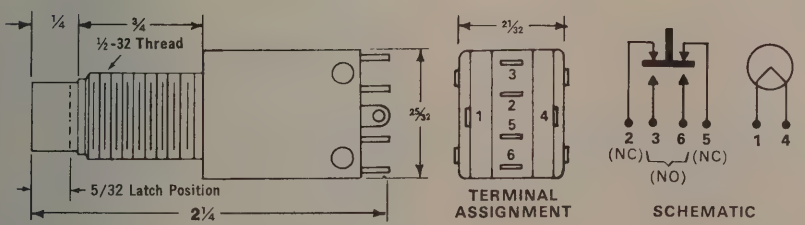
- Nominal operating force: 20 oz.
- Nominal pushbutton travel: 7/32 in.
- Latching action: Pushing plunger closes N.O. contacts and latches plunger. Pushing plunger again releases contacts and returns plunger to "out" position. Plunger latch point is 5/32 from "out" position. Switch and latch interlocked to prevent teasing.

#### MOMENTARY ACTION TYPE 586

- Nominal operating force: 16 oz.
- Nominal pushbutton travel: 3/32 in.

Both U.L. recognized

### 10.5 amp switch base



Single pole, 2 circuit, double break (Form Z) snap action contacts.
Contact rating: 10.5 amps resistive, 125/250 VAC
10.5 amps resistive, 28 VDC
¼ H.P., 125/250 VAC

#### ALTERNATE LATCHING ACTION TYPE 571

- Nominal operating force: 12 oz.
- Nominal pushbutton travel: 7/32 in.
- Latching action: Pushing plunger closes N.O. contacts and latches plunger. Pushing plunger again releases contacts and plunger returns to "out" position. Plunger latch point is 5/32 from "out" position. Switch and latch interlocked to prevent teasing.

#### MOMENTARY ACTION TYPE 581

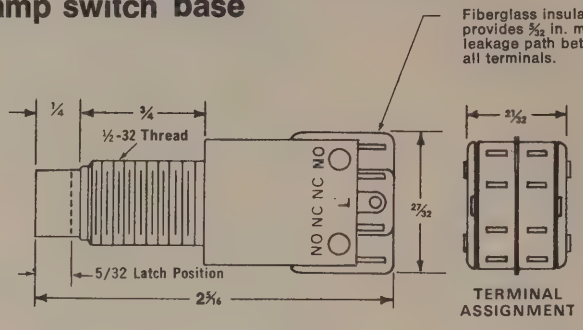
- Nominal operating force: 10 oz.
- Nominal pushbutton travel: 3/32 in.

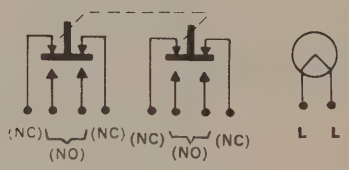
Both U.L. recognized

**OAK Industries Inc.**
SWITCH DIVISION/CRYSTAL LAKE, ILLINOIS 60014
TELEPHONE: (815) 459-5000/TWX: 910-634-3353/TELEX: 72-2447

## Presslites, Friction Cap

### 10.5 amp switch base





SCHEMATIC

Double pole, 2 circuit, double break (Form Z) snap action contacts.
Contact rating: 10.5 amps resistive, 125/250 VAC
10.5 amps resistive, 28 VDC
1/4 H.P., 125/250 VAC

### ALTERNATE LATCHING ACTION TYPE 572

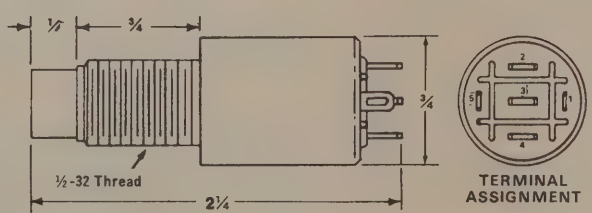
- Nominal operating force: 20 oz.
- Nominal pushbutton travel: 7/32 in.
- Latching action: Pushing plunger closes N.O. contacts and latches plunger. Pushing plunger again releases contacts and returns plunger to "out" position. Plunger latch point is 5/32 from "out" position. Switch and latch interlocked to prevent teasing.

### MOMENTARY ACTION TYPE 582

- Nominal operating force: 16 oz.
- Nominal pushbutton travel: 3/32 in.

Both U.L. recognized

### 15 amp switch base



TYPES 517 & 519

TYPES 317 & 319

SCHEMATICS

Single pole, double throw (Form C) snap action contacts.
Contact rating: 15amps resistive at 115 VAC or 28 VDC.

### ALTERNATE ACTION TYPE 517

- Nominal operating force: 32 oz.
- Nominal pushbutton travel: 7/32 in.

### TYPE 317
INTERNAL RESISTOR

- An internal 27K OHM resistor connected to terminal No. 5 provides for A1H neon lamp operation.

### MOMENTARY ACTION TYPE 519

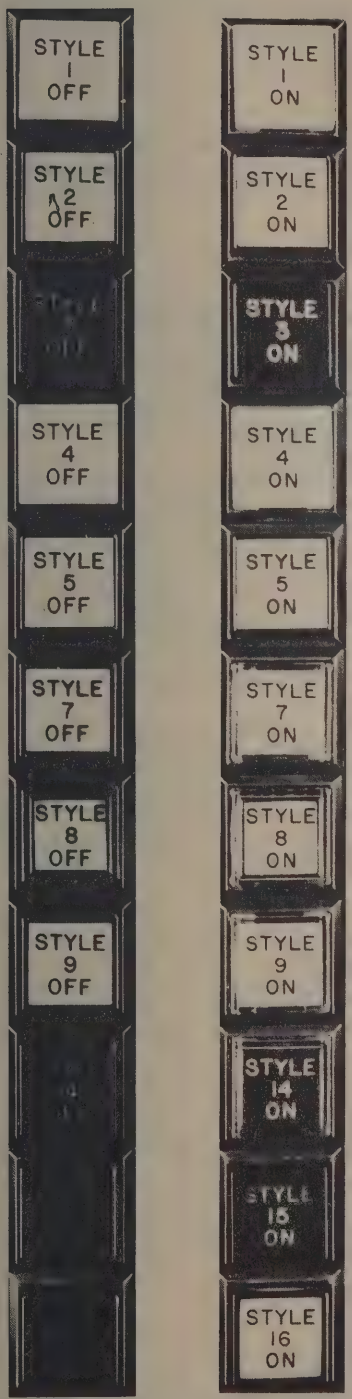
- Nominal operating force: 40 oz.
- Nominal pushbutton travel: 5/32 in.

### TYPE 319
INTERNAL RESISTOR

- An internal 27K OHM resistor connected to terminal No. 5 provides for A1H neon lamp operation.

# Presslites, Friction Cap

## Pushbuttons



A wide variety of pushbuttons are available for the Friction Cap Presslite switch line. Round, square and rectangular sizes are offered, in nine different colors, with or without legends or symbols.

Pushbutton part numbers are shown in the table on page 13. These part numbers are used to construct a complete assembly part number as shown on page 6.

**STYLES**

Eleven different pushbutton styles are offered for Friction Cap and Snap-in Presslites. An understanding of these styles will permit selecting pushbuttons to provide the best possible panel appearance and operating convenience. All eleven styles are shown in color on the back cover of this catalog.

**Style 1** . . . . . is the most frequently used. It features "wrap-around" construction, providing front and side surfaces of one continuous piece of translucent plastic in the color specified. It also provides the largest possible legend area in each size.

**Style 2** . . . . . provides a flat lens of the specified color with black opaque sides. It is used where a 1/32 inch wide black frame around the illuminated area is desired, or where no transmission of light through the sides is allowed, such as in matrix groups.

**Style 3** . . . . . is a Style 1 pushbutton oversprayed black on all surfaces. It is used only with engraved legends, where the message illuminates in the specified color while the background remains black. This style provides maximum legibility in the "on" condition. Where severe usage is anticipated, a protective cover (Style 14 or 15) is recommended to prevent damage to the black surface.

**Style 4** . . . . . has a lunar Style 1 wrap-around lens with an internal filter of the specified color. The color is visible only when the lamp is "on". In a low ambient light environment, Style 4 is virtually identical to Style 1 in appearance. The greater the ambient light, the less saturated the appearance of the color when the lamp is on.

**Style 5** . . . . . is similar in performance to Style 4, but features black opaque sides with the 1/32 inch wide frame around the illuminated area, as described under Style 2.

**Style 7** . . . . . is a Style 1 cap of the specified color, with a clear protective cover over the front and sides. It is used in applications where the legend must be protected from wear or dirt. It also permits use with customer-provided film or vellum legends. The protective cover provides a 1/16 inch wide frame around the translucent legend area.

**Style 8** . . . . . is a Style 2 pushbutton of the specified color with a clear protective cover, but is otherwise similar to Style 7. The legend area is framed by a 3/32 inch wide border.

**Style 9** . . . . . is a Style 4 pushbutton with a clear protective cover. The legend area is framed by a 1/16 inch wide border.

**Style 14** . . . . is a Style 3 pushbutton with a clear protective cover.

**Style 15** . . . . is a Style 3 pushbutton with a grey, neutral density protective cover of about 25% light transmission, for use in hidden legend applications. The legend is nearly invisible when the lamp is "off". This style is particularly effective under high ambient light conditions.

**Style 16** . . . . is a Style 4 pushbutton with the neutral density cover described in Style 15. In the "off" condition, the background is dark grey, and the legend is barely visible under normal ambient light levels. When "on", the background illuminates in the selected color, and is framed by a 1/16 inch wide black border.

## Pushbuttons

### COLORS

The standard Presslite pushbutton colors were selected to provide the best compromise between pleasing appearance in the "off" condition and high light transmission in the "on" condition when used with Style 1 and similar pushbuttons. Several colors are offered in more than one transmission grade, or otherwise require discussion:

**White**
(Color No. 5) is snow white in the off condition. When used with black oversprayed pushbuttons (styles 3, 14, and 15), a pale blue internal color filter is also provided to eliminate possible confusion with yellow when the lamp is on.

**Lunar**
(Color No. 17) provides transmission characteristics midway between clear and white (color No. 5). It is recommended where high ambient light level might otherwise make it difficult to determine when the lamp behind a white lens is "on", or in applications involving low brightness lamps such as neons. Because of its high transmission, the outline of the filament is slightly noticeable. Lunar is also used in Styles 4, 5, 9, and 16 Presslite pushbuttons to provide maximum color transmission from the internal color filter. When supplied as color No. 5 (White, when lamp is on), a pale blue internal color filter is also provided in Styles 4, 5, 9, and 16, to eliminate possible confusion with yellow when the lamp is on.

**Red**
(Colors No. 6 and 36) is provided in two transmission grades to meet both general purpose and warning applications. Color No. 6 is a pure "lipstick red" color in the "off" condition, providing excellent diffusion when "on". Color No. 36 is recommended for warning applications and for use with neon lamps. This color is much darker in the "off" condition than Color No. 6, and provides greater light transmission. In high ambient light areas, Color No. 36 provides a greater on-off contrast ratio than does No. 6.

**Green**
(Colors No. 7 and 37) is also provided in two transmission grades. Color No. 7 is a rather dark, "grass green" in the "off" condition and is a very saturated, pure green when "on". No. 37 is a greyish-green in the "off" condition and transmits more light when "on" than does No. 7. Both grades completely hide the lamp filament. Green is not satisfactory for use with neon lamps.

**Blue**
(Color No. 11) is selected in a transmission grade that allows the lamp filament to be slightly noticeable. This is necessary to provide sufficient brightness for general use, since incandescent lamps have very little blue in their output. Like green, blue cannot be used with neon lamps.

Other Standard Colors offered are yellow (No. 12) and orange (No. 16).

Frequently, styling considerations for a commercial product dictate the use of non-standard colors to achieve a particular effect. Illuminated Products' engineers will be glad to assist you in developing special colors for such applications.

### LEGENDS

In addition to identifying the function of Presslite pushbuttons and indicator lens caps by the suitable selection of colors, their versatility and convenience may be greatly extended by an engraved or hot-stamped legend.

Hot stamping is not as durable as engraving. While it is entirely satisfactory for indicator lens caps and infrequently used pushbuttons, it is not recommended in applications where the pushbutton may be operated many times a day. In this case engraving is essential.

The most common type used for hot-stamped and engraved legends is ⅛ inch high News Gothic, which permits an average of about 8 letters per horizontal inch. For best appearance, at least ⅛ inch of space should be allowed at both the beginning and end of each line. The same amount of space should be allowed between lines. For example, a ¾ inch square pushbutton will accept 3 lines of type, each line having up to 5 letters, while a ½ inch square pushbutton can accommodate only 2 lines of 3 letters each. Where more letters per line are required, Condensed News Gothic may be used or the letter size reduced.

Most Oak Switch Division's distributors provide custom engraving of Presslites and indicators, and the factory maintains a well equipped engraving and hot stamping department. When ordering custom engraving, full details should be provided on a drawing or sketch. Unless otherwise specified by the customer, black letters will be used on white, orange, and yellow backgrounds, and white will be used on red, green, and blue backgrounds.

**PUSHBUTTON PART NUMBERS FOR FRICTION CAP PRESSLITES**
**(Where a number is not shown, the pushbutton is not available in that style)**

| PUSHBUTTON SHAPE | PUSHBUTTON SIZE | PUSHBUTTON STYLE (See Page 12) | | | | | | | | | | |
|---|---|---|---|---|---|---|---|---|---|---|---|---|
| | | 1 | 2 | 3 | 4 | 5 | 7 | 8 | 9 | 14 | 15 | 16 |

| | ½ x ⅞ IN. | 7016 | 7026 | 7036 | 7046 | 7056 | — | — | — | — | — | — |
| | ¾ x 1 IN. | 12016 | 12026† | 12036 | 12046 | 12056† | — | 12086 | 12096† | — | — | — |

**Pushbutton Colors:** Last digit, 6, of above part number designates translucent red color.

For other colors, substitute one of the following:

White*: 5 Dark Red*: 36 Orange: 16 Blue: 11
Yellow: 12 Light Green*: 37 Green: 7 Lunar*: 17

*Colors 5, 17, 36, and 37 not available in Styles 4, 5, 9, and 16 (internal color filters).

Above part numbers are for unkeyed (rotatable) caps.
For keyed (non-rotatable) caps, substitute "1" for the first "0" of the part number. Example: 1016 is unkeyed. 1116 is keyed.

Square or rectangular mounting hardware provides inherent cap keying. Therefore, assemblies which use square or rectangular recess adaptors or recess barrier mounts are provided with unkeyed caps.

**Pushbutton Materials:** All of the above pushbuttons are high impact-resistant plastic per L-P-349a (Tenite) except those marked "†" are per L-P-393 (polycarbonate).

# Presslites, Friction Cap

## Friction Cap Presslite Mounting Hardware

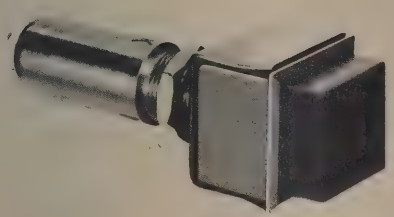
The versatility of Oak Switch Divisions' Presslites is extended by the broad selection of mounting hardware styles and finishes. These include knurled nut and safety collar for surface or sub panel mounting, and 6 different recess mounting configurations including the low cost snap-in type.

The third block of digits in the complete Presslite part number identifies mounting hardware, as follows:

**516 — 40112 — 51 — 327**

**Finish**
1 Bright
2 Black

**Style**
1 Knurled Nut
4 Safety Collar
5 Recess Adaptor
6 Recess Barrier Mount
7 Flush Snap-In Mount
8 Barrier Snap-In Mount
50X Recess Adaptors on Mounting Strip
60X Recess Barrier Mounts on Mounting Strip



The above part number describes an assembly which includes a bright recess adaptor.

The projection of the Presslite base behind the front of the mounting panel depends on the base type, and the style of mounting hardware, as shown below. To determine projection behind the back of the panel, the panel thickness must be subtracted from this dimension.

**BASE PROJECTION BEHIND FRONT OF MOUNTING PANEL**

| OVERALL BASE LENGTH (See pages 7-11) | MOUNTING HARDWARE STYLE (See pages 15-17) | | | | | | | |
|---|---|---|---|---|---|---|---|---|

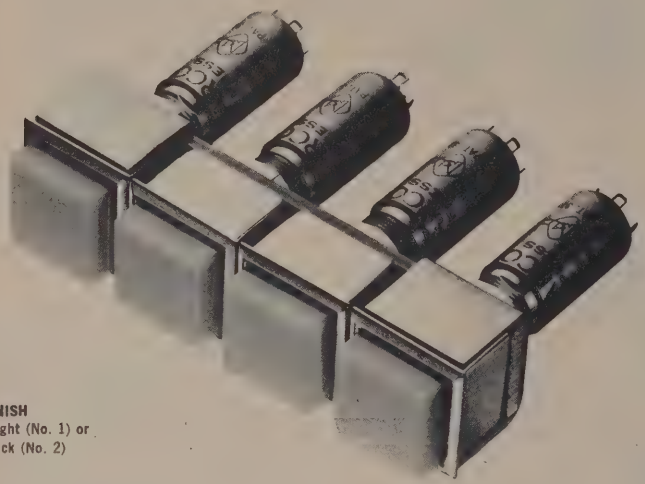
## STYLE 50X
## recess adaptors on mounting strip



**FINISH**
Bright (No. 1) or
Black (No. 2)

Available
Pushbutton Sizes
□ ¾ In. Square

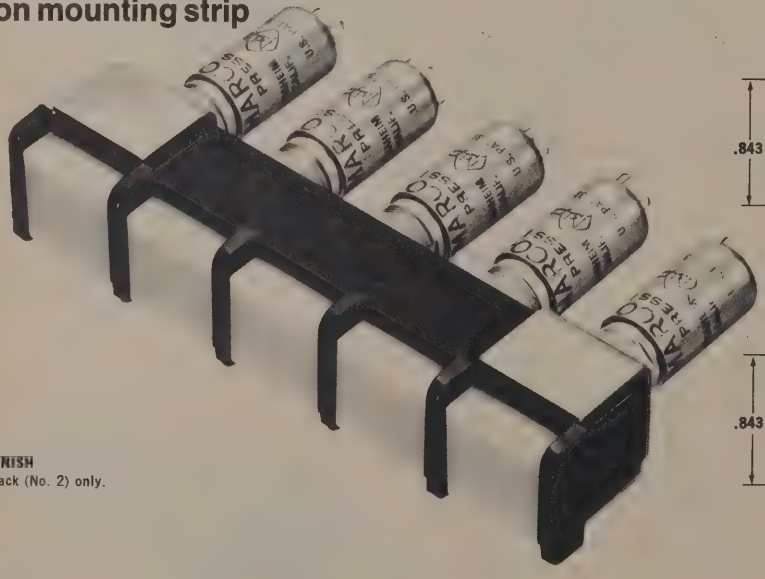
Where 3 or more Recess Adaptors (Style 5) or Recess Barrier Mounts (Style 6) are to be mounted next to each other, it is recommended complete assemblies be ordered mounted on an aluminum strip to facilitate final assembly into the panel. Installation requires tightening of only 2 hex nuts.

When ordering 50X or 60X assemblies, X is the number of stations. Thus, part no. 516-4015-5081 describes an 8 station recess adaptor assembly with bright finish.

Where more than one type of base or pushbutton color is to be installed on the mounting strip, or special legends are required, provide complete information and a special part number will be assigned to identify the assembly.

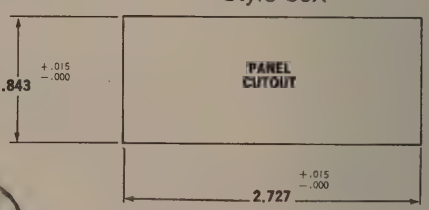
The mounting strips do not alter space requirements of Style 5 or 6. The panel cutouts for 3 or more stations are as follows:

## STYLE 60X
## recess barrier mounts on mounting strip



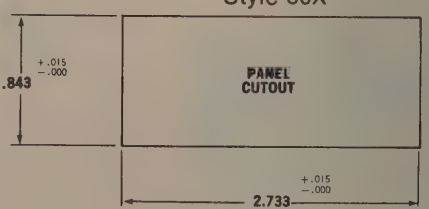
**FINISH**
Black (No. 2) only.

Style 50X



For 3 assemblies on strip.
For each additional assembly add .942.

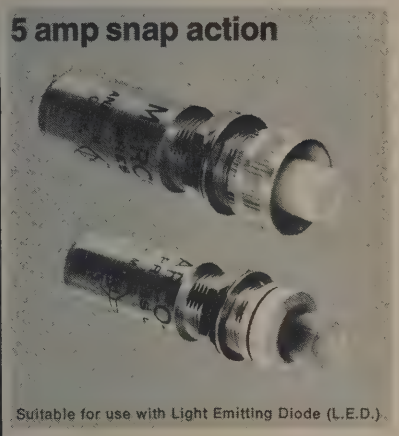
Style 60X



For 3 assemblies on strip.
For each additional assembly add .906.

# Presslites, Low Profile

## 5 amp snap action



Suitable for use with Light Emitting Diode (L.E.D.)

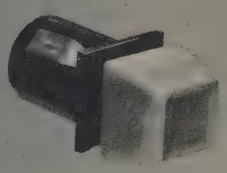
To order switch with lamp installed, add lamp number as 3 digit suffix to part number. Example: 675-55-327.

# Presslites, Snap-in

## ½ amp momentary action switch and matching indicator

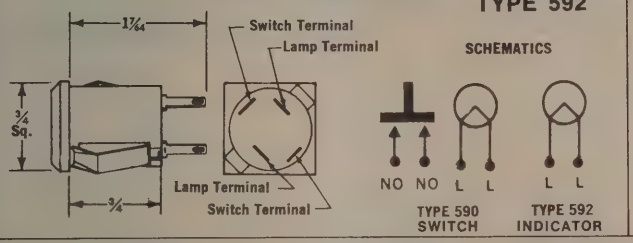


Suitable for use with Light Emitting Diode (L.E.D.)

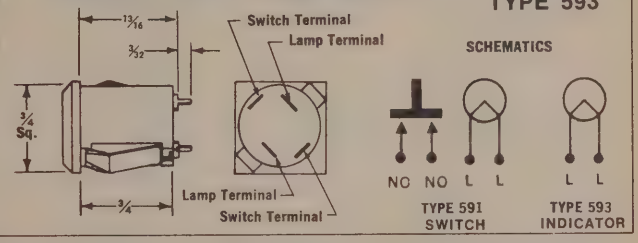
The double break bifurcated wiping action contacts of the Snap-In Presslite Series provide extremely reliable switching for data entry and control applications. In addition to low initial cost, a further major saving results from the very simple mounting procedure of pressing the switch into a round panel hole. The round mounting hole provides a further advantage for matrix mount applications. Instead of the complicated egg crate assemblies which were used in the past, a simple plate with 11/16 inch diameter holes punched on ¾ inch centers is all that is needed to mount any size matrix.

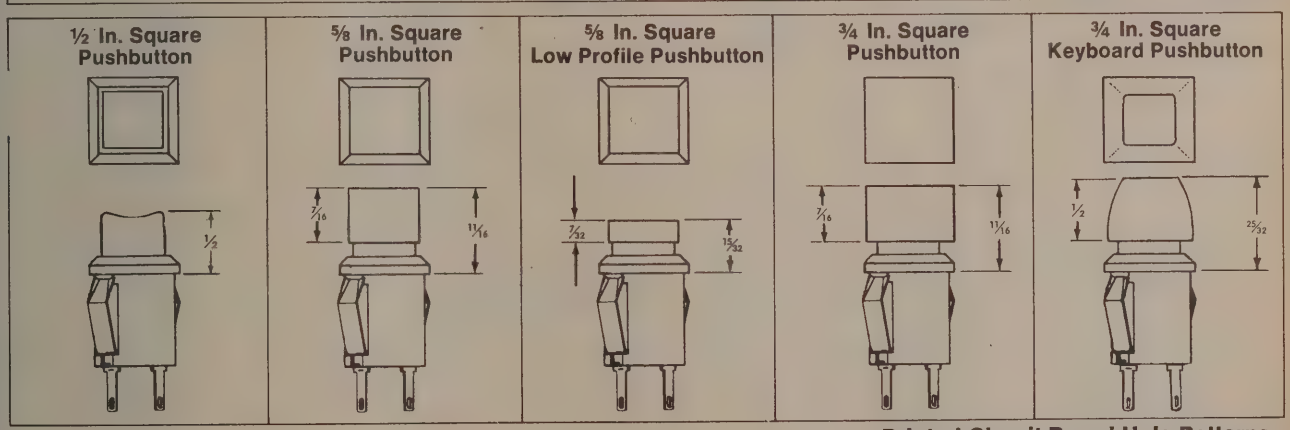
All of the pushbutton styles described on Page 12 are available for the Snap-In Presslite. In addition, pushbuttons are available which enhance legibility for use with light emitting diodes and neon lamps. These pushbuttons may be used interchangeably with both the Types 590 and 591 Presslite, and the Types 592 and 593 matching indicator.

### SOLDER TERMINALS — TYPE 590 TYPE 592



### PRINTED CIRCUIT TERMINALS — TYPE 591 TYPE 593





**Notes:**

1. **Switch Characteristics**
   - Contact rating: ½ amp resistive at 30 VDC. 1/10 amp resistive at 115 VAC.
   - Nominal pushbutton travel: .1 in.
   - Nominal operating force: 4 oz.
2. **Materials and Finishes:**
   - Pushbuttons: high impact plastic per L-P-349a.
   - Housing: black thermoplastic.
   - Mounting clip: stainless steel.
   - Lamp terminals: beryllium copper, tin plated.
   - Switch terminals and contacts: brass, gold plated.
3. **Lamp:** T-1¾ incandescent, T-2 neon, or L.E.D. with midget flange base. See lamp selection guide. Lamp remains stationary when pushbutton is depressed.
4. **Mounting:** Assemblies press fit into .687 ±.005 dia. holes from front of panel .Mounting clips accommodate panels from 1/16 in. to 3/16 in.
5. **Weight:** Approx. .25 oz.
6. **Solder Terminals:** Terminals accept AMP FASTON receptacle #60415 -1 or equiv.

### MATRIX MOUNTING

Switch and Indicator Bases may be mounted to form any size Matrix by spacing panel holes as shown.

- **Pushbutton Colors:** Last digit, 6, of above part numbers designates translucent red color. For other colors change to one of following: white 5; green 7; blue 11; yellow 12; orange 16; lunar 17; dark red 36; light green 37. Do not specify colors 17, 36, and 37 as filter colors for styles 4, 5, 9, and 16.
- **Base Types:** To order complete assembly with other base types change 590 to desired type,(i.e., 591, 592, 593)
- **Lamps:** To order complete assembly with lamp installed, add lamp no. as 3 digit suffix to part no. Example: 590-5216-327.
- **Styles:** See pages 12 and 13 for description of pushbutton styles.

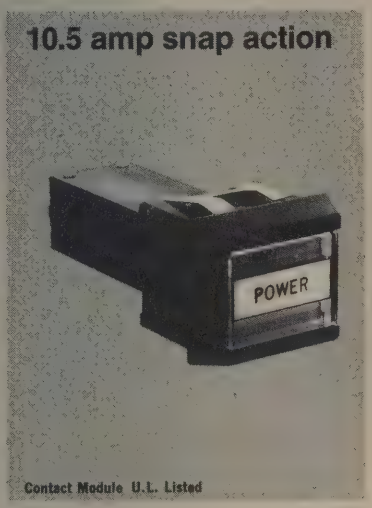
**COMPLETE ASSEMBLY PART NUMBERS WITH NEON OR LIGHT EMITTING DIODE LAMP FOR SWITCH WITH SOLDER TERMINALS**

| ½ In. Square High Brightness Pushbutton | Transparent Pushbutton Colors | 115 VAC Neon (Includes A1H Lamp) | Light Emitting Diode* (Includes D2 Lamp) |
|---|---|---|---|
|  | Clear | 590- 5P73-A1H | — |
| | Red | 590- 6P73-A1H | 590-6P71-D2 |
| | Amber | 590- 8P73-A1H | — |
| | Lunar | 590-17P73-A1H | — |

- **Base Types:** To order complete assembly with other base types change 590 to desired type,(i.e., 591, 592, 593)
- **Translucent Colors:** Not recommended.

* Pushbutton has an internal microgroove lens for optimum light dispersion.

# Presslites, Rainbow

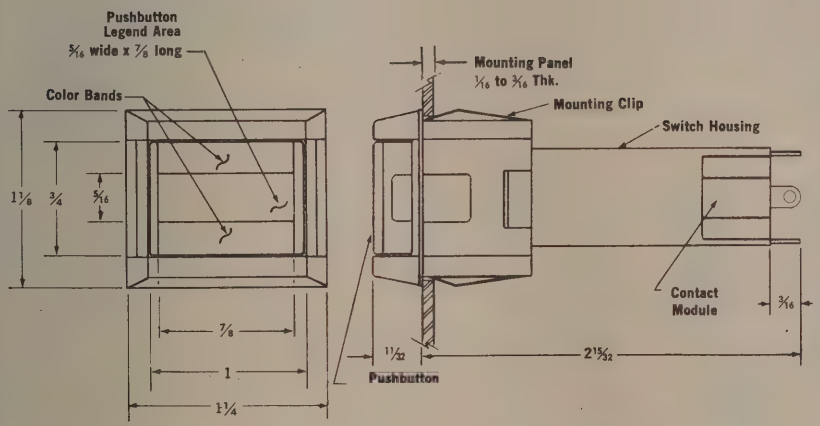


The Rainbow Switch is totally unique in its ability to change pushbutton color when it is depressed from the "off" to the "on" condition. A varied selection of colors is available to the designer.

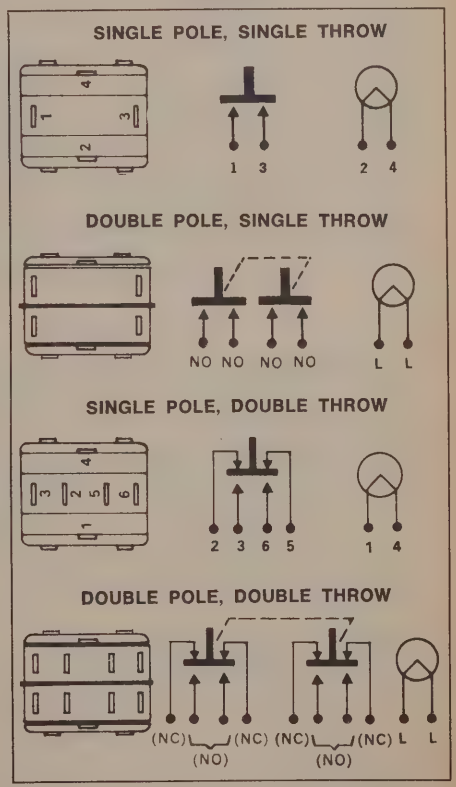
A white legend area is provided between the color bands, which may be illuminated by a lamp contained inside the pushbutton. This lamp also provides illumination of the color bands for operation in a dark environment, but this additional illumination is unnecessary for viewing under normal ambient light levels.

Alternate action switches provide a latching action, so the pushbutton remains down while the switch is "on", and returns to the out position when the switch is turned "off" by again depressing the pushbutton. This latching action retains the color and legend changes between operations. Momentary action Rainbow Switches are also offered as companion items. Their color and legends remain changed only while the pushbutton is depressed, after which they return to the out position.

In addition to the combinations listed below, many other variations are possible, and should be discussed with IPI Application Engineers.



SCHEMATICS



**Notes:**

**1. Switch Characteristics:**
- Contact rating: 10.5 amps at 125/250 volts AC or 28 volts DC resistive, ¼ HP 125/250 volts AC. Contact module U.L. listed.
- Alternate action switches: depressing pushbutton from "out" to "in" position changes color bands from one selected color to any other selected color, and button remains latched down. The next actuation restores color bands and switch to the "out" position. Switch and latch interlocked to prevent teasing.

**2. Materials and Finishes:**
- Switch housing: Molded thermoplastic, optional black or light gray color.
- Mounting clips: stainless steel.
- Lamp terminals: brass, gold flashed and tin plated.
- Switch terminals: brass, silver plated.
- Cap assembly: molded thermoplastic.

**3. Lamp:** T-1¾ bulb with midget flange base. See lamp selection guide. Pushbutton engages switch plunger with tight friction fit permitting relamp from front of panel without use of tools.

**4. Mounting:** assembly snaps in from front of panel without the use of tools.

**5.** Terminals accept AMP FASTON receptacle #60729-1 or equal.

- **Housing Colors:** To order switch with black housing color, change second digit of base assembly part number from 1 to 0. Examples: 1023-5-0-120105.

- **Color Bands:** Above part numbers are for switches with white "out" color bands. To order switch with other colors, change first dash no. of part number from 5 to one of the following:

| | | | | | | | |
|---|---|---|---|---|---|---|---|
| Black | 0 | Red | 6 | Blue | 11 | Orange | 16 |
| White | 5 | Green | 7 | Yellow | 12 | | |

Examples: For red "out" color band: 1123-6-0-120105.

- **Lamps:** To order complete assembly with lamp installed, add lamp no. as 3 digit suffix to part number. Examples: 1123-5-0-120105-327.

## LEGENDS

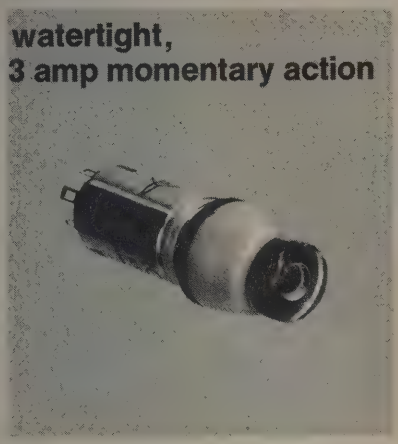
Pushbuttons and color bands may be marked with any letter/number combination space permitting. Specify marking desired after selecting assembly part number designating switch type and color band colors from above tables. Unless otherwise specified all marking will be black, 7/64 in. high. Maximum number of characters per line is nine. Indicate desired marking for pushbutton and each upper and lower color band. Note that pushbutton legend marking does not change when pushbutton is depressed and marking for upper and lower color bands may be different if desired. A sketch similar to the illustrated example should be included with order.

EXAMPLE:
ASSEMBLY PART NO. 1121-5-16-120105
With Special Marking

| | | |
|---|---|---|
| "Out" Position | OFF | Upper color band (white) |
| | POWER | Pushbutton legend (white) |
| | OFF | Lower color band (white) |
| "In" Position | ON | Upper color band (orange) |
| | POWER | Pushbutton legend (white) |
| | ON | Lower color band (orange) |

# Presslites, Watertight, Splashproof, and E.M.I. Suppressed

## watertight, 3 amp momentary action



This switch features a grey silicone rubber boot and rubber washer which provide a true watertight seal from the front of the mounting panel. The pushbutton screws into the switch base and may be removed from the front of the panel for relamping.

When switching a 3 amp resistive load, life expectancy exceeds 1 million cycles.

The linear action switch mechanism is provided with a special overtravel device which prevents damage to the contacts from excessive pushbutton pressure and assures positive engagement of the contacts at an optimum force. To assure immunity to mildly corrosive environments, all terminals, contacts and springs are heavy gold flashed.

**Notes:**

1. **Switch Characteristics:**
   - Contact rating: 3 amps resistive at 115 VAC or 30 VDC.
   - Nominal pushbutton travel: 1/8 in. including 1/32 in. pretravel and 1/32 in. overtravel.
   - Nominal operating force: 48 oz.
2. **Materials and Finishes:**
   - Pushbuttons: high impact resistant plastic per L-P-349a.
   - Lens holders: aluminum, black anodized.
   - Rubber boot and "O"-ring: silicone rubber.
   - Mtg. tube and spacers: aluminum, anodized per MIL-A-8625.
   - Keywasher: brass, nickel plated.
   - Lockwasher: stainless steel.
   - Terminal board: molded thermoset plastic.
   - Terminals and contacts: coin silver, gold plated.
3. **Lamp:** T-1¾ bulb with midget flange base. See lamp selection guide.
4. **Mounting:** Recommended mounting tool for tightening mounting nut: Marco-Oak #51630 (Xcelite Inc. #ST62-196 or equivalent).

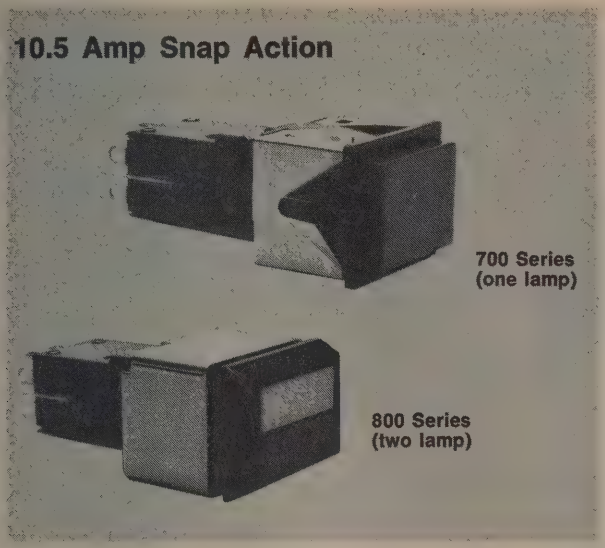
# SINGLE & SPLIT LEGEND PRESSLITES

## 10.5 Amp Snap Action



- Five Pushbutton Styles
- Nine Standard Colors
- Single or Split Legends
- Momentary or Alternate Actions
- Snap-in or Hard mounting
- U.L. Recognized

Either Presslite series—the *700* (single lamp) or *800* (two lamps)—are available with a wide range of legends, colors, styles, actions and mountings to fit your needs.

Five pushbutton styles are available in any of nine standard colors. They come in either single or split legend designs, with or without barriers, in either black or light gray.

**Unmatched flexibility.** Not only in color and style, but in mountings and actions. You can choose from two mounting styles: A snap-in for fast mounting and a hard-mount for severe conditions.

You can specify momentary or alternate action. Alternate action switches come with a latching pushbutton which remains depressed while the switch is "on."

Our new patented mechanism interlocks the switching and latching actions so it's impossible to "tease" the switch. Either it's on or it's off. Period. Competitive designs require full depression to latch; incomplete depression only provides a temporary closure until finger pressure is removed.

**Display options.** Applications are limited only by the designer's ingenuity and job requirements. In the simplest application, single lamp models are energized directly by the voltage being switched resulting in direct display of on-off condition. With dual lamp, split legend models, far more sophistication is possible. For instance, the upper legend could light up when the system is ready for a special command. Then when the command is given (by depressing the pushbutton) the light would go out. As soon as the command was executed, the lower legend could then light. Either or both legends might flash on and off to indicate a malfunction or emergency condition. There's no end to the flexibility.

**Easy installation and maintenance.** Unlike many switches, Presslite assemblies snap in quickly from the front of the panel. The most popular versions take a simple push in and snap, they're in place. Relamping is accomplished simply by removing the pushbutton and inserting the new lamp. If you want to change the legend that's easy, too, because each color legend plate is quickly replaced without removing the whole assembly.

### PUSHBUTTONS

**Styles:** Series 700 and 800 Presslites' five standard styles meet most application requirements. Specials, such as hidden legends, are also available. When you require two different styles on a split legend pushbutton, a drawing or sketch should be provided.

**Colors:** Standard—white, lunar, red, dark red, green, light green, blue, orange, and yellow. Standard colors were selected to provide a pleasing appearance in the "off" position and high light transmission when the lamp is "on." Two different reds and greens are offered for most effective illumination. Dark Red and Light Green provide optimum legibility under high ambient light. Lunar is similar to white, but provides higher light transmission.

**Engraving:** Presslites are engraved at the factory, or your Oak Switch Division distributor can provide custom engraving. Where you anticipate severe service, Style 8 is recommended to protect the engraved legend.

**Style 1**—One-piece design with wrap-around construction provides colored front and side surfaces.

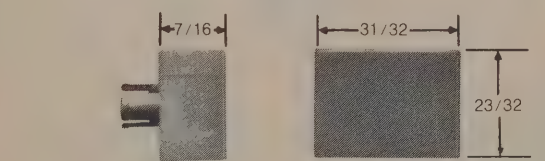
**Style 2**—Flat colored lens has a 1/32" black opaque frame and black opaque sides. Used where no light transmission through the sides is allowed.

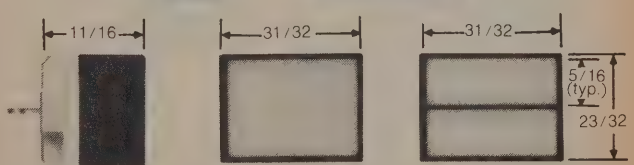
**Style 4**—This lunar color Style 1 pushbutton has an internal filter of the desired color, which is visible only when the lamp is illuminated.

**Style 5**—Same as Style 4, but has black opaque sides.

**Style 8**—Same as Style 2, except colored lens is covered with a clear window. Recommended for applications where the legend must be protected from abrasion.

**Single lamp**





**Two lamp**

**Single lamp pushbutton part numbers**

| Lens or Filter Color | Pushbutton Style | | | | |
|---|---|---|---|---|---|
| | 1 | 2 | 4 | 5 | 8 |
| WHITE | 12015 | 12025 | — | — | 12085 |
| RED | 12016 | 12056 | 12046 | 12056 | 12086 |
| GREEN | 12017 | 12027 | 12047 | 12057 | 12087 |
| BLUE | 120111 | 120211 | 120411 | 120511 | 120811 |
| YELLOW | 120112 | 120212 | 120412 | 120512 | 120812 |
| ORANGE | 120116 | 120216 | 120416 | 120516 | 120816 |
| LUNAR | 120117 | 120217 | — | — | 120817 |
| DARK RED | 120136 | 120236 | — | — | 120836 |
| LIGHT GREEN | 120137 | 120237 | — | — | 120837 |

Single lamp pushbuttons are made from butyrate plastic, per L-P-349.
Two lamp pushbuttons are made from polycarbonate plastic, per L-P-393.

**Two lamp pushbutton part numbers**

| Lens or Filter Color | Single Lens | | | Split Lens | | |
|---|---|---|---|---|---|---|
| | Style 2 | Style 5 | Style 8 | Style 2 | Style 5 | Style 8 |
| WHITE | 3225 | — | 3285 | 3325 | 3355 | 3385 |
| RED | 3226 | 3256 | 3286 | 3326 | 3356 | 3386 |
| GREEN | 3227 | 3257 | 3287 | 3327 | 3357 | 3387 |
| BLUE | 32211 | 32511 | 32811 | 33211 | 33511 | 33811 |
| YELLOW | 32212 | 32512 | 32812 | 33212 | 33512 | 33812 |
| ORANGE | 32216 | 32516 | 32816 | 33216 | 33516 | 33816 |
| LUNAR | 32217 | — | 32817 | 33217 | — | 33817 |
| DARK RED | 32236 | — | 32836 | 33236 | — | 33836 |
| LIGHT GREEN | 32237 | — | 32837 | 33237 | — | 33837 |

Part numbers listed for split legend pushbuttons designate the same color lens or filter on both top and bottom. For different colors at the bottom portion, add one of the following numbers: white 5, red 6, green 7, blue 11, yellow 12, orange 16, lunar 17, dark red 36, light green 37. Example: 332512 for white lens on the top, yellow lens on the bottom.

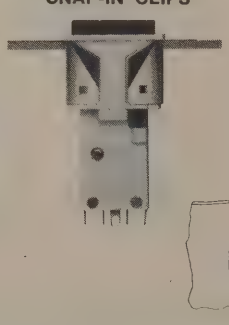
## MOUNTING HARDWARE

For most applications, snap-in clips provide more than adequate retention and minimal mounting time. In severe applications involving shock, vibration or substantial wiring harness loads, the sleeve mounting method provides extremely rigid clamping. The sleeve is easily tightened by means of two screws behind the pushbutton.

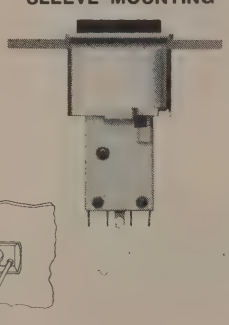
| MOUNTING HARDWARE PART NUMBERS | |
|---|---|
| Snap-in | Sleeve |
| 01 | 02 |

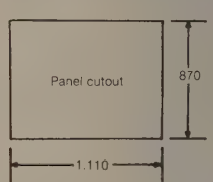
Snap-in clip and mounting sleeve material is stainless steel.
Panel thickness:
Snap-in—1/16" to 3/16"
Sleeve —1/32" to 1/4"

### SNAP-IN CLIPS



### SLEEVE MOUNTING





For vertical stacking, add .942 for each additional assembly.
For horizontal stacking, add 1.182 for each additional assembly.

Tolerances:
±.005 for snap-in
+.015 −.005 for sleeve mounting

### Lamp part numbers

SIZE T-1¾
MIDGET FLANGE BASE

| Lamp No. | Rated Voltage | Amps | Approx. M.S.C.P. | Average Life (Hrs.) | MS Part No. |
|---|---|---|---|---|---|
| 345 | 6.0 | .04 | .04 | 10,000 | — |
| 328 | 6.0 (5.0)* | .20 (.18)* | .60 (.34)* | 1,000 (10,000)* | MS25237-328 |
| 381 | 6.3 | .20 | .40 | 2,000 | — |
| 344 | 10.0 | .014 | .006 | 50,000 | — |
| 330 | 14.0 | .08 | .50 | 1,500 | MS25237-330 |
| 327 | 28.0 | .04 | .34 | 4,000 | MS25237-327 |
| 387 | 28.0 | .04 | .30 | 7,000 | MS25237-387 |

* Figures in parentheses are for derated operation at 5 volts.
Service conditions such as dc operation, voltage surges, temperature, shock, and vibration may contribute to shorter average life.

## HOW TO ORDER

A complete part number for an assembly consists of four block of digits, like these . . .

**711-12016-01-327**

Switch or indicator base assembly (select above)
Pushbutton (select from Page 26)
Mounting hardware (select above)
Lamp (select above)

# MARCOFLEX SWITCHES

- Alternate or Momentary Action
- Double Throw
- Small Size
- Fewer Parts/Higher Reliability
- Low Cost
- Tactile Feel
- High Contact Force
- Mounts in .625 Square Opening or P.C. Board

Oak Switch Division's new dimension in low-cost, high-quality small switches has the features of units twice its size. It also represents a major design breakthrough—the first small switch to break the alternate action/double throw barrier. And for application versatility, you can also purchase it as a momentary action switch or indicator.

**Immediate applications for Series 650**

The first switch to benefit from Marcoflex construction fits into a standard sized .625" panel opening...or mounts on a P.C. board. It's a direct replacement for the compact switches presently on the market, which offer only momentary action and single throw. You're sure to find many uses for Series 650.

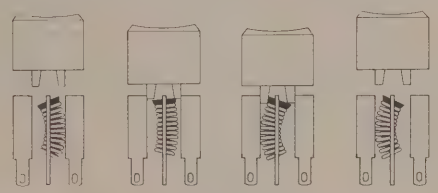
For example, high contact force combines with wiping action and bifurcated contacts to make these units particularly well suited for low level use. They're also ideal for peripheral equipment, eliminating the complex circuits otherwise required to compensate for lack of alternate or double throw mechanical action.

Versatility and low cost broaden the spectrum of applications to include lab test equipment, process control apparatus, broadcast studio controls, vending machines, hotel and airline reservation systems, and much more.

This Form C switch (single pole, double throw) has uniquely simple construction. It's the first to use Oak's patented Marcoflex design. Lower parts count and easy manufacturing combine to produce a cost-effective switch with inherent reliability.

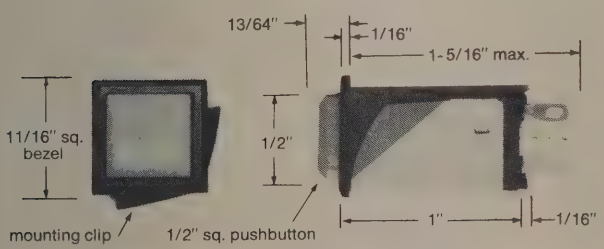
**How the Marcoflex mechanism works**

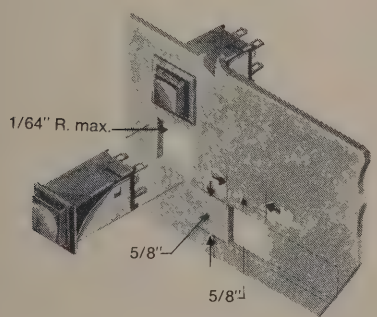
The Marcoflex design is based on a compressed spring, mounted in a slot in the common terminal with a slider inserted in the top of the spring. The spring's geometry is such that it stays in a buckled condition. Because of the bi-stable configuration of this assembly, the spring can be buckled to the left or right of the common terminal, turning the switch on or off.



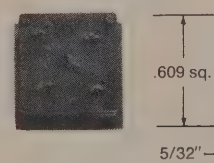
**Alternate action** begins with switch OFF. As push-button begins descent, right-hand actuator contacts slider disc. Bi-stable spring is forced to the left creating wiping action; switch turns ON. Pushbutton returns to top position. To turn switch OFF, the action repeats in reverse.

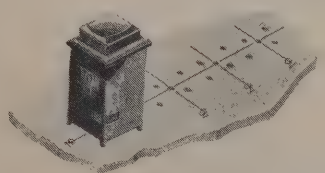
**Momentary action** switches have reduced contact gap on one side so that the spring does not reach a stable position at the opposite side, and returns to previous position when push-button is released.



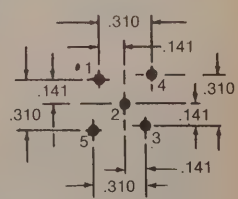


Series 650 mounts in panels from 3/64" to 3/16" thick. For horizontal or vertical stacking, add .690" for each additional unit.





Series 650 mounts directly on the P.C. board. Note the location of the P.C. board holes in relation to the fingernail groove and "IPI" logo.



PC board layout, viewed from component side All holes .046 in. diameter. Omit No. 1, 2 & 3 holes for indicators.

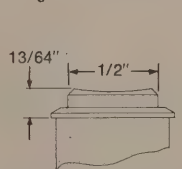


Fig. 1

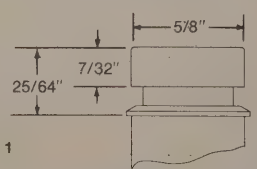

Fig. 2

Pushbuttons are available in ½ inch and ⅝ inch square sizes. The ½ inch size (Fig. 1) features a concave top and solid color construction. The ⅝ inch version (Fig. 2) has a flat top. It is available in solid colors or with black opaque sides.

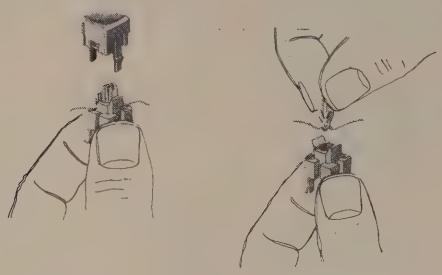
# MARCOFLEX SWITCHES

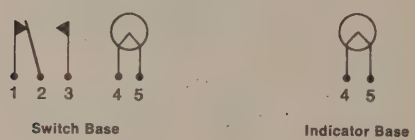
## Economical lamps, easily replaced



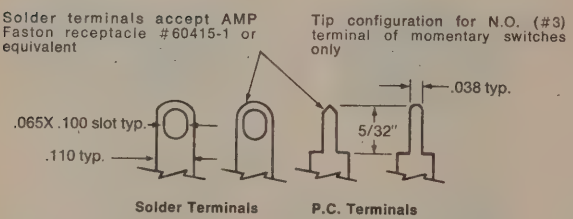
Series 650 accepts any low-cost, unbased T-1¾ incandescent or AIC neon lamp. Assembled units come with your choice of eight lamps, with voltages from 5-125 volts and rated life of as high as 7,000 hours. Lamps with other characteristics are also available on special order.

No special tools are required to relamp. Just spread the lamp leads as shown, then insert into cavity. Press the pushbutton firmly over the lamp retainer, until parts lock together, then cut the leads off flush.

## Schematics



## Terminals



Solder terminals accept AMP Faston receptacle #60415-1 or equivalent
Tip configuration for N.O. (#3) terminal of momentary switches only

.065X .100 slot typ.
.110 typ.
5/32"
Solder Terminals
P.C. Terminals

## Technical data

**Switch characteristics:**
- Single pole, double throw (Form C)
- Alternate/momentary action with independent lamp circuit.
- Also available as matching indicator light

**Materials and finishes:**
- Molded thermoplastic pushbutton
- Molded black thermoplastic base
- Lamp terminals are .012" thick copper alloy
- Stainless steel mounting clip

**Contact Rating:**
- 1 amp resistive at 30 VDC
- ¼ amp resistive at 125 VAC

**Pushbutton travel:**
- .08" total

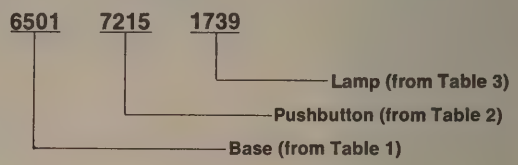
**Operating force:**
- 12 oz. nominal

**Recommended chassis punch:**
- Greenlee #731 (⅝" square)

**Soldering and cleaning:**
To assure clean contacts, solvents or flux should not be allowed to enter the back of the housing. Vapor degreasing should also be avoided.

## How to order

A complete part number for an assembly consists of three blocks of digits, like these...



### TABLE 1. BASE SELECTOR

| Mounting Method | Part Number* | | |
|---|---|---|---|
| | Alternate Action Switch | Momentary Action Switch | Indicator Light |
| Square Panel Cutout (Solder Terminals, 1 clip) | 6511 | 6521 | 6501 |
| Horizontal or Vertical Panel Stack (Solder Terminals, 2 clips) | 6512 | 6522 | 6502 |
| Printed Circuit Board Mount (PCB Terminals, no clips) | 6610 | 6620 | 6600 |

*Note: Last digit of base assembly number designates quantity of mounting clips which are recommended for the indicated mounting method (0, 1 or 2). A different quantity may be specified by changing this digit accordingly.

### TABLE 2. PUSHBUTTON SELECTOR*

| Pushbutton Color (Translucent) | Part Number | | |
|---|---|---|---|
| | ½" sq. concave top, solid color | ⅝" sq. flat top solid color | ⅝" sq. flat top with black opaque sides |
| Dark Red** | 72136 | 74136 | 74236 |
| Orange | 72116 | 74116 | 74216 |
| Yellow | 72112 | 74112 | 74212 |
| Light Green | 72137 | 74137 | 74237 |
| Blue | 72111 | 74111 | 74211 |
| White** | 7215 | 7415 | 7425 |
| Lunar** | 72117 | 74117 | 74217 |

*May be custom-marked to your requirements
**Suitable for illumination with AIC neon lamp

### TABLE 3. LAMP SELECTOR*

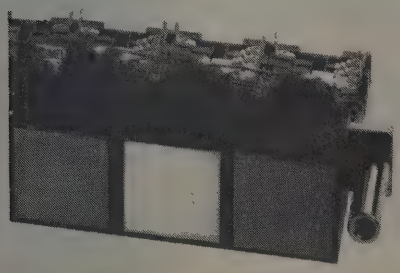
| Rated Voltage | Amps | Approx. M.S.C.P. | Avg. Life (hours) | Part Number |
|---|---|---|---|---|
| 5 | .066 | .11 | 7,000 | 1739 |
| 6 | .200 | .60 | 1,000 | 1784 |
| 6.3 | .075 | .23 | 1,000 | 1739 |
| 10 | .04 | .08 | 5,000 | 2107 |
| 14 | .08 | .50 | 1,500 | 1705 |
| 28 | .04 | .34 | 4,000 | 1764 |
| 28 | .04 | .30 | 7,000 | 2187 |
| 105-125 | .0012 | — | 5,000 | AIC** |

*Consult factory for availability of lamps with other ratings
**Requires external 27K Ohm series resistor

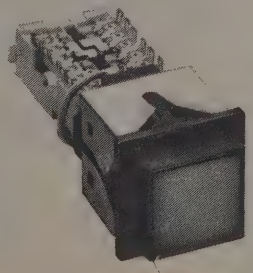
In addition to the complete assemblies shown above, the base, pushbutton, and lamp may be ordered separately by the individual part numbers shown in the tables.

# ILLUMINATED PUSHBUTTON SWITCHES SERIES 300/300SL — GANGED AND SNAP-IN

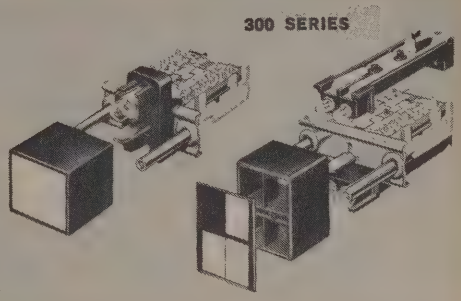
300 SERIES (GANGED)



300SL SERIES (SNAP-IN)



300 SERIES



The Series 300 switches are built for dependable performance and long life. They are ideal for such demanding applications as computers, peripheral equipment, security systems, bank terminals, medical equipment, numerically controlled equipment, copiers and point-of-sale terminals where reliability is essential.

- Ganged type available with single, dual, four-lamp or non-lighted displays.
- Front replaceable lamps are stationary. Do not move with button.
- Up to four pole double throw switching capacity.
- Available in momentary or alternate action, indicator.
- 500,000 cycle minimum life (momentary action).

## SPECIFICATIONS AND PERFORMANCE DATA

**ELECTRICAL RATING:**
Silver Plated Brass: 0.5 amp at 28 volts DC
0.25 amp at 110 volts AC
Solid Silver: 1.0 amp at 28 volts DC
0.5 amp at 110 volts AC
Carry 5 amps (non-switching).
All ratings for resistive loads at room ambient.

**VOLTAGE BREAKDOWN:**
Over 750 volts AC at sea level.

**LIFE:**
Excellent long life. Nylon-filled alkyd, tested to 500,000 cycles, momentary action only.

**OPERATING FORCE:**
7 oz. minimum to 28 oz. maximum. Pressure depends on number of poles and contact material (Standard tolerance is ±30%.)

**STROKE:**
To Latch: .134 in.
Overtravel: .044 in.
Total: .178 in.

**LOCKOUT:**
Effective over full length of switch to maximum of 12 buttons. Lockout is mechanical only.

**INSULATION:**
Stator: Nylon-filled alkyd.
Slider: Acetal. (UL Rated 94 HB.)
Note: The following insulator materials are available but are considered special:
Stator — diallyl phthalate (for improved insulation resistance) UL Rated 94V-0.
Stator — nylon-filled alkyd (for long mechanical life — 500,000 operations momentary action only). UL Rated 94 HB.
Shorter life glass-filled alkyd optional. UL Rated 94 HB.
Slider — glass-filled Kel-F (for high insulation resistance and temperatures above 85°C). UL Rating not available.

**TEMPERATURE RANGE:**
Standard Commercial −25°C to +85°C.
Special Commercial Extended range above or below standard, available on special order only.

**CONTACTS:**
Contact resistance less than 10 milliohms initial and 20 milliohms after life test.
Type 1. Silver plated brass — .0001″ minimum plating will assure silver to silver contact for about 10,000 cycles. Usable to temperatures of +100°C.
Type 2: Silver alloy — will assure silver to silver contact in excess of 200,000 cycles. Usable to temperatures of +100°C.

**TERMINALS:**
Wire hole solder terminals are standard. Printed circuit contacts or lugs available when required.

**FINISH:**
Basic frame parts plated to resist corrosion.

**PUSH ROD: (Series 300)**
Nominal size at button end is 0.188 ±.002 x 0.049 ±.002 in.
Push rod lengths: Minimum 0.375; Maximum, 2.750 for unlighted versions.

**MOUNTING (Series 300 Lighted Switches):**
Mounting posts are riveted to channel mounting holes, one on each end of channel. Posts are threaded to permit mounting switch from front or subpanel as required.

**MOUNTING (Series 300 Unlighted Switches):**
Mounting is provided by perforated holes in either end of channel. Holes are located in embossings.
Alternate mounting is provided between push rods, by square posts riveted into the channel. The posts are drilled and tapped for mounting screws. Post can be provided between any two push rods. (When post mounting is used, then mounting extensions outside of end modules may be cut off.)

**BUTTONS: (Series 300)**
Two button sizes — ¾ in. square and ¾ x 1 in. — available in standard legend plate colors of lunar white, white, red, amber, green, blue, yellow, orange.‡
Buttons are pressed on push rods.

**BUTTONS: (Series 300 SL)**
Two styles — single display and split display — each .732 inches square, available in standard legend plate colors of lunar white, white, red, amber, green, blue, yellow, orange.‡
Buttons are pressed on to push rods.

**CIRCUITRY:**
Sufficient contact locations for 4P2T. Each contact position may carry long or short contacts.
Two additional contact positions at extreme rear of stator are available. These may be used for dummy lugs. If used as contact positions for special circuitry, then only long contacts may be used. A maximum of 4 moving contacts may be mounted to the slider insulator.

## HOW TO ORDER

**300 4-1 M G/P S I S R**

**SERIES**
300SL — Snap-in type (no position or location designation)
300 — Ganged type (requires position/location designation)

**POSITIONS/LOCATION**
For Series 300 only. First digit indicates number 1 to 12) of positions in bank. Second digit indicates location of individual switch, left to right, when viewed from front of array.

**ACTION**
**300SL** — M-Momentary — A-Alternate Action — I Indicator
**300** — M-Momentary — A-Alternate Action — L-Latching
B-Blockout — I-Indicator

**CIRCUITRY**

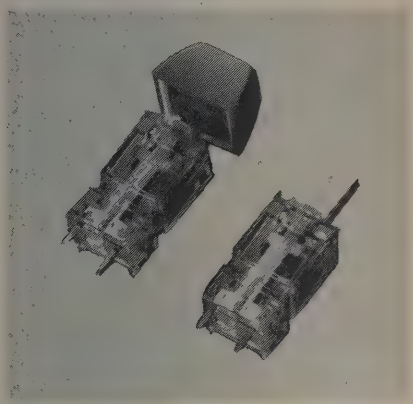
# SERIES 400 AND 475 KEYBOARD SWITCHES

**Low cost, versatile, long life Series 400 and 475 Keyboard Switch** applications include data entry terminals, bank terminals, business machines, typewriter and calculator keyboards, reservation and credit verification systems.

Engineered for comfortable, fatigue-free operation, Series 400 and 475 switches have the inherent reliability of gold alloy, crossbar wiping contacts, and are self-cleaning and tarnish resistant. Tested for more than 20 million operations.

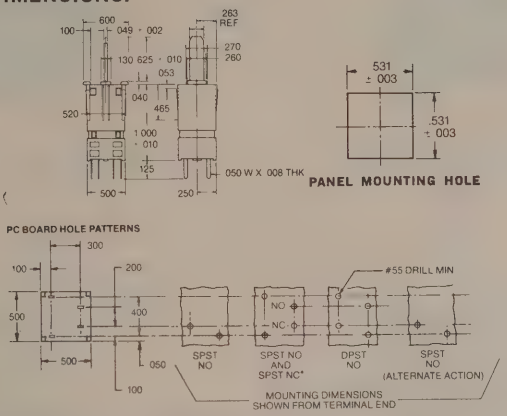
Series 400 and 475 switches mate with industry standard keycaps. Keycaps supplied blank only. For legend information, contact factory.

## SERIES 400



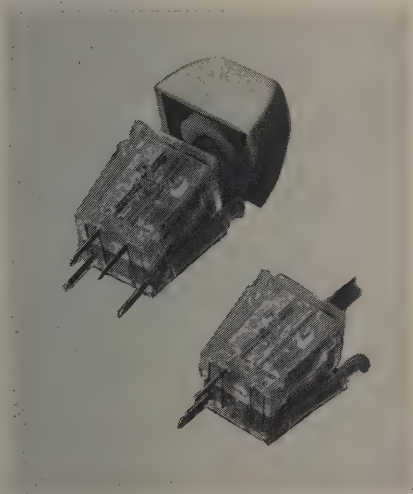
Straight plunger standard. Plug-in printed circuit terminals with snap-in feature for panel mounting.

### SERIES 400 DIMENSIONS:



*To make SPDT the common, contacts must be connected together.

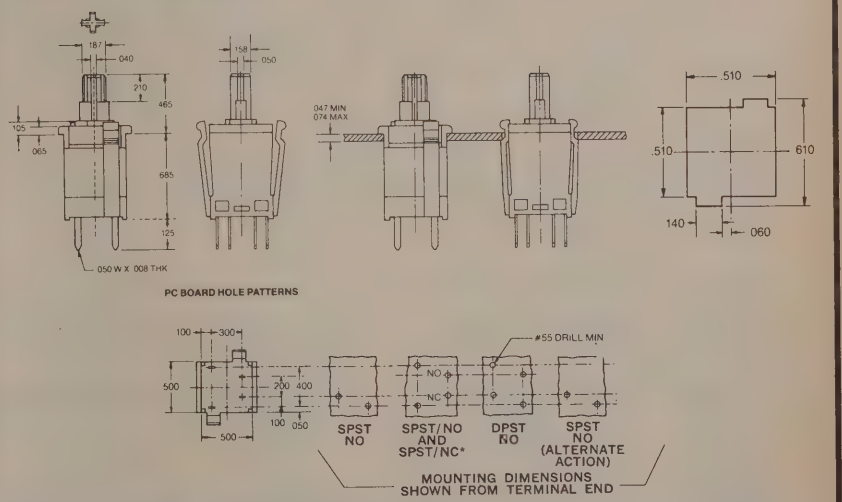
## SERIES 475



Straight plungers. Plug-in printed circuit terminals with snap-in mounting ears for panel mount.

Custom keyboard arrangements available. Contact your Oak representative or factory for information.

### SERIES 475 DIMENSIONS:



*To make SPDT the common, contacts must be connected together.

## SPECIFICATIONS:

**PERFORMANCE DATA**

**OPERATING LIFE:** Tested for more than 20 million operations per key at rated load.

**OPERATING FORCE:** 3 oz. ±½ oz. (85 gm. ±15 gm.)

**KEY TRAVEL:** 0.125 ±0.010″ total.

**PRE-TRAVEL, SERIES 400:** Normally open, 0.070″ nominal. Normally closed, 0.060″ nominal.

**PRE-TRAVEL, SERIES 475:** Normally open, 0.075″ nominal. Normally closed, 0.050″ nominal.

**TEMPERATURE RANGE:** 0°C to +85°C.

**CONTACT BOUNCE:** Less than 3 milliseconds, N.O. only.

**CONTACT RESISTANCE:** Less than 100 milliohms throughout switch life.

**BREAKDOWN VOLTAGE:** Over 500 VAC.

**CONTACT RATING:** 5 VDC resistive load. 100 Ma. (Higher ratings can be applied with corresponding decrease in life expectancy.)

**MATERIALS**

**CONTACT:** Gold alloy crown on nickel base, crossbar wiping.

**CONTACT LEAVES:** Copper alloy.

**HOUSING:** Polycarbonate, UL listed 94 V1.

**ACTUATOR, SERIES 400:** Polycarbonate, UL listed 94 V1.

**PLUNGER, SERIES 400:** Stainless steel.

**ACTUATOR PLUNGER, SERIES 475:** Modified PPO, UL listed 94 V1.

**PHYSICAL CHARACTERISTICS, SERIES 400**

**HOUSING:** 0.50 x 0.50 (±.003) x .990 (±.010) inches high.

**MOUNTING:** Plug-in printed circuit terminals with snap-in feature for panel mounting.

**TERMINALS:** 0.050 (±0.002) x 0.008 x 0.125 inches long (below standoffs on housing). Terminal ends are tinned to facilitate soldering. Also available with .240 inch long terminals (please specify).

**PLUNGER:** 0.187 (±0.002) x 0.049 (±0.002) inches at keycap end. Length, 0.625 (±.010) inches standard.

**PHYSICAL CHARACTERISTICS, SERIES 475**

**HOUSING:** .685 (±.010) x .510 x .610 (±.003) inches high.

**MOUNTING:** Plug-in printed circuit terminals with snap-in mounting ears for panel mount.

**TERMINALS:** Same as Series 400, above.

**PLUNGER:** 0.187 (±0.003) x .158 (±0.003) inches at keycap end. Length, .465 (±.010) inches standard.

## RECOMMENDED CLEANING SOLVENTS:

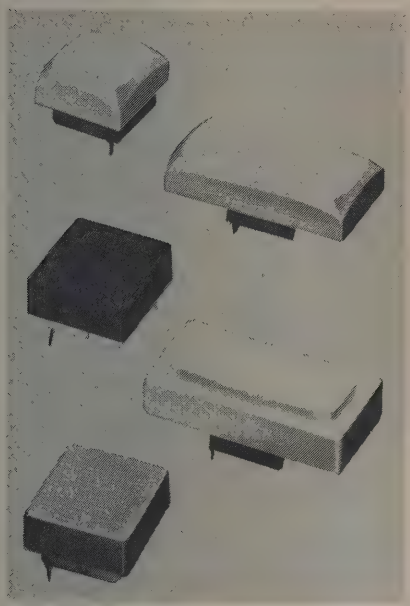
When cleaning PC boards after soldering, we recommend the use of Denatured Alcohol No. 1430, Ethanol (grain alcohol), Methanol (wood alcohol), Isopropyl Alcohol, Liquid Detergent Solution (1% in water), Freon TF, Heptane Petroleum Ether, VM and P Naptha, or White Kerosene. CLEANING SOLVENTS DETRIMENTAL TO POLYCARBONATE (LEXAN) AND MODIFIED PPO (NORYL) — **DO NOT USE:** Acetone, Benzol, Carbon Tetrachloride, Methyl Ethyl Ketone, Methyl Isobutyl Ketone, Toluol, Trichlorethylene, Triclene, or any halogenated or aromatic hydrocarbon.

**IMPORTANT:**
Series 400 and 475 Keyboard Switches should NOT be immersed in the cleaning solution. Such practices will coat the internal surfaces with foreign matter (flux, etc. and also remove lubrication from necessary areas. This can result in "sticky" plunger action, affecting electrical characteristics of the switch.

**Request Form F-1020, Dept. EEM, for additional information.**

# KEYBOARD SWITCHES

## LOW PROFILE KEYBOARD SWITCH SERIES 415



**Low cost, dependable and adaptable,** these low profile keyboard switches are available in a choice of styles and colors in both ⅝"* and ¾" sizes, including two station. Tested to 10,000,000 operations at 100 ma, 5 VDC.

Oak Series 415 Keyboard Switches are used as individual switches allowing unlimited versatility in any keyboard layout for calculators, data entry devices, office equipment, security devices, electronic scales, timers, video games, test equipment and point-of-sale terminals.

* Flat Top Keyboard Switch (with and without LED) available in ⅝" single position only.

Patent 4,016,388 and 3,916,131

### SPECIFICATIONS

**PERFORMANCE DATA**

**Operating Life:** Tested to 10 million operations
**Switching:** SPST N/O
**Travel:** 0.100" (approximate)
**Pre-Travel:** 0.070" (nominal)
**Operating Force:** 114 gm. (+30 gm., −25 gm.)
**Contact Bounce:** 3 milliseconds (max.)
**Contact Material:** W.E. #1 gold alloy inlay
**Contact Resistance:** 100 milliohms (max.)
**Temperature Range:** −20°C to +75°C
**Loads:** 5 V, AC-DC @ 100 mA
**Voltage Breakdown:** 500 VAC

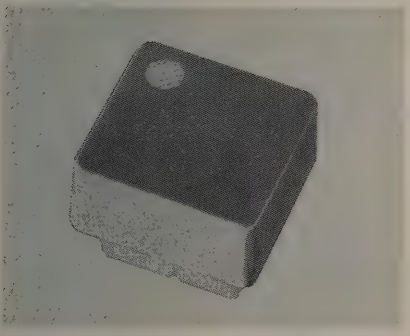
**MATERIALS**

**Base:** High temperature thermoplastic UL 94 HB Rated
**Top:** A.B.S. or similar UL 94 HB Rated
**Note:** Contact factory for additional UL listed materials

**PHYSICAL CHARACTERISTICS**

**Terminals:** 0.125" Long on 0.400 Grid
**Height:** (Includes keytop)
.410" — Flat Top Keyboard Switch with and without LED)
.415" — Standard Keyboard Switch
.467" — Square Raised Keyboard Switch
**Mounting:** Printed circuit board
**Standard Colors:** White, red, gray, blue, black, specials available on request
**Legend:** Hot-stamped
**Note:** Contact your distributor for keytop legends

## SERIES 415 LED FLAT TOP KEYBOARD SWITCHES WITH LIGHT EMITTING DIODE (L.E.D.) INDICATOR



Series 415 LED Keyboard Switches with red LED indicator provides positive visual confirmation of data entry and operation status in data terminal communications, security and educational equipment.

These low profile switches may be combined on a keyboard matrix with other Oak Series 415 switches to provide unlimited keyboard design flexibility.

Low initial cost, tested long life, high reliability, and minimal contact bounce for demanding requirements.

### SPECIFICATIONS

**ABSOLUTE MAXIMUM RATING**

**Power Dissipation @ 25°C Ambient:** 80 mW
**Derate Linearly from 25°C:** 1.0 mW/°C
**Storage and Operating Temperature:** −55°C to 100°C
**Peak Forward Current:** (1 μsec. pulse width, 0.1% duty cycle), 5A
**Lead Solder Time @ 260°C:** 10 seconds
**Continuous Forward Current:** 40 mA
**Reverse Current:** 10 μA

**TYPICAL OPERATING CHARACTERISTICS**

**Forward Voltage:** 1.65 V
**Forward Current:** 20 mA
**Reverse Current @ 3 V:** 5.0 nA
(For additional electro-optical characteristic specifications, see catalog data for Monsanto MV-50.)

**PERFORMANCE AND PHYSICAL CHARACTERISTICS**

Same as 415 Keyboard Switches.

* Red LED's available only

### CHEMICAL RESISTANCE:

The bottom housing is not affected by most chemicals. However, the top housing resists alkalies, mineral acids (except strongly oxidizing acids, such as concentrated nitric and sulfuric), animal, vegetable and mineral oils, alcohols and many organic chemicals.

Cleaning solvents should be selected carefully with designated chemicals in mind. The switch should never be immersed in the cleaning solution or brought too close to detrimental vapors which tend to eliminate lubricity on mechanical guide surfaces.

**For additional information, request Form F-1021 and F-1023.**

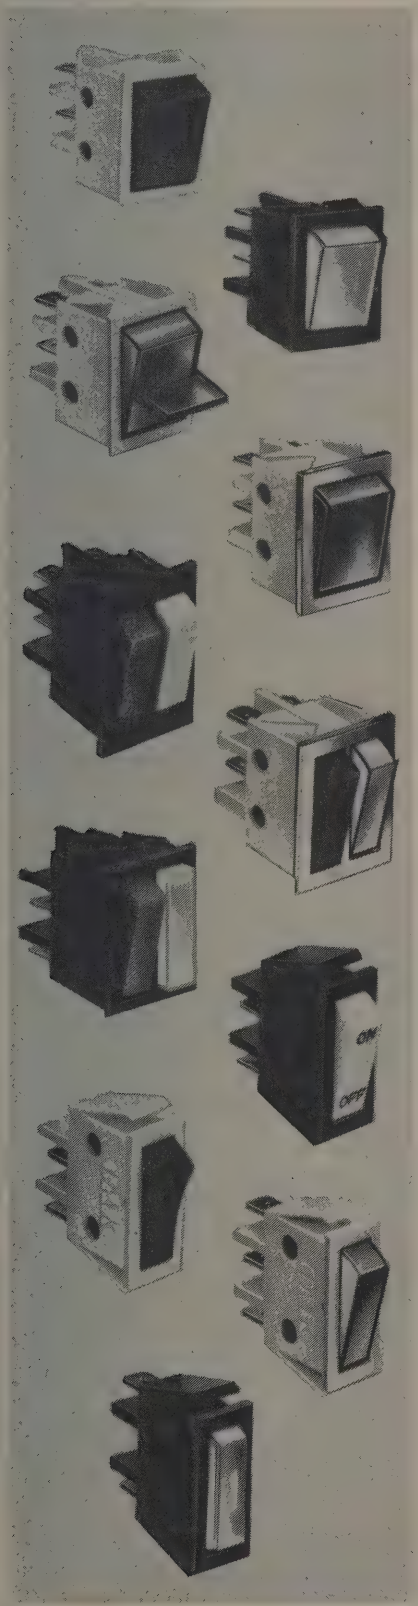
# SNAP-IN ROCKER SWITCHES — LIGHTED AND UNLIGHTED / AND INDICATOR LIGHTS



## VERSATILE, EYE APPEALING, DEPENDABLE, FOR: Appliances / Business Machines / Computers / Test Instruments / Industrial Controls

These attractive Oak switches and indicator lights will enhance the appearance of any equipment. They offer many significant advantages:

- Snap-in design speeds assembly and accommodates a wide range of panel thicknesses.
- UL and CSA listed.
- One piece plastic case, with integral molded barriers between terminals.
- 16 Ampere rating.
- 20mm (1.14 in.) depth, including barriers.
- Optional chrome bezels available.
- Silver Cadmium Oxide and Solid Silver contacts for long life and dependability.
- Substantial savings in assembly costs can be achieved by using the double housing version, with two switches, or one switch and an indicator light in the same housing.

Available through Oak distributors.

### SINGLE HOUSING STYLE (15mm/.59" WIDE)

**STANDARD TYPES**

1. On-off switch (SPST), lighted
2. On/on switch, (SPDT), unlighted
3. On/off switch (SPST), unlighted
4. On/off/on — 3 position (SPDT), unlighted (single housing only)
5. Matching indicator lights.

## HOW TO ORDER

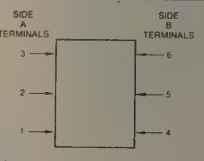
(——) — (—) — (SIDE A —— SIDE B) — (—) — (——)

**Series indicates housing color of switch and/or indicator function.**

| White Housing | Black Housing | |
|---|---|---|
| SINGLE HOUSING, AVAILABLE STYLE #1 ONLY | | |
| 14 | 24 | On/off/on, 3 position, center off unlighted |
| 15 | 25 | On/off,SPST, unlighted |
| 16 | 26 | On/on, SPDT, unlighted |
| 17 | 27 | On/off, SPST, lighted |
| 18 | 28 | Neon indicator light only |
| DOUBLE HOUSING, AVAILABLE STYLE #2 ONLY | | |
| 35 | 45 | One actuator, DPST, lighted |
| 36 | 46 | One actuator, DPST, unlighted |
| 37 | 47 | One actuator, DPDT, lighted |
| 38 | 48 | One actuator, DPDT, unlighted |
| DOUBLE HOUSING, AVAILABLE STYLE #3 ONLY | | |
| 39 | 49 | *One actuator, SPST unlighted, one indicator lighted |
| 40 | 50 | *Two actuators, each SPST, unlighted |
| 41 | 51 | Two lighted indicators only |
| 42 | 52 | Two actuators, one SPST lighted, one SPST unlighted |
| 43 | 53 | Two actuators, one SPST lighted, one SPDT unlighted |

Part numbers and code numbers must be specified in the sequence shown above.

**Actuator or lens color ***
Y = Yellow lens or actuator(s)
W = White actuator(s)
B = Black actuator(s) (unlighted only)
A = Amber lens
R = Red lens — or actuator(s)
C = Clear lens
G = Green lens — or actuator(s)
O = Orange lens — or actuator(s)



*When choosing colors for two actuators or indicators specify side "A" first (see drawing opposite).

**Trim**
T = Bezel added if requested

**Voltage** must be specified on lighted versions only due to the internal series resistor required for the neon lamp.
1 = 120 volts AC (lighted only)
2 = 240 volts AC (lighted only)

**Actuator or lens shape**
F = Flat
P = Paddle, (double housing, single actuator only)

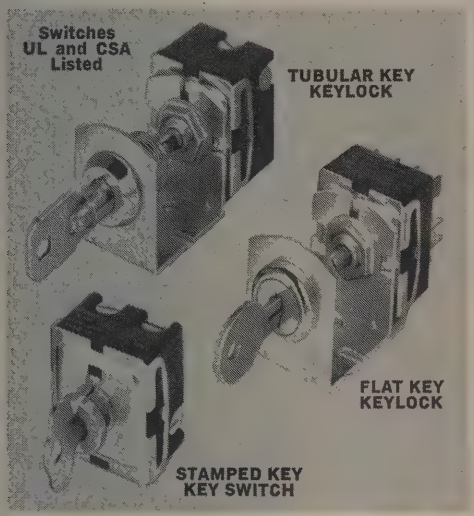
### EXAMPLES:

1. (40)-(T)-(BR)-(F)-(—)
White housing
Double housing, Style #3
Two actuators each, SPST, unlighted
Bezel added
Side "A" — Black
Side "B" — Red
Flat actuator
Unlighted

2. (45)-(—)-(A——)-(F)-(1)
Black housing
Double housing, Style #2
One actuator, DPST, lighted
No bezel
Amber lens (one only)
Flat actuator
120 VAC

NOTE:
On single throw switches, terminals 1 and 2 will be utilized on side "A" and 4 and 5 on side "B".

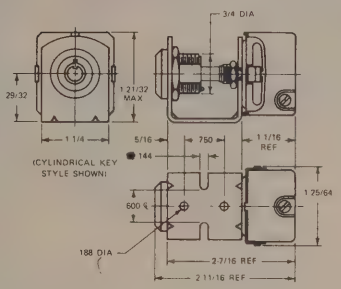
# SECURITY KEYLOCK AND KEY SWITCHES — 90° THROW



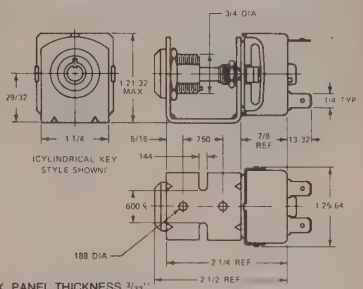
All offer power input ratings of 7½ amps through 38 amps, including motor ratings of ¼ H.P. to 1 H.P., 120 V; 2 H.P., 240 V.

All power switches illustrated offer almost identical capabilities. Models shown on the left and right have screw terminals. Spade terminal is shown in the center.

KEY OPERATED SWITCH — TYPE 240



KEY OPERATED SWITCH — TYPE 390



MAX. PANEL THICKNESS 3/32"
ALL DIMENSIONS ARE ±.015 UNLESS OTHERWISE SPECIFIED
BRACKET AND LOCK ASSEMBLY MUST BE ORDERED SEPARATELY.

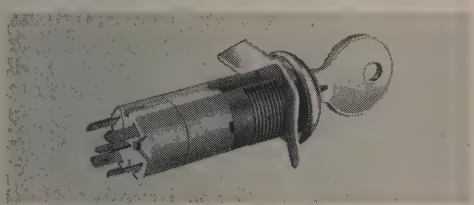
# ANTI-STATIC KEYLOCK SWITCHES — 90° THROW



## SPECIFICATIONS

- Operating voltages from dry circut to 4 amps @ 120 volts AC
- Compact, miniature design — ¾" diameter x 2 1/16" deep — for high density packaging
- Long switching life — up to 10,000 operations
- UL and CSA listed
- Economical design

### Performance Characteristics

**OPERATING LIFE:** Tested to 10,000 operations
**SWITCHING:** Enclosed: SPST, SPDT, SP3T
**THROW:** 90° standard
**OPERATING TORQUE:** 7 to 16 in.-oz.
**TEMPERATURE RANGE:** 0°C to +85°C
**POSITIVE DETENTING STOPS:** Integral with lock mechanism

### Physical Characteristics

**HOUSING:** Zytel 101, Gray
**SWITCH TERMINALS:** Copper alloy, silver-plated
**CONTACT MATERIAL:** Copper alloy
**CONTACT PLATING:** Silver
**BARREL:** Zinc alloy, chromate dipped
**BEZEL:** Polished stainless steel
**KEY:** Brass
**HEX MOUNTING NUT:** Supplied standard

### Electrical Specifications

**ELECTRICAL RATINGS:** 1.0 amp @ 28 volts DC
4.0 amps @ 120 volts AC
2.0 amps @ 240 volts AC
**CONTACT RESISTANCE:** 10 milliohms

### DOUBLE-BREAK B3 SERIES

MIL-S-8805/76

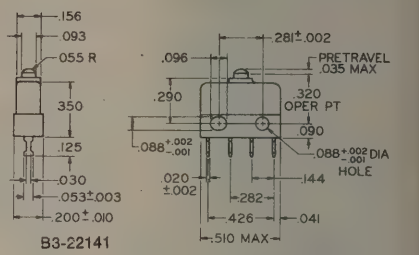
MIL-S-8805/101

**CHARACTERISTICS**

- Contact Resistance: .010Ω max.
- 10 million mechanical cycles.
- 100,000 cycles at full load.
- Operating Force: 5 $^{+3}_{-2}$ oz.
- Release Force: 1.5 oz. min.
- Pretravel: .035″ max.
- Overtravel: .006″ min.
- Move. Diff.: .015 ±.005″.
- Temp. Range: −65°C to +125°C.
- Size: .200″ or .156″ wide x .350″ h. x .510″ lg.

**MIL-S-8805/76 THIN** **B3-22141**

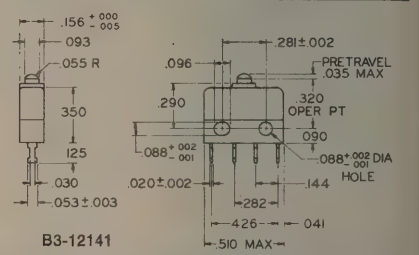
For your run-of-the-"MIL" projects, OTTO's B3-22141 Series is only .200″ thick. Contact resistance less than 10 milliohms, contact pressure higher than normal, minimal contact bounce. Gold flashed contacts, solder terminals in diallyl case. Rated 4A Res. SPDT; 8A. Res., SPDT-DB.



B3-22141

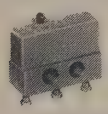
**MIL-S-8805/101 THINNER** **B3-12141**

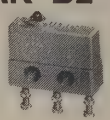
Brand new, OTTO inspired military spec. Only .156″ thin, yet all the rating, life, and reliability of the /76 version. You can get five B3-12141 Series in the space of four B3-22141 with room to spare. Your choice of double-break form X, Y, Z and single break form C. B3-12141 turret terminals, B3-23141 solder terminals. Also commercial versions.



B3-12141

### SINGLE-BREAK B2 SERIES





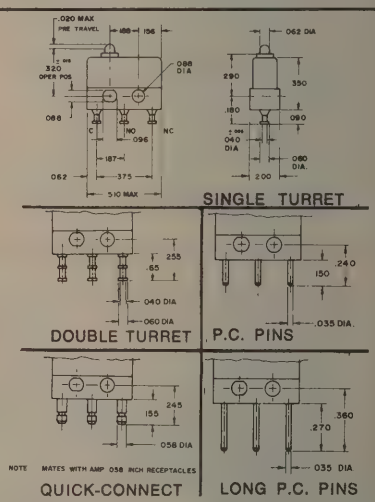
**CHARACTERISTICS**

- Contact Resistance: .025Ω max.
- 5 million mechanical cycles.
- 50,000 cycles at full load.
- Operating Force: 5 oz. max.
- Release Force: 1 oz. min.
- Pretravel: .020″ max.
- Overtravel: .010″ min.
- Move. Diff.: .005″.
- Temp. Range: −55°C to +85°C.
- Rating: 7A res. @ 115/250 VAC, 28 VDC.

While the OTTO B2 conforms to and is qualified to MIL-S-8805/4, the same switch can be specified for commercial use at a cost savings. Whether it be military or commercial, low-level "dry circuit" or high ampacity, large or close differentials, you can specify the exact switch to meet your needs. Case is diallyl. Terminals are gold-flashed brass. Contacts are silver or gold.

**APPROVALS TO MIL-S-8805/4**

| MS P/N | OTTO P/N |
|---|---|
| MS24547-1 | B2-211351 |
| MS24547-2 | B2-211353 |
| MS24547-4 | B2-212351 |
| MS24547-5 | B2-212353 |



## ACTUATORS FOR BASICS

### PUSHBUTTONS

¼″ OR $^{15}/_{32}$″ BUSHING

¼″ or $^{15}/_{32}$″ bushings, red or black button, 1 to 4 poles. Feature B3 basics. Overtravel: .006″ min. Total travel: .036″ Typical.

SEALED

Choice of 3 panel bezels styles, 1 or 2 poles. Feature B3 basics. Operating force: 4 lbs. max. Total travel: .050″ Typical.

### TOGGLES

¼″ or $^{15}/_{32}$″ bushings, 1 to 3 poles, B2 or B3 basics. Momentary and three position.

### LEVERS

**For B3 Basics**

| # Poles | Cat. No. |
|---|---|

# ...MAKE AND BREAK EVERYTIME

## ...that breaks welds and wipes contacts clean

## PUSHBUTTONS* miniature & moistureproof

### TYPE P1 (MIL-S-8805/3)

P1-1 P1-2 P1-3 P1-5 P1-6 P1-7 P1-8

**FEATURES**

- 250,000 mechanical cycles.
- High Contact Pressure: 120 gr.
- Low Contact Resistance: <10 milliohms.
- Repeatable trip point within .001″.
- Rolling sleeve principle seals button.
- Sealed case and terminals.

Pushbutton is sealed by silicone rubber boot operating on a "rolling sleeve" principle to give long life and smooth operation. Case and terminals sealed against environment and solder flux. Load ratings: 10A res., 5A ind., 3A lamp. Contact forms: N.O., N.C., 2-circuit. Red or black button.

### TYPE P3 Commercial Grade

P3-3 P3-6 P3-7 P3-8

Momentary or push-pull double-break action. Same specs as P1 military series. Choice of solder or screw terminals. Designed for use in panel boards, computers, business machines, instruments. Can be used as limit switch.

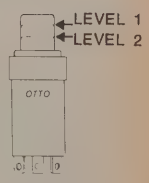
## twostep™ for applications requiring 3 modes of operation

**FEATURES**

- Unique 2-position design.
- Sequential contact action.
- 12 contact arrangements.
- Make-before-break contact option.
- Moistureproof construction.
- 100,000 mechanical cycles.

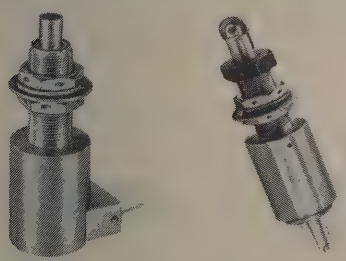
P2-1 P2-3 P2-6

Ideal for "off-high-low," "off-slow-fast," "Stop-fine-course" applications. Each level operates an independent set of SPDT circuits rated to 5A. Twelve contact arrangements are offered to satisfy just about any circuit requirement. Also available as DPDT single detent.



# SPECIAL PURPOSE SWITCHES

## ENVIRONMENT-FREE

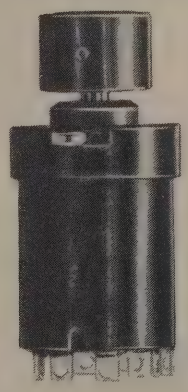


One piece housing, sealed at plunger with ring seals and at base with hermetic header for immersion proof and against corrosive atmospheres. Case grounded for EMI reduction. P6 Series available with roller or in-line plunger.

**CHARACTERISTICS**

- Rating: 7A res. at 28 VDC.
- Actuating Force: 9 lbs. Typ.
- Reset Force: 5 lbs. min.
- Movement Differential: .030″ max.
- Overtravel: .125″ min.
- Mechanical Life: 25,000 cycles.

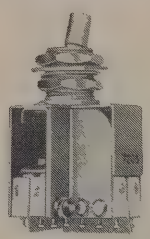
## TOGGLE/ PUSHBUTTON



T2-0001

Combo toggle and pushbutton. It's a 2-position toggle and a pushbutton switch all in one. 30° toggle throw, .135″ total pushbutton travel with 4.5 lbs. operating force. Rated 10A res. and ind.

## TOGGLE



T1-0001

Four position, 6-pole toggle featuring MIL-S-8805/4 basic switches. Positions #1 and #3 are 2PDT maintained action each, position #4 is 2PDT momentary, position #2 is center "off." Rated 7A. res. each pole.

T1-0004

Same except 3-position, 4-pole toggle. Position #1 is 2PDT momentary, position #2 is center "off," position #3 is 2PDT maintained action.

T1-0005

Same as T1-0001 except all four positions are maintained action.

## ELECTRICAL FEATURES

Load rating: 10 amperes 125/250 volts ac.
Contacts: fine silver, double-break, break-before-make
Circuits: single-pole and double-pole
Dielectric strength: 2000 volts ac rms.
Life: 25,000 operations at maximum rating

## MECHANICAL FEATURES

One-piece molded-nylon body has integral, serrated, spring-lock clips.
Bezel molded integral with body.
Metal bezel available.
Molded-in light-dispersing lens.
Interchangeable lens-caps in wide choice of colors.
Positive mechanical indication of switch-contact position.
250,000 mechanical operations.

## TERMINALS

Style A—1/4-inch quick-connect
Style B—3/16-inch quick-connect
Style C—Solder-lug, for #12 wire

## STANDARD LAMPS

Integral with switch;
Internally connected per diagrams above.
6, 12, and 28 volt incandescent lamps standard.
125 and 250 volt neon lamps standard.

## SPECIAL ORDER LAMPS

125 volt incandescent lamp available.
125 and 250 volt Blue or Green neon lamps available. Consult factory for price and delivery information.

## COLOR DESIGNATIONS

**Body and integral bezel**
White—C7, Grey—C8, Black—C9,

**Transparent lens-cap**
Red—1, Clear—2, Amber—3, Green—4, Blue—5

**Opaque pushbutton-cap**
White—7, Grey—8, Black—9, Blue—10, Green—11, Red—12

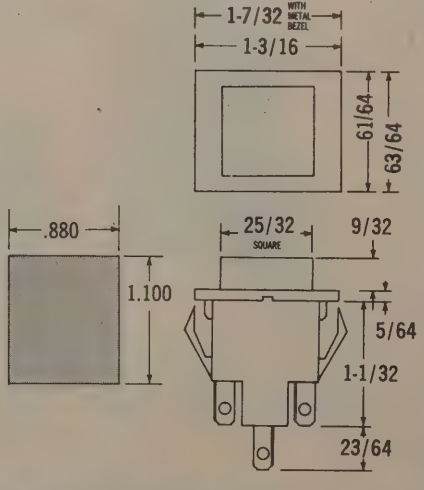
# TYPE DG – Lighted Indicators

Type DG Lighted Indicators are identical in size and mounting with Type DL and DP switches and can be grouped easily with them without need for special mounting provision. A choice of different lens-cap heights is available.

**TYPE DGS** the low-profile indicator extends the same distance from the panel as the Type DL or DP switch in its ON position (1/16 inch).

**TYPE DGT** the high-profile indicator extends the same distance from the panel as the Type DL or DP switch in its OFF position (9/32 inch).

## OUTLINE DIMENSIONS (inches)



## METAL BEZELS (optional)

Gold-color—F1, Chrome—F2

## MARKINGS

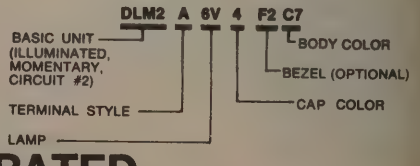
Letters, numbers, and symbols can be applied to lens-caps.

## MOUNTING

Snap-in mounting in rectangular hole; fits any panel-thickness 1/32 to 3/16 inch.

## ORDERING EXAMPLE

Develop catalog-number of unit by adding to the basic Type Number, shown above, the applicable code-letters or numbers in the sequence shown below.



OSLO CONTROLS INCORPORATED

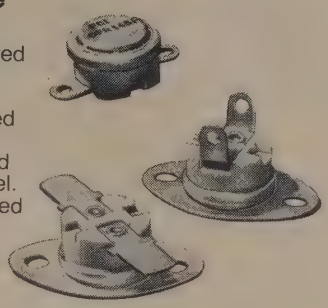
# SNAP-ACTION THERMOSTATS

## SERIES 5002—Miniature High Temp Thermostat

Miniature, rugged switch suited for high temperature applications; plattens, steam equipment, electrically heated press heads, etc. Available in ceramic base only with closed caps of brass or stainless steel. Cap construction can be sealed with resin for additional protection.



| Series Part No. | Type | Contacts Amps | Volts | Operating Temp. Range |
|---|---|---|---|---|
| 5002 | SPST Single Break | 3<br>1.5 | 120V ac<br>240V ac | −20°F to +575°F |

Ask for Reference Sheet 5002

## SERIES 5003—Close Control Thermostat

Extremely thin, lightweight, water type thermal switch. Overall depth .250". Provides fast, positive response and good shock and vibration resistance. NC or NO contacts. Excellent repeat reliability. Factory calibrated.

| Series Part No. | Type | Contacts Amps | Volts | Operating Temp. Range |
|---|---|---|---|---|
| 5003 | SPST Single Break | 5 | 120V ac | +300°F to +575°F |

Ask for Reference Sheet 5003

## SERIES 5004—240V AC Surface Thermostat

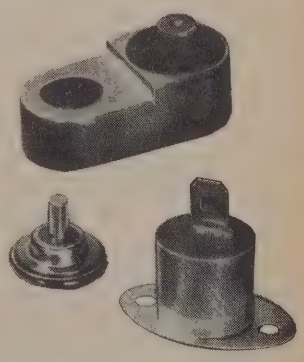
Designed with 4 mm clearance and for operation at 240V ac. Applications include industrial, electronic and electrical equipment such as business machines, radar, computer peripherals, heater blanket controls and heat sink protection. Excellent shock and vibration resistance. Rapid thermal response due to low mass. Factory calibrated. U/L recognized.

| Series Part No. | Type | Contacts Amps | Volts | Operating Temp. Range |
|---|---|---|---|---|
| 5004 | SPST Single Break | 7 | 240V ac | −20°F to +350°F |

Ask for Reference Sheet 5004

## SERIES 5011—Hermetically Sealed Surface Thermostat

Low cost, designed to meet exacting requirements of shock and vibration applications. For use where temperature control, warning or protection is required. Fast response. Factory calibrated and 100% inspected. Available with a variety of adapter packages (plug, bolt or isolated base mounting) to suit specific applications.

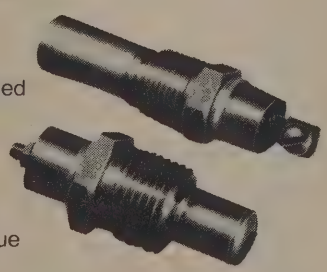


| Series Part No. | Type | Contacts Amps | Volts | Operating Temp. Range |
|---|---|---|---|---|
| 5011 | SPST Single Break | 3 | 120V ac<br>32V dc | −20°F to +575°F |

Ask for Reference Sheet 5011

## SERIES 5020—Immersion Thermostst

A snap-acting hemetically sealed temperature control designed for use where a sealed unit and high vibration resistance are required. Applications include water-cooled engines and engine generator sets. Temperature sensing element confined to very tip, assuring rapid and true response to liquid or air temperature.



| Series Part No. | Type | Contacts Amps | Volts | Operating Temp. Range |
|---|---|---|---|---|
| 5020 | SPST Single Break | 3 | 32V dc | −20°F to +525°F |

Ask for Reference Sheet 5020

## SERIES 5100—Immersion Thermostat

Especially designed for use where a sealed unit and high vibration resistance are required. Applications include water-cooled engines, hydraulic systems, degreasers, industrial air compressors and tanks where liquids are heated as in commerical dryers and sterilizing equipment. Designed for rapid response to liquid or air temperature. Approved for vibration per MIL-E-5272 proc. XII 10G.

| Series Part No. | Type | Contacts Amps | Volts | Operating Temp. Range |
|---|---|---|---|---|
| 5100 | SPST Single Break | 3<br>1.5 | 120V ac<br>240V ac | −20°F to +575°F |

### TOUCH SWITCH FEATURES

- Extremely fast turn-on and turn-off.
- Very low transient noise.
- Exceptionally rugged construction for long life and ease of handling during assembly.
- Economical design. Simple to mount.
- Clean, contemporary graphics to accent highly functional packaging.
- Unique ability to handle inductive loads as well as dry circuits or low level applications with ease.
- Optional legendizing.

ROCKER SPDT

LEVER SPDT

## SNAP-IN ROCKER/LEVER SERIES R, SERIES LE

The Series R and Series LE rocker and lever switches are high quality with actuators styled to complement modern panel design. Both series snap-in front panel mounting. Bezel and actuator colors can be color coordinated. A black bezel and black actuator is supplied, unless otherwise specified. Spring steel springs hold the switches firmly in place. Rated at 5 Amperes with resistive load at 120 VAC or 28 VDC; 2 Amperes with resistive load at 250 VAC: both SPDT and DPDT versions are available. Solder-lug terminal.

### SPECIFICATIONS

**Contact Rating:** 5 Amperes with resistive load at 120 VAC or 28 VAC; 2 Amperes with resistive load at 250 VAC.
**Electrical Life:** 100,000 make and break cycles at full load on all models.
**Contact Resistance:** 10 milliohms maximum initial at 2 to 4 VDC, 100 milliamps for both coin silver and gold plated contacts.
**Insulation Resistance:** 1000 megohms minimum.
**Dielectric Strength:** 1000 Volts RMS at sea level.

### MATERIALS

**Case:** Black phenolic resin.
**Rockers and Lever Handles:** Nylon.
**Mounting Bracket:** Stainless steel.
**End Contact:** Coin silver, silver plated.
**End Terminal:** Brass, silver plated.
**Center Contact and Terminal:** Brass or zinc, silver plated.
**Snap-in Springs:** Spring steel, nickel plated.
**Bezel:** Nylon.

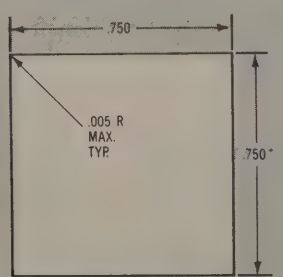
## MOUNTING CUTOUT



## LIGHTED ROCKER SNAP-IN MOUNT—SERIES LR

This high quality lighted rocker switch snaps into front of panel. The bezel/lens combination suits them for attractive modern panel styling. A choice of bezel and lens colors is available (Table 1). A black bezel with a white lens is provided, unless otherwise specified. SPDT and DPDT models available. Solder-lug terminals. Bulb is not supplied. (Use bulb sizes T 1½ and T 1¾). Separate lamp circuit for added flexibility. Rated at 5 Amperes with resistive load at 120 VAC or 28 VDC; 2 Amperes at 250 VAC. Actuator/lens is removable from front for easy bulb replacement.

## SPECIFICATIONS

**Contact Rating:** 5 Amperes with resistive load at 120 VAC or 28 VDC. 2 Amperes with resistive load at 250 VAC.
**Electrical Life:** 100,000 make and break cycles at full load.
**Contact Resistance:** 5 milliohms maximum initial at 2 to 4 VDC, 100 milliamps for both coin silver and gold plated contacts.
**Insulation Resistance:** 20,000 megohms minimum.
**Dielectric Strength:** 1000 Volts RMS at sea level.

## MATERIALS

**Case:** Melamine.
**Housing:** Stainless steel.
**Bezel:** Nylon.
**Lens:** Lexan (R).
**Snap-in Springs:** Spring steel, nickel plated.
**End Contacts:** Coin silver, silver plated.
**End Terminals:** Brass, silver plated.
**Center Contact and Terminals:** Brass, silver plated.
**Lamps Socket Terminals:** Brass, electro-tin plated.

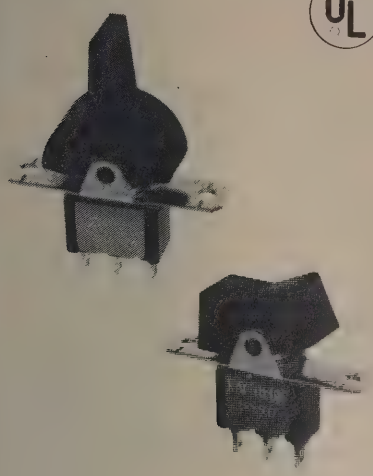
# ROCKER AND LEVER SWITCHES



## REAR-PANEL MOUNTED ROCKER AND LEVER

Ruggedly constructed, these compact switches can handle 5 Amperes at 120 VAC. Both rocker and lever models are available. Designed to mount behind a front panel, standoff hardware is provided. Terminals are solder-lug. SPDT, DPDT, 3PDT, and 4PDT sizes are available in both styles. Actuator color is black, unless otherwise specified. See Table 1 for color choices.

### SPECIFICATIONS

**Contact Rating:** 5 Amperes with resistive load at 120 VAC or 28 VDC; 2 Amperes with resistive load at 250 VAC.
**Electrical Life:** 100,000 make and break cycles at full load on all models. All momentary models—40,000 cycles.
**Contact Resistance:** 10 millohms maximum initial at 2 to 4 VDC.
**Insulation Resistance:** 1000 megohms minimum
**Dielectric Strength:** 1000 Volts RMS at sea level.

### MATERIALS

**Case:** Black phenolic resin.
**Rockers and Lever Handles:** Nylon.
**Housing:** Stainless steel.
**Mounting Bracket:** Stainless steel.
**End Contact:** Coin silver, silver plated.
**End Terminal:** Brass, silver plated.
**Center Contact and Terminal:** Brass or zinc, silver plated.
**Hardware Supplied:** Two screws, two lockwashers, two nuts, and two standoffs for 1/8 inch panels.

# TOGGLE SWITCHES

## MINIATURE TOGGLE SWITCHES

Quality ultra-small toggle switches combining high current capacity and long life in a miniature package. The small case size makes them ideally suited for miniaturized equipment where front, and rear of panel space is limited. There are two mounting styles: bushing mounted, and right angle PC mounted. All standard terminals have coin silver contacts and terminals. PC, right angle PC, and wire-wrap terminals have gold contacts and terminals.
Most models UL listed. File E53864.

### SPECIFICATIONS—ELECTRICAL

**Current Rating:** Coin silver contacts 5 Amperes resistive load at 120 VAC or 28 VDC, or 2 Amperes at 250 VAC. Brass contacts with gold over nickel plate 0.4 Volt-Amperes at 20 Volts maximum (AC or DC).
**Contact Resistance:** 10 milliohms maximum initial at 2 to 4 VDC, 100 milliamps for both silver and gold-plated contacts.
**Insulating Resistance:** Over 1000 megohms between terminals and case ground at 500 VDC.
**Dielectric Strength:** 1000 VAC between terminals and case ground for a duration of 1 minute.
**Electrical Life:** 100,000 (40,000 on momentary types) on-off, switching actions at rated current.

### SPECIFICATIONS—MATERIAL

**Case:** Black phenolic resin.
**Toggle:** Brass, chrome plated.
**Bushing:** Brass, nickel plated.
**Housing:** Stainless steel.

### SPECIFICATIONS—CONTACTS

**STANDARD TERMINALS AND CONTACTS:**
**End Terminals:** Contact surface—coin silver; Body—coin silver or brass, silver plated.
**Center Terminal:** Contact surface—brass or zinc, silver plated; Body—brass or zinc silver plated.
**PC TERMINALS:**
**End Terminals:** Contact surface—brass with 50 millionths minimum gold plate, over 200 millionths nominal nickel plate; Body—brass with 50 millionths minimum gold plate, over 200 millionths nominal nickel plate.
**Center Terminal:** Contact surface—brass or zinc with 50 millionths minimum gold plate, over 200 millionths nominal nickel plate; Body—single pole model. Brass with gold plate over nickel plate. Two, three and four pole models-brass, silver plated, or zinc, gold plated.
**WIRE-WRAP AND RIGHT ANGLE PC TYPES:**
**End Terminals:** Contact surface—brass with 50 millionths minimum gold plate, over 200 millionths nominal nickel plate; Body—brass with 50 millionths minimum gold plate, over 200 millionths nominal nickel plate.
**Center Terminal:** Contact surface—brass with 50 millionths minimum gold plate, over 200 millionths nominal nickel plate; Body—brass with 50 millionths minimum gold plate, over 200 millionths nominal nickel plate.

### HARDWARE SUPPLIED

**Flatted toggle:** one N-3 dress nut, one N-2 hex nut, one standard locking ring;
**Right angle toggle:** none (has non-threaded bushing);
**All other toggles:** two N-2 hex nuts, one standard locking ring.

## BUSHING MOUNTED

Four toggle styles are available: standard length bat, long bat, long plastic bat, and flatted toggle. The flatted style is supplied with a special dress mounting nut (N-3). Solder lug, PC pin, or wire-wrap (R) terminals are available on some styles. Not all combinations of switch size, toggle style, and terminals are available. See chart on page 5.

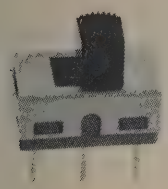
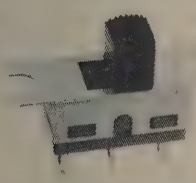
# SLIDE SWITCHES, SNAP ACTION



PC MOUNT



PANEL MOUNT

## PANEL AND PC MOUNT—SERIES S1

These subminiature slide switches have the same toggle-action mechanism as used in the Raytheon toggle switches. A spring-loaded teflon actuator operates the mechanism. The standard version can handle 6 Amperes resistive at 120 VAC or 20 VDC (3 Amperes at 250 VAC). A low energy version Model S1A2M2 has gold plated contacts for levels as low as 0.4 Volt-Amperes at 20 Volts maximum (AC or DC). Panel mounting or PC board mount models are available. A black slide handle is provided, unless otherwise specified on special order; see Table 1. Terminals on panel mount style are solder-lug.

## SPECIFICATIONS

**Contact Rating—Standard Version:** 6 Amperes with resistive load at 120 VAC or 28 VDC; 3 Amperes at 250 VAC.
**Contact Rating—Low Energy Version:** 0.4 Volt-Amperes at 20 Volts maximum; AC or DC.
**Contact Resistance:** 10 milliohms maximum initially.
**Electrical Life:** 40,000 actuations at full load.
**Mechanical Life:** 250,000 actuations (low energy).
**Insulation Resistance:** 100,000 megohms minimum.
**Dielectric Strength:** 1000 Volts RMS at sea level.
**Actuation Force:** 150 to 350 grams initially.

## MATERIALS

**Case:** Melamine.
**Housing:** Stainless steel.
**Slide Handle:** Nylon.
**End Contact—Standard Version:** Coin silver, silver plated.
**End Contact—Low Energy Version:** Brass with 50 millionths minimum gold plate over 200 millionths nominal nickel plate.
**End Terminal:** Brass, silver plated.
**Center Contact and Terminal—Standard Version:** Brass, silver plated.
**Center Contact and Terminal—Low Energy Version:** Brass with 50 millionths minimum gold plate over 200 millionths nominal nickel plate.

## BUSHING MOUNTED SNAP-ACTION—SERIES P

These momentary snap-action switches are especially recommended for low energy circuits because of their gold-on-brass contacts. The solder-lug terminals are epoxy sealed. Two sizes of snap-on nylon caps are available in a choice of colors. The switches can be wired for either normally open or normally closed operation. SPDT and DPDT.

### ORDERING INFORMATION

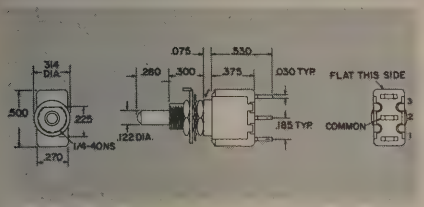
# PUSH BUTTON SWITCHES



## BUSHING MOUNTED 6 AMP, SERIES 6P

These snap action bushing mounted switches have a 6 Amp rating at 120 Vac. Standard solder lug terminals. Two versions available: momentary, and alternate action.

### ORDERING INFORMATION

| Model No. | Contacts | Description | Caps* |
|---|---|---|---|
| 6P1K1 | SPDT | Alternate Action | C7, C8 |
| 6P1F1 | SPDT | Momentary | C7, C8 |

*There is a choice of colors available in either style. See Table I page 8. Specify color and style.

### SPECIFICATIONS

**Contact Rating:** 6 amps with resistive load @ 120 VAC or 28 VDC; 3 amps with resistive load @ 250 VAC.
**Contact Resistance:** 20 milliohms max. initial @ 2-4 VDC, 100 milliamps for both coin silver & gold plated contacts.
**Insulation Resistance:** 1,000 megohms min.
**Dielectric Strength:** 1,000 volts RMS @ sea level
**Electrical Life:** 100,000 operations at full load
**Operating Force:** 2.5 pounds

### MATERIALS

**Case:** Melamine
**Bushing:** Brass, nickel plated
**Housing:** Stainless steel
**Plunger:** Nylon
**End Contact:** Coin silver, silver plated
**End Terminal:** Brass, silver plated
**Center Contact & Terminal:** Brass, silver plated
**Hardware:** Nut—Brass, nickel plated
Locking Ring—Brass, bright nickel plated
Lockwasher—C.R.S., bright nickel plated

## SNAP-IN ALTERNATE ACTION 6 AMPERE—SERIES 6P

This miniature snap-in pushbutton has a pushbutton cap less than ½ inch square. Yet the switch can carry a big load—6 Amperes at 120 VAC. An attractive front panel bezel can be color coordinated with the cap, both being available in a choice of colors. The alternate action, push on-off feature, is an added plus in a switch of such a small size. SPDT configuration only. Standard solder-lug terminals. Switch is held firmly in place in panel by spring steel clips. Front panel mounted.

### TABLE 1

## SNAP-IN SNAP-ACTION SERIES P-J81

These snap-action pushbutton switches mount from the front of the panel, snapping into place and held by nickel plated spring steel clips. The pushbutton cap is less than ½ inch square. Both cap and bezel can be color coordinated by selecting from the available colors; see Table 1. A white cap with a black bezel is supplied, unless otherwise specified. Terminals are solder-lug and are epoxy sealed. Both bezel and cap are nylon. The switches can be wired for either normally open or normally closed operation. SPDT and DPDT.

### ONLY RCL OFFERS THESE EXCLUSIVE FEATURES:

- An exceptionally sturdy miniature switch with adjustable stops, as standard, designed for insertion into printed circuit boards. Engineered to withstand unusual stress and strains.
- Provides the ultimate in reliability as all point-to-point soldering is completely eliminated.
- Behind panel stickout is .687" (17.46mm) for 1 deck and .300" (7.62mm) for each additional deck.
- Eliminates all point to point wiring-labor costs.
- Sells at lower cost than old-fashioned open deck wafer switches.
- Up to 12 active positions per deck — shorting or non-shorting, with 30° spacing.
- On any one deck of a multi-pole switch a variety of combinations of shorting (MBB) and non-shorting (BBM) actions may be obtained. For example, a six pole switch may be ordered with 4 poles — shorting action, and 2 poles, non-shorting action.

### GENERAL FEATURES:

- Adjustable stops offer maximum versatility at no extra charge. (Fixed stops optional at no extra charge.)
- Up to 12 positions per pole (30° Spacing) and as many as 6 poles per deck are available.
- Shorting and non-shorting poles may be grouped on one deck in any combination. Shorting and non-shorting positions on any one pole are also available.
- Switching elements are completely enclosed.
- Contact and lug assembly is integrally molded and completely enclosed. This eliminates the possibility of movement of contacts and terminals, and prevents flux flowing onto the contact surface during soldering or cleaning operations.
- Industry standard spacing on terminals.
- Shaft and panel seals available on fixed stop versions.

### ELECTRICAL FEATURES:

- **Initial contact resistance** — .015 max.
- **Current breaking capacities:**
  250 MA — 115 VAC resistive
  250 MA — 28 VDC resistive
  125 MA — 28 VDC inductive
- **Dielectric strength (voltage breakdown)** —
  a. Between any two adjacent positions — 1000 V-RMS (60 cycles)
  b. Between any active position to ground — 1000 V-RMS (60 cycles)
- **BCD Coding Available**
- **Current Carrying Capacity** — 5.3 amps
- **Insulation Resistance** (measured at 25°C, 50%RH) — 10⁹ megohms
- **Capacitance** — Between adjacent active contacts — .2 pF max. Between contact and common terminal — .2 pF max.

### UP TO 12 DECKS ARE AVAILABLE

### MECHANICAL FEATURES:

- Life expectancy — in excess of 25,000 mechanical operations. (NOTE: The actual life is determined by a number of variable factors. These include: electrical loading, environment, rate of rotation, maximum contact resistance, minimum insulation resistance, and the minimum voltage breakdown which is required at the end of the life.)
- Detent — stainless steel ball-type snaps positively from position to position. The detent housing is made of special high strength plastic, providing positive action and minimal wear. Commercial series, "Zamac" (Zinc) detent housing.
- Stop strength — Designed to withstand 10 pound-inches of torque.
- "Molded-in" terminals result in exceptionally high contact stability, completely eliminating movement.
- Terminal locations clearly marked on rear cover plate.
- Materials and Finishes:
  **Rotor** — Lexan
  **Rotor Blade** — Beryllium copper (heavy silver plated) Gold plating available — consult factory
  **Detent Housing** — High Grade Die Cast
  **Shaft** — Stainless steel
  **Stators** — Glass filled polyester
  **Contacts** — Brass (silver & gold plate) heavy gold plating available, contact factory.

# RCL Electronics

# *series "V" switch*

**AVAILABLE IN 12, 10, 8 OR 6 POSITIONS! (30°, 36°, 45° AND 60° SPACING)**

**WITH TRUE ½" DIAMETER AND .355" LENGTH!**

A totally integrated series of switches where all common angles of rotation are available in a single subminiature size (½" True Diameter x .355 length).

Overall length including terminals (total depth-behind-panel) has been significantly reduce to less than ½" (.355)!

**SPECIFICATIONS:**

**Contact Resistance:** 10 milliohms maximum initial.

**Insulation Resistance:** 50,000 megohms initial; 10,000 megohms minimum between mutually insulated parts.

**Voltage Breakdown:** 600 VAC minimum between mutually insulated parts.

**Electrical Rating:** Will make and break 50 milliamperes: 115 VAC for 25,000 cycles or 200 milliamperes: 115 VAC for 10,000 cycles.

**Poles:** Available in 1 and/or 2 poles.

**Spacing Between Positions:** Available with 30°, 36°, 45°, 60° Spacing.

**Deck and Terminal Arrangement:** Available only in one deck with terminals projecting from rear of switch.

**Shaft Length, Flat and Orientation:** Available in accordance with individual requirements.

**Materials and Finishes:** In accordance with applicable MIL specs.

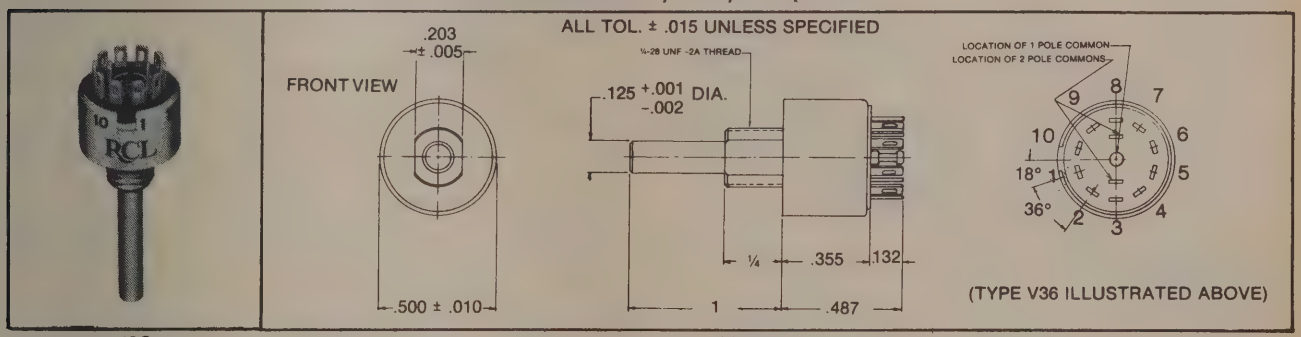
**Contacts: Common Terminals, Wipers:** Metal alloys with characteristics consistent with performance requirements.

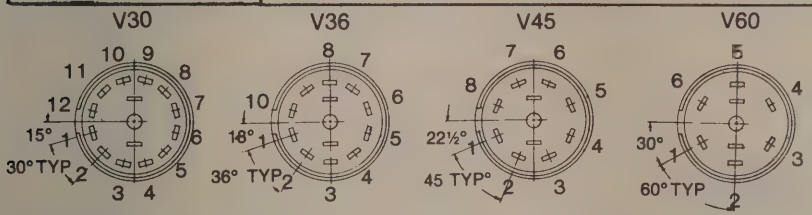
**Environmental Requirements:** Meets or exceeds MIL-S-3786.

**Explosion Proof:** Per paragraph 4.8.12 of MIL-S-3786.

**MEETS ALL REQUIREMENTS OF MIL-S-3786/20 & 35**

**RCL SERIES V30, V36, V45, V60**





**SHORTING — 1 POLE**
